

Cleaning Disinfectants Suitable for Use on Knoll Products

Hospitals and other healthcare organizations require furniture, storage and casegoods that are functional, durable and easy to clean with the disinfectants typically used in healthcare facilities.

Knoll has completed testing on its open plan, private office, storage and seating products, and found that the following products will not cause harm to the function or finishes of our products:

- **Envirox® H₂Orange₂ Concentrate 117**
- **Virox™ Accelerated™ Hydrogen Peroxide 5**
- **Envirox® MultiPurpose Cleaner*** (Formerly Evolve02)

These products have been tested on all standard Knoll Office veneers, laminates, paints, glass, aluminum, and plated finishes. While Knoll cannot guarantee the efficacy of these products, when properly used in accordance with the manufacturers' directions for use and dilution, they will not cause harm to standard Knoll Office finishes.

** this product is a Green Seal® Standard GS-37 product*
