Knoll and Sustainable Design

Each year Knoll sets key initiatives in our journey to sustainability. We are members of a global consortium on energy, have adopted a scientific, metrics-based approach to sustainable product design, and maintain a leadership position in establishing universal, verifiable, sustainability standards for our industry.

Knoll promotes independent third-party certification because it provides the most impartial and trustworthy foundation for industry-wide environmental compliance. Certification by established and respected third parties ensures that all manufacturers are held to the same high standards and that customers can trust a company’s declaration about the environmental benefits of its products. Knoll third-party partners include: the International Standards Organization (ISO); Forest Stewardship Council (FSC®); Rainforest Alliance; GREENGUARD® Environmental Institute; and The Business and Institutional Furniture Manufacturer’s Association (BIFMA) level® certification from Scientific Certification Systems (SCS).

In addition, Knoll is aligned with the U.S. Green Building Council and can help companies, healthcare organizations and educational institutions achieve Leadership in Energy and Environmental Design (LEED®) workplace certification.

Global Climate Change
• Knoll is a sponsor of the Clinton Global Initiative, which brings together a community of global leaders to devise and implement solutions to some of the world’s most pressing challenges, including environmental change.
• Knoll has a comprehensive Energy Management Program to increase energy efficiency in products and processes.

Life Cycle Assessment (LCA) Tool
• Life Cycle Assessment is a science-based measurement of a product’s environmental impacts throughout its life cycle, from raw materials sourcing through manufacture, shipping, use and re-use or end-of-life. LCA enables cradle-to-cradle implementation of sustainable practices.

Setting Industry Standards
• Knoll partners with MTS (The Institute for Market Transformation to Sustainability) to develop the SMaRT® Consensus Sustainable Products Standards, a set of consensus-based sustainable product standards based on the LEED® model, for all building products, fabric, apparel, flooring and carpet. MTS, the developer of SMaRT®, is an accredited American National Standards Institute (ANSI) standard developer.
• Knoll also partners with BIFMA (Business and Institutional Furniture Manufacturers Association) to promote level® sustainability standards for the contract furniture industry.
• Knoll has established FSC® (Forest Stewardship Council) certified wood as the standard for general office open plan office systems, casegoods and tables.
• Knoll has launched Full Circle, a resource recovery program developed with ANEW, to help customers extend the life cycle of surplus furniture, fixtures and equipment (FF&E) in an economically, socially and environmentally responsible manner.
• Our goal is to encourage all manufacturers in the contract furniture industry and related industries to adopt standards that will lead to sustainable products and practices.

Note:
Line drawings in this price list are purely for quick product identification without any form of detail. One must not use the price list line drawings to satisfy production dimensions, shape or support options. Refer to Planning Guide for detailed product information.

Wood and Laminate Components
Tops are 1 ½” or 1 ¼” thick. Flush and cantilever top assemblies have 1 ½” thick end panels, and ⅛” thick back panels. Recessed top assemblies have 1 ½” or 2 ⅛” thick end panels and a 15/16” thick back panel. Pedestals are supplied with metal channels on the top to attach the pedestal to the underside of a worksurface.

Drawer boxes can be specified in either metal or wood with dovetailed joinery. Hinge doors use concealed, adjustable hinges. Components are finished on all sides unless otherwise specified. Edges are banded with treated paper on hidden surfaces and .6 or 2.0 mm ABS or wood on visible surfaces.

Locks
All pedestals and cabinets with drawers are supplied with a ganglock mechanism in place. In addition, cabinets with drawers have a drawer interlock anti-tip device designed to prevent the opening of a second drawer when one is already open. Locks for drawers in pedestals and cabinets can be retro-fitted. Door locks are not pre-routed and therefore, locks cannot be retro-fitted. Reff lockcores must be specified separately. Reff lock mechanisms are optionally black or silver and feature a removable core for easy replacement.

Orders with 50 or fewer locks required with no specific keying requests will be sent randomly keyed by the factory without warning.

Levellers
All end panels, back panels (except recessed), floor pedestals and cabinets are equipped with levellers.

Lighting
Task lights are available as fluorescent or LED solutions.

Task Lights
Task lights are TCLP compliant and meet requirements of California Title 20 and Title 24. T5 advanced task lights are fitted with ballasts and lamps compliant with LEED requirements. All task lights are approved for New York City installations.

T5 Task Lights
All T5 task lights include mounting hardware for attachment to overhead cabinets, shelves, up mounted cabinets and freestanding overdesks. Specify task lights one size or less than the overall cabinet or overdesk width. T5 task lights have adjustable mounting brackets that lock into integral channels in the underside of the cabinet’s lower shelf. The spring steel adjustable mounting brackets flex to install without requiring tools and allow the light to be positioned at any position side-to-side and front-to-back.

LED Task Lights
LED task lights mount into the recess in the underside of overhead cabinets and shelves at least 5” wider than the task light width.

Grommets
Grommets are optional (except where noted). Tops up to 48 wide have one grommet. Tops wider than 48 include two grommets. See Planning Guide for locations.

All dimensions in this price list are for representative purposes only. For accurate build dimensions or factory drawings, please call Customer Services.

Finishing
All Reff natural wood veneer and Techwood components are stained and sealed using a state of the art custom blended polyurethane finishing process.

This finish provides superior resistance to solvents, stains, abrasion and heat.

Each component is coated and then cured with ultraviolet light for a durable, lasting wood surface.

Natural veneers are all hand selected to best showcase the beauty of natural grain and to Knoll’s meticulous color and grain standards.

Every effort is made to ensure that Knoll Reff Profiles veneers are the best that can be sourced in quality of color, consistency and size. Natural variations of wood are held in high regard and are not considered to be defects.

Natural variations are not subject to warranty. The natural process of color change in real wood products is part of the unique character and beauty of this material.

Knoll expects wood to patina over time and does not warranty color change.

Techwood is real wood, enhanced by technology to provide added color and grain consistency.

