Digital Control Switch
Quick Set-Up Guide

For Use with Tone and Antenna Telescope
The Antenna Digital Control Switch is designed for use with Tone Height-Adjustable Tables and Antenna Telescope. The switch features basic up and down buttons; programmable quick sit and quick stand buttons; and three additional programmable height settings.

This document will guide users through basic set up and programming the most commonly-used functions of this Switch. For more detailed instructions, or for the full Antenna Digital Control Switch User Guide, visit the Tone or Telescope product pages at www.knoll.com.

Program a Quick Sit Height
1. Move the table to seated height.
2. Press and hold $\bigcirc$ for 3 seconds.
3. Immediately press $\triangleleft$. Quick sit is programmed.
4. To travel to the Quick Sit Height, press and hold $\triangleleft$.

Program Quick Stand Height
1. Move the table to standing height.
2. Press and hold $\bigcirc$ for 3 seconds.
3. Immediately press $\bigtriangledown$. Quick stand is programmed.
4. To travel to the Quick Sit Stand, press and hold $\bigtriangledown$.

Program Positions 3, 4 or 5
1. Move the table to desired height for position 3.
2. Press $\bigtriangleup$ once and immediately press $\bigtriangledown$ once.
3. The Menu mode icon will appear in the top left corner.
4. Press $\bigtriangledown$ until the display reads 3. $\bigtriangleup$ $\bigtriangledown$ $\bigtriangleup$ $\bigtriangledown$
5. Press $\bigtriangleup$ to store position.

The display will confirm the setting by flashing three times. Repeat steps above for positions 4 and 5, navigating to Present 4 and 5 respectively.

To Travel to Stored Positions 3, 4 or 5
1. Press $\bigtriangleup$ once. The memory icon will appear in the top left corner.
2. Use $\bigtriangledown$ to navigate to stored positions 3, 4 or 5. $\bigtriangleup$ $\bigtriangledown$ $\bigtriangleup$ $\bigtriangledown$ $\bigtriangleup$ $\bigtriangledown$
3. Press $\bigtriangleup$ and hold while the table moves to the stored position.

Operating the Table
Tone and Antenna Telescope feature press-and-hold adjustments to prevent injury to users and damage to surrounding objects. To adjust the table up or down or to move to any of the preset heights, a user must press and hold the appropriate button.
