Introduction

With a commitment to innovation and modern aesthetics, Knoll sets the standard for the environment in which people work. AutoStrada is one of the most comprehensive office concepts to be developed by Knoll. Evolving workplace needs are met with innovative design, from private offices to collaborative spaces for team interaction.

AutoStrada addresses any office combination with a consistent aesthetic of high quality materials and carefully detailed design. Whether an office requires a high-performance open plan system, refined architectural case goods, progressive private office furniture, or a collaborative “big table” concept, AutoStrada provides a solution.

AutoStrada is a planning approach that combines furniture and interior architecture for both open plan and private offices spaces.

AutoStrada is a premium, one-source design.

AutoStrada is the definition of the most advanced technology management capabilities.

AutoStrada is modern. It is absolute design with a strong, basic design premise.

The Planning Models

Four AutoStrada planning models offer one set of continuous, intelligent, solutions-oriented capabilities.

Four ways AutoStrada redefines space:

- Spine-based planning
- Storage-anchored planning
- Collaborative table-based planning
- Architectural office planning

Any one environment could include solutions provided by any mix or all of the four planning models. Diverse planning models meet cross-cultural workplace environments everywhere.

AS1 AutoStrada spine based planning

AutoStrada spine based planning provides wall-like architectural order to office interiors and offers high performance technological support. The spine supports continuous off-module attachment of workspaces, storage components, KnollExtra accessories, and perpendicular linkable screens or panels to define workstations. The spine also manages and distributes power and communications throughout clusters of workstations, enabling convenient outlets at desk height and unobstructed access to cabling.

Spines can be built to any one foot increment of length and can be freestanding with outriggers to support cantilevered workspaces and overhead storage. Spines may also be integrated with attached panels or screens for support and enclosure. T-ends enable the spine to extend to absorb the dimensional gain of attached panels.

Spine covers include veneer, laminate, dry-erase marker, tackable fabric, integral shelves, slatwall and integral cable tray surfaces. Spines are available in three horizons--39”H, 48”H and 64”H--and may be fitted with frameless glass add ups for additional privacy above any of four crown profiles.

Linkable screens are available in tackable upholstered or glazed panels and windows, with a complete range of connectors that also support workspaces and storage.

AS2 AutoStrada storage anchored planning

AutoStrada storage anchored planning redefines the open office architecture with aesthetic and functional alternatives to conventional panel-based systems. Storage anchored planning begins with the anchor cabinet to which either AutoStrada panels or wood or laminate surrounds are attached to create individual or shared work areas. Storage anchored planning combines the performance of systems furniture with elegant details more like custom millwork.

AutoStrada panels feature a laminate or veneer tiled grid to the floor, with aluminum reveals between tiles on the exterior, and fabric or fabric and slatwall surfaces on the inside of the workstation. Interior base raceway distributes power and communications throughout a cluster with outlets only on the inside of the panels. AutoStrada panel heights enable seated access (42”H), seated privacy (49”H) or standing privacy (64”H). Frameless glass add ups can be added to panels for additional privacy. Connectors support workspaces, overhead storage or shelves and KnollExtra paper management and technology support tools.

AutoStrada surrounds, in veneer or laminate surface, are ideal for raised floor environments and a visual alternative to panels. Median surrounds or median storage form the backbone to which bridges and anchor cabinets are attached. Medians include a back panel, one or two end gables, a counter surface and a workspace or shelves. Bridges include a back panel and workspace. AutoStrada surrounds typically describe workstation boundaries at a 49” horizon.

AS3 AutoStrada wall based planning

AutoStrada wall based planning integrates freestanding and wall supported storage, desks and tables to build distinctive workspaces in private offices and walled collaborative areas.

AutoStrada Applied Walls add systems performance to built walls, enabling various surface materials and off module support for shelves, overheads and workspaces. Applied wall is either 69”H or 84”H, in any 6” increment of width. Horizontal channels contain interchangeable inserts like veneer, marker surface, fabric, glass, slatwall or recessed covers, and accept brackets for a variety of accessories at any point. Wall frames transfer most of the supported load directly to the floor.

AutoStrada overheads and tackboards can also be directly attached to most built walls. Freestanding AutoStrada cabinets for private offices are available in 70” and 84” horizons.

AS4 AutoStrada collaborative planning

AutoStrada collaborative planning is based on the Crinion Open Table, which creates open shared workspaces for groups from two to ten or more at a continuous workspace “bench”. Designed to support teams of people Crinion Open Table is ideal for trading rooms, libraries and conference rooms.

Crinion Open Table offers a unique alternative to traditional workstations, with continuous cantilevered workspaces, unobstructed kneespace, convenient, capable power and communications distribution, and optional desktop privacy screens. An extremely strong structure supports workspaces up to 36”d each side and virtually unlimited in length.

Crinion Open Table may be complemented with AutoStrada metal or wood storage, or Calibre files and cabinets as parallel file banks or as returns.

Materials

AutoStrada offers a range of exceptional materials and finishes, including premium grade hardwood veneers, Techwood, laminate, clear anodized aluminum, and architectural glass.

Veneers are all hand selected to best showcase the beauty of natural grain. Every effort is made to ensure that Knoll veneers are the best that can be sourced in quality of color, consistency and size. Natural variations of wood are not considered to be defects. The natural process of color change in real wood products is part of the beauty and unique character of the material. Knoll expects wood to patina over time.

Techwood is a genuine wood veneer which has been enhanced by technology to provide color and grain consistency.

High recycled content aluminum is used in the manufacture of aluminum components.

High-pressure laminate surface materials have been selected for their durability and low maintenance.

FSC (Forest Stewardship Council) certified materials are available by request.

Construction details

All AutoStrada worksurfaces are 1 1/4" thick and are a 3 ply solid construction. Worksurfaces are available in rectilinear and wedge shapes. The distinctive 3/8" tapered edge can be specified on just the user side or also on the approach side. Worksurfaces can be specified "full depth" with or without grommets, or with a 3/8" cord drop along the back with a centered edge grommet.

Worksurfaces appear to "float" 1" above lower storage components. Pedestals and legs can support a worksurface height of 28 1/4"H (typically in open plan) or 29 5/8" (in private offices). The higher worksurface height requires wood pedestals equipped with cabinet feet.

Pedestals and overhead storage are available in either metal or wood case. Wood pedestals have full extension file drawer slides with bottom-loadable steel floor and 3/4 extension slides all wood construction box drawers.

Wood or laminate case cabinets with hinged doors and adjustable shelves require doors to be removed to adjust shelving; alternatively a special request 170° hinge package is available to retrofit cabinets in the field.

Metal pedestals and Reuter overhead storage cabinets with flat front are durable steel construction with painted, laminate or veneer drawer fronts.

Metal pedestals feature full width protruding aluminum pull. Metal pedestals have all full extension personal, data and file drawer slides.

Wood cases incorporate 3 ply construction and components are finished on all sides. Core material is 45lb density particleboard. Wood drawers feature dovetail joinery details. File drawers have steel floor and are bottom loadable. Wood drawers feature full width anodized aluminum recessed or protruding pull. File drawers include file bars to support letter or legal suspended filing in either direction.

Freestanding private office cabinets are supported by cylindrical extruded aluminum feet which match an optional worksurface standoff detail.

Spine, linkable screens, panels, legs and metal storage offer 1" or greater levelling capacity. Wood storage has 1/2" levelling.

Cable management

AutoStrada incorporates discreet and concealed wire management as well as four or six circuit power distribution in all four planning models, supporting low to very high technology requirements. Storage anchored surrounds, designed for raised floor environments, are the only planning type that does not have power distribution capability.

Leg design

AutoStrada support legs are a refined shape in clear anodized aluminum finish. Legs feature either lockable casters or a unique glide sleeve that allows leveling without exposed glide threads. A pair of straight legs or one 9" wide leg can support one end of a worksurface when the other end is spine-supported, panel-supported or joined to a perpendicular worksurface with AT2TB brackets. If distance between support spans over 48", additional support is required.

Two pairs of straight legs may also be specified to create a freestanding table in combination with an AutoStrada worksurface not to exceed 72" x 30" with a corresponding stiffener.

Locks

All pedestals and cabinets with drawers are supplied with a ganglock mechanism in place. In addition, cabinets 30" wide and over with drawers have an interlock anti-tip feature to prevent the opening of a second drawer when one is already open. Drawer fronts and door fronts where applicable are routed to receive the lock itself. Keying instructions for key alike must accompany all orders and are field installed. Products are shipped from the factory with random locks or lock plugs for key-alike orders.

Representative Dimensions

All dimensions in this price list are nominal and for representative purposes only. For specific build dimensions please consult specification planning tools or contact your Customer Service representative.

Line drawings in this price list are strictly for quick product identification.

Customers Own Material

Prices for panels that are to be manufactured with a customer supplied fabric will follow Grade 10 panel pricing. COM fabrics are subject to a testing charge prior to acceptance for use on panels. Panels bearing COM fabrics are subject to extended leadtimes. It is the responsibility of the customer's purchasing agent to ensure COM fabric is supplied for testing and manufacturing. Delays in receiving COM fabric for manufacturing will result in rescheduled delivery dates.

** Markerboard white is available only on AS1 spine access covers and AS3 Applied Wall covers.

Introduction

AutoStrada Applied Wall System is designed for systems performance in built wall environments. Applied Wall enables a variety of interchangeable wall surface materials, continuous support for worksurfaces, shelves and overhead storage, power distribution and integrated wire management. Applied Wall System supports AutoStrada components in private offices and collaborative work spaces, while transmitting much of the weight load directly to the floor.

Applied Wall System includes:

- wall mount frames which stand on leveling glides and are secured to built walls
- horizontal channels that are attached to the frames
- covers that insert between the channels
- shelves and overhead storage components that can be engaged anywhere along the channels
- cable tray, worksurface support brackets and accessories

Frames

Wall mount frames are available in 69" and 84" horizons, 36" or 48" wide. Frames are steel weldments that include two or three horizontal rails through which frames are bolted to the vertical structure of the built wall. Adjacent frames can be leveled and shims enable each frame to be made plumb. At each side are vertical frame members with leveling glides. Between the side frame members are one or two intermediate studs that extend from approximately 24" above the floor to the top of the frame.

Channels

Channels are natural anodized aluminum extrusions that hold covers and feature a continuous curved slot into which components and brackets are inserted. Channels are attached to the frames at each side member and stud with a bracket above and below. Channels do not need to align with frame widths and can extend up to 6" beyond the side of a frame.

Top channels, 36"-144" in width in 6" increments, attach only at the top of the frame and finish off the top of the assembly. Intermediate channels, 24"-144" in 6" increments of width, attach typically every 15" below the top channel, but may also be set at 7 1/2" or 22 1/2" increments to accommodate specific purpose covers such as slatwall or markerboards. Bottom channels, 36"-144" in 6" increments of width, attach only at the base of a wall frame to support covers below worksurface height (between 1 1/2" and 24" above the floor). If no covers are planned below 24" no bottom channel is required but intermediate bottom trim cover and vertical frame covers are recommended to enclose the structural frame.

Covers

Wall covers are designed to insert between channels and may be interchanged without removing channels. Covers are optional and not required behind overhead storage cabinets or below worksurface height, for example. The scope of wall covers includes:

- 7 1/2"H recess covers for surface-mounted plugmold and voice/data outlets, normally mounted just below worksurface height, with optional cable trays
- 7 1/2"H slatwall covers to support KnollExtra accessories
- 15" and 22 1/2"H tackable linoleum covers
- 7 1/2", 15", 22 1/2" and 30"H veneer, laminate, paint, fabric, tackable fabric covers
- 7 1/2", 15", 22 1/2", 30", 45" H marker.

All covers are available from 24"-96" in 6" increments of width except laminate and marker, 24"-72".

Components

- 5 1/2" deep display shelves of clear anodized aluminum, 24"-72" wide in 6" increments
- 9" deep, 1/2" thick glass shelves and 12" deep plastic laminate or wood veneer bookshelves, 24"-72" wide, designed to align with the bottom of an adjacent cabinet,
- 9" deep glass and 12" deep plastic or veneer bookshelves to align with the top of an adjacent cabinet,
- open overhead storage units in plastic laminate or wood veneer, 18"-96" wide
- overhead storage units with solid or glass sliding doors, 42"-96" wide in 6" increments
- fully enclosed overhead storage units with hinged doors, 18"-96" wide,
- Reuter overhead storage, task lights and fascias for wood overhead storage,
- grommets for wall covers, surface mounted plugmold raceway and cable trays,
- support brackets for the back or end of a worksurface, and
- accessories such as coat hook, picture hook, marker tray, notepad, and horizontal/vertical wire manager clips.

