Hospitality, theater and play at work.

From Knoll and David Rockwell, renowned for creating places where people want to be, comes an unrivaled work experience designed to let spontaneity unfold and people complete the story. Welcome to Rockwell Unscripted.
So glad I ran into you.
The concept of the workplace is being reinvented. Despite mobile technology and other workspace alternatives, for most people the office is still home base for getting work done. To encourage employees to work on site, companies are providing compelling environments and programs that draw workers together to foster engagement and build community.*

This explains why people are on the move—and on their toes—throughout the day. It’s workday as improvisation.
The workplace deconstructed to the performance and surfaces you need to get work done.
