

# Spaces, Inc.

## Sector Focus: Knoll Dealer

Founded as an interior architectural and space-planning firm in 1987, Spaces, Inc. specializes in providing solutions for workplace environments. A full-line dealer of Knoll furniture, Spaces is committed to meeting its clients' business goals by offering dedicated service teams and presenting creative solutions to their individual project needs. When Spaces, Inc. outfitted its new offices in Lenexa, KS, the firm sought a Knoll system that would satisfy an expansive workspace plan, while incorporating outdoor light. The solution: a custom blend of Dividends Horizon® and AutoStrada™ panels to define boundaries in the open plan while complementing

the open architecture of the office. Dividends Horizon® Open Weave Fabric screens, cover, offer transparency without obstructing views to the exterior landscape and facilitate interaction in a collaborative work environment. With its light aesthetic and Open Weave Back Suspension Fabric, Life® seating adds fluidity to the space. AutoStrada™ storage-anchored panels, left, delineate work units and establish an overarching geometry throughout the office. Tubular steel Wassily seating and a Laccio table by Marcel Breuer, right, engage with the rectilinear space, creating a focal centerpiece in the lounge area.
