Private Offices
Design for the modern office.

Rooted in the pioneering work of Florence Knoll, whose table desk became a design icon, we have endeavored to design and produce furnishings for the private office appropriate to contemporary architecture and suited to the changing needs of today’s workplace.

Whether it’s a distinguished office, the refined expression of place; a classic office, designed to withstand the test of time; an efficient office, streamlined to the essence of what matters functionally; or a progressive office, which supports new work styles and a new spirit of work, this heritage provides the foundation as the modern office evolves from a symbol of prestige to a flexible meeting space.
The Distinguished Office

Knoll balances functional and aesthetic needs with innovative, elemental forms that define the office. The result: modern, distinguished spaces that achieve a definitive expression of place and provide inspirational day-to-day settings for focused and collective work.