Other cover sets

69" frames

sliding doors

display wall with marker surface

84" frames

Upper shelf, lower shelf, glass shelf and overhead

open overhead

hinged doors

Recess cover with cable tray and worksurface brackets

How to specify Applied Wall

1. Plan frames to support the height and width of the intended overall wall system. Frames can be installed side-by-side or as much as 12" apart to provide adequate structure for horizontal channels up to 6" wider than the frame on each side. For example, a 10' length of channels and wall covers can be supported by three 36" wide frames or by two 48" wide frames.
2. Specify horizontal channels at each level required for covers and overhead storage or shelves. A top channel is always required and intermediate channels may be attached to the frame at any 7 1/2" increment above 24", 31 1/2", 39", 46 1/2", 54", 61 1/2", or 69" above the floor.
3. Typically intermediate channels are planned at 24", 39" and 54" to support 15" h covers. An additional channel at 31 1/2" will enable 7 1/2" h covers above and below worksurface height for slatwall and power/wire management. Horizontal channels can be planned the full width of the wall or may be segmented to allow taller covers such as a markerboard in specific locations. Alternatively intermediate channels may be planned at 24" and 46 1/2" on a 69" H frame to support all 22 1/2" H covers.
4. Specify bottom channel to support 22 1/2" H covers between floor and 24". Specify intermediate bottom trim and vertical frame covers if leaving the frame open below 24".
5. Specify end trim if end of wall is visible and specify corner connectors, if any.
6. Specify functional covers such as recess cover, the mounting location for surface mounted power distribution and voice/data outlets, and slatwall covers. Also specify tackable or marker surface covers. Then fill in the wall with decorative covers such as wood veneer, plastic laminate, non-tackable fabric, or backpainted glass. If planning a bookshelf the cover below the shelf cannot be glass. Covers are not required behind overhead storage cabinets.
7. Specify overhead storage: display shelves at 31 1/2" or 39", lower bookshelves at 54" and upper bookshelves at 69" to align with adjacent overhead storage cabinets. Specify open, partially open or fully enclosed overhead storage in veneer or laminate surface. Overhead storage cabinets usually hang from a channel at 69" and bear against a channel at 54" above the floor.
8. Specify power and cable trays. Power is distributed by a surface mounted plugmold raceway with ten simplex outlets, available in three configurations: one- circuit three-wire, two-circuit four wire, or two-circuit six wire. A 24" wide plugmold with eight simplex outlets is also available. Raceways are always hardwired to the building power supply by an electrical contractor. Contractor will punch a hole through the recess cover behind the plugmold to connect from the wall to the plugmold. Recess cover also accommodates voice/data outlets and cable grommets are available to line a punched hole.
9. Specify worksurface supports. Worksurface support brackets can be attached to the channel at 24" above the floor or may be attached within a cable tray at the same level.
10. Add accessories.

Customer's Responsibility:**Attachment of AutoStrada Applied Wall System to built walls**

It is the responsibility of the customer and their structural engineer/architect to verify that the permanent built wall (studs, blocks, solid masonry, or other) to which the Applied Wall System is intended to be attached is designed to support the load bearing standards set forth below. It is also the responsibility of the customer and their structural engineer/architect to specify the fasteners and method for attaching the frames to the built wall and confirm that the installers have followed these specifications. For local standards and additional requirements such as seismic the customer should consult local building and safety codes.

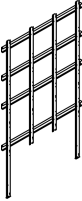

Design loads:

69"H Applied wall: 240#/foot of width. Assume four 60 lb. vertical loads spaced evenly between 24" and 69" above the floor, with the load centered 11" from the built wall.
 84"H Applied wall: 300#/foot of width. Assume five 60 lb. vertical loads spaced evenly between 24" and 84" above the floor, with the load centered 11" from the built wall.

Warning/Disclaimer

Knoll is not responsible for the attachment method of the Applied Wall System product, which is the responsibility of the customer and its structural engineer/architect. Knoll is not responsible for the cost of preparing an existing wall nor the additional cost for a new wall to make them appropriate for the installation of the Applied Wall System product. Failure to properly attach the Applied Wall System to a wall capable of supporting the loads listed above can lead to property damage and/or personal injury.

| Example: | AAWS IC 024 AA |
| A | AutoStrada |
| AWS | Applied wall system |
| IC | Intermediate channel |
| 024 | Width |
| AA | Finish |

Specification Information

AA- Anodized Aluminum only.

Application Notes

Intermediate channels attach to wall frames to provide continuous slot for component support and retention for top and bottom of wall covers. Horizontal channels attach to wall frames at predetermined mounting locations depending on what height covers and overhead storage are planned on wall surface: 24", 31 1/2", 39", 46 1/2", 54", 61 1/2", 69" above the floor.

Specify channels in length to match overall length of applied wall covers, or in shorter segments. Intermediate channels can extend past wall frame up to 6" on each end. Channels include mounting hardware to attach to wall frame studs.

Specification Information

AA - Anodized Aluminum only.

Application Notes

Bottom channels attach to bottom of wall frames to retain bottom of wall covers planned below 24". Specify channels in length to match overall length of applied wall covers, or in shorter segments. Bottom channels can extend past wall frame up to 6" on each end.

Includes hardware.

Bottom channel is not required if no covers are planned below intermediate channel mounted at 24" above floor. Specify intermediate bottom trim and vertical frame covers to cover exposed studs at bottom of each wall frame.

|------------|----------------------|
| Example: | AAWS ET 69 AA |
| A | AutoStrada |
| AWS | Applied wall system |
| ET | End trim |
| 69 | Width |
| AA | Finish |

Specification Information

Intermediate bottom trim and Vertical frame covers are only available in Easy Grey (812).
AA - Anodized Aluminum only.

Application

Wall end trim encloses exposed end of applied wall frame. If no wall covers are planned below 24" datum specify corresponding wall end trims. 48"h for 69" h frames or 63"h for 84"h frames.
If no covers are planned below 24" datum specify optional intermediate bottom trim, which may be cut on site to overall width of applied wall, and one pair of vertical frame covers to cover exposed studs of each wall frame.

Inside corners and outside corners align and enclose the 90° junction of two wall frames.

| LW | Finish |

Specification Information
LW - Markerboard surface

Application
Markerboard cover is a white, dry-erase surface that fits flush with adjacent wall covers. Marker covers insert between channels set at the corresponding height differences.

Wall covers

Specification Information

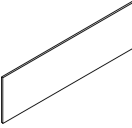

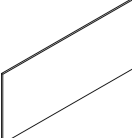

LW - Markerboard surface

Application

Markerboard cover is a white, dry-erase surface that fits flush with adjacent wall covers. Marker covers insert between channels set at the corresponding height differences.

| Specification Information |
|--|
| Backpainted glass is 4mm thick. |
| Specify glass surface: |
| 881 sea glass white |
| 882 star white |
| Sea glass has natural glass tint. |
| Star glass has low lead content for pure white appearance. |

| Application |
|---|
| Backpainted glass covers insert between horizontal channels to provide nearly opaque glass surface. Glass covers may be used as dry-erase marker surface. |
| Bookshelves cannot be mounted in channel directly above glass cover. |

Specification Information

AA - Anodized Aluminum only.

Application

Display shelf is natural anodized aluminum extrusion with integral bracket detail that engages into horizontal channel at any point. Display shelves are typically mounted in channels at 31 1/2" or 39" above the floor. Display shelf can be mounted in channel between glass covers.

| 09 | Depth |
| G | Glass |
| GL13 | Glass finish |
| AA | Support finish |

Specification Information

GL13 - Powder glass only.
 AA - Anodized Aluminum only.

Application

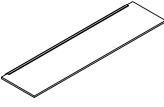

Glass shelves are supported by a 5 1/2" clear anodized aluminum platform with integral bracket detail that engages into horizontal channel at any point.
 Specify lower shelf for most applications to align with bottom of adjacent overhead storage cabinet. Specify upper shelf only to align with top of adjacent overhead storage cabinet.
 Shelf bracket bears against surface of cover below so it cannot be positioned above glass or tackable fabric covers.

Book ends rest on glass shelf at any point to contain books or binders.

Specification Information

See finish page for laminate and veneer finish codes.

Application

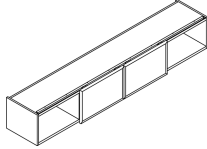

Open overhead cabinets include continuous mounting extrusion that engages into top or intermediate channel at any point. Overhead cabinets also include anti-dislodgement brackets that engage into intermediate channel below cabinet. Overhead cabinets normally mount between 54" and 69" above the floor.

Open overhead cabinets are binder height.

| WOMK | Wall mount bracket kit |
| 18 | Width |
| AA | Finish |

Specification Information

AA - Anodized Aluminum only.

For Reuter overhead downmount brackets - see finish page for painted finish code options.

Application

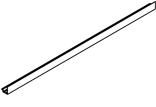

Reuter overhead storage downmount kit adapts Reuter flat front or curved front cabinets to attach to top or intermediate channel. Kit includes two anti-dislodgement brackets that engage into intermediate channel below the cabinet.

Adapter kit for wood overhead storage converts AutoStrada wall-attached single-high overhead cabinets to mount on the applied wall system.

|------------------------------|---------------------|
| Example: AAWS CT18 AA | |
| A | AutoStrada |
| AWS | Applied Wall System |
| CT | Cable tray |
| 18 | Width |
| AA | Finish |

Specification Information

Cable trays are available in AA - Anodized Aluminum only.

End support brackets are available in all standard paint finishes.

Application

Cable trays mount anywhere along any intermediate channel, and are typically installed below worksurface height in the channel 24" above the floor.

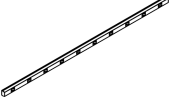

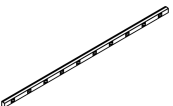

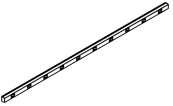

When combined with recess cover above cable tray is effectively expanded from 1 3/4" to 2 1/2" deep.

End support brackets include a flat base plate to engage into a slot in the base of the cable tray.

End support brackets also directly engage into intermediate channel at 24" above floor to support back edge or one end of worksurface.

| A | AutoStrada |
| AWS | Applied Wall System |
| RPM1 | Plugmold raceway, one circuit |
| 03 | 36" width |
| AA | Finish, Aluminum |

Specification Information

AA - Aluminum only available finish.

Plugmold is 60" wide with outlets every 6" (ten simplex outlets total).

Plugstrip is 24" wide with outlets every 3" (eight outlets total).

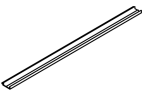

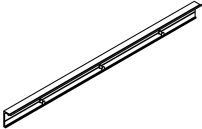

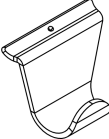

Application

Plugmold is surface mounted raceway for one or two circuits. Plugmold includes ten simplex outlets, anodized aluminum covers and end caps. Plugmold may be linked or trimmed to length on site.

Plugstrip includes eight simplex outlets.

Plugstrip mounts to 30" or wider recess cover.

Power supply must be made by an electrical contractor, including hardwire connection from junction box in building to back side of plugmold raceway. Typically contractor punches a hole for connection through a recess cover positioned just above a junction box in the building wall.

| AA | Finish |

Specification Information

- Marker tray and easel pad holder are available in AA - anodized aluminum only.
- Picture hook and Coat hook are available in all standard painted finishes.
- Wire manager clips are easy grey plastic.
- Cable grommets are black plastic.

Application Notes

Applied wall system accessories include integral bracket detail that engages into top or intermediate channels at any point.

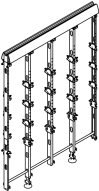

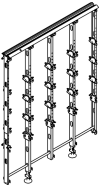

Easel pad holder includes three studs to hang standard 27"x34" easel pads on inside and outside face of bracket.

Wire manager clips may be used for horizontal or vertical wire management of lamp cords on the face of the applied wall.

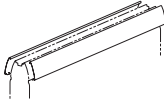

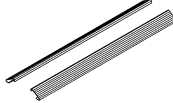

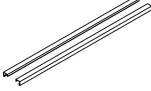

Cable grommet is 1 1/4" diameter trim ring for 1" diameter hole which may be punched in recess covers to route data/communications cables from inside of applied wall to the surface.

| Order Code | Specification Information | Application |
|----------------------------|--|---|
| Example: APFA1 3948 | Wall frame pattern numbers begin with APF (standard crown) and APFA (compact crown) prefixes. | Service wall frames are the structural component of spine-based planning. Specify frames in any combination of widths to create the overall wall length required. |
| APF Spine frame | | Frames include vertical studs every 12" on center, with cover mounting clips and cable manager inserts on both sides. Frames also include 4"H or 1" top crown with continuous channel for add-up panels. Standard crown frames include shaped crowns for upmounting shelves and overhead storage cabinets, canopy lighting, or awnings at any point. Compact crown frames feature a slim profile crown with downmounting capability only. |
| A compact crown | | Crown is bored to accept stackable add-up panels at 3" increments. |
| 1 Generation | <i>Specify:</i> | Wall frames include two levelling feet with 2" travel, 12" from each side edge. |
| 39 Height | <i>Fifth position: height</i> | Acoustical inserts fit between studs in service wall frame to increase control of sound transmission. Inserts are bagged in heights corresponding to wall frame. Specify four inserts for 48"W frame, five for 60"W frame, and six for 72"W frame. Service walls with acoustical inserts have been tested to STC 33. Inserts do not affect the NRC rating of the wall which is .40. |
| 48 Width | 39 39"H 48 48"H 64 64"H | Specify crown covers, raceway covers, structural base covers, and wall covers for each face of frame, and specify power components separately. |
| | <i>Seventh position: width</i> | |
| | 48 48"W 60 60"W 72 72"W | |
| | All wall frames include 3" diameter, 2" levelling glides and one set of connectors to adjacent frame or wall connector. Frames are black painted finish. | |

| | |
|-------------|-----------------------|
| Example: | APCA 0948C |
| APCA | Autostrada wall cover |
| 09 | Height |
| 48 | Width |
| C | Type |

Specification Information

Cable tray and slatwall covers are aluminum with an anodized finish.

Outlets covers are painted plastic with anodized aluminum extrusion on the top and bottom.

Please specify painted finish for outlets cover face from paint options listed on page 6.

Application Notes

Cable tray mounts from 21" - 30" only on any panel frame. Adjacent trays form continuous, easily accessible cable management at worksurface or table height. Shorter segments provide local cable management below outlet modules. Covers may span across a straight wall frame connection.

Bottom half of cable tray cover permits cables to be managed on surface of studs with one cable holder (55 CAT5 cables) or two clips (28 cables).

Slatwall supports KnollExtra task lights, monitor arms, paper trays, file holders and other accessories.

Locate outlets covers on wall frames before specifying other wall covers.

Outlets cover mounts between 21" and 30" (below standard desk height), 30" - 39" (above desk height) or 39" - 48" on spine wall frame.

Outlets cover is 12" wide, and mounts anywhere on wall frame between 21" and 48" above the floor. Outlets cover corresponds to power components (specified separately) mounted on wall frame.

