

Trim. Dexterous. Unobtrusive. KnollExtra® integrates technology comfortably into your workspace.

Sapper™ Monitor Arm Collection

Designed by Richard Sapper.

Available in Bright White, Medium Grey, Jet Black and Silver.

Sapper™ single monitor arm table clamp kit in Bright White (shown, left).

SAP-MA-S-CLMP-K ■

Sapper™ double monitor arm table clamp kit in Bright White (shown, above).

SAP-MA-D-CLMP-K ■

Sapper™ triple monitor support table clamp kit in Silver (shown, above).

SAP-MA-T-CLMP-K ■

+ also available with deep table clamp, Dividends Horizon® benching mount, Crinion Open Table™ center channel, Antenna® Workspaces center and side beam, grommet, fixed table, slat wall and wall mounting options

+ also available with black adjustment knob

> Generation by Knoll® chair, pg 1; Dividends Horizon®, pg 43

Each Standard Sapper™ monitor arm:

- Will hold up to 20 lbs, which accommodates up to 95% of the monitors on the market
Weight limit for each mounting option varies (some hold less weight)
- Offers 165 degrees of monitor tilt up and down, 180 degrees of swivel left and right and 360 degrees of rotation for portrait or landscape viewing
- Offers approximately 17" of depth adjustment (depending on mounting option)
- Folds into itself to be highly compact (at only 2 7/8" when fully compressed)
- Is durable and lightweight (standard arm weighs only 2.6 lbs)
- Incorporates easy-to-use external cable management which keeps wires tidy and accessible

Sapper 50™

Available this spring, the newest addition to the Sapper™ Monitor Arm collection.

Sapper 50™ is an innovative monitor arm which can hold up to 50 pounds and is suited for heavier flat-panel monitors, as well as TVs. The monitor arm and movement joint are new, but the remaining elements are interchangeable with the existing Sapper Monitor Arm Collection.

+ also available in kits with 24" masts or black adjustment knobs

RICHARD SAPPER'S TRAINING IN PHILOSOPHY, ANATOMY, BUSINESS AND ENGINEERING at the University of Munich have not been forgotten during his design career. He has designed a range of household products and experimental transportation products that encompass clever modern design, at once beautiful, practical, and sensitive to the needs and desires of consumers. His main interest has always been the design of technically complex objects, from ships, chairs, watches, radios, cars, bicycles, coffeepots and toothbrushes, with fifteen of his products on permanent display at The Museum of Modern Art, New York. Among this distinguished group is the Knoll Sapper office chair, introduced in 1979 and the Sapper Monitor Arm, introduced in 2009.

keyboard supports and technology management

For simplicity, durability and ergonomics, KnollExtra® has the right combination of keyboard support for you.

1 Act I™ Keyboard Support
