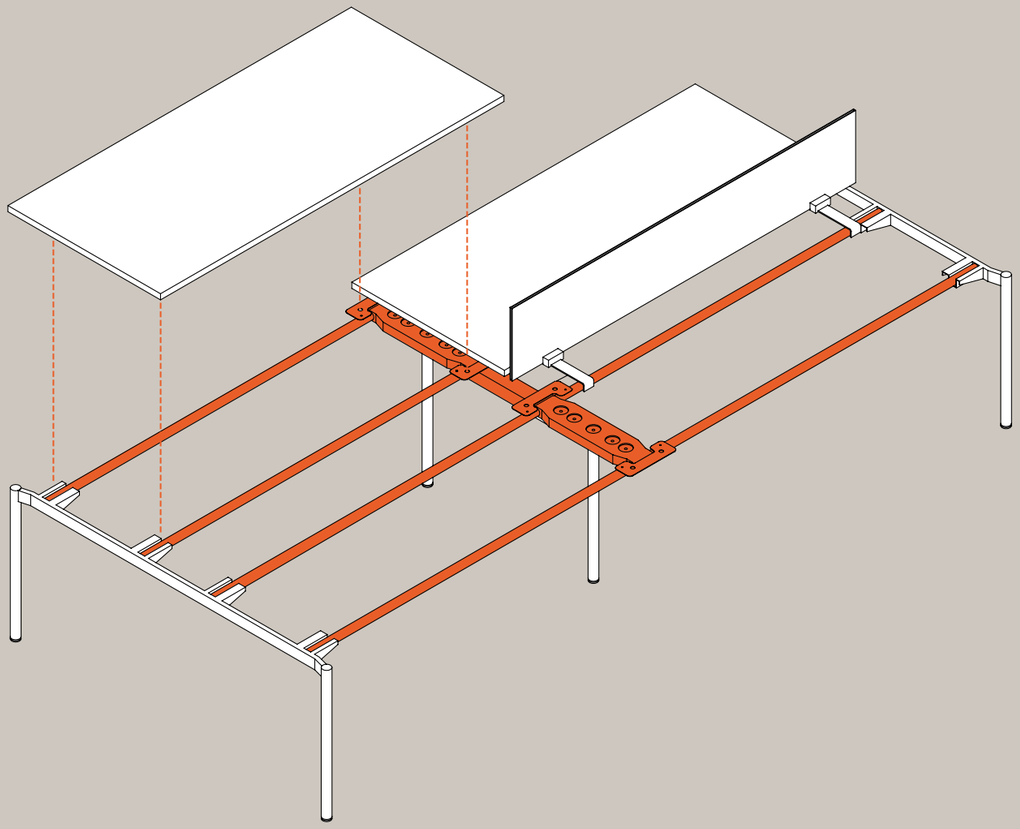
un sistema universale

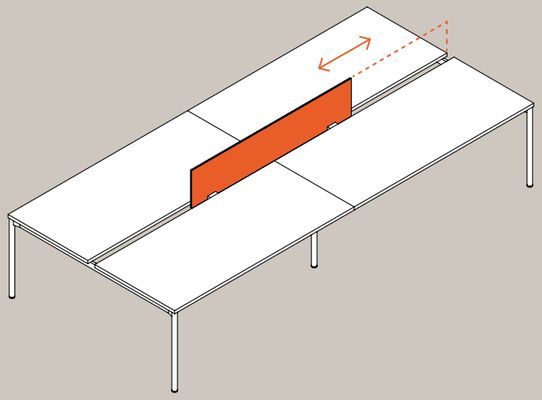
Scope è un sistema universale di arredo per ufficio,
in grado di soddisfare qualsiasi esigenza, dalla semplice scrivania,
alla postazione lineare multipla o angolare, fino ad arrivare ai tavoli riunione.
Tutto ciò prescindendo da vincoli di modularità e in una grande
varietà di dimensioni o forme. Un sistema operativo universale
per qualsiasi luogo di lavoro.

scope | Knoll

struttura

I piani Scope sono supportati da una robusta struttura portante. Le travi strutturali fungono da connessione universale per piani, schermi e cestelli passacavi.