Outlets covers have four openings for power or PDC outlets. Specify outlet fillers for unused outlet openings in cover.

| AX1A | AutoStrada connector |
| C | Type |
| 48 | Height |
| 118 | vertical cover finish |

Specification Information

For flat ends specify:
Starting seventh position:
 painted finish for outside trim cover and raceway cover
Starting eleventh position:
 painted finish for crown end cap
 Please specify painted finishes from paint finish options listed on page 6.

Application Notes

Flat end finishes end of corresponding height spine when end of wall is supported by outriggers or perpendicular screens or panels. Flat ends include end cover for compact crown or standard crown, as specified.

High-low straight connectors join service wall of different heights in a straight line.

Straight connector is replacement hardware kit to join Currents wall frames of the same height end to end. Kit includes four barrel-shape connectors and hardware.

| L | Type |
| 48 | Height |
| 118 | vertical cover finish |

Specification Information

For L, T, V and Y connectors specify:

Seventh position:
painted finish for vertical trim cover and raceway cover

Eighth position, and X connectors:
painted finish for top cap and standard crown end caps

Please specify painted finish as applicable from paint options listed on page 6.

Application Notes

L, T, and X connectors join spine frames at 90° angles and include vertical trim covers, top cap and standard crown end caps, and one spare set of straight connectors.

When ordering connectors for the spine frame with compact crown, specify crown end caps separately.

V and Y connectors join spine frames at 120° angles and include vertical trim covers, topcap and standard crown end caps.

Spine ends and connectors

|------------|--------------------|
| Example: | AA1 MPS48 3 |
| AA1 | Accessory |
| M | Morrison |
| PS | Panel starter |
| 48 | Panel height |
| V3 | Finish |

Specification Information

Please specify painted finish for panel starters, Morrison raceway shroud and end trim from paint finish options listed on page 6.

Linkable screen fillers are trim grey or easy grey integral color.

Application Notes

Panel starters attach perpendicular panels or linkable screens to spine wall structural base covers (5" - 21"H).

Panel starters include clamp bracket to any height spine wall and full height connector track with modified top wedge block.

Top clip connects panel connector track to spine wall crown. Specify top clip for added stiffness of panels higher than 48" or whenever cantilevering components from panel. Top clip is not compatible with end trim.

Specify raceway shroud if connecting power from spine wall to Morrison panel.

Linkable screen fillers are optional fillers for linkable screen starters. End trims may interfere with easy access to wall covers.

| E Top trim profile |
| 4 4" base height |
| W359- Fabric |
| AA Trim finish |
| 111 Outside base finish |
| 111 Inside base finish |

Specification Information

See Reff System for full selection of painted finishes, fabrics and wood veneers for T-end cover sets.

Specify:

1. Top trim profile
2. Panel finishes
3. Top trim finish
4. Base finish

Top trim profile:

E Extruded Aluminum

Base height:

4 4" base height

Application Notes

Specify covers in monolithic or tiled sets to complete T-end frames for AutoStrada or Reff panel..

Monolithic cover sets include a raceway cover and a single snap-in panel above.

Tiled sets include raceway cover and segmented tiles corresponding to adjacent AutoStrada or Reff tiled panels.

AutoStrada or Reff tiled module horizontal reveals are at nominal 19", 34", 49" and 64" above the floor and do not align with service wall cover reveals.

Please see page 6 for list of applicable finishes.

Panel system starters and ends

Order Code

| | |
|------------|----------------------|
| Example: | AA1 UPS48 111 |
| AA1 | Accessory |
| UPS | Panel starter |
| 48 | Panel height |
| 111 | Finish |

Specification Information

Please specify painted finish for universal end and panel starters from paint finish options listed on page 6.

Application Notes

Universal adapters and starters integrate other panel systems with the AutoStrada spine. Vertical surface accepts architectural wall starter of most other systems.

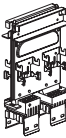

T-end adapters include connector to corresponding height T-end for linkable screen (specified separately).

Panel starter includes clamp bracket to structural base cover on service wall.

Top clip gives added stability to attached panels of the same height or higher than the service wall.

Order Code

| | |
|------------|-----------------|
| Example: | AR1 EOM |
| AR1 | Power component |
| E | 2+2 |
| OM | Outlet module |

Application Notes

Autostrada power components distribute four 20-amp circuits at desk height: two convenience circuits and two protected circuits, with separate grounds and heavy duty #10 neutrals. Power may be distributed point-to-point between outlet modules at or below desk height. Outlet modules accept two duplex outlets on each face and four jumper cables to connect to other modules or infeed power.

Modular desk-height outlet module mounts between frame studs at any height from 21" - 48", above or below adjacent worksurfaces. Each 12"W frame bay can accept two outlet housings (up to four duplex outlets on each side) side by side.

Central switch controls three outlets inside wall frame for task or ambient lights. Switch occupies right-hand outlet opening in outlets cover on one side of wall.

Switches cannot be positioned back-to-back in combination with an outlet module. Central switch includes white rocker switch, connector to adjacent outlet module, and three simplex outlets on circuit B (2+2 or 3+3).

Outlet modules accept two duplex outlets on each face. Specify outlets with black face for convenience circuits. Specify orange face or black with orange triangle for protected circuits with separate ground and neutral in building power supply.

Desk height power infeed connects from floor box to outlets module in spine. Infeed includes 6' cable with pigtail. Ceiling infeed connects from ceiling mounted box to desk height outlet module. Specify ceiling infeed panel separately.

Hardwire base infeed is approved for installations in the City of New York. Infeed includes junction box for base raceway and connector to outlet module.

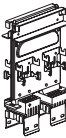

Jumper cables join power from outlet module to outlet module. Application dimension is distance between modules.

Transitional connectors connect power from AutoStrada spine to powered Morrison or Reff panels attached to the spine. Application dimension suggests distance from outlet to panel. Transitional connectors have watertight conduit between modular ends. Do not specify transitional connectors in City of New York installations.

| T | 3+3 |
| OM | Outlet module |

Application Notes

AutoStrada power components distribute six 20-amp circuits at desk height or wall base: three convenience circuits and three protected circuits, with separate grounds and heavy-duty #10 neutrals.

Service wall power may be distributed point-to-point between outlet modules at desk height or in the base raceway. Outlet modules and power rails accept two duplex outlets on each face and four connector/jumper cables.

Modular desk-height outlet module mounts between frame studs at any height from 21" - 48", above or below adjacent worksurfaces. Each 12"W frame bay can accept two outlet housings (up to four duplex outlets on each side.)

Central switch controls three outlets inside wall frame for task or ambient lights. Switch occupies right-hand outlet opening in outlets cover on one side of wall.

Central switch includes white rocker switch, connector to adjacent outlet module, and three simplex outlets on circuit B (2+2 or 3+3).

Outlet modules and power rails accept two duplex outlets on each face. Specify outlets with black face for convenience circuits. Specify orange face or black with orange triangle for protected circuits with separate ground and neutral in building power supply.

| Order Code | Specification Information | Application Notes |
|-----------------------------|---|--|
| Example: AR1 PCC 100 | Cable clips and cable managers are black plastic. | Specify cable clips, approximately 50 per wall frame to support and manage cables on the face of studs in the spine wall frame. Each clip manages up to 14 Category 5 or fiber optic cables; four clips attach between 21"-30", 30"-39", 39"-48"; six between 48"-64"H. Only two clips fit behind a cable tray cover at the 21"-30" height. |
| AR1 Raceway | Cable holders are light grey plastic. | |
| PCC Cable clip | <i>Please specify painted finish for hardware outlets cover or ceiling infeed panel from paint finish options listed on page 6.</i> | |
| 100 Size/Quantity | | Specify high capacity cable holders approximately 20 per wall frame to support and manage larger bundles of cables. Each holds up to 55 Cat 5 cables; two holders attach to studs at each 9" level; three holders at the 16" level of a 64"H wall. Only one holder fits behind a cable tray cover at the 21"-30" height (upside down). |
| | | Raceway cable managers are U-shape cable supports that snap into the underside of the panel frame. Plan one per foot to contain data cables or power jumpers in the base raceway. |
| | | Ceiling infeed panel attaches to end of spine adjacent to stabilizer end cabinet or Currents, Morrison, or Ref T-end panel with 3 1/2" extension, or to power monument. Center channel, 2" x 2 1/2", accommodates one or two power infeed cables. Each side channel is 1 1/2" x 3 1/2" lay-in cable raceway, for continuous lay-in cabling from ceiling to wall surface. |
| | | Specify ceiling infeed separately. |

Specification Information

Glazed linkable screens include top cap and two 4"H x 2 1/2"W extruded aluminum legs with levellers. Top cap is integral color trim grey or easy grey.

Window frame is anodized aluminum extrusions.

Glass is tempered clear. Architectural glass is available in powder or block matrix finishes.

TEMP Clear Tempered
GL6 Block Matrix
GLI3 Powder

Application Notes

Linkable screens divide workstations perpendicular to spine where base raceway is not required. Linkable screens connect to the wall with screen starters and to each other with screen connectors. Specify starters and connectors separately.

Glazed linkable screens feature nearly flush glazing on one surface and a perimeter frame of anodized aluminum. Glazed linkable screens with connectors can end support or cantilever worksurfaces with brackets designed for Morrison panel mounting.

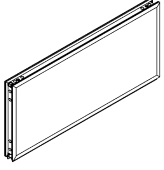

39"H screens align with the underside of either compact or standard crown on 39"H spines. 39"H screens enable seated visual access.

48"H screens align with the underside of either compact or standard crown on 48"H spines. 48"H screens provide some seated privacy.

64"H screens align with the underside of either compact or standard crown on 64"H spines.

Specification Information

All top and vertical trim is easy grey (812) or trim grey (813) integral color surface.

Connector post is painted black extrusion.

Carpet grips are black integral color surface.

Application Notes

Connectors join linkable screens in straight, 90° or 120° post configurations.

Linkable screen connectors include connector tracks, universal posts and top and vertical trim (where required).

Connector tracks have cantilever slots for worksurface and storage support.

L, T and X connectors include a universal post and 2, 3 or 4 connector tracks and top cap.

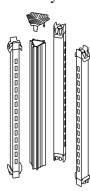

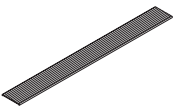

End trim may be specified instead of an end connector if cantilever capability is not required.

Carpet grips snap into linkable screen glides to prevent components from sliding. Glide rotates in carpet grip to permit levelling.

Non-skid grips snap into glides to prevent sliding on hard surface floors.

Order Code

| |
|--------------------------------------|
| Example: AC1 39L2 812 |
| AC1 Linkable screen connector |
| 39 Height |
| L2 90° 2-way L |
| 812 Finish |

Specification Information

All top and vertical trim is easy grey (812) or trim grey (813) integral color surface.

Connector post is painted black extrusion.

Carpet grips are black integral color surface.

Application Notes

Connectors join linkable screens in straight, 90° or 120° post configurations.

Linkable screen connectors include connector tracks, universal posts and top and vertical trim (where required).

Connector tracks have cantilever slots for worksurface and storage support.

L, T and X connectors include a universal post and 2, 3 or 4 connector tracks and top cap.

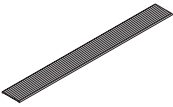

End trim may be specified instead of an end connector if cantilever capability is not required.

Carpet grips snap into linkable screen glides to prevent components from sliding. Glide rotates in carpet grip to permit levelling.

Non-skid grips snap into glides to prevent sliding on hard surface floors.

both sides 64x48 shown, 49" h with three tiles; 34" h with two tiles

| Order Code | Specification Information | Application Notes |
|--|---|---|
| Example: R3R1AF33418EAA4K 613W359-V515N | To order please specify pattern number including: | Monolithic side with base raceway only. Tiled side inserts extended to the floor. Be sure to specify power rails for panels with one sided base raceways. |
| R3 | AutoStrada w/generation 3 frame | |
| R1 | Base raceway monolithic side only | Tiled side includes aluminum panel reveals between V3 inserts. Aluminum vertical hookstrip cover ordered separately. Anodized aluminum finish only. |
| A | Tiled one side, Monolithic other | |
| F | Fabric, monolithic side | |
| 3 | V3 Exotic, tiled side | |
| 34 | 34" high | Panels are not for use with medians, storage medians or bridges. |
| 18 | 18" wide | |
| E | Extruded Aluminum top trim | Black PVC hookstrip reveals should be ordered for monolithic side from Reff price list. |
| AA | Top Trim anodized aluminum finish | |
| 4 | 4" high base raceway | Panels on this page will accept standard Reff System stacking window modules. |
| K | Knock-outs in base raceway | |
| 613 | Finish, base raceway | |
| W359- | Finish, fabric | |
| V515 | Finish, Quartered Clear Figured Sycamore | |
| N | Not milled for ported components | |

See page 6 for finish options applicable.