7 3/4" wide x 1 3/8" deep
Protrudes 1" from the drawer front
Available in Nickel Plated Finish only
1 pull per drawer front
Position: Center, 1/2" down from the top of drawer

D-Pull
7 3/4" wide x 1 3/8" deep
Protrudes 1 3/8" from the drawer front
Available in all core paint finishes, Bushed Pewter (PT) and Satin Brass (PZ)
1 pull per drawer front
Position: Assembled to plate, center line 1/2" down from the top of drawer

S-Pull
(Stainless Steel Finish Only)
6 3/4" wide x 1 3/8" deep
Protrudes 1 3/8" from the drawer front
Available in Stainless Steel only
1 pull per drawer front
Position: Center, 1/2" down from the top of drawer
**R-Cylinder**

1” diameter
Protrudes 1” from the drawer front
Available in painted and plated finishes
1 pull per 16” & 19” wide pedestal drawer
Position: center position for 16” & 19” drawers
2 pulls per 30” & 36” lateral drawers
Position: 6” in from end, 1 ½” down from top of drawers

**H-Out Line**

4” wide x 1” deep
Protrudes 1” from the drawer front
Available in painted and plated finishes
1 pull per 16” & 19” wide pedestal drawer
Position: center, 1 ½” down from the top of drawer
2 pulls per 30” & 36” lateral drawers
Position: 6” in from left/right, 1 ½” down from top of drawers

**T-Tab**

Short Tab: 2” wide x 1 ¼” deep
Long Tab: 10” wide x 1 ½” deep
Protrudes ½” from drawer front
Available in painted or plated finishes
Position: Center line position on drawers

**F-Bar Pull**

Short bar pull: 3 ½” wide x .3” thick
Long bar pull: 10 ½” wide x .3” thick
Protrudes 1” from drawer front
Available in painted and plated finishes

**G-Grommet Pull**

1 ½” diameter
Flush with the drawer front
Available in painted and plated finishes
1 pull per 60” & 72” sliding doors
Position: 1.656” from left or right, center line vertical
2 pulls per 90” & 108” sliding doors
Position: 1.656” from left and right, center line vertical
Position: Center line position on drawers
Legs and End Supports

**L-Leg**
- Leg: 3" x 3"
- Top plates: 5 1/2" x 5 1/2"
- Flush with worksurface edges
- Finishes: painted or anodized
- Available on rectilinear peninsulas; square and rectangular 1 1/2" tables
- Available in pairs

**Soft Rectangular Leg**
- Leg: 2" x 3"
- Top plates: 5 1/2" x 5 1/2"
- Flush with worksurface edges
- Finishes: painted or anodized
- Available on rectilinear peninsulas; square and rectangular 1 1/2" tables
- Available in pairs

**Open Frame Leg**
- Leg: 2 1/4" thick
- Top plates (2): 6" x 6"
- Flush with worksurface edges
- Finishes: painted or anodized
- Available on rectilinear peninsulas; rectangular 1 1/2" tables
- Available with laminate or wood veneer infill panels

**Reverse L-Leg**
- Leg: 3" x 3"
- Top plates: 5 1/2" x 5 1/2"
- Flush with worksurface edges
- Finishes: painted or anodized
- Available on rectilinear peninsulas; square and rectangular 1 1/2" tables
- Available in pairs

**Column Leg**
- Leg: 3" diameter
- Top plate: 10" x 10" (peninsulas)
- Top plate: 7 3/4" x 7 3/4" (tables)
- Flush with worksurface edges
- Finishes: painted or plated
- Available on bullet, D, P and 9 peninsulas; 2 1/4" and 4" diameter available on 1 1/2" tables

**Thick End Panel**
- Leg: 2 1/8" thick
- Top bracket: extends 1 3/4" inboard x 2 1/8" from front and back edges
- Flush with worksurface edges
- Finishes: laminate or wood veneer
- Veneer direction is vertical
- Available on rectilinear peninsulas
- Not sold separately
What is Reff Profiles?
Reff Profiles is finely detailed office furniture that combines versatility with image by providing unparalleled attention to quality from dovetailed joinery to a patented finishing process. Users can choose from a broad range of natural woods, fine veneers and durable laminates to create private offices, freestanding work areas and panel-based environments that fit the individual’s requirements. A variety of stacking panel styles, including monolithic, tiled and floor-to-ceiling, will support any design criteria.

Worksurfaces are available in traditional rectilinear or innovative curvilinear shapes for a choice of aesthetic approaches and ergonomic solutions. Cabinetry can be specified in numerous sizes and configurations with either wood or metal interiors with a choice of hardware options to support any storage requirement. Innovative desk-height storage, cabinets and office towers combine aesthetics with functionality.

The result is a comprehensive product offering that will satisfy a wide spectrum of users. Let your imagination take hold.

For private offices consider a variety of desk options including flush, cantilevered, recessed or bow fronts and storage solutions including innovative workwalls.

In freestanding furniture, Reff Profiles offers a full selection of components to support any requirement from managerial to administrative. Options include numerous worksurfaces and meeting tops with a variety of freestanding supports. Administrative and Gallery desk surrounds, stationary and mobile storage components and storage towers provide exceptional planning alternatives.

Panel systems provide high-density power, data and communications capacity along with acoustic control and design flexibility. Panels can be specified with smooth monolithic surfaces, tiled faces or stacking modules. Additionally, panel surfaces are available with fabric on both sides or with fabric on one side and wood on the other.

Who should consider Reff Profiles?
Reff Profiles is well suited to organizations who want to project a high image while supporting any work environment from private offices to panel-based workstations. Companies will appreciate the fine quality and breathtaking aesthetics of Reff Profiles and, for those rapidly changing firms who require interchangeable components to support long term use, Reff Profiles is truly the design choice for inspired offices.

Desk Height Planning vs. Standard Height Planning
Reff Profiles offers two support height planning models: “standard” height (26 ½”) and “desk” height (28 3/8”).

“Standard height” support components provide an underdesk clearance of 26 1/8”. This yields a worksurface height of 27 ¾” with 1 ¼” thick worksurfaces and 28” with 1 ½” worksurfaces.

Standard height planning (26 ½”) may be utilized in panel-based open planning, freestanding open planning (including Reff ProfilesGallery), and in private office planning.

“Desk height” support components provide an underdesk clearance of 28 3/8”. This yields a worksurface height of 29 5/8” with 1 ¼” thick worksurfaces and 29 7/8” with 1 ½” thick worksurfaces.

“Low Credenza” and “¾ high” storage options may be incorporated into desk height planning models. Progressive Low Credenza storage incorporates a 1 1/16” top shelf for a finished height of 23 ½”, ¾ high storage is 22 ¾”h and requires a 1” thick applied worksurface top which yields a low worksurface height of 23 3/8”.

Desk height planning (28 3/8”) may be utilized in freestanding open planning (including Administrative and Reception desk units) and in private office planning.

Storage Relationships
Care should be taken to make sure storage cabinets are specified in the type that corresponds to the planning height model being used.

Classic Cabinets, Overheads, Workwalls, and Overdesk Units are available for both standard and desk height planning and must be specified accordingly.

Progressive Cabinets, Progressive Overheads, and Desktop Towers are only available for desk height planning.

Task panels are intended to be used with desk height planning. They are not recommended for use with standard height planning.

Price List / Planning Guide Organization
The Reff Profiles price list is divided into two volumes. Volume 1 contains pricing related to panels and “standard” height (26 ½”) planning. Planning guidelines for 26 ½” height planning are available in the Reff Planning Guide, on Exchange. The Reff Profiles price list Volume 2 contains pricing and planning information for “desk” height (28 3/8”) elements.

It is not advised to mix 28 3/8”h desk height products with 26 ½” components.

