

Performance Upholstery Fabrics

KnollTextiles

Whether you're looking for basic stain resistance or healthcare appropriate fabrics, we have a multitude of solutions to fit your performance needs. Options include:

Nano-Tex®: Nano-Tex provides additional performance benefits – spill and stain protection – and comes stocked on a number of fabrics. This finish can also be applied to dozens of KnollTextiles fabrics for an upcharge and additional lead time.

Crypton®: KnollTextiles stocks over a dozen patterns with Crypton. It has a moisture barrier plus stain, odor and bacteria resistance, to protect the fabric and the cushion.

Gore™ Seating Protection or Nano-Tex® with DuraBlock™: Gore and Nano-Tex with DuraBlock provide a durable moisture barrier with a soil and stain resistant topical treatment. Even under high pressure, no liquid can travel through the treatment into the cushion. Some Nano-Tex with DuraBlock patterns are available as standard product.

Vinyl/Polyurethane: Vinyl or polyurethane fabrics combine high durability with easy cleanability. These upholstery fabrics also act as a moisture barrier. Polyurethane fabrics are breathable.

Solution Dyed Fiber: These fibers are perfect for high traffic areas. During the dying process, the color is infused into the fiber, making the fabric bleach-solution cleanable and colorfast to light.

For additional information, including pricing and lead times, visit knolltextiles.com or contact customer service at 866.565.5858.