both sides 64x48 shown, 42" & 49" h do not have insert above slatwall section

| Order Code | Specification Information | Application Notes |
|---|---|--|
| Example: R3R1CX34218EAA4K 613W359-V515AA | To order please specify pattern number including: | Tiled side includes aluminum panel reveals between V3 inserts. Aluminum vertical hookstrip cover ordered separately. Anodized aluminum finish only. Tiled side inserts extend to the floor, there is no base raceway on this panel side. Be sure to specify power rails for panels with one sided base raceways. |
| R3 AutoStrada w/generation 3 frame | 1. Height | Panels with slatwall one or both sides do not accommodate ported power or data modules. 42" and 49" h panels on this page will not accept frameless glass add-ups. |
| R1 Base raceway slatwall combo side only | 2. Width | |
| C Tiled one side, Slatwall combo other | 3. Extruded Aluminum Top Trim <i>E - default</i> | |
| X Fabric/Slatwall combo side | 4. Finish, Aluminum trim <i>AA - anodized aluminum only</i> | |
| 3 V3 Exotic, tiled side | 5. Base raceway height <i>4 = 4" h, default</i> | |
| 42 42" high | 6. Knock-out option <i>K = with knock-outs</i> <i>N = no knock-outs</i> | |
| 18 18" wide | 7. Base raceway finish <i>(painted or plated finish options only)</i> | |
| E Extruded Aluminum top trim | 8. Fabric selection | |
| AA Top Trim anodized aluminum finish | 9. Finish, V3 Exotic | |
| 4 4" high base raceway | 10. Finish, Slatwall <i>(painted or AA - anodized aluminum)</i> | |
| K Knock-outs in base raceway | See page 6 for finish options applicable. | Black PVC hookstrip reveals should be ordered for panel side with slatwall. |
| 613 Finish, base raceway | | Panels on this page will accept standard Reff System stacking window modules. |
| W359- Finish, Fabric (combo side) | | |
| V515 Finish, Quartered Clear Figured Sycamore (tiled side) | | |
| AA Finish, Slatwall | | |

Slatwall/Fabric combo both sides - both sides with base raceway

Panels

| Order Code | Specification Information | Application Notes |
|---|---|---|
| Example: A1CRTT60AA A AutoStrada 1 Generation 1 CR Continuous Run TT Top Trim 60 60" wide AA Finish, anodized aluminum | <i>To order please specify pattern number including:</i> 1. Width 2. Finish, where applicable <i>AA - anodized aluminum only</i> | Continuous run top trim for spanning multiple panels with one piece of trim. Continuous run top trim ships without PVC carrier which secures trim to panel frame. Carrier must correspond to individual panel widths below one piece top trim. May reuse PVC carrier from individual top trim that ships with panel; installer would remove carrier from single width top trim and then slide multiple carrier pieces onto continuous run top trim to align with panels below top trim. |

| Example: APLP10 | <i>To order please specify pattern number including:</i> 1. Pack quantity required | Panel leveling plates are for installation aid only. The plate fits on top of the hookstrip connecting two panels and spans the joint between the panels. Simply drop the plate in the cavity between the two panels, tighten top wedges as you would normally during installation. The dimension and shape will force panel alignment. Remove the plate and proceed onto the next connection. |

Specification Information

Power rails are the primary power distribution component. Each rail provides provides outlet mounting position on one side and receptacles for branching power connectors at each end.

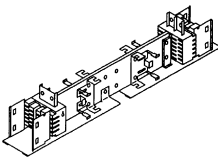

Power rail for 24" wide panel accepts one duplex outlet or one power infeed. Power rails for 30" to 48" wide panels accept two outlets.

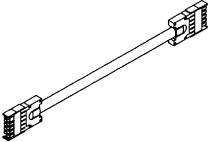

Application Notes

Power rails on this page are for use with panels with one side raceway only.

Power connections and duplexes as required to be specified from following pages for 8 or 10 wire as required for panels with either one sided base raceway or both sides with base raceway.

Specification Information

Reff 3+3 Raceway is a six-circuit, ten-wire modular power distribution system for use in Reff panels. 3+3 Raceway components distribute three 20-amp convenience circuits (A,B and C) with neutral and ground, and three 20-amp circuits (X, Y and Z) with separate neutral and ground.

A, B, X, Y outlets are identical to eight wire, 2+2 components.

Duplex outlet circuits are designated by white letters on black background.

In Canada, circuits carry a 15 amp load rating.

Note:

Specify the suffix "RF" after the power rail pattern number for panels manufactured before June 1996.

Application Notes

Power rails are the primary power distribution component of the Reff 3+3 Raceway. Each rail provides outlet mounting positions on both sides and receptacles for branching power connectors at each end. Center supports permit lay-in cabling from either side of the raceway, shielded from power conductors and outlets by grounded steel septums.

Rail for 24"W panel accepts one duplex outlet or power infeed one either side. Rails for 30" to 48" panels accept two outlets each side, 60", 66" and 72" rails accept four duplex outlets per side.

*Power connectors must be specified according to the panel widths in the specified orientation.

Power connectors transmit power between adjacent powered panels. Specify straight power connector for straight connections and through-post power connector when passing in a 90° or straight through a T or X or L post connection.

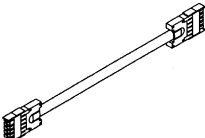

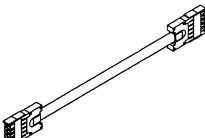

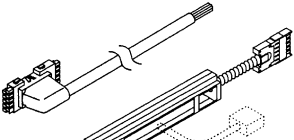

Duplex outlets are preconfigured to access one of the four circuits, A, B, X, Y, and snap into any standard outlet location. Duplexes on circuits X and Y may be specified in orange to signify protected circuits for electronic equipment; all duplexes are black.

| Example: AWBK42EAAGL13AA A AutoStrada W Window BK Bridge kit 42 42" wide E Extruded Aluminum Top Trim AA Finish, window frame GL13 Finish, glass AA Finish, aluminum top trim | To order please specify pattern number including: Window bridge kit: 1. Width <i>Note: Be sure to specify window bridge kit to correspond with width of window bridge assembly</i> 2. Extruded Aluminum Top Trim profile <i>E = default</i> 3. Finish, window frame <i>Paint or Anodized Aluminum</i> 4. Finish, glass <i>TEMP - Clear, tempered</i> <i>GL6 - Block Matrix</i> <i>GL13 - Powder</i> 5. Finish, Aluminum top trim <i>AA - anodized aluminum only</i> | Window bridge kits are for use with window bridge assemblies on page 111. Be sure to include median gable top trim when attaching window bridge assembly and window bridge kit to medians for the appropriate condition of median gable and top shelf. The median gable top trim is an aluminum extrusion which finishes the exposed portion of the median gable and continues a consistent aluminum trim detail from one unit to the next. |

left hand shown, shelf aligns with worksurface at 28 1/4" h overall, or 27" h to underside

| Order Code | Specification Information | Application Notes |
|--|--|--|
| Example: ACEL4924SEWV316AA | To order please specify pattern number including: | See page 6 for finish options applicable. |
| A AutoStrada | 6. Drawer Interior applicable ACE(L/R) and ACI(L/R) only | |
| C Cabinet | 7. Finish Laminate, V1, V2 or V3 finish | When planning with medians and bridges (single station or clusters of stations) specify 49"h cabinets in either 26.5" or 32.5" deep storage anchored cabinets for anchoring the median or bridge unit of the same depth. |
| E File/File lower front, Interior back open shelf | 8. Finish, Aluminum trim (trim & pull) AA - Anodized aluminum only | |
| L Left Hand | Connection method to medians, median storage or bridges incorporated into product design, no additional hardware required. | When planning with panels, single station or cluster groups where all workstations within the group are the same direction/hand, then specify 26.5" or 32.5" deep storage anchor cabinet units. When planning multi-station clusters mirroring left hand/right hand or back to back stations with panel run perpendicular to two cabinets, you then need to specify one 24"d with one 26.5"d or 30"d with one 32.5" d cabinet to go side by side or back to back as the case may be. |
| 49 49" high | 64"h cabinets include shelf to match case in price list above. Upcharge below applicable as follows for 49"h shelf to match case for L/V1/V2/V3 or AA for anodized aluminum metal shelf for M option for both 49"h and 64"h cabinets. | |
| 24 24" deep | depth L V1 24" \$ 87 164 26.5" \$ 92 169 30" \$ 96 177 32.5" \$ 101 181 | |
| S w/shelf to match cabinet case | depth V2 V3 24" \$182 236 26.5" \$188 244 30" \$197 257 32.5" \$203 265 | |
| E Extruded Aluminum Pull | 4. Shelf option for open interior side N = No shelf, optional for 49"h units only S = Shelf to match case * (optional 49" and 64"h) M = Two piece anodized aluminum metal shelf assembly * (optional 49" and 64"h) (*upcharge applicable) | Cabinets with front and back access not to be used in freestanding applications. |
| W Wood interior | 5. Pull E = extruded aluminum pull P = extruded aluminum protruding pull | Cabinet to panel attachment brackets required, see page 126. |
| V316 Finish, Maple | | Cabinets include angle bracket to side support worksurfaces. Cabinets drilled for locks, keying instructions must accompany order. |
| AA Finish, trim & pull, anodized aluminum | | File drawers in cabinet styles prefixed ACIL and ACIR do not accommodate legal filing side to side. |

3rd digit in pattern number indicates storage configuration, see individual pattern groups above for description.

| A | AutoStrada |
| W | Worksurface |
| TC | to Cabinet |
| T | Trim |
| 24 | 24" d worksurface |
| AA | Finish, anodized aluminum |

Specification Information

To order please specify pattern number including:

1. Depth of worksurface
24 = 24" d worksurface
30 = 30" d worksurface
2. Finish
AA = anodized aluminum

Application Notes

Anodized aluminum spacer optional to fill 1/8" gap at worksurface and storage anchored cabinet connection in AS-2 storage anchored panel based planning. Trim piece installed at worksurface level and rests on side support bracket to cabinet.

| ASFS1 | Autostrada floorstanding pedestal |
| FF | Configuration |
| 18 | Depth |
| 111 | Finish for case |
| P | Finish type for fronts |
| 114 | Finish for fronts |

Specification Information

All pedestals include front lock with KnollKey lock system. Personal drawer is 4"h. Data drawer is 7"h. File drawers are 11"h. Deep file drawers include file support for letter (width) or legal (depth) suspended file folders. All drawers have full extension, ball bearing drawer slides.

Please specify painted finish for case or fronts from paint finish options; front finish also optional from laminate, V1, V2 or V3 finish options listed on page 6.

Application Notes

Floorstanding pedestals include levelling glides and closed top with 1" spacer to support one end of a worksurface at 27"h to underside of worksurface. 18"d pedestals fit under any worksurface with standard stiffener. Deep floorstanding pedestals fit under worksurfaces with worksurface stiffener 18" less than nominal width.

The metal case pedestals come with a 1"h board spacer that installs between the case and the worksurface it is supporting. The tops of the pedestals are drilled to accept the attachment screws.

| ASMS1 | Autostrada mobile pedestal |
| FF | Configuration |
| 18 | Depth |
| 111 | Finish for case |
| P | Finish type for fronts |
| 114 | Finish for fronts |

Specification Information

All pedestals include front lock with KnollKey lock system. Personal drawer is 4"H. Data drawer is 7"H. File drawers are 11"H. Deep file drawers include file support for letter (width) or legal (depth) suspended file folders. All drawers have full extension, ball bearing drawer slides.

Please specify painted finish for case or fronts from paint finish options; front finish also optional from laminate, V1, V2 or V3 finish options listed on page 6.

Application Notes

Mobile pedestals are independent storage components with locking casters and pull. Standard mobile pedestals roll under worksurfaces set at 28" or higher. Deep mobile pedestals with two files or personal/data/file will not fit under stiffener of universal worksurface or desk set at 29" or lower. Specify data/file mobile pedestal under worksurfaces adjusted lower than 28"H.

|-------------|------------------|
| Example: | AFB19V316 |
| A | AutoStrada |
| FB | Finished back |
| 19 | 19" wide |
| V316 | Finish, Maple |

Specification Information

To order please specify pattern number including:

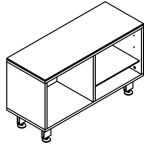

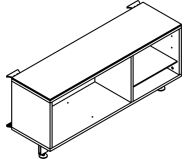

- Width
 - 16 = for 16" wide units
 - 19 = for 19" wide units
 - 30 = for 30" wide units
 - 36 = for 36" wide units
 - 42 = for 42" wide units
 - 60 = for two 30" w side by side
 - 72 = for two 36" w side by side
 - 84 = for two 42" w side by side
 - 90 = for three 30" w side by side
 - 96 = for two 30" w & one 36" w side by side
- Finish
 - Laminate, V1, V2 or V3 finish

Application Notes

Finished backs are used with lower storage in free-standing applications where the back is exposed. Backs are 1/2" thick. Finished backs also recommended for "ganging" units together when creating build-to-spec credenza units.

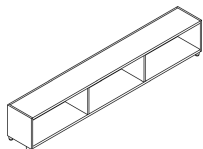

Pedestal filler strip used in lieu of finished back when full back not exposed to finish gap to wall.

See page 6 for finish options applicable.

96" w shown

| Order Code | |
|--------------------------------|----------------------|
| Example: ASOBD42LV316AA | |
| A | AutoStrada |
| S | Stack-on |
| O | Overhead |
| B | Binder depth |
| D | Hinged Door |
| 42 | 42" wide |
| L | Locking |
| V316 | Finish, Maple |
| AA | Finish, support feet |

| Specification Information |
|--|
| To order please specify pattern number including: |
| 1. Depth B = Binder depth G = Legal depth |
| 2. Width |
| 3. Lock option L = Lock hole drilled N = Not drilled for locks |
| 4. Finish Laminate, V1, V2 or V3 |
| 5. Finish, support feet AA - Anodized aluminum 111 - Painted black |

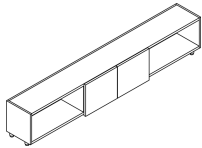

| Application Notes |
|--|
| Stack-on overheads, as the description implies "stack-on" median top shelf, please make sure median top shelf depth and overhead depth correspond. |
| Hinged doors extend slightly beyond case construction to allow for easy finger pull access along the bottom. No pulls available. |
| Optional lock drilling to be specified. If drilled for locks selected, keying instructions must accompany order. |

See page 6 for finish options applicable.

Order CodeExample: **APHOBD42LV316**

| | |
|-------------|---------------|
| A | AutoStrada |
| PH | Panel hung |
| O | Overhead |
| B | Binder depth |
| D | Hinged Door |
| 42 | 42" wide |
| L | Locking |
| V316 | Finish, Maple |

Specification Information

To order please specify pattern number including:

- Depth
B = Binder depth
G = Legal depth
- Width
- Lock option
L = Lock hole drilled
N = Not drilled for locks
- Finish
Laminate, V1, V2 or V3

See page 6 for finish options applicable.