Worksurfaces

The selection of worksurface sizes and their relationship to each other are primary considerations when planning a Reff Profiles office. Refer to the illustrations in the Introduction to Desk Height Planning to see how the various heights of storage and worksurface supports relate to the choice of worksurface thickness. Reff worksurfaces are available in three thicknesses: 1", 1 ¼" and 1 ½". Construction details specific to the 1 ¼" thick surfaces, including Cascade and Edge Detail surfaces, can be found in the Reff Planning Guide on Exchange.

When selecting top sizes consider whether storage components can be used to support the surfaces and what other worksurface supports will be required.

**NOTE:** Additional support is required when using 1" thick credenza tops for unsupported spans over 36”. 1 ¼" thick worksurfaces require additional support for an unsupported span of more than 48”. When using 1 ½" thick worksurfaces the maximum unsupported span is 54”.

**Construction**

All worksurfaces feature 3-ply construction (see figure below) and can be specified in laminate, veneer or laminate tops with veneer edges. Laminate tops have a laminate top surface with an FSC-certified, 45-pound density particle board core and neutral tone backer sheet for balanced construction. Edges match the top in 2.0mm ABS with 2.0mm radius top and bottom edges. Ends overlap the front and back edges (see figure below).

Techwood and natural veneer tops have a veneer top surface, an FSC-certified, 45-pound density particle board core and a neutral tone backer sheet for balanced construction. Veneer tops have matching finish 2.0mm thick solid veneer edges on all sides. Edges have a 2.0mm radius on the top and bottom.

All worksurfaces except Bridge Rectilinear worksurfaces are pre-drilled with pilot holes for use with wood screws.

**Application Notes**

1 ¼" Straight Rectilinear worksurfaces are available in 20”, 24”, 30” and 36” depths for regular worksurface applications. Widths available range from 24" to 96" in 6" increments.

1 ½" Straight Rectilinear worksurfaces are available in 20", 24", 30” and 36” depths for regular worksurface applications. Widths available range from 24" to 108" in 6" increments.

Bridge Rectilinear worksurfaces are 1 ½" thick and available from 36"W to 54” wide in 6 inch increments in either 20” or 24” depths. They can be ordered with the grain specified to run either vertically (across the depth of the surface) or horizontally (along the length of the surface) when specified in wood grain laminate or veneer finish.

Credenza Tops are available in both 1” and in 1 ½” thicknesses and in widths from 60" to 108" in 6” increments.

Rectilinear worksurfaces can be specified in non-standard dimensions. For information, contact Knoll Custom Product Development.

Grommets
Grommets are optional and must be specified by adding the appropriate designation to the pattern number. Designations are:

N = No grommet
F = Flush grommet location
R = Recessed grommet location

Rectilinear worksurfaces 24" to 48" wide receive one grommet centered on the back edge of the worksurface. Rectilinear worksurfaces over 48" wide receive two grommets along the back edge.

1 ¼" and 1 ½" thick rectilinear tops are available with no grommet, flush grommet or recessed grommets locations.

1 ¼" thick tops are available with additional grommet options; Classic type and Profile type.

Classic type grommets sit even with top of the worksurface.

Profiles type grommets have a 1/16" thick flange which rests above the worksurface.

These 2 types of grommets, provides additional grommet options for 1 ¼" thick tops (only):

CF = Classic grommet in flush location
PF = Profiles grommet in flush location
CR = Classic grommet in Recessed location
PR = Profiles grommet in Recessed location
CA = Classic grommet in Alternative location
PA = Profiles grommet in Alternative location

* CA & PA are available on 36" deep tops only.

1 ½" thick credenza tops come standard with a 1 3/8" deep edge grommet which runs along the rear of the worksurface to within 6" of each end (see figure below).

The 1" credenza tops are available with or without an edge grommet.

Refer to the Reff Planning Guide, posted on Exchange, for 2" x 3" grommet locations.

For non-standard grommet locations contact Knoll Custom Product Development.

Planning for Worksurface Thicknesses
Critical to the correct specification of Reff Profiles is an understanding of worksurface thicknesses, support component heights and their relationship to each other. Worksurfaces and support components can be combined to create the following overall finish heights:

23 3/8" – Intended as a credenza height in 28 3/8"H planning scenarios; this height is achieved using 1" thick worksurfaces with 22 3/8"H (¾ height) storage components.

27 ¾" – Intended as the overall worksurface height in a panel supported workstation scenario; this height is achieved by combining "Standard height" 26 1/2" storage or support components with 1 ¼" thick worksurfaces.

29 7/8" – Intended as the overall worksurface height in freestanding office scenarios; this height is achieved by combining "Desk height" 28 3/8" storage or support components with 1 ½" thick worksurfaces.

### Specification Information

To order please specify pattern number including:

1. Grommet option:
   - F=Flush front grommet location
   - N=No grommet
   - R=Recessed front (not recommended for 20"D and 24"D tops)

2. Grommet finish:
   - Painted, Plated

3. Top finish:
   - L, V1, V2, V3

4. Edge finish: L, V1, V2, V3
   (Edge options are available on laminate tops only.)

Knoll accepts no responsibility for special grommet locations which interfere with support or other hardware. All requests for special grommet locations must be approved through custom product development.

Product on this page will accept woodgrain laminate where laminate is currently an option. Worksurfaces stiffeners recommended to provide additional support for open spans greater than 54"w.

### Application Notes

Products on this page are shipped without hardware which must be ordered separately from the support components section.

Actual widths of worksurfaces are 1/16" less than nominal dimension. Actual depth is 1/8" less.

These worksurfaces are predrilled with pilot holes for use with wood screws.

### Order Code

**Example:** RSD243RL

**R** Reff Profiles

**S** Straight top

**D** 1 1/2" thick

**24** 24" wide

**3** 30" deep

**R** Recessed grommet location

**111** Jet Black (grommet)

**V316** Top finish

**()** Edge finish

### Specification Information

To order please specify pattern number including:

1. **Grommet options:**
   - N = No grommets
   - F = Flush front grommet location
   - R = Recessed front (not recommended for 20"D and 24"D tops)
   - A = Alternate location (for 36"D tops only)

2. **Grommet finish:**
   - Painted, Plated

3. **Finish:**
   - L, V1, V2, V3

4. **Edge finish:** L, V1, V2, V3

(Edge options are available on laminate tops only.)

Knoll accepts no responsibility for special grommet locations which interfere with support or other hardware. All requests for special grommet locations must be approved through custom product development.

Product on this page will accept woodgrain laminate where laminate is currently an option.

Worksurfaces stiffeners recommended to provide additional support for open spans greater than 54".

### Application Notes

Products on this page are shipped without hardware which must be ordered separately from the support components section.

Actual widths of worksurfaces are 1/16" less than nominal dimension. Actual depth is 1/8" less.

These worksurfaces are predrilled with pilot holes for use with wood screws.

