

Twist Barstool
AMAT- 3

TWIST BARSTOOL Designed in-house by Spanish manufacturer AMAT-3, Twist is a simple, elegant barstool consisting of a polished anodized aluminum frame and seat, with a durable footrest of polished cast aluminum. An extremely versatile design, Twist is offered in both counter and bar heights and suits all types of residential interiors. It also provides an ideal solution for contract and commercial interiors, particularly cafeterias, break-out areas and other types of hospitality spaces. Twist provides a perfect complement for the Toledo chairs and bar-height tables; like them, it can be used both indoors and out. Made of recyclable materials, it is truly an environmentally friendly design.

AMAT-3 The celebrated Spanish manufacturer AMAT-3 adheres to a philosophy of designing products that are elegant and functional. The creators of the Toledo chair and Jamaica barstools, AMAT-3 developed the Twist barstool with its in-house technical team of designers and engineers.