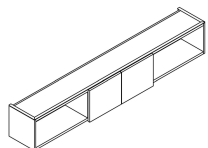

Application Notes

Panel hung overhead storage units include hardware to hang unit on panels.

Hinged doors extend slightly beyond case construction to allow for easy finger pull access along the bottom. No pulls available.

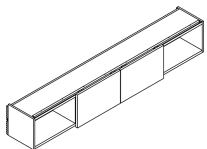

Optional lock drilling to be specified. If drilled for locks selected, keying instructions must accompany order.

| Application Notes |
|---|
| Manufacturer assumes no responsibility for the intallation, attachment or the securing of wall hung units to the wall. A qualified local building contractor should be consulted to advise securing method and to determine if and what blocking requirements are necessary. |
| Single high overhead storage to be mounted at 68 1/2" from floor to top of overhead unit. Dimension is to top of wood side gable of corresponding 70" h floor standing cabinet not including aluminum and wood top trim. |
| Wood cleat included for wall mounting. Two piece cleat, full width of overhead. Each piece nominally 3 5/8" h. Bottom piece attached to wall. |

See page 6 for finish options applicable.

Application Notes

Manufacturer assumes no responsibility for the installation, attachment or the securing of wall hung units to the wall. A qualified local building contractor should be consulted to advise securing method and to determine if and what blocking requirements are necessary.

Single high overhead storage to be mounted at 68 1/2" from floor to top of overhead unit. Dimension is to top of wood side gable of corresponding 70" h floor standing cabinet not including aluminum and wood top trim.

Hinged doors extend slightly beyond case construction to allow for easy finger pull access along the bottom. No pulls available.

Optional lock drilling to be specified. If drilled for locks selected, keying instructions must accompany order.

Wood cleat included for wall mounting. Two piece cleat, full width of overhead. Each piece nominally 3 3/8" h. Bottom piece attached to wall.

96" w shown

| Order Code | Specification Information |
|----------------------------------|---------------------------|
| Example: AWHOBDD30LV316AA | |
| A AutoStrada | |
| WH Wall hung | |
| O Overhead | |
| B Binder depth | |
| D Double high | |
| D Hinged doors, wood | |
| 30 30" wide | |
| L Lock holes drilled | |
| V316 Finish, Maple | |
| AA Finish, Aluminum trim | |

Specification Information

To order please specify pattern number including:

- Depth
B = Binder depth
G = Legal depth
- Width
- Lock
L = lock hole drilled
N = not drilled for locks
- Finish
Laminate, V1, V2 or V3
- Finish, aluminum trim
AA - Anodized aluminum only

See page 6 for finish options applicable.

Application Notes

Manufacturer assumes no responsibility for the installation, attachment or the securing of wall hung units to the wall. A qualified local building contractor should be consulted to advise securing method and to determine if and what blocking requirements are necessary.

Double high overhead storage to be mounted at 82-5/16" from floor to top of overhead unit. Dimension is to top of wood side gable of corresponding 84" h floor standing cabinet not including aluminum and wood top trim.

Hinged doors extend slightly beyond case construction to allow for easy finger pull access along the bottom. No pulls available.

Optional lock drilling to be specified. If drilled for locks selected, keying instructions must accompany order.

Wood cleat included for wall mounting. Two piece cleat, full width of overhead. Each piece nominally 3 7/8" h. Bottom piece attached to wall.

Overhead storage, wood cases

| Order Code | Specification Information | Application Notes |
|-------------------------------------|---|--|
| Example: RO3-A30PL-117-L-117 | Specify mounting hardware separately. | Reuter storage is a universal product applicable Knoll systems. |
| RO3 Reuter overhead | Optional anodized aluminum front pull trims the entire width of cabinet door. | Cabinet door rotates above cabinet on side pivots, counterbalanced by two pneumatic cylinders. Two-door cabinets have center divider and four pneumatic cylinders. Vertical interior partitions may be positioned on 1 1/2" increments of width anywhere across shelf, 1 1/2" in from each side. Vertical partitions contain cutouts for mounting up to five horizontal partitions at 2" increments on either or both sides. |
| A flat front | <i>Specify paint finishes for case.</i> | Horizontals are suspended between two verticals, and may be positioned end-to-end in any combination up to 3" less than cabinet width. Available in sets of 10; 6", 9", 12", 15" widths. |
| 30 width | <i>Finish types for front:</i> | Order locks for overheads with a KnollKey order form. Please note that Reuter overhead cabinets 60"W or wider require two lock cores. |

| Order Code | Specification Information | Application Notes |
|-----------------------------|--|---|
| Example: AA1RODN 613 | Please specify painted finish for overhead upmount or downmount kit. Paint options are listed on page 6. | Reuter upmount brackets attach overhead cabinet anywhere along standard spine crown, lifting 1" above nominal wall height. Extended upmount brackets lift overhead to 10" above nominal wall height. Downmount brackets attach overheads within the upper 16" of 64"H walls with either compact or standard crown. The AutoStrada version of the downmount brackets extends to the bottom of the access cover, making contact with the bottom trim extrusion. |
| AA1 Spine accessory | | |
| RO Reuter overhead | | |
| DN Configuration | | |
| 613 Finish | | Specify an extra bracket (one-half pair) for center support of overhead cabinets wider than 60". Upmount or downmount brackets may be inset to permit overhead to extend 1" or 3" beyond the end of the spine at T-ends. Wall mount frames secure Reuter overhead cabinets to wall (frame/wall mounting hardware is not included). Frame is concealed behind storage. Use 2 RO1-WMF2 to wall mount 66" and 72" wide Reuter overheads. Wall mount wire manager is two-part wire concealment kit, 22"H (medium grey only). |

Specification Information

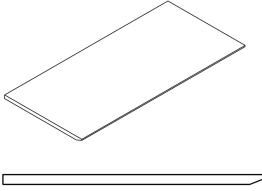

AA- Anodized Aluminum only.
 15" deep: legal depth wood overhead, wall mounted with tackboard below.
 16" deep: legal depth wood overhead on Applied Wall System or wall mounted without tackboard.

Application

Reuter T5 task lamp mounting kit enables task lamp to be mounted under veneer or laminate overhead storage cabinets (with or without doors). Mounting kit includes anodized aluminum fascia to conceal lamp and manage power cord along front and side of cabinet. Specify mounting kit in width corresponding to overhead cabinet. Mounting kit also includes back supports for one task lamp.

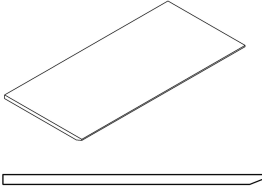

To mount a second task lamp within one longer mounting kit specify one additional pair of back supports. Back supports are L brackets into which the pins at the back of the Reuter are inserted. Sliding brackets on sides of the lamp slide over the inside lip of the fascia at any point to support the front of the lamp.

Worksurfaces

| Order Code | Specification Information | Application Notes |
|--|---|--|
| Example: AW1T1RF1830MG118 V316613 | To order please specify pattern number including: | Hardware to attach to vertical support to be specified separately. |
| A AutoStrada | 1. Width | 1 1/4" tops require additional support when distance spans over 48"; see page 181 |
| W Worksurface | 2. Depth | |
| 1 Generation 1 | 3. Surface type | Actual widths are 1/16" less than nominal dimension noted and depths are 1/8" less than nominal dimension noted. |
| T1 Tapered 1 side, user | <i>L = Laminate</i> | |
| R Rectilinear | <i>M = Mixed, Laminate surface/V1, V2 or V3 edge</i> | When grommets specified up to 48" w tops have one grommet, over 48" w have two grommets. |
| F Full depth, flush | <i>V = V1, V2 or V3</i> | |
| 18 18" wide | 4. Grommet option | |
| 30 30" deep | <i>N = No grommets</i> | |
| M Surface type, Mixed | <i>G = Grommet(s), flush</i> | |
| G Grommet | <i>R = Grommet(s), recessed</i> | |
| 118 Finish surface, Bright white | 5. Finish, Surface | |
| V316 Finish edge, Maple | <i>Laminate, V1, V2 or V3 finish</i> | |
| 613 Finish, grommet | 6. Finish, Edge | |
| | <i>Must be same as surface finish unless M surface type specified, then must be V1, V2 or V3 finish</i> | |
| | 7. Finish, Grommet(s) | |
| | <i>specify painted or plated finish</i> | |
| | See page 6 for finish options applicable. | |

Laminate, V1, V2 or V3 finish

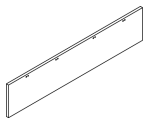

See page 6 for finish options applicable.

Application Notes

To be used for free-standing private office applications.

Half height suspended modesty intended for optional use with work surfaces when creating configurations including a peninsula top supported at one end by a pair of legs (legs on page 178) or "freestanding" table desk by set of legs and would install just behind the legs by angle bracket that ships with modesty. Attachment hardware included.

If installing below worksurface with grommets, be sure to specify recessed grommet location.

AWM1 Stiffener

S Straight

36 Application

Specification Information

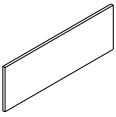

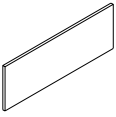

Stiffeners are black painted finish.

Application Notes

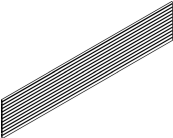

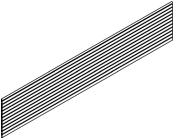

AutoStrada worksurfaces require stiffeners when the span between structural supports exceeds 48". Stiffener also serves as horizontal cable manager.

Stiffener corresponds in width to straight or corner worksurface back edge. Specify 12" less wide stiffener to mount adjacent to floor standing pedestal.

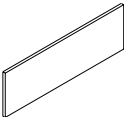

For 90" application span, use AWM1-S84 stiffener.

| Example: AWSOAA A AutoStrada WSO Work surface stand-off AA Finish, anodized aluminum | To order please specify pattern number including: 1. Finish <i>AA - anodized aluminum</i> <i>111 - painted black</i> | <p>Worksurface stand-offs are for use primarily in the private office between work surfaces and wood case pedestals or lower storage. Worksurface stand-offs may also be installed in place of anti-tip wood spacer between worksurfaces and wood case pedestals or lower storage in storage anchored planning. Anti-tip wood spacer and stand-offs are both 1" h.</p> <p>Cabinet feet are for use with lower storage units in private office planning to achieve overall worksurface height of 29 3/8".</p> <p>Note: Free-standing cabinets on page 128 include cabinet feet.</p> <p>If you are planning to create an open knee space credenza with one storage unit on either end of the credenza, you would require 2 pairs of work surface stand-offs and 2 pairs of cabinet feet for each lower storage unit.</p> <p>When "ganging" units together to create "build-to-spec" credenzas, one pair of worksurface stand-offs and one pair of cabinet feet are required to span side-by-side units. For instance, if creating a credenza with 3 lower storage units, specify 4 pairs of stand-offs and 4 pairs of cabinet feet.</p> <p>Cabinet feet should not be used in spine-based or storage anchored planning models. Use only with wood case pedestals and laterals to achieve overall worksurface height of 29 3/8" (or 28 3/8" to underside of worksurface). Spine based and Storage Anchored planning model components are engineered at 27" from floor to underside of worksurface.</p> <p>To install cabinet feet, first remove leveller from pedestal or lower storage.</p> |

This Order Guide provides basic planning, specifications and pricing information for Crinion Open Tables.

Refer to KnollExtra price list for compatible accessories such as flat screen monitor supports, task lights, paper management accessories, keyboard and storage drawers.

Refer to Calibre, Reff or Currents price lists for shared and individual storage options. Additional information can be found at www.knoll.com.

Crinion Open Table is the straightforward alternative for open, collaborative work environments. The table accommodates a group of four to eight or more at a continuous work surface.

Crinion Open Table typically consists of deep worksurfaces end-to-end and back-to-back, cantilever supported by parallel beams between end legs. The beams form a technology corridor for flat screen monitor supports, outlets and power/data distribution. Also available is a single-sided configuration, with a single main beam and a smaller back beam.

Above the center of the table are optional privacy screens in tackable fabric, translucent or slatwall surfaces.

Crinion Open Table is appropriate for libraries and education environments, laboratories, finance and trading desks, teaming areas and design offices.

Crinion Open Table is unique in offering individual height-adjustability and extraordinarily deep worksurfaces. Overall dual table depth is 48", 60" or 72".

The table structure is strong enough to span 16 feet between end legs or intermediate supports to build tables of any length.

The continuous worksurfaces and clear kneespace enable varying numbers of workers to sit on each side. Storage is typically separated from the table in parallel, shared file-and-storage islands.

Crinion is distinguished by a minimalist, modern design, and details like square or tapered edge worksurfaces, plastic laminate, Techwood or natural veneers, and aluminum fittings.

Crinion Open Table simplifies the planning and specifications of an open office, and it can make a dramatic visual and functional statement of collaboration.

The quality and classic design of Crinion work well in virtually any interior.

Crinion Open Tables are comprised of worksurfaces, table base assemblies, power components and screens.

Worksurfaces

Individual worksurfaces are available in four standard widths (48", 60", 72", 96") and three depths (nominal 24", 30", 36"), which may be combined to form single-sided or dual-sided groups of two to ten or more positions.

Worksurface edge options

Worksurfaces are 1 1/4" thick, with three front edge options: Tapered edge, laminate, veneer or mixed.

Square edge, veneer

Postformed edge, laminate only

Power and accessory options

Worksurfaces may be specified with hinged power access door and continuous 1/2" cord drop, or edge grommet and continuous cord drop, or just cord drop.

Hinged power access door is 24"W and 5"D, centered on worksurface width. Door hinges toward user for continuity between access opening and cord drop.