Peninsulas
Peninsulas for Reff Profiles are a central element in private office planning. Peninsulas are available in two styles; flush mounted and over-sailing. The flush mounted style is intended to connect tops which use full height pedestals for support, creating a flush transition between the peninsula and the adjoining top. The over-sailing style of peninsula is designed to overlap low storage made up of ¾ height cabinets with 1" credenza tops or Progressive low credenzas by using a stand-off to support the peninsula top and create a space between the top and the low storage element.

See diagrams below and page following for descriptions. Peninsulas are offered as complete assemblies including worksurface, leg(s), credenza support, and grommet options.
Specification Options

Flush mounted peninsulas, previous page below right, come with Flush Mounting kit including two flush plates and connection hardware.

Over-sailing peninsulas are offered with two stand-off options; Power Center, previous page middle, and Simple stand-off, previous page left.

Electrical components are not supplied with peninsulas but are orderable separately. Refer to Planning Guidelines for Accessories.

The Power Center kit is supplied with power center grommet, stand-off, round cable grommet and connection hardware.

When specified with a Power Center, the peninsula top is pre-drilled to accept the Power Center grommet. The Power Center stand-off is field installed to the peninsula top and lower storage. Refer to PN #6TP00505 for Power Center Stand-Off installation instructions.

In the recommended mounting location, the peninsula top will be 2 ½” from the wall or the back edge of the 1” credenza top (over ¾ height pedestals). Refer to elevation diagrams below for details.
The Simple Stand-Off kit is supplied with a simple stand-off, stand-off mount, round cable grommet and connection hardware. When specified, the peninsula top is pre-drilled to accept the 2 x 3 grommet. Refer to Planning Guideline for Accessories. The Simple Stand-Off is field installed to the peninsula top and lower storage. Refer to PN #6TP00505 for Power Center Stand-Off installation instructions.

Power center and 2 x 3 grommets are offered in two plated finishes; Polished Chrome (PD) and Satin Nickel (PU) and all core paint finishes.

Stand-Off’s are offered in all Reff Profiles core paint finishes.

Peninsula 1½" - Planning Guidelines and Specifications

Reff Profiles Vol. Two
Leg options for Peninsulas include L-leg, reverse L-leg, soft rectangular leg, open frame leg and cylindrical column leg. L, reverse L, soft rectangular and open frame legs are offered with anodized finishes: Polished (AP) and Satin (AU).

Cylindrical column leg is offered with plated finishes: Polished Chrome (PD) and Satin Nickel (PU).

All legs are available in all Reff Profiles core paint finishes.

Rectilinear peninsula tops are offered with L, reverse L, soft rectangular, and open frame leg options. All other peninsula tops are offered with cylindrical column leg.

Refer to figures on previous page and following for grommet locations and order codes.

**Construction**

Reff Profiles Peninsula tops are nominal 1 1/2" thick, consisting of 1 7/16" thick substrate with a laminate or veneer surface finish.

Laminate tops have a laminate top surface with an FSC-certified particle board core and a neutral tone backer sheet for balanced construction. Edges can match the top or are available in a selection of veneers. Matching edges are in 2.0mm ABS with 2.0mm radius top and bottom edges. End edges overlap the front and back edges with the outside corners minimally radiused.

Edges on veneer tops are 2.4mm thick wood with 2.4mm radius top and bottom edges. Ends overlap front and back edges with 2.4mm radius on outside corners.

All tops are supplied with pilot holes for hardware inserts for attachment of specified leg options.

Legs are shipped separately, fully assembled with connection hardware included.

**Application Notes**

It is not advisable to mix 28 3/8" h desk height product and standard height products.

Products on this page work with standard height planning.

Products on this page will accept woodgrain laminate where laminate is currently an option.

Worksurface stiffeners, recommended to provide additional support for open spans greater than 45" w.

Due to height restriction, pedestals 26 3/4" h may not fit immediately adjacent to the legs or end panels.

Peninsula worksurfaces with power center do not come with Electrical Components.

Products on this page do not include appropriate electrical units in Accessories, pages 540 to 545.

Modesty sold separately and can be field installed.

Wire chase sold separately.

Refer to grommet page for location option.

From users perspective, if the leg is on the right side, the peninsula is classified a "Right Hand" peninsula.

- 115: Leg Finish

### Specification Information

To order please specify pattern number including:
1. Left or Right hand
2. Grommet option
   - E=End, N=No grommet, M=Middle grommet
3. Grommet finish
   - Painted or plated
   - N has no finish option
4. Worksurface finish
   - L, V1, V2, V3
5. Edge finish: L, V1, V2, V3
   - (Edge options are available on laminate tops only.)
6. Leg finish
   - Painted or Anodized

Upcharges apply to legs with P2, P3 and P4 finishes.

### Application Notes

- It is not advisable to mix 28 3/8" desk height product with 26 1/2" standard height products.
- Products on this page work with 28 3/8" height planning.
- Products on this page will accept woodgrain laminate where laminate is currently an option.
- Worksurface stiffeners, recommended to provide additional support for open spans greater than 48".
- Due to height restriction, pedestals 28 3/8" may not fit immediately adjacent to the legs or end panels.
- Peninsula worksurfaces with power center do not come with Electrical Components.
- Products on this page do not include electrical components. Refer to appropriate electrical units in Accessories, pages 540 to 545.
- Modesty sold separately and can be field installed.
- Wire chase sold separately.
- Refer to grommet page for location option.
- From users perspective, if the leg is on the right side, the peninsula is classified a “Right Hand” peninsula.

Peninsula worksurfaces with Reverse L-legs provide a unique design option for desks and tables. The Rectilinear top feature offers a sleek, contemporary look, while the Float Edge design adds a touch of elegance. The Reverse L-leg configuration provides stability and supports the worksurface efficiently. The Flush Mount Attachment ensures a clean integration with the worksurface, making it a popular choice for professional and home settings. The variety of dimensions and finishes available allows for customization to fit specific needs and preferences.

**Application Notes**

It is not advisable to mix 28 3/4"h desk height product with 26 1/2"h standard height products.

Products on this page work with 28 3/4"h height planning.

Products on this page will accept woodgrain laminate where laminate is currently an option.

Worksurface stiffeners, recommended to provide additional support for open spans greater than 48".

Due to height restriction, pedestals 28 3/4"h may not fit immediately adjacent to the legs or end panels.

Peninsula worksurfaces with power center do not come with Electrical Components.

Products on this page do not include electrical components. Refer to appropriate electrical units in Accessories, pages 540 to 545.

Modesty sold separately and can be field installed.

Wire chase sold separately.

Refer to grommet page for location option.

From users perspective, if the leg is on the right side, the peninsula is classified a “Right Hand” peninsula.

**Application Notes**

It is not advisable to mix 28 3/8" desk height product with 26 1/2" standard height products.

Products on this page work with 28 3/8" height planning.

Products on this page will accept woodgrain laminate where laminate is currently an option.

Worksurface stiffeners, recommended to provide additional support for open spans greater than 48".

