# Cleaning Information

## Regular Maintenance

It is important to vacuum upholstery regularly to remove the surface dust that builds up and slowly contributes to a greying effect that diminishes the clarity of the *original* color.

Please note that vacuuming should be done with the proper attachments to avoid breaking down the fibers and contributing to pilling.

In addition to regular vacuuming, a professional cleaner should come in at least once or twice a year to thoroughly clean the fabrics and remove the soiling that a normal vacuum cleaner cannot reach. The expense of this service is small compared to the reward of seating that looks good as new after a lot of use.

## Cleaning Codes

W — Water-based cleaning agents or foam may be used for cleaning this fabric.

S — Only mild, pure water-free dry cleaning solvents may be used for cleaning this fabric.

W-S — Water-based cleaning agents and foam or mild, water-free solvents may be used for cleaning this fabric.

X — This fabric should be vacuumed or brushed lightly to remove soil. *Warning:* Do not use water-based foam or liquid cleaning agents of any type on this fabric.

## Stain Treatment

There are two types of stains: water-based and oil-based. The key to removing either type is prompt action. The longer a stain is allowed to remain on a fabric, the more difficult it will be to remove.

For water-based stains, a solution of warm soapy water (not overly soapy) used in the following manner should remove them.

In removing oil-based stains, the same procedure can be followed, but instead of warm water, a spray dry cleaning solution is used. Either treatment should be tried in a concealed part of the fabric first, to make sure there will be no adverse reaction between the dye stuffs and the cleaning solution.

Step 1. Soak up excess staining material immediately with a soft absorbent material. Do not dry the stain completely or it may set.

Step 2. Either by using the warm soapy water or a dry cleaning solution and a clean sponge or soft bristle brush, begin brushing the stain with light, quick strokes. Start at the outside of the stain and work toward the center. Be careful not to overly saturate the stain with cleaning solution or you may get a ring. Do not rub too vigorously or you may damage the nap of the fabric or break fibers.

Step 3. Once the stain is removed, soak up all remaining cleaning solution and then use another clean cloth or sponge dipped in cool water to remove any residue that will attract further soiling.

Step 4. Allow fabric to dry thoroughly and then vacuum well before using.

Step 5. Several light applications are less harmful to fabrics than one concentrated one. If you go through the above steps and there is still a stain, repeat the entire procedure.

Step 6. Remember, never use anything hot to clean fabric, as heat will set stains. Also, avoid a scrubbing motion.

Step 7. If the stain is stubborn, call a professional cleaner and ask for their advice.

## Spot Cleaning Treatment

Step 1. As soon as possible, blot liquid spills with tissue, paper towels or a clean, colorfast cloth. Scrape and vacuum away dry, solid material. Avoid working soilent deeper into the fabric.

Step 2. Apply household or commercial upholstery cleaner sparingly to the soiled area, as overwetting may spread the stain and damage cushion material under the fabric. Rub gently with a clean, white cloth. Turn the damp cloth frequently to a clean surface to avoid redepositing the soilent.

Step 3. Work from the outer edge toward the center of the spot to reduce ringing. Cleaning the entire fabric panel, or at least a large area around the spot, further reduces the likelihood of ringing. A final water rinse of the entire panel with a hot water extraction cleaner is preferable.

## Note on Cleaning Agents

The following procedure should be used with all cleaning agents. A clean, white cloth dampened with the recommended cleaning agent should be used in an inconspicuous place to test for colorfastness. Optimum cleaning will be achieved by not overwetting the cloth and by turning it frequently to keep it clean. Rings can be avoided by working from the outer edge of the spot toward the center. This process should be repeated until the spot is removed or there is no further transfer to the cloth.

## Note on Environmentally Cleaning of W fabrics

Environment Friendly cleaners can be used for general purpose cleaning. A few are listed below (manufacturers are identified in parenthesis) These cleaners can be substituted for detergent when spot cleaning:

- Enviro Care All Purpose Cleaner (Rochester Midland)
- Enz-Away (Naturally Yours)
- N1 All-Purpose (The Clean Environment)
- Cleaner Concentrate (Ultra Shield)

Environmentally friendly degreaser products that can be used for oily and greasy stains are listed below (manufacturers are identified in parenthesis):

- ECO 2000 Multiuse Degreaser/Cleaner (KC Products)
- Green Uniclean Degreaser and Floor Cleaner (Ipax Cleanogel)
- Formula G510 (Gaylord Industries)
- Magic 555 Industrial Degreaser and Cleaner (P&D Creative)

## Note on Oily/Greasy Stains for W-S and W Fabrics

For oily and greasy stains, in addition to the recommended method, some stains (i.e. perspiration/body oils) respond well to dry cleaning such as Host (Racine Industries), Capture (Milliken), Bonafides (Drummond American), Keft (Texize) and Carbona. Carefully follow the directions on the label.

Note: Orders requesting special finishing are non-cancellable and non-returnable † Direct Ship Program: non-cancellable and non-returnable. Pricing current as of January 1, 2010 and is subject to change.
