## Give your workspace an identity.

We want you to do what you do best — your work. We don't want you distracted by being uncomfortable or unable to find things at your desk. Your workspace should respond to your needs. You shouldn't have to adjust to your work environment, it should adjust to you.

This is what KnollExtra is all about — providing integral tools to make your work life easier. Our products help organize your space, facilitate communication and manage the technology you use everyday.
