

Morrison

Knoll

Powerful Simplicity

Morrison delivers efficiency and comfort, creating work environments that adapt and grow. Consistent logic and versatility ensure that Morrison product enhancements build on existing components — leveraging the value of your investment.

Modern Geometry

A horizon of 48"-high Morrison panels offers powerful spatial simplicity. Panels in Metaphor, Iron and Optical White with trim in Silver paint; worksurfaces in Medium Brown Mahogany Techgrain™; Morrison and Calibre® lateral files; Morrison mobile pedestals and upmounted flat-front Reuter overhead storage in Silver paint.

Definitive Design. Enduring Value.

For organizations seeking a definitive architectural vocabulary and an office system with proven performance, Morrison defines the workplace with a contemporary, unified aesthetic.

Unified Design and Functional Elegance

Morrison unites planning intelligence and refined design to create well-integrated, high-performance workplaces. Morrison flexibility recognizes the differences among work styles, creating virtually any type of workspace from a simple vocabulary of universal components.

The ultimate system for the entire facility, Morrison is both an advanced panel-based system for open plan workstations and a freestanding desk system for private offices and team workspaces.

Refined, Clean Surfaces

64"-high Morrison panels in Reflect, Titanium panel fabric; worksurfaces in Snow laminate; Reuter overheads in custom Red; and storage towers and painted components in Medium Metallic Tan create a pleasing composition of rectilinear lines and sculptural forms. Life™ chair in Grain BSF with Spinneybeck® Volo, Black leather back and seat topper; CHIP™ side chairs; Interaction™ table; Visor® chair; and mobile pedestal with cushion in Suburban, Red. Desk supports and screens, lower right, replace panels in freestanding applications.

Collaboration and Comfort

Morrison defines the interior landscape with a crisp, clean palette of fabrics, veneers and painted finishes.

Each Morrison component is carefully detailed for a wide range of applications, ideally suited for a graceful transition from open plan workstations to private offices to collaborative areas.

Workspace Composition

A low horizon of 42"-high panels, organic-shaped worksurfaces, Act II keyboard supports, Compact Copeland Lights in black and Calibre mobile pedestals with cushion in Century, Fudge, right, create efficient and ergonomic 120° workstations. Calibre 3/10/10 files and tower, left, in Soft Grey, maximize storage efficiency.

120° Planning Intelligence

Morrison 42"-high panels in Relay, Raven with Jet Black trim, worksurfaces in Bright White laminate; Calibre pedestals Soft Grey define the 120° workplace. Essentials Tech Work Chair in Black back with Empire Stripe, Waldorf seat cover upholstery; Essentials Tech side chair in Black with Ultrasuede®, Sky seat cover upholstery; Compact Copeland Light in black; D'Urso table.

Freestanding Logic

Morrison Network is a freestanding, powered desk system that creates private office, open-plan and dynamic teamwork areas.

Morrison Network is engineered to embrace change, with universal work-surface and storage components, including Reuter overheads, that can be used interchangeably with panels and freestanding furniture.

Powerful Integration

A horizon of 49"-high Morrison Network screens in Hard Rock, Patina with worksurfaces and storage in Folkstone Grey form freestanding work areas. Morrison Network stanchions, right, support Reuter overheads and offer power and data integration. Chadwick chair in Green; Propeller table in Natural Cherry laminate; Standard Copeland Light in silver; Bertoia side chair with seat pads in Vibe, Envy.

Unmatched Technology Support

Morrison integrates with the Currents® service wall for unmatched cable capacity and ease of access, offering unlimited lay-in cable distribution anywhere on the face of the wall structure. Morrison panels and components connect to the service wall at any point, on- or off-module; cables are instantly accessible behind removable covers.

A Perfect Fit

48"-high Currents® service wall and Morrison panels in Progression Striae, Daylight with trim and storage components in White paint; worksurfaces in Light Grey laminate. Adjustable Upstart® screen, above left, creates a more open environment. Soho chairs in Una, Steel.

Power Access and Data Capabilities

Above or below the worksurface, Morrison meets your essential power and data requirements.

Knoll pioneered **2+2**, the office system raceway with the right balance of convenience that offers four 20-amp circuits of protected power for computer intensive offices.

Now Morrison offers two powerful alternatives to 2+2:

3+3 delivers six circuits from a single power supply: three convenience circuits and three separate, protected circuits — enough power for 60 or more duplex outlets.

4•4•2 is a four-circuit, 10 -wire system for special applications requiring an independent neutral for each circuit.

Ported Panel

When you need worksurface-height access to power and data, the Morrison ported panel, top, provides a simple solution.

Distribution Requirements

In addition to the standard base raceway, which maintains the safety and integrity of data, the vertical raceway, bottom left, enables you to position power and data ports above and below the worksurface.

The Morrison desktop power monument, bottom right, provides yet another choice for creating above-the-worksurface power and data solutions. A simple, add-on monument, or a structural stanchion capable of supporting overheads, it mounts in panel stations, as well as accommodates fully freestanding Morrison Network™ desks.

Morrison and Sustainable Design

Design continuity and a proven track record have made Morrison the choice of companies and organizations that value sustainability.

Commitment

The Morrison system is manufactured using clean technologies, including water-based and virtually VOC-free adhesives, and powder coating on metal and wood substrates. Worksurfaces are 93 percent recycled content particle board and panels contain 15–25 percent recycled steel and are available with numerous 100 percent recycled-content fabrics.

Innovation

Morrison established a standard of design continuity by which new product enhancements integrate with existing furniture, and components are easily refurbished for a second life. The Knoll East Greenville, PA, plant pioneered the reduced VOC technology of powder coating on wood and earned the LEED® Gold certification for Existing Buildings for its Lubin building.

Partnership

Knoll partners with third-party certification organizations that measure our sustainability practices. GREENGUARD™-certified for indoor and outdoor air quality, and available with 100 percent recycled-content fabrics and FSC-certified materials, Morrison meets or exceeds the standards set by the U.S. Green Building Council and can contribute to LEED® certification for Existing Buildings, Commercial Interiors and New Construction.

1. Morrison metal storage components are always powder coated and fronts are available in powder on wood finishes. Powder coating is 99 percent VOC-free and has a resin usage rate of up to 95 percent.
2. Morrison workstation panel frames are made from 15–25 percent recycled steel and are available in numerous 100 percent recycled-content fabrics from KnollTextiles using an upholstery process where no adhesives are necessary.
3. Morrison laminate worksurfaces are manufactured with greater than 40 percent recycled materials. Worksurfaces are made from 100 percent recycled particle board. Adhesives used to bond surface materials to worksurface cores are water-based and 99 percent VOC-free. Morrison Techgrain™ veneers are based on a reconstituted veneer made from wood grown in well-managed forests, providing substantially greater yield than natural wood veneers. Techgrain worksurfaces are finished with a UV-cured coating which is virtually VOC-free.

Morrison

Definitive Design. Enduring Value. When your office calls for architectural elegance, from private offices to collaborative areas, and from conference room to reception desk, Morrison is the definitive panel system for your entire facility.

Privacy and Access Panels, doors and windows create various levels of privacy within an open plan. An integrated raceway distributes power and data with options for desk-height access.

Morrison Network This freestanding, powered desk system provides private office, open-plan and dynamic teamwork areas. Desks connect seamlessly to panels, forming groups, separate departments or corridors.

A Perfect Fit Morrison integrates with the Currents® service wall for unmatched cable capacity and ease of access. Morrison panels connect to the spine at any point to enclose tables, desks or existing Morrison workstations.