Due to height restriction, pedestals 28 3/8" may not fit immediately adjacent to the legs or end panels.

Peninsula worksurfaces with power center do not come with Electrical Components.

Products on this page do not include electrical components. Refer to appropriate electrical units in Accessories, pages 540 to 545.

Modesty sold separately and can be field installed.

Wire chase sold separately.

Refer to grommet page for location option.

From users perspective, if the leg is on the right side, the peninsula is classified a “Right Hand” peninsula.

### Specification Information

**To order please specify pattern number including:**

1. Grommet Finish: Painted or Plated
2. Top Finish: L, V1, V2, V3
3. Edge Finish: L, V1, V2, V3 (Edge options are available on laminate tops only.)
4. Leg Finish: Painted or Anodized
5. Stand-off Finish: Painted

**Grommet type:** P only

Due to height restriction, pedestals 26 3/8"h may not fit immediately adjacent to the legs or end panels.

### Application Notes

It is not advisable to mix 28 3/8"h desk height product with 26 3/8"h standard height products.

Products on this page work with 28 3/8"h height planning.

Products on this page will accept woodgrain laminate where laminate is currently an option.

Work surface stiffeners, recommended to provide additional support for open spans greater than 48"w.

Upcharges apply to legs with P2, P3 and P4 finishes.

Additional upcharges:

- **Leg Finish Add**
  - P2: $75
  - P3: $105
  - P4: $400

Peninsula worksurfaces with power center do not come with Electrical Components.

Products on this page do not include electrical components. Refer to appropriate electrical units in Accessories, pages 540 to 545.

Modesty sold separately and can be field installed.

Wire chase sold separately.

Refer to grommet page for location option.

From users perspective, if the leg is on the right side, the peninsula is classified as a “Right Hand” peninsula.

Reff Profiles Classic Height Adjustable Desks for 28 ¾” planning are an elegant and ergonomic solution for executive office spaces. With a height range of 26 ½” to 42 ¼” from the underside of the worksurface, the Classic Height Adjustable Desk offers a range of work heights from sitting to standing and is perfect for multi-user offices where convenient desk height adjustment is desired.

Construction
Classic Height Adjustable Desks are made up of two components, specified separately: the worksurface and the base. The worksurface is 1 ½” thick and has a three ply construction; refer to Worksurface planning guide pages for details of construction. The worksurface is pre-drilled with pilot holes for use with wood screws. The base consists of the electric height adjustable leg system, enclosed by two side gables, a modesty panel and leg covers. The base includes vertical hanging shrouds on three sides that are attached to the worksurface. The hanging shrouds move with the worksurface, sliding inside the gables and modesty which rest on the floor. Hanging shrouds are ¾” thick. Side gables are 1½” thick. The modesty is ¾” thick. The height adjustable legs are attached to the gables and modesty using heavy gauge steel brackets.

The product ships knocked-down. Field assembly is required. Refer to Installation Instruction 6TP00495 available on Knoll Exchange.

The Classic Height Adjustable Desk is a freestanding furniture element and must be placed at least 1” away from adjacent furniture elements in order to avoid any potential pinch points.

Reff Profiles Vol. Two
Height Adjustable Leg System:

Construction
The electric height adjustable leg system includes five parts: cabinet mounted weldment constructed of 14 gauge and 11 gauge steel, extendable columns constructed of 14 gauge steel, cantilever brackets constructed of 11 gauge steel, and outer and inner adjustable width crossbars of 14 gauge and 11 gauge steel respectively.

Electrical Requirements
The energy used by the electric height adjustable leg system during operation ranges from 180 – 320 Watts, which translates to 1.5 – 3.2 Amps. Energy consumption during standby is 0.45 Watts, which translates to 0.00375 Amps. Power requirement and usage per desk is: 120 – 240V, 50 - 60Hz, 3.2 Amps @ 120V running draw.

Load limit for the height adjustable leg, in excess of the worksurface and shrouds, is 95lbs, uniformly distributed.

For complete guide to the height adjustable leg system, user instructions and safety features, refer to the Reff Profiles Height Adjustable Desk Users Manual available on Knoll Exchange.

Scope:
Worksurfaces and Bases come in two depths; 30"D and 36"D; and widths from 60"W to 84"W in 6" increments. Worksurfaces are 1 ½" thick and have a standard square edge profile.

Worksurfaces are pre-drilled for either flush or recessed configurations. The flush configuration consists of equal depth worksurface and base. The recessed configuration consists of the 36" deep worksurface with a 30" deep base. All 30" deep worksurfaces are pre-drilled for flush configuration. 36" deep worksurfaces maybe specified either “F” for flush or “R” for recessed configuration.
**Power and Data Access**
Optional grommets can be specified to provide electrical and communications access at worksurface height.

Grommets are 2”x3” Profiles style which have a 1/16” thick flange which sits above the worksurface. Refer to Worksurface planning guide pages for grommet locations.

**Finish Options**
Worksurfaces are available in all core laminates, including wood grain laminates, and wood veneer. Wood grain direction runs along the width of the worksurface.

**Base Options:**
The Classic Height Adjustable Desk base has four elements requiring consideration: control switch, and the finish choices for the base, shroud and leg.

**Control Switch**
The default switch for the Classic Height Adjustable Desk is the simple up/down switch. A digital programmable control switch is also available with an upcharge. “S” specifies the standard up/down control switch. “D” specifies the digital display with programmable settings. The digital display comes with five programmable memory settings, including two “quick access” buttons for sitting mode and standing mode. Refer to Tone™ “Users Manual for Digital Control Switch” available on Knoll Exchange.

**Finish Options**
The base finish options refer to the two side gables and modesty panel. The base may be specified in laminate or wood veneer. The base is not available in wood grain laminate.

The shroud, which hangs vertically from the underside of the worksurface, may be specified in laminate or wood veneer. Shrouds are not available in wood grain laminate.

A small portion of the adjustable height legs are visible above the leg covers. The legs are offered in all core paint finishes.

**Planning Notes:**

**Storage**
Built-in storage options are not available for the Classic Height Adjustable Desk. Mobile pedestals are the recommended solution for under-desk storage. Available depth clearance adjacent to the leg covers is 19”.

**Accessories**
It is essential to understand the mounting clearance required for accessories such as keyboard supports, laptop drawers, CPU holders and wire management. Refer to the figures on the following page for available under-desk clearances and dimensions.

Wire management options include the RJBU Undermounted J-wire Trough. Refer to the Reff Profiles Accessories page for image and pricing. Alternatively, the Tone™ TBCP Cleat Plate which mounts to the underside of the worksurface centered between the crossbars may be used. Refer to the Tone™ Accessories page for image and pricing.

