

Product Overview

- With solution dyed fiber, the color is added to the liquid polymer before it is extruded into yarn. Therefore, it is inherent in the fiber and there is no dye or water waste.
- Because the color is impregnated throughout the fiber, these materials have excellent UV resistance to color fade.
- Solution dyed fiber also has excellent abrasion, superior color consistency, superior crocking results, vibrant colors and superior everyday cleanability.
- Solution dyed yarns can be cleaned with a 3:1 bleach solution
- KnollTextiles was one of the first contract textile companies to bring solution dyed fibers to the marketplace.

Lifecycle

KnollTextiles solution-dyed products include:

- Panel fabrics: Clarity, Harmony, Progression, Resolution and Weave Three
- Upholstery fabrics: Belize, Entourage, Framework, Pogo, Rio, Roundtrip, Spectator and Zipline
- Wallcovering fabrics: Petra and Prague