indipendenza dalla modularità - schermi

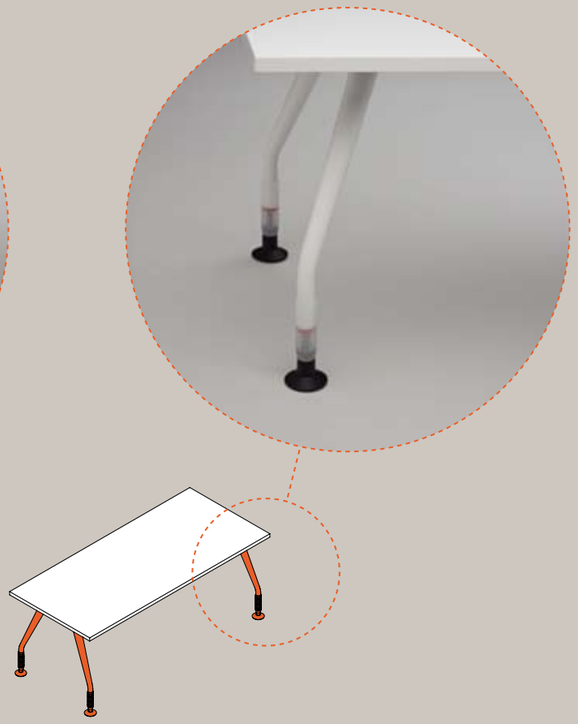
coniche – altezza fissa



coniche – altezza regolabile

note tecniche

Scope è estremamente regolabile. Le gambe sono regolabili
in altezza fino a 200mm e hanno 5 diverse opzioni di montaggio.
La gamba può essere ruotata individualmente per agevolare l'accesso
o evitare interferenze con le scatole d'alimentazione a pavimento.
L'allineamento dei piani contigui è garantito da un sistema di livellamento
al fine di ottenere un perfetta complanarità.
I piani sono fissati con un rapido sistema di aggancio/sgancio,
che consente l'accesso immediato al cestello passacavi.