- **CH**: Classic Height Adjustable Desk
- **T**: Top
- **D**: 1 1/2" thick, square edge
- **F**: Flush modesty, (R = Recessed modesty available on 36" deep worksurfaces only)

### Specification Information

To order please specify pattern number including:
1. Grommet type:
   - **N**: No grommet
   - **G**: with Grommet
2. Grommet finish:
   - Painted or Plated
3. Worksurface finish:
   - L, V1, V2, V3
4. Edge finish: L, V1, V2, V3
   (Edge options are available on laminate tops only.)

Product on this page will accept woodgrain laminate where laminate is currently an option.

### Application Notes

- **Hardware is included.**
- **All tops are drilled to accept shrouds.**
- **Recessed modesties are an option for 36" deep worksurfaces only.**
- **If Flush modesty is selected; the grommet location is flush.**
- **If Recessed modesty is selected, the grommet location is Recessed.**

Product on this page **do not** accept wood grain laminate.

Bases are designed for use with corresponding worksurfaces to create freestanding tables.

### Application Notes

Worksurfaces must be specified separately.

Bases come with worksurface mounting brackets.

Height range is from 26 1/2" h - 43" h, (from the underside of worksurface to the floor) with the load capacity of 95 lbs uniformly distributed.

An upcharge of $318 applies to the "Digital Switch Option".

Assembly required; the base ships knocked down.

Leg finish applies to the vertical columns, cross rails and end brackets.

Side gables are 1 1/2" thick.

The Base includes the lower side gables, modesty & leg covers.

The Shrouds are attached to the underside of the worksurface.

### Application Notes

Worksurfaces must be specified separately.

Bases come with worksurface mounting brackets.

Height range is from 26 1/2"h - 43"h, (from the underside of worksurface to the floor) with the load capacity of 95 lbs uniformly distributed.

An upcharge of $318 applies to the “Digital Switch Option”.

Assembly required; the base ships knocked down.

Leg finish applies to the vertical columns, cross rails and end brackets.

Side gables are 1 1/2" thick.

The Base includes the lower side gables, modesty & leg covers.

The Shrouds are attached to the underside of the worksurface.
Executive Height Adjustable Desks

Executive Height Adjustable Desks for 28¾” high planning offer flexibility, personalization and advanced ergonomic performance in the workplace. With a height range of 26½" to 42¼" from the underside of the worksurface, Executive Height Adjustable Desks offer a range of work heights from sitting to standing and are perfect for multi-user offices where convenient desk height adjustment is desired.

Executive Height Adjustable Desks can be configured in a variety of ways to meet many functional and aesthetic requirements. Executive Height Adjustable Desks consist of a Worksurface Top and a configurable, Height Adjustable Executive Desk Base. The base offers options for the modesty panel and the desk storage.

See Figures 1, 2, 3, & 4 for example configurations.

Executive Height Adjustable Desks are typically planned as a stand-alone, free-standing element in an enclosed office space. Refer to Planning with Executive Height Adjustable Desks at the end of this section.

Components and Specification Options

Worksurface:
Executive Height Adjustable Desk worksurfaces are available in two depths; 30” and 36”, and in widths from 60” to 84” in 6” increments. All desk worksurfaces come with a standard square edge and are 1½” thick. Refer to The Planning Guide section for worksurfaces for general construction details.

Worksurfaces are pre-drilled with pilot holes for attachment to the height adjustable leg set. Worksurfaces are offered with two drilling options, which correspond to either a flush or a recessed leg selection:

- F=flush leg/storage
- R=recessed leg/storage

Note: Recessed leg/storage is only available for 36”D tops. See Figure 5 for worksurface drilling options as they relate to leg/storage positions.

Figure 5: Worksurface Drilling Options for Flush or Recessed Legs/Storage  
(Shown with Storage on Both Sides)
Worksurfaces are available with 2" x 3" desktop grommets for wires to pass through. There are two grommet options:

- N=no grommet
- G=grommet

When the (G) grommet option is selected, the position of the grommets on the depth of the worksurface is determined by the leg/storage drilling option selected, (F) or (R).

See Figure 6 for grommet locations. Grommets consist of a sleeve and a lid. The sleeve has a raised flange which trims the opening in the worksurface. The lid covers the opening and has a mouse-hole to allow wires to pass through.

When specified with grommets, the worksurface is pre-drilled and includes two grommets located at each end of the worksurface.
Desk Base:
The Height Adjustable Executive Desk Base consists of the following components, varying per the configuration specified.
- Height Adjustable Leg Set
- Leg Surround
- Box-File Pedestal
- Pedestal Top
- Pedestal Back
- Modesty
- Wire Manager

See Figure 7 for exploded view of a Height Adjustable Desk Base.

The base is a pre-configured unit which is assembled in the field. Refer to installation instructions available on Knoll Exchange.

See Figure 8 for a matrix of available configurations.

**Height Adjustable Leg Set:**
Height adjustable leg sets are electrically controlled with two telescoping two-stage legs and have a height range from 26½" to 42¼" to the underside of the top. The legs have an outer diameter of 3½". They have a 30" deep T-leg base with adjustable-width cross rails provided in the appropriate width to suit the desk.

See Figure 9 for height adjustable leg set details.

Height adjustable leg sets are available in all core paint finishes.

Two switch options are available for the leg sets. The standard up/down switch (S) activates power to extend or retract the legs to reach the desired height. The optional digital control (D) is programmable to preset user height preferences.

A 120" A/C power cordset with a 3-prong, grounded plug is provided. Refer to Ref Profiles Height Adjustable Electric Legs User’s Manual available on Knoll Exchange and Antenna Digital Control Switch User’s Manual available on Knoll.com.

**Leg Surround:**
Leg surrounds conceal the height adjustable leg and foot and provide an elegant aesthetic alternative to the typical exposed leg set. The leg surround provides no structural support of the desk.

Leg surrounds are of all wood construction, 6¹/₄"W and 22²/₈"H. They come in two depths, 30" and 36"D, corresponding to the desk base size selected.

The unit consists of side gables with overlaying front and back panels. The front panel of the unit will be full height when the flush base option is selected, or raised off the floor when the stepped base option is selected. Refer to Figure 11 for base details.

The top is pre-drilled with a cut-out for a field installed leg grommet which trims the opening for the height adjustable leg. The mouse-hole in the leg grommet allows the height adjustable leg set power cable to pass through the top into the interior of the leg surround where it may pass under the side gable to a local floor monument. Refer to Figure 10 for exploded view.

The front finish of the leg surround corresponds to the pedestal front finish when a storage pedestal is specified. The top and sides finish defaults to the desk base case finish. The leg grommet finish defaults to the height adjustable leg finish.

---

**Figure 9: Height Adjustable Leg Set**

**Figure 10: Leg Surround, Exploded View**
Box-File Storage Pedestal:
The Height Adjustable Executive Desk Base may be configured with either one or two letter width box-file pedestals, available with either metal or wood interior and with either flush or stepped base detail.

See Figure 11 for base options & details.

Pedestal depths correspond to the desk base depth selected. Drawer interiors are 26"D for both 30"D and 36"D options.