Any worksurface (except end counters) accepts clamp on KnollExtra accessories such as flat screen monitor arm or task light.

Other worksurface types

End counters have front edge detail on side edges as well and are designed to extend dual tables 24" or 30" beyond the endleg. End counters also include 3" wide center grommet. Extended end counters are 36"D surfaces with center grommet or hinged power access door. Base of the table must be extended 12" under the back of each extended end counter (although top channels should be specified only as wide as the worksurfaces on each side of the table).

All end counters must be supported by end counter cantilevers and endlegs for end counters.

Worksurface heights

Fixed height cantilevers support worksurfaces at 28 1/2"H, with 27" clear below the top (except directly below cantilevers).

Adjustable height cantilevers enable worksurfaces to be independently set at 27", 27 3/4", 28 1/2", 29 1/4", or 30"H.

Open Table base assemblies

Complete base assemblies simplify specifications for most common configurations of dual or single-sided open tables. Base assemblies include top channels and end caps, beams, end legs and intermediate legs (where required), trusses and top channel supports, cantilever brackets (specify fixed or adjustable height) and midspan supports. Specify worksurfaces, screens, power components, cable trays and accessories separately.

Complete base assemblies are available for the following typical tables, combinations of 60" or 72" worksurfaces.

Single-sided or dual, 24"D, 30"D, or 36"D, with continuous beam span between end legs

10' W two/four positions 60"W

12' W two/four positions 72"W

15' W three/six positions 60"W

Single sided or dual 24"D, 30"D, or 36"D, with intermediate leg

18' W three/six positions 72"W

20' W four/eight positions 60"W

24' W four/eight positions 72"W

25' W five/ten positions 60"W

Open Table base components

Base assemblies may also be specified by individual components to create configurations other than those listed above, or to create tables with end counters or frameless glass add ups.

In addition to worksurfaces Open tables require top channel, starter beams for spans up to 15', extension beams for additional spans of 4' to 15', intermediate legs every 16' or less, two end legs, trusses at every worksurface junction and at each end leg. Adjustable tables require two cantilevers per worksurface (or three for 96"W). Fixed height tables may be supported by a fixed height cantilever at each end, shared cantilevers at each worksurface joint, and a midspan support bracket at the center of each worksurface greater than 48" wide. For 96"W worksurfaces the midspan support should be a 24"D cantilever. Power components, cable trays and screens are optional.

Power distribution

Optional modular raceway distributes 2+2 four circuit or 3+3 six circuit configuration from a single point of supply. Bundles of cables can be managed from the floor in a cable infeed shroud located at any intermediate leg. Raceway provides power outlets and data/communications outlet openings on one or both sides, accessed through hinged access doors in worksurfaces or from under table. Specify 30" raceway for two duplex outlets each side or 42" raceway for four duplex outlets each side. Duplex outlets, power infeed and jumpers between raceways must be specified separately.

Privacy screens

There are four screen options for Crinion Open Table.

The standard screens are 14"H (42" horizon) or 21"H (49" horizon) in acrylic, slatwall or combination surfaces. Center screens include mounting hardware to attach to the standard top channel. Center screens are available full width, 48", 60" or 72", or shorter by 1" to leave space at either end of the table for a dual end screen. Side screens attach to the front and back of a worksurface at any point other than at a hinged access door. Mounting brackets are specified separately to correspond to each worksurface edge detail. Dual end screens span across the end of a table (or above an end counter) from worksurface front edges.

Frameless glass add ups are available in 12" height only, 48", 60", and 72"W. Add ups can only mount to a top channel for frameless glass add ups, which may be at the center of a dual table or back of a single-sided table.

Original Crinion privacy screens are 12"H or 19"H (41" or 48" horizons) and mount to a standard top channel only.

Morrison Network fabric screens (15"H or 22"H) can also be mounted to the standard top channel with Crinion Open Table mast kit.

Accessories and storage

All Crinion worksurfaces accept clamp base KnollExtra flat screen monitor arms and task lights at any point except behind the hinged power access door. Worksurfaces also accept suspended accessories like adjustable keyboard supports, BackPack center file or keyboard drawers, or CPU holders. Beam location under most tables prevents pedestals deeper than 20" underneath. However 36"D tops can be planned on 30"D table bases to create additional kneespace depth and room for 24"D pedestals.

Crinion Open Table file tops are available for 27"H Calibre files positioned perpendicular to the table to act as returns. Tapered front and back edges assure consistent detail with tapered worksurface edges. File tops are also available for pairs of files and back to back files.

Customers Own Material

Prices for panels that are to be manufactured with a customer supplied fabric will follow Grade 10 panel pricing. COM fabrics are subject to a testing charge prior to acceptance for use on panels. Panels bearing COM fabrics are subject to extended leadtimes. It is the responsibility of the customer's purchasing agent to ensure COM fabric is supplied for testing and manufacturing. Delays in receiving COM fabric for manufacturing will result in rescheduled delivery dates.

| Order Code | Specifications | Application Notes |
|--|--|---|
| Example: XTPP6030AL 118 | | |
| XT Crinion Open Table | Worksurfaces are 1 1/4" thick with square edge or tapered edge option tapering to 1/2" thick front edge. | Crinion 30"D worksurfaces correspond in width to table bases, which are specified separately. |
| T Worksurface | | 48"W worksurfaces plan on 12' wide or 20' wide bases. 60"W worksurfaces plan on 5', 10', 15' and 20' wide bases. 72" W worksurfaces plan on 6', 12' and 18' wide bases. |
| P Postformed plastic | Specify finishes: L - Laminate M - Laminate/veneer edge | Power access door is 24" wide, 5" deep, centered at back edge of worksurface. |
| 60 Width | 1 - Veneer group 1 2 - Veneer group 2 | Continous 1/2" wire drop accommodates clamp-on flat screen monitor arm or most power cords plugs. |
| 30 Depth | 3 - Veneer group 3 | Actual worksurface depth is 22.35", 28.35" or 34.35". |
| A With center hinged power access | | Worksurfaces with hinged power access enable access to suspended modular raceway. |

| Order Code | Specifications |
|--------------------------------|----------------|
| Example: XTPP6030BL 118 | |
| XT Crinion Open Table | |
| T Worksurface | |
| P Postformed plastic | |
| 60 Width | |
| 30 Depth | |
| B With edge grommet | |
| L Finish type | |
| 118 Surface | |

Worksurfaces are 1 1/4" thick with square edge or tapered edge option tapering to 1/2" thick front edge.

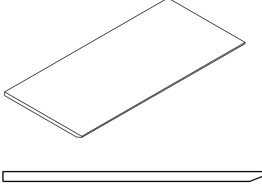

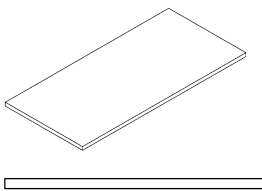

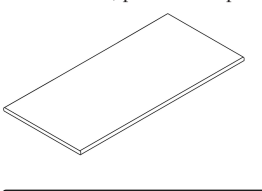

Specify finishes:
 L - Laminate
 M - Laminate/veneer edge
 1 - Veneer group 1
 2 - Veneer group 2
 3 - Veneer group 3

Application Notes

Crinion 30"D worksurfaces correspond in width to table bases, which are specified separately. 48"W worksurfaces plan on 12' wide or 20' wide bases. 60"W worksurfaces plan on 5', 10', 15' and 20' wide bases. 72" W worksurfaces plan on 6', 12' and 18' wide bases.

Edge grommet accommodates most power cord plugs up to 1" deep.

Actual worksurface depth is 21.85", 27.85" or 33.85".

Order Code

| |
|--------------------------------|
| Example: XTPP6030CL 118 |
| XT Crinion Open Table |
| T Worksurface |
| P Postformed plastic |
| 60 Width |
| 30 Depth |
| C With cord drop |
| L Finish type |
| 118 Surface |

Specifications

Worksurfaces are 1 1/4" thick with square edge or tapered edge option tapering to 1/2" thick front edge.

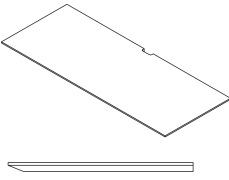

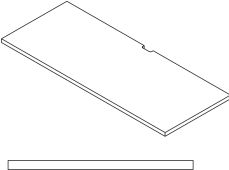

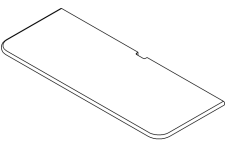

Specify finishes:
 L - Laminate
 M - Laminate/veneer edge
 1 - Veneer group 1
 2 - Veneer group 2
 3 - Veneer group 3

Application Notes

Crinion 30"D worksurfaces correspond in width to table bases, which are specified separately. 48"W worksurfaces plan on 12' wide or 20' wide bases. 60"W worksurfaces plan on 5', 10', 15' and 20' wide bases. 72" W worksurfaces plan on 6', 12' and 18' wide bases.

Continuous 1/2" cord drop accommodates clamp-on flat screen monitor arm or most power cords.

Actual worksurface depth is 21.85", 27.85" or 33.85".

Order Code

| |
|--------------------------------|
| Example: XTTP6024EL 118 |
| XT Crinion Open Table |
| T Worksurface |
| P Postformed plastic |
| 60 Width |
| 24 Length |
| E End counter |
| L Finish Type |
| 118 Surface |

Specifications

End counters are 1 1/4" thick with square edge or tapered edge option tapering to 1/2" thick front edge. End counters are tapered front and side edges only.

Specify finishes:
 L - Laminate
 M - Laminate/veneer edge
 1 - Veneer group 1
 2 - Veneer group 2
 3 - Veneer group 3

Application Notes

End counters mount at the ends of dual tables with two end counter cantilever brackets. Specify dual end legs for end counters instead of standard dual end legs (tables with end counters are tapered front and side edges only).

Specify 48" W for dual 24" tables, 60" W for dual 30" tables and 72" W for dual 36" tables.

Specify added length of 24" or 30" beyond end leg for end counters.

* Note - End counters for postformed plastic are not available in these finishes:
 121 Micro grey
 129 Micro sand
 122 Brushed sand
 123 Brushed grey

| XT Crinion Open Table |
| T Worksurface |
| P Postformed |
| 42 Width |
| 18 Depth |
| F File top |
| L Finish type |
| 118 Surface |

Specifications

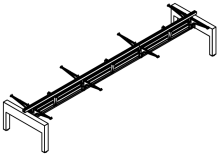

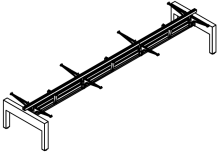

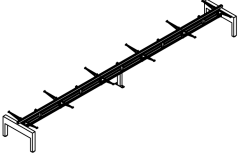

File tops are 1 1/4" thick with square edge or tapered edge option tapering to 1/2" thick front edge. Tapered edge file tops are tapered front and back edges only.

Specify finishes:
 L - Laminate
 M - Laminate/veneer edge
 1 - Veneer group 1
 2 - Veneer group 2
 3 - Veneer group 3

Application Notes

File tops correspond to 30", 36" or 42"W lateral files. File tops on 2 high Calibre files positioned perpendicular to the Crinion Open Table serve as a worksurface return.

Order Code

| | |
|------------|---------------------------|
| Example: | XTB1BAS24D10CF 613 |
| XT | Crinion Open Table |
| B1 | Base components |
| BAS | Assembly |
| 24 | Depth |
| D | Dual |
| 10 | Width |
| C | Continuous |
| F | Fixed height |
| 613 | finish |

Specifications

Base assemblies include end legs, beams, trusses, cantilever brackets, channels and end caps.

Fixed height base assemblies have shared cantilever brackets for adjacent worksurfaces and midspan support brackets for every worksurface.

For legs and cantilever brackets specify one paint finish for all.

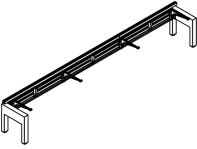

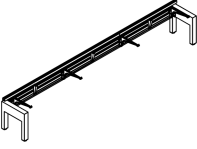

Application Notes

Complete base assemblies include all base components necessary to support worksurfaces. Specify screens, power components and cable trays separately. Base assemblies include end legs, intermediate leg (where required), beams, trusses, cantilever brackets, mid span support brackets, top channel and end caps.

No table on this page has beams longer than 15'.

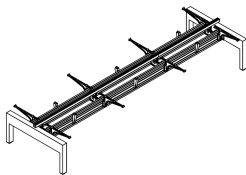

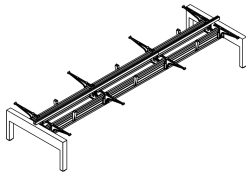

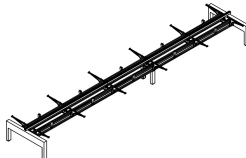

Base assemblies correspond to:
 10': four 60"x24"D worksurfaces
 12': four 72"x24"D worksurfaces
 15': six 60"x24"D worksurfaces
 18': six 72"x24"D worksurfaces
 20': eight 60"x24"D worksurfaces
 24': eight 72"x24"D worksurfaces
 25': ten 60"x24"D worksurfaces

Specifications

Base assemblies include end legs, beams, trusses, cantilever brackets, channels and end caps.

Fixed height base assemblies have shared cantilever brackets for adjacent worksurfaces and midspan support brackets for every worksurface.

For legs and cantilever brackets specify one paint finish for all.

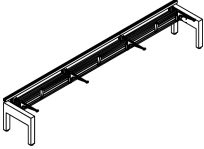

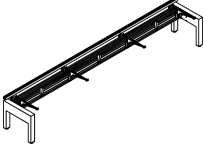

Application Notes

Complete base assemblies include all base components necessary to support worksurfaces. Specify screens, power components and cable trays separately. Base assemblies include end legs, intermediate leg (where required), beams, trusses, cantilever brackets, mid span support brackets, top channel and end caps.

