

HR Access Solutions

Knoll

Sector Focus: Finance

Serving more than 520 customers worldwide in 52 countries, HR Access, a Fidelity company, provides outsourced and in-house HR and Payroll products and services to the European market. In 2004, it opened a new location in the La Défense business district in Paris, France. Swanke Hayden Connell Vidal Architects worked with HR Access to select the Knoll Scope office system and Life® chairs for the open plan office and meeting rooms in this skyscraper. From high performance technical spine walls to mobile desks and credenzas, Scope offers clients a range of solutions with a modern architectural vocabulary.

The Scope system was installed throughout this open and collaborative work environment. In one area of the office, cover, Scope worksurfaces with curved edges and privacy screens form a continuous row of workstations. Low panel heights foster collaboration and the exchange of ideas. Scope storage, left and below right, provides space for binders, files and other items. In meeting rooms, above right, and throughout the workplace, SMaRT® Gold certified Life® chairs provide ergonomic support. Manufactured using clean technologies and minimal materials, Life® sets the standard for high performance, eco-sensitive seating.
