

## **Product Overview**

The KnollTextiles RECORE™ vinyl wallcovering collection is composed of a minimum of 30% recycled vinyl content, including:

- 20% post consumer content (consumer level “trash”), as certified by Scientific Certification Systems (SCS).
- 10% post industrial content, which includes construction trim, bindery scraps, obsolete inventory and sample material as well as other miscellaneous sources.

## **RECORE has the following benefits:**

- All of the same performance benefits of vinyl, including durability, easy cleanability (even with solutions of bleach), long service life and easily installed.
- RECORE may contribute to LEED credits, including Recycled Content, Regional Materials, and Innovation Credit categories (Maintenance/Cleaning).
- Greenguard certified for low chemical emissions.
- RECORE meets the California Indoor Air Quality requirements for schools (California Section 01350).