Wood drawers are a 4-sided, 5-ply, wood box, maple veneered and finished inside and out. All corners are dovetailed for superior fit.

Metal drawer interiors are constructed of 22-gauge cold rolled, commercial quality (CRCQ) steel, painted black.

Drawers have full extension steel, ball bearing slides and are designed to meet BIFMA loading standards.

Pulls can be specified in B (no pull), C, D, F (bar), H (outline), J (routed), R (cylinder), S, and T (tab). Integral "J" pulls are full-width and routed out of the drawer front. Refer to page 566 for pedestal pull locations and details.

All pedestals come drilled for locks. Lock keyholes are located at the top right hand corner of the box drawer front. Locks are specified separately and can be randomly keyed or keyed alike. Locks are no charge and are available in either black or a matte silver finish.

Keying instructions must accompany all orders. Refer to page 623 for KnollKey Lock Program Information. Pedestals do not come with locks included. Randomly keyed locks are factory installed. Keyed-alike locks are field-installed using the KnollKey order form. Each locking pedestal counts for one lock core.

Pencil trays are included in box drawer pedestals with wood interiors; Pencil trays can be ordered separately for pedestals with metal interiors.

File drawers include bars for front to back and side to side filing, accommodating both letter and legal filing. Wood file drawers do not support bottom loading. Metal file drawers will support bottom loading.

The finish of the pedestal front may be wood veneer, or any core laminate except wood grain laminate. The finish of the pedestal case defaults to the desk base case finish which may be wood veneer, or any core laminate except wood grain laminate.

Pedestal Top:
Pedestal tops provide a 1/2" thick surface over the leg surround or both the leg surround and BF pedestal when storage is specified. The pedestal top clips onto the leg surround or pedestal for ease of installation.

See Figure 12 for exploded view.

Pedestal tops are pre-drilled with an access hole for insertion of the height adjustable leg set. This access hole is trimmed with a keyhole shaped leg grommet. The mouse-hole in the leg grommet facilitates passage of power wires through the pedestal top.

The finish of the pedestal top defaults to the desk base case finish. The finish of the leg grommet defaults to the height adjustable leg finish.

Pedestal Back:
Pedestals and leg surrounds are covered with either a pedestal back or full flush modesty. Pedestal backs require no specification. Their finish defaults to the desk base case finish. Refer to Figure 12 for exploded view.
Modesty:
The Height Adjustable Executive Desk Base is available with four modesty options:
- N=None
- F=Flush Full Height
- P=Recessed Partial Height
- R=Recessed Full Height

When no modesty (N) is selected, the leg surround and pedestals come with a finished pedestal back. When flush full height modesty (F) is selected, a single-piece full-height back spans the entire width of the desk base, covering the leg surrounds and pedestals. When recessed partial height (P) or recessed full height (R) modesty is selected, each pedestal unit and/or leg surround comes with a finished back, and a recessed modesty panel spans the space between the pedestal units and/or leg surrounds. That recessed panel is located 6" in from the back of the pedestals and/or leg surrounds.

Refer to Figure 5 & Figure 8 for modesty configuration examples.
Partial height modesties are 13½"H. All modesties are nominally 1" thick.

The Modesty finish defaults to the desk base case finish.

Wire Management:
The Wire Manager neatly and conveniently encapsulates and conceals several cables and directs them down the height adjustable leg, through the mouse-hole of the leg grommet. The wire manager prevents the cables from bunching as the worksurface is raised and lowered.

The Wire Manager is of metal construction with a back and a snap-on cover. It attaches to the structural support under the worksurface. See Figure 13 for details.

One wire manager is included with the Height Adjustable Executive Desk Base and is field installed. Refer to Installation Instruction 6TP00499 available on Knoll Exchange.

The wire manager comes in core paint finishes which default to the leg finish.

Wire managers are available as a separate accessory item; pattern code RHPW. The accessory wire manager is available in all core paint finishes.

Other accessories available for wire and power management include the Tone Cleat Plate, Power Strip and Hinged Wire Cover. Refer to the Tone Height Adjustable Tables price list, Accessories section.

Figure 13: Wire Manager
Planning with Executive Height Adjustable Desks

In the installed position, the sides of the worksurface overhang the leg surrounds by 1\(\frac{1}{16}\)". The approach edge of the worksurface is flush with the storage pedestal back(s) and/or the leg surrounds when the flush leg option is selected, and overhangs 6" for the recessed leg/storage option. The user’s edge of the worksurface is flush with the face of the leg surrounds/storage.

See Figure 14 for overhang dimensions.

CAUTION: Allowance must be made for a minimum 1" clearance to adjacent worksurfaces to avoid possible pinch points.

Planner must be aware of the upper height of the worksurface travel and allow clearance for mounted ancillary products such as monitor arms or lighting.

See Figure 15 for desk height range.

Generally, the planner should match the aesthetic of the Executive Height Adjustable Desk storage to the adjacent storage, selecting the same pull and base detail options.

Height Adjustable Peninsulas

Research shows that moving throughout the day increases well-being and workplace satisfaction. Reff Profiles offers sit-to-stand solutions for the entire office, including height-adjustable open plan workstations and adjustable desks, credenzas and peninsulas for the private office or enclosed workspace.

Height Adjustable Peninsulas for 28½” high planning offer flexibility, personalization, and advanced ergonomic performance in the workplace. With a height range of 26½” to 42¼” from the underside of the worksurface, the Height Adjustable Peninsulas offer a range of work heights from sitting to standing and are perfect for multi-user offices where convenient desk height adjustment is desired.

Height adjustable peninsulas consist of a worksurface with height adjustable leg set. The leg set has a height adjustable column with a supporting foot at either end of the worksurface. At one end of the peninsula is a storage element while at the other is a box leg surround.

Peninsulas are typically planned in a T-shaped layout, with the storage aligning a wall or panel system. Refer to Planning with Height Adjustable Peninsulas at the end of this section.

Height Adjustable Peninsulas are offered in two pre-configured options, “Classic” and “Progressive” as well as the individual components to create a custom solution to suit a wide variety of aesthetic and functional needs.

The Classic solution is offered with an Open Access Pedestal combined with a 1” thick Credenza Top to create the storage element at one end with a wood-case box leg surround at the other. See Figure 1.

The Progressive solution uses a Progressive Low Credenza as the storage element at one end with an aluminum framed box leg surround at the other end to emulate an Open Frame Leg solution with infill panels. See Figure 2.

Common components to both solutions include the worksurfaces and height adjustable leg sets.

Classic and Progressive pre-configured peninsulas are handed relative to the leg surround. From the User’s point of view, a right-handed peninsula has the leg surround on the right-hand side. A left-hand peninsula has the leg surround on the left-hand side. See Figure 3 for peninsula handedness.

