

#### The 1.5" Planning Advantage

A 55.5"-tall, 5-high lateral file (figure A), created with (5) 10.5" drawers, increases usable space for hanging files with top tabs by 20%, providing easier accessibility than a typical 63"-tall, 5-high lateral file with (5) 12" modules (figure B).

#### How?

When 12" drawers are used in 5-high lateral files, the top is often a receding door because a hanging file drawer would be difficult to access at this height. The 1.5" planning solution offers a more effective use of your space for hanging file storage. Your filing at work for you.

\*Series 2™ front available on 27", 39" and 51"-high lateral files with 12"-high drawers only.

For the complete line of Knoll Essentials Files and Storage, consult the Knoll Essentials price list. Calibre® and Series 2™ storage are listed with nominal dimensions.

Knoll files and storage, featuring lateral files, mobile pedestals and architectural towers, maximize your organizational options without compromising valuable workspace.

### 1 Calibre® 3/10/10

Maximize usable space by eliminating the 1.5" of wasted space associated with standard 12"-high drawers, providing ample room for hanging file folders with top tabs. Calibre® storage has the unique ability to support a 3" drawer for supplies and personal items as well as two 10.5" drawers for hanging file folders.

**64"-high x 24"-wide Calibre® 3/10/10 Wardrobe Tower**  
Cupboard and 9" wardrobe with (1) 3" drawer and (2) 10.5" file drawers.
