

Rose State College

In celebration of their 50th anniversary, Rose State College of Midwest City, Oklahoma scheduled the construction of a 48,000 square foot building to replace the original student union. Architect and interior designer Beck Design paired with Knoll Dealer Spaces, Inc. to create an outstanding multi-use space to commemorate the student body community and support campus engagement. The team prioritized functionality and flexibility in furnishing the space while maintaining a timeless design throughout.

Central to the new student union is the 30 foot atrium with impressive floor to ceiling windows that houses administrative offices and a cafeteria. The space needed to be inviting to students to gather and work, while maintaining a level of sophistication that would appeal to visitors and prospective students. To achieve this style, the team went with a furniture color scheme that balanced

the school's blue and gold colors with complementary light grey and white furniture to balance the space.

The atrium is filled with Pixel™ Column Leg Tables, Bertoa™ Molded Shell Chairs and Spark Series™ Side Chairs. Additional seating includes k. lounge™, Rockwell Unscripted® High-back Settee and Modular Lounge, and Muuto Modular Connect; all of which provide students with comfortable touchdown spaces to meet or study. Taking advantage of the full-sized windows, the team lined the perimeter with Bertoa™ Molded Shell Barstools to capitalize on the vertical space. The final product – a grand and vibrant space where students can comfortably enjoy a meal and congregate with friends or staff.

On the second floor of the student union, 14 private offices furnished with Generation by Knoll® Chairs, Moment Side Chairs, and Reff Profiles™ Work Desks provide students and staff with a quiet space, while floor-to-ceiling glass walls keep the space feeling open and bright. Additional workspaces for students fill the rest of the floor using Dividends Horizon™ Tables, MultiGeneration by Knoll® Chairs, Rockwell Unscripted™ Sawhorse Tables, High Tables, Club Chairs, Cylinder Stools, and Highback Settee.

Beck Design and Knoll Dealer Spaces succeeded in creating a multifunctional space that increased student usage and satisfaction. Overall, the bright colors and sleek lines provide a fun yet classy atmosphere that welcomes students, faculty and staff and business leaders. The design complements

the architecture so beautifully that the atrium has become the “selfie destination” on campus.✂
