

Product Overview

Print custom graphics, logos or photos in Imago, a pioneering hard surface material that combines the strength and flexibility of resin with the translucency, texture, and color of textiles. Images can be printed on a white mesh fabric and encapsulated inside two layers of a high-performance resin. The resulting translucent material can be used in almost limitless applications – from lighting and back-splashes, to moveable walls and cabinet doors.

Design

Our design team helps clients create custom solutions to meet individual needs. Choose one image or duplicate multiple images, at a small, medium or large scale, across each sheet of Imago.

Examples are shown below:

Details

- Minimums: 1 sheet minimum (48" x 96").
- Lead time: 9 weeks upon receipt of digital file (3 weeks for sample; 6 weeks production). Additional lead time may be required for complex projects involving photo retouching, color enhancements, and other design services.
- Files: digital files must be submitted in the following approved formats:
 - .eps – Vector files created in Adobe Illustrator CS are preferred. Image does not need to be sized to scale.
 - .tiff, .jpg, or .pdf – image should be sized to scale at 300 dpi.
 - In addition to the digital file, Pantone® chips or color references should be provided if specific color matching is required.
 - Contact customer service for information on where to mail a CD with the image(s) (files under 5 MB can be emailed).
- Mock up: we will submit for approval one digital proof of the complete design, as well as one 8" x 8" mock-up, showing a portion of the overall image design encapsulated in Imago.
- Pricing: price quoted will include one 8" x 8" mock-up. Additional mock-up samples may require additional fees.
- Deposit: 100% deposit required.
- Returns: custom orders are non-cancelable and non-returnable
