

Product Overview

Crypton Green

- These fabrics combine post-consumer recycled polyester fibers with an optimized chemistry for reduced environmental impact and increased human safety.
- The re-engineered fabric system underwent evaluation to prove its safety, resulting in SCS Indoor Advantage™ certification.
- Crypton Green also supports renewable energy. In order to offset energy used for every yard produced, Green-e certified energy certificates are purchased to fund the expansion of renewable energy resources.
- Stain, liquid, odor and bacteria resistance, so that nothing penetrates the fabric into the cushion.
- All KnollTextiles non-recycled Crypton products also utilize this optimized chemistry, resulting in low volatile organic compound (VOC) emissions.

Cleaning Code

W - water-based cleaning agents or foam may be used for cleaning this fabric.
