

Lovegrove Round Table
Ross Lovegrove

LOVEGROVE ROUND TABLE Recognized for forward-thinking, organically-inspired products shaped in innovative materials, Ross Lovegrove achieves a new level of clarity with his collection for KnollStudio. Lovegrove round tables are available in a range of finishes, including laminate, bamboo, Starphire™ clear glass, and acid-etched or bronze glass. Lovegrove's signature tubular steel base is also available in a variety of paint finishes. Versatile in scope, Lovegrove round tables can be specified to suit a variety of contract and residential applications.

ROSS LOVEGROVE Ross Lovegrove studied design at Manchester Polytechnic and subsequently trained at the Royal College of Art in London. At frog design, he contributed to the design of the Sony Walkman and Apple computers. As an in-house designer for Knoll International in Paris, Lovegrove worked on the Alessandri office system. As a co-member of the Atelier de Nimes, along with Philippe Starck and Jean Nouvel, he acted as a design consultant to Luis Vuitton, Cacharel, Dupont and Hermès. In 1990, he created Studio X in London. Lovegrove is inspired by forms of the natural world, the possibilities of new manufacturing techniques and the ability to evoke an emotional response in users.