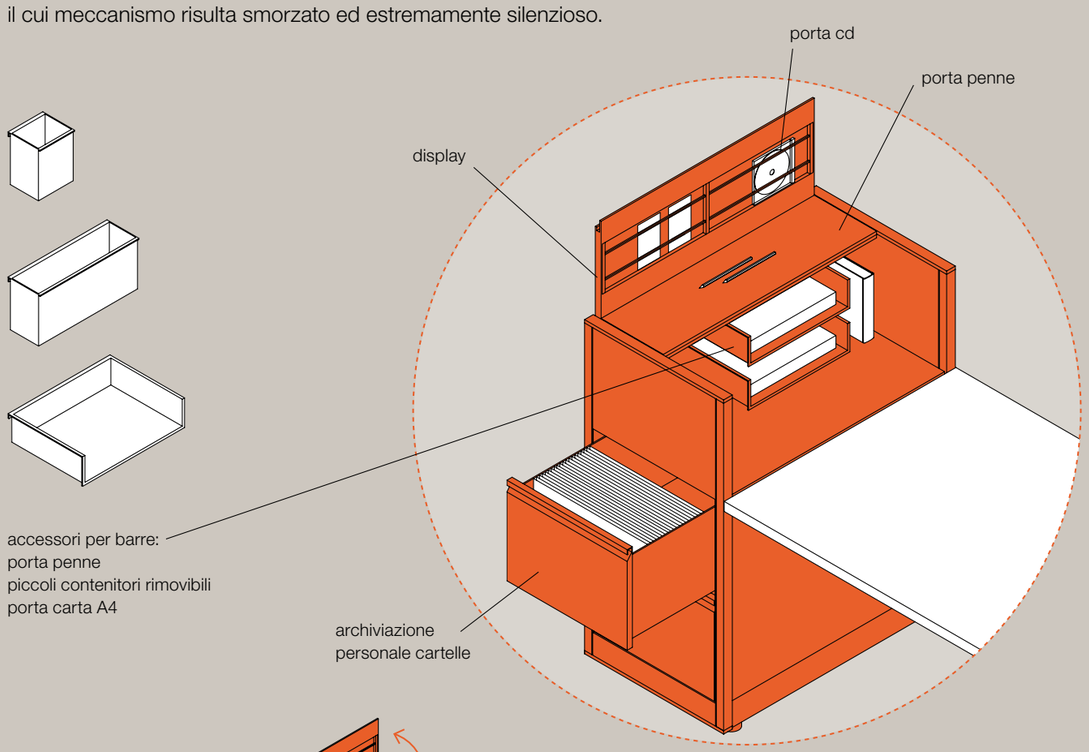
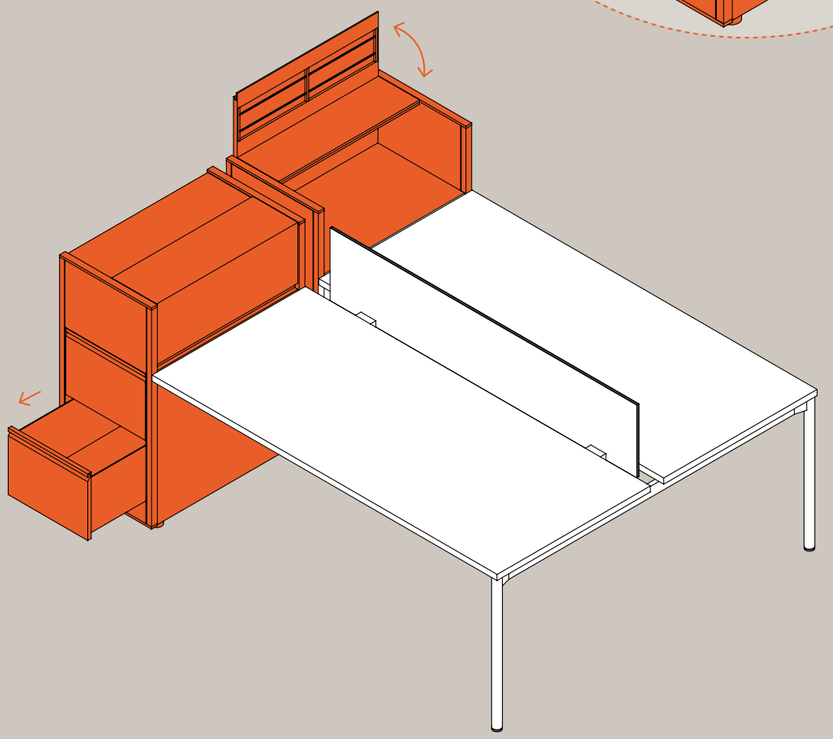
contenitori bureau

contenitori bureau

I contenitori bureau posti a lato del piano sono delle unità personali di contenimento. Quando sono aperti non solo estendono l'area di lavoro, ma consentono un facile accesso alla cancelleria, alle carte, agli accessori attraverso un pannello portaoggetti predisposto. Alla fine della giornata tutti gli oggetti personali possono essere comodamente riposti al sicuro ordinatamente grazie ad un'anta richiudibile il cui meccanismo risulta smorzato ed estremamente silenzioso.





armadi

La linea di armadi Scope è un sistema modulare componibile.
Gli elementi singoli, come le ante, i cassetti o i ripiani posso essere aggiunti,
rimossi o ricollocati secondo necessità. Il contenitore può essere configurato
con l'accesso da entrambi i lati, anche nell'ambito dello stesso modulo.
I piani lavoro possono essere agganciati su entrambi i lati del contenitore.
Gli armadi Scope sono molto più comodi e leggeri da trasportare rispetto
ad un contenitore tradizionale, potendo essere spostati smontandone i componenti.

finiture

Scope offre un’ampia gamma di finiture, integrando una selezione di vernici e laminati utilizzati in coordinato con gli altri prodotti Knoll.
È disponibile il laminato, il melaminico e il techgrain.
Il techgrain Knoll è un’impiallacciatura lignee dal quale sono state eliminate le asperità e le imperfezioni che caratterizzano il legno naturale.