No table on this page has beams longer than 15'.

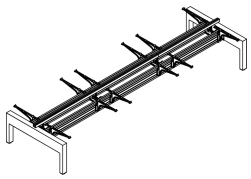

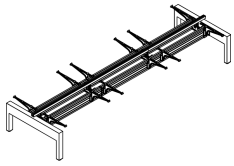

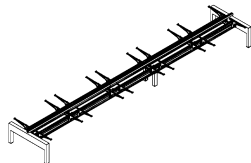

Base assemblies correspond to:
 10': four 60"x30"D worksurfaces
 12': four 72"x30"D worksurfaces
 15': six 60"x30"D worksurfaces
 18': six 72"x30"D worksurfaces

| | |
|--------------------------|--------------------|
| Example: XTC1120A | |
| XT | Crinion open table |
| C1 | Top channel |
| 120 | Width |
| A | Finish |

Specifications

Top channels are extruded aluminum with natural anodized finish.

Top channel end caps are die cast aluminum.

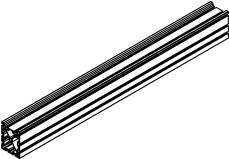

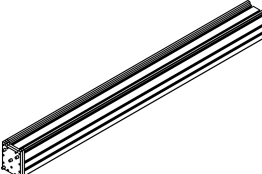

Application Notes

Crinion Open Table top channel supports privacy screens and suspended raceway components at any point. Top channel is required at the center of dual tables.

Top channels and end caps are included in complete base assemblies.

Top channels correspond in width to one or two worksurface widths.

Beams for single sided or dual tables 24" D

| Example: XTB1TB15C | |
| XT | Crinion Open Table |
| B1 | Base components |
| TB | Dual beam set |
| 15 | Width |
| C | Starter |

Specifications

Beams are extruded aluminum with natural anodized finish.

Application Notes

Crinion Open Table bases are assembled from beams, end legs, intermediate legs and trusses.

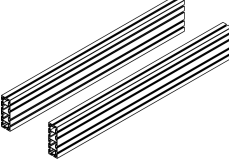

Beam sets can be used with either dual or single sided tables. Table bases require one starter beam and extension beam adding up to the length as the sum of the worksurface widths on one side.

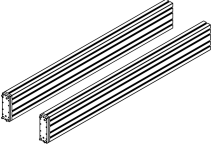

Extension beam sets are specified only to add on to starter sets or other extension beams.

Beam sets must be supported by intermediate legs at least every 16'. Intermediate leg must be positioned at beam truss location, where two worksurfaces meet.

Beams for dual tables

30" and 36" D

| description | nominal | w | | h | pattern number | list price |

Specifications

Beams are extruded aluminum with natural anodized finish.

Beam sets are starter or extension.

Extension beam sets are specified only to add on to starter sets or other extension beams.

Application Notes

Crinion Open Table bases are assembled from beams, end legs, intermediate legs and trusses. Beam sets may be used with either worksurface depth. Single sided tables require one pair of main beams of the same nominal width as the sum of the worksurfaces on each side.

Beam sets must be supported by intermediate legs at least every 16'. Intermediate leg must be positioned at beam truss location, where two worksurfaces meet.

| XT | Crinion Open Table |
| R1 | Raceway |
| T | Ten wire system |
| 42 | Width |
| 4 | Extra outlets |
| D | Dual Raceway |
| 613 | Finish |

Specifications

Ten wire 3+3 has two sets of three circuits, each set with a separate ground and neutral.

Specify paint finish code after pattern number.

Covers have two openings for data/com outlet modules (Decora-size, specified separately).

Application Notes

Raceway for Crinion Open Table is suspended from the top channel. For ideal access, worksurfaces should be specified with hinged power access.

Each raceway requires four or eight duplex outlets, on any of six circuits.

Jumpers connect power from one raceway to another.

To join power between 42" raceways: specify 18" jumper for 60" desks and 30" jumper for 72" desks.

Flat end covers enclose the end of a raceway at the end of a table.

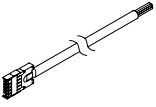

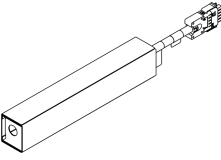

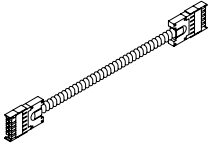

Extended end covers enclose the end of a raceway at the end of a table where power infeed is located.

To join power between 30" raceways: specify 30" jumper for 60" desks and specify 42" jumper for 72" desks.

| 613 Finish |

Specifications

Specify paint finish code after pattern number.

Hardwired raceway components are designed for use in City of Chicago installations.

Covers have two openings for data/com outlet modules (Decora-size, by others).

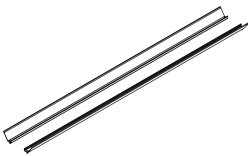

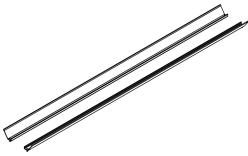

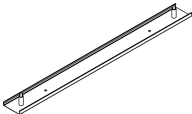

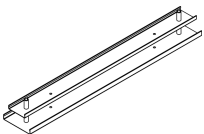

Application Notes

Raceway for Crinion Open Table is suspended from the top channel. For ideal access, worksurfaces should be specified with hinged power access.

Dual raceways are code-approved boxed with openings for two or four duplex outlets on each face, plus two additional openings for data/communications faceplates on each face. A continuous horizontal metal septum divides power wires and connections from data and communications cables. Each raceway requires Decora-type architectural power outlets, internal wiring and connecting cables, supplied by electrical contractor.

Flat end covers enclose the raceway at the end of a table. Extended end covers provide an opening on the underside to permit cables to enter the raceway.

Specify outlet filler plates for unused outlet openings. Specify PDC extenders to create space behind data/com for cable distribution inside dual raceway.

| A | Acrylic |
| O | Opal |

Specifications

- Specify surface
A = Acrylic
V = Veneer
- For Acrylic surface specify
O = Opal
 Veneer surfaces may be any standard AutoStrada V1, V2 or V3 veneer.
 Specify veneer finish code from Crinion Open Table.
 Frame is clear anodized aluminum.

Application Notes

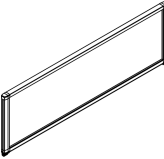

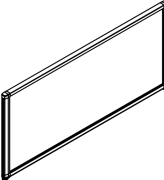

Return screens span the depth of Crinion Open Table worksurfaces and the width of a 30", 36" or 42" worksurface planned as perpendicular return. Specify 14" H screens for 43" horizon. Specify 21" H screens for a 50" horizon. Returns must be at the same height as worksurface.

Specify side brackets separately.

Veneer grain direction is horizontal.

| 14 | Height |
| F | Surface |
| W280 | Fabric |

Specifications

1. Tackable fabric surface is suffix F.
 2. Select fabric surface finish code from list on page Crinion Open Table.
- Frame is clear anodized aluminum.
Fabric is railroaded.

Application Notes

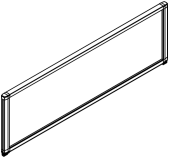

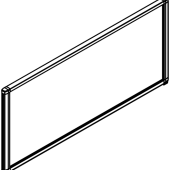

Fabric return screens span the depth of Crinion Open Table worksurfaces and the width of a 30", 36" or 42" worksurface planned as perpendicular return. Specify 14" H screens for 43" horizon. Specify 21" H screens for a 50" horizon. Returns must be at the same height as worksurface.

Specify mounting brackets separately.

| X | Crinion Open Table |
| AUA | Frameless addup screen |
| 48 | Width |
| 12 | Height |
| G | Glass |
| TEMP | Finish |

Specifications

Add up type:
G Glass

Glass add-ups are available with the following glass options:
TEMP Clear tempered
GLI3 Powder

Application Notes

Frameless glass addups for Crinion Open Table match those available for the AutoStrada spine.

Tempered glass in clear or powered finish is 1/2" thick. Base frame is secured with bolts to top channel for frameless glass addups.

Frameless addups cannot be mounted to standard top channel included with base assemblies.

Base extrusion is clear anodized aluminum.

Selling Policy

| | |
|--|---|
| | <p>This Selling Policy supercedes all previous selling policies. Prices, discounts and product offerings are subject to change without notice.</p> |
| Terms & Conditions of Sales | <p>Sales by Knoll, Inc. or Knoll North America Corp. ("Seller") of Knoll Product Lines (hereinafter "Products") within the United States and Canada are made only on the terms which are contained in this Selling Policy. Seller hereby gives notice of its objection to any different or additional terms and conditions. This sale is expressly conditional upon Purchaser's assent to the terms and conditions set forth below. Additional terms and conditions may apply to KnollStudio and KnollTextiles orders. These terms and conditions may be modified or supplemented only by a written document signed by an authorized representative of Seller. These terms and conditions supercede any prior and/or contemporaneous agreements or correspondence between Purchaser and Seller. Written quotations expire thirty (30) days from the date of issuance and can be withdrawn by written notice anytime during that period. Where Purchaser and Seller have entered into the Knoll Electronic Terms and Conditions, all orders, acknowledgements, invoices and other business communications placed or transmitted in accordance with the Knoll Electronic Terms and Conditions shall be deemed to be in writing and signed and shall be valid for all purposes as if they were originated and maintained in documentary form.</p> |
| Ordering Information | <p>All orders must be in writing. The product pattern number(s) contained on Seller's order acknowledgement shall be the final expression of the order.</p> |
| Order Confirmation | <p>A purchase order is not binding on Seller until Purchaser has received Seller's order confirmation or acknowledgment.</p> |
| Pricing Policies | <p>List prices are subject to change without notice.</p> <p>List prices shall be those prices in effect on the date of receipt of a complete purchase order unless shipment is requested more than ninety (90) days after order entry in which case prices in effect on the date of shipment apply. List prices include specified freight costs. Unless specified in writing by Seller, no other charges are included in Seller's list prices.</p> |
| Taxes | <p>All sales, use, excise and other taxes applicable to the sale of the Products shall be paid by Purchaser. If Purchaser claims an exemption from any tax, Purchaser shall submit to Seller the appropriate exemption certificates.</p> |
| Terms of Payment | <p>Payment for one hundred percent (100%) of the net order amount is due within thirty (30) days of the date of invoice, which is issued upon shipment. In case of any discrepancies, such as shortages, and Seller is notified in writing within ten (10) days of receipt of Product, only that portion may be deducted and the balance paid. For orders greater than \$100,000 net, a one-third (1/3) deposit is due at the time of order placement, with the remainder due within thirty (30) days of the date of invoice.</p> <p>KnollStudio orders less than \$2,000 require payment for one hundred percent (100%) of the net order amount (including any applicable sales tax and charges for inside delivery, special packaging, etc.), due at time of order placement. For KnollStudio orders greater than \$2,000, a one-half (50%) deposit is due at time of order placement with the remainder (including any applicable sales tax and charges for inside delivery, special packaging, etc.) due prior to shipment.</p> <p>If, in the judgment of Seller, Purchaser's financial condition does not justify the terms of the payment, Seller may require full or partial payment in advance.</p> <p>Past due accounts shall be charged one and one-half percent (1.5%) per month, or the highest rate permitted by law, whichever is less, and will be added to the outstanding balance. In the event Purchaser defaults on payment, Purchaser shall be liable for all collection costs, including reasonable attorney's fees and costs.</p> |
| Changes and Cancellation | <p>Purchase orders may not be changed or cancelled, in whole or in part, without prior written consent of Seller. Changes may effect delivery dates. Expenses incurred because of changes shall be charged to Purchaser. In the event of cancellations, Purchaser will be liable for reasonable cancellation charges established by Seller. Orders for special Product, orders including "COM" (hereinafter defined) material and orders pursuant to expedited delivery programs, may not be canceled.</p> |
| Freight Prepaid | <p>Freight is prepaid and included in the price of all Products, except KnollTextiles, within the 48 contiguous United States and Canada, excluding the Yukon, Northwest Territories, Nunavut and Newfoundland. Packing is tested for rigorous motion and transportation but is not guaranteed to protect furniture from conditions over which the Seller has no control. If special packaging is required for any reason, please consult with your sales representative or dealer. Seller shall select the method of shipment and routing. All shipments shall be tailgate deliveries. Freight for all KnollTextiles orders is prepaid and added to the invoice.</p> |
| Delivery/Freight Charges | <p>Shipments outside the contiguous 48 United States and Canada shall be shipped F.O.B. Origin.</p> <p>For shipments outside the contiguous United States and Canada, Purchaser is responsible for the cost of freight from point of embarkation, including any handling and transportation charges incidental to loading at the point of departure and unloading at the final destination.</p> <p>Conditions beyond the control of Seller, including weather, available facilities and traffic conditions, may affect exact time of delivery. Seller shall not be responsible for specific carrier delivery date or time unless it has made a specific delivery commitment, in writing.</p> <p>Nonstandard methods of shipment and/or additional services are available upon request. Purchaser will be billed for the differential cost of any special services in excess of standard surface carrier freight costs. Premium charges, at Purchaser's request, will be added for airfreight, exclusive use of vehicle and extra, export or special packaging. Accessorial charges will be added for inside delivery, extra labor, reconsignment and redelivery.</p> <p>Partial shipments may be made and invoiced by Seller.</p> |
| Claims | <p>All shipments for all Knoll Products within the contiguous United States and Canada are F.O.B. Origin. Risk of loss passes to Purchaser at time of delivery to carrier. Purchaser shall inspect all Products upon receipt and notify Seller within ten (10) working days after receipt of any damage or defects which are, or should be, apparent from an inspection of the Product and its packaging. Failure of Purchaser to make a claim against carrier or notify Seller during the ten (10) working day period shall constitute acceptance of the Products and waiver of any apparent defects, errors or shortages. Seller will agree to repair or replace Product damaged in shipment if Purchaser has notified Seller of freight damage within ten (10) working days after receipt and assigns its rights against the carrier.</p> |
| Seller's Security Interest | <p>Until Seller receives the full payment for the Product, Seller shall have a security interest in the Product. Purchaser agrees to perform all acts, including but not limited to the execution and filing of documentation, which may be necessary to perfect and assure the security interest of Seller.</p> |
| Returns | <p>The return of Products without a written authorization by Seller shall not be accepted. To receive authorization for Product return, please call Customer Service. All Products that are returned pursuant to a valid authorization shall be subject to a twenty-five percent (25%) of list restocking charge. Products not currently offered for sale by Seller (including COM) shall not be authorized for return. All returned Products must be unused, in original condition and in the original Seller packing cartons. No refund or credit shall be given for damaged Products.</p> |
| Held Orders/Storage | <p>If Purchaser requests that an order be held or delayed, prices and terms and conditions in effect at the time of shipment shall apply. If Purchaser requests a delay after the time when Seller can defer production, Purchaser will be invoiced for the Product, payable in accordance with standard terms, when the order is ready for shipment. Seller may transfer the Product to storage, in which case all expenses incurred in connection with storage, including demurrage, preparation for storage, storage charges and handling shall be payable by Purchaser upon submission of invoices by Seller. Risk of loss to the Product shall pass to the Purchaser upon delivery of the Product into storage.</p> |

Selling Policy

| | |
|---------------------------------|--|
| Customer's Own Material | <p>A Purchaser who requests a fabric or other surface material not standard to Seller's line of Products ("COM") must submit samples of the requested material to Seller prior to entry of a purchaser order. Seller shall determine if the material is suitable to its manufacturing processes and meets any requirements of Underwriters Laboratories. If the COM is acceptable, Seller will then establish a price for using the COM or the Product in question. For a description of the procedures for submitting samples and testing, contact customer resources or your sales representative. Seller shall have no responsibility for the appearance, condition, performance, durability, colorfastness or any other physical attribute of the COM. Purchaser shall indemnify and hold Seller harmless for any damages, injuries or losses arising out of or related to use of the COM on the Product.</p> |
| Warranty | <p>Seller warrants to the original Purchaser only that the Products Seller manufactures and sells to Purchaser are free of defects in workmanship and materials, during the applicable warranty period set forth below.</p> <p>Should any failure to conform with this limited warranty appear to a Product listed below during the applicable warranty period from the date of shipment, Seller shall, upon prompt written notice, repair or replace, at its option and costs, the affected part or parts.</p> <p><i>Product and Period of Warranty</i></p> <p><i>Lifetime: AutoStrada, Calibre, Crinion Open Table, Currents, Dividends, Equity, Morrison, Reff</i> laminate and other non-wood components (except cascade edge worksurfaces, operational parts, controls, electrical, special or custom products, see below)</p> <p><i>10 Years: AutoStrada, Crinion Open Table and Reff</i> wood components, wood casegoods, <i>Interaction</i> tables (except height adjustment mechanisms for <i>Counterforce</i>, crank-adjustable, and split-top tables and worksurfaces, see below), <i>Reuter</i> overheads, <i>Reuter</i> vertical storage, <i>Bulldog, Chadwick, Essentials Work Chairs, Life, RPM</i> and <i>Sapper</i> seating structural and operational parts, controls, casters, pneumatic cylinders, seat and back mesh (except seating upholstery, finishes and labor, see below)</p> <p><i>5 Years:</i> Operational parts, controls, electrical (except light ballasts and bulbs, see below), cascade edge worksurfaces, special or custom product, wood veneer products, <i>A3, Currents</i> handcrank, <i>Interaction Counterforce, Interaction</i> crank-adjustable, and split-top mechanisms, <i>KnollStudio, KnollExtra</i> adjustable keyboard supports, VDT carousel, monitor platform, equipment storage drawers and all universal storage drawers, <i>Open Up, Visor</i> and <i>SoHo</i> seating structural and operational parts, controls, pneumatic cylinders (except seating upholstery, finishes and labor, see below)</p> <p><i>3 Years:</i> Upholstery, finishes and labor to repair the following chairs: <i>Bulldog, Chadwick, Life, Open Up, Parachute, RPM, Sapper</i> and <i>SoHo</i>.</p> <p><i>2 Years:</i> All other <i>KnollExtra</i> product</p> <p><i>1 Year:</i> Light ballasts and bulbs and <i>Equity</i> fiberglass panels, seating upholstered armpads and soft armpads, <i>Visor</i> finishes and labor to repair.</p> <p>This warranty does not apply to:</p> <ul style="list-style-type: none">• Damage caused by a carrier other than the Seller.• Normal wear and tear or acts or omissions of parties other than Seller (including user modification).• COM or other third party materials applied to Products.• Products not installed by or under the auspices of a certified dealer of Seller.• Dramatic temperature variations or exposure to unusual conditions.• Except as specifically noted above, textiles and upholstery supplied by <i>KnollTextiles</i> (consult current <i>KnollTextiles</i> price list for applicable warranty).• Labor to repair or replace Essential Work Chairs affected part or parts. <p>Natural variations occurring in wood, marble, and leather shall not be considered defects, and the Seller does not guarantee the colorfastness or matching of the colors, grains or textures, or surface hardness of such materials. The Seller also does not guarantee the colorfastness of fiberglass panel surfaces. THE EXPRESS WARRANTIES CONTAINED HEREIN ARE IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSE AND ALL OTHER WARRANTIES ARISING FROM COURSE OF DEALING OR USAGE OF TRADE.</p> <p>The remedies provided above are the Purchaser's sole remedies for any failure of Seller to comply with its obligations regarding the workmanship of its Products. Correction of any nonconformity in the manner and for the period of time provided shall constitute complete fulfillment of all liabilities of Seller, with respect to or arising out of the Product furnished hereunder.</p> |
| Delay/Force Majeure | <p>Seller shall not be liable for failure to perform or for delay in performance due to fire, flood, strike or other labor difficulty, act of God, act of any governmental authority or of the Purchaser, riot, embargo, fuel or energy shortage, wrecks or delay in transportation, inability to obtain necessary labor, materials or manufacturing facilities from usual sources or failure of suppliers to meet their contractual obligations, or due to any cause beyond its reasonable control. If any such event occurs, Seller may extend delivery dates by a period of time necessary to overcome the effect of such delay, allocate available Product or cancel any purchase order.</p> |
| Compliance with Law | <p>PURCHASER IS SOLELY RESPONSIBLE FOR COMPLIANCE WITH ALL APPLICABLE FEDERAL, STATE AND LOCAL LAWS, ORDINANCES, REGULATIONS, RULES AND STANDARDS RELATING TO THE INSTALLATION, MAINTENANCE, USE AND OPERATION OF THE PRODUCTS.</p> |
| Patents | <p>Subject to the following provisions, Seller shall, at its own expense, defend or, at its option, settle any claim, suit or proceeding brought against the Purchaser, and/or its vendees, mediate and immediate, so far as based on an allegation that any Product or any part thereof furnished hereunder constitutes a direct or a contributory infringement of any claim of any patent of the United States or Canada. This obligation shall be effective only if Purchaser shall have made all payments then due hereunder and if Seller is notified promptly in writing and given authority, information and assistance for the defense of said claim, suit or proceeding. Seller shall pay all damages and costs awarded in such suit or proceedings so defended.</p> <p>The foregoing indemnity does not apply to the following:</p> <ul style="list-style-type: none">• Products supplied according to a design other than that of Seller, and which is required by the Purchaser.• Combination of the Product with another product not furnished hereunder unless Seller is a contributory infringer.• Any settlements of a suit or proceeding made without Seller's written consent. |
| Limitations of Liability | <p>SELLER, ITS CONTRACTORS, AUTHORIZED DEALERS AND SUBCONTRACTORS OR SUPPLIERS OF ANY TIER SHALL NOT BE LIABLE TO PURCHASER FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING FROM A BREACH OF THIS AGREEMENT.</p> <p>Purchaser's remedies set forth herein are exclusive and the liability of Seller with respect to the breach of this agreement or any contract entered into between the parties pursuant hereto shall not exceed the price of the Product or part on which such liability is based.</p> |

KnollKey Lock Program

KnollKey Lock Program General Information

Following is the KnollKey lock policy, applicable to all products.

Key-alike

For the convenience of the user, furniture may be keyed alike at no charge. Write "Key-alike" in the description of your purchase order for any pedestal, overhead, file or other item you wish to have keyed alike.

Using the key-alike instructions, order cores and keys as line items on your purchase order. Do NOT submit a key-alike form. The Knoll East Greenville Lock Center will select key numbers from the standard range of K 001 - K 250. Key numbers will not be repeated unless over 250 sets are ordered. Lock cores keyed-alike will ship separately from the product, ready for field installation.

There is no charge for key-alike orders if placed with the furniture order.

IF THE KEY-ALIKE ORDER IS NOT PLACED AT LEAST TWO WEEKS PRIOR TO THE FURNITURE SHIP DATE, A \$50 HANDLING CHARGE AND AIR FREIGHT CHARGES WILL APPLY.

If product is ordered and shipped random-keyed, additional lock cores for key-alike are billable.

Random-Keying

To specify product keyed-random, write "key-random" in the product description. Random-keyed product is shipped with the lock core factory installed. A shrouded key is included. Random means no effort has been made to match key numbers, or to make them different.

Keys

A Knoll shrouded key is shipped with every lock core. 250 Key numbers are available. For numbers above 250, contact Custom Product Development. Additional keys and key blanks are available. See service parts for more information.

Master Keying

Knoll locks can be controlled by means of a master key. There is no additional per-lock charge for master keying. A letter of approval from the client must accompany orders for master keys.

Installing Lock Cores

Lock cores can be installed or removed in the field by using a change key. Cores must be in the unlocked position to be removed. See service parts for change key pattern number and pricing.

Lock Distribution

All orders for key-alike lock cores/keys are packaged and shipped from the East Greenville Lock Center, regardless of where the pedestals, overhead, or other units are produced. Random keyed product will have cores factory-installed.

How to Specify Key-Alike

Following is an example of how to specify key-alike for a cluster of 10 workstations.

Step 1 - Using the project floorplan, count the number of locks in each workstation.

Step 2 - Count the number of workstations with the same quantity of locks. Group together the workstations with a like number of locks.

5 workstations with 2 locks per station
3 workstations with 4 locks per station
2 workstations with 5 locks per station

Step 3 - For the first group (5 sets of 2 locks), enter the number of workstations in the quantity column.

| Qty | Pattern # | Description | Unit List | Ext. List |
|-----|-----------|-------------|-----------|-----------|
| 5 | | | | |

Step 4 - Then enter the pattern number "KSPEC_ _" and add a suffix for the number of locks for that group (i.e., for 2 locks per station, add the suffix "2"). Up to 30 lock cores are available in a set (i.e., KSPEC 30).

| Qty | Pattern # | Description | Unit List | Ext. List |
|-----|-----------|---------------------|-----------|-----------|
| 5 | KSPEC 2 | Set of 2 cores/keys | N / C | N / C |

Step 5 - Repeat for other groups.

| Qty | Pattern # | Description | Unit List | Ext. List |
|-----|-----------|---------------------|-----------|-----------|
| 5 | KSPEC 2 | Set of 2 cores/keys | N / C | N / C |
| 3 | KSPEC 4 | Set of 4 cores/keys | N / C | N / C |
| 2 | KSPEC 5 | Set of 5 cores/keys | N / C | N / C |

Your Key instructions are complete.

Knoll will select key numbers for each set from 250 available numbers. Additional key numbers are available through Custom Product Development. **For additions to existing installations, specify desired key numbers in the description.**

Service Parts

| Pattern # | Description | List Price |
|-------------|---|------------|
| KKEY_ _ _ | Shrouded Key Specify key number desired | \$5 |
| KBLANK | Shrouded Key Blank | \$5 |
| KSPECB_ _ _ | Retrofit Universal Core/Key Specify key number desired | \$18 |
| KCHANGE | Change Key | \$5 |
| KMASTER* | Master Key | \$5 |

*Note: A letter of approval on company letterhead from the client must accompany all orders for master keys.

General Ordering Information

The Products

This guide encompasses all standard products for this product group.

Sizes

Dimensions listed in this guide are indicated as:

H = height

W = width

D = depth

Dia. = diameter

Rad. = radius

Pricing

All prices shown are list.

How to Order

Select pattern numbers and quantities required for your complete installation. Product questions can be addressed in the specific sections of this guide or by contacting your sales representative or customer resource representative at 1-800-343-5665.

Next, select options (if required), along with colors and finishes appropriate to each product. Reference the Finishes and Fabrics pages for color designations.

On large installations, an item's "designated area" can be specified to assist in product organization and handling.

To expedite complete / correct entry of your order, be certain all pattern numbers, quantities, colors and area identifications are completely specified. Also, include complete purchase order numbers, bill-to and ship-to addresses, a contact name and specific factory shipping dates required.

Mail all orders to:

Knoll, Inc.

1235 Water Street

P.O. Box 157

East Greenville, PA 18041

Attention: Order Entry

Once your order is entered at Knoll, an acknowledgment will be mailed to you. You will be advised of your scheduled shipping date within five days of the original acknowledgment. If it is necessary to revise your order, please contact your customer resource representative.

Sustainability Statement

Sustainable design is a key component of Knoll's environmental focus. Our commitment to social responsibility and a healthy environment has prompted us to further articulate our longstanding environmental programs and, with encouragement and support from our colleagues in the industry, we have re-energized our focus on such "green" initiatives as life cycle analysis and LEED™ certification. Knoll is proud to have contributed to projects that have received LEED certification from the U.S. Green Building Council.

For the latest information on Knoll products that help our customers achieve LEED certification, log on to knoll.com, click on "About Knoll" and then "Environmental Focus."