The Classic and Progressive pre-configured peninsula products simplify the order process for a complete solution. To accommodate more finish options and facilitate mixing and matching storage or leg surround options, the entire set of modular components is available to create a build-to spec solution to suit adjacent furniture aesthetics.
Components and Specification Options

Worksurface
Peninsula worksurfaces are available in two depths; 30" and 36", and widths from 60" to 84" in 6" increments. All peninsula worksurfaces come with standard square edge and are 1½" thick. Refer to The Planning Guide for Worksurfaces for general construction details. Worksurfaces are pre-drilled with pilot holes for attachment of the height adjustable legs.

Worksurfaces are available with 2" x 3" desktop grommets for wires to pass through. Grommets consist of a sleeve with a raised flange which trims the opening in the worksurface and a lid with a mouse-hole to cover the opening and allow wires to pass through. There are three grommet options:

- N = no grommet
- GL = grommet left side, is to the left of the User
- GR = grommet right side, is to the right of the User.

See Figure 4 Grommet Locations.

In the installed position, for both Progressive and Classic HA Peninsulas, the edge of the peninsula top is 3½" inboard from the wall. So, for example, a 72" wide peninsula top will extend 75½" into the room.

See Figure 5 Overall Width Dimensions.
Height Adjustable Leg Set

Height adjustable leg sets are electrically controlled with two telescoping two-stage legs and a height range from 26½” to 42¼”. The legs have an outer diameter of 3¼”. They have a 30” deep T-leg base with adjustable-width cross rails in three width options:

- **S** = short (31”-45”W); for use with 30”-54” wide tops
- **M** = medium (42”-68”W); for use with 42”-78” wide tops
- **L** = long (63”-89”W); for use with 66”-96” wide tops

Height adjustable leg sets are available in all core paint finishes.

Two switch options are available for the leg sets. The standard up/down switch (S) activates power to extend or retract the legs to reach the desired height. The optional digital control (D) is programmable to preset user height preferences. Refer to Reff Profiles Height Adjustable Electric Legs User’s Manual available on Knoll Exchange and Antenna Digital Control Switch User’s Manual available on Knoll.com.
Open Access Storage Pedestal
Access pedestals offer a recessed, single-piece removable back behind the adjustable shelf that allows convenient access to wall-supplied services. The recessed position of the back panel allows space for the height adjustable leg as well as space for cords to bend and for plugs to connect to wall outlets, as necessary. The recess space is 8\(\frac{3}{16}\) deep. Access pedestals are intended for use in applications where the back of the pedestal is not exposed. Access pedestals are planned with an associated Credenza Top. See the next section for details.

Access pedestals may be specified with a flush base detail or with a recessed, stepped base detail. See **Figures 7 & 8**.

Shelf depth is 8\(\frac{1}{2}\)" for 19" deep pedestals and 12\(\frac{1}{2}\)" for 23" deep pedestals.

Three sets of holes are drilled inside the pedestal. The shelf is positioned on the middle location and can move 2\(\frac{1}{2}\) higher or 2\(\frac{1}{2}\) lower. When centered, the clearance below the shelf is 11\(\frac{5}{8}\)". The clearance above the shelf is 4\(\frac{15}{16}\)".

**Figure 7: Open Access Storage Pedestal, Flush Base**

**Figure 8: Open Access Storage Pedestal, Stepped Base**
**Credenza Top**

Credenza tops provide a worksurface over the Access Pedestal and are available in two depths; 20" and 24", and widths of 30" and 36". All credenza tops come with standard square edge and are 1" thick. Refer to The Planning Guide for Worksurfaces for general construction details. Credenza tops are available with or without edge grommet. See [Figure 9](#).

The edge grommet has the central portion of the back edge of the credenza top offset 1 3/8" inboard to allow cables to drape over the back edge into the recessed cavity of the Access pedestal unit below. This is often used in conjunction with a wall mounted Task Panel or Tackboard which partially conceals the edge grommet.

**Figure 9: Credenza Tops**

![Credenza Tops Diagram](image_url)
Credenza Top
Credenza tops are pre-drilled with an access hole for insertion of the height adjustable leg set. This access hole is trimmed with a keyhole shaped leg grommet. The mousehole in the leg grommet facilitates passage of power wires through the credenza top. 30" wide credenza tops have one grommet location which is centered. 36" wide credenza tops offer three leg grommet locations:

- L = left
- C = centered
- R = right

See Figure 10 for leg grommet locations.

The centered grommet location, places the height adjustable leg and the perpendicular peninsula top, centered on the credenza top. The left location places the leg so that the peninsula top is flush with the edge of the credenza top and lower storage on the User’s side of the peninsula. The right grommet location places the peninsula top flush with the credenza top on the approach side of the peninsula top.

See Figure 11 for planning details.
Leg Surround
Leg surrounds conceal the height adjustable leg and foot and provide an elegant aesthetic alternative to the typical exposed leg set. The leg surround provides no structural support of the Peninsula worksurface.
Leg surrounds are 6¼"W and 22¾"H. They come in two depths, 30" and 36"D, corresponding to the Peninsula top depths.
There are two styles of leg surround; Classic and Progressive.

Classic Leg Surround
The Classic Leg Surround is an all wood case and top. See Figure 12. The top is removable for ease of installation. It is ½" thick and may be specified with its own finish options.

The case consists of side gables with overlaying front and back panels. The case finish options apply to all surfaces of the unit. For a separate front finish, refer to Custom Product.

The top is pre-drilled with a cut-out for a field installed leg grommet which trims the opening for the height adjustable leg. The mouse-hole in the grommet allows the height adjustable leg set power cable to pass through the top into the interior of the leg surround where it may pass under the side gable to a local floor monument.
The leg grommet is available in all core paint finishes.

Figure 12: Classic Leg Surround
Progressive Leg Surround

The Progressive Leg Surround emulates the aesthetic of the Open Frame Leg creating an attractive picture frame effect with the attached wood infill panels. See Figure 13.

The leg surround frame is constructed of an aluminum extrusion and is available in all core paint finishes.

The inside infill panel is permanently affixed to the aluminum frame while the outside infill panel is removable for access to the height adjustable leg and for ease of installation and wire management. The infill panels may be specified in all core laminates including wood grain laminates or wood veneer.

The top of the leg surround aluminum frame is pre-drilled with a cut-out for a field installed leg grommet which trims the opening for the height adjustable leg. The mouse-hole in the grommet allows the height adjustable leg set power cable to pass through the top into the interior of the leg surround where it may pass under the aluminum lower rails to a local floor monument.

The leg grommet is available in all core paint finishes.
Progressive Low Credenza

The Progressive Low Credenza for Height Adjustable Peninsulas emulates the aesthetic of the open shelf version of Reff Profiles Progressive Low credenzas. See Figure 14. They do not require an additive credenza top. The top is built into the unit. The units have an all wood case supported on two legs with two additional stabilizing feet.

These units are nominally 20"D (19" actual) x 23½"H. They come in two widths, 30" and 36"W.

The top of the progressive low credenza is pre-drilled with an access hole for insertion of the height adjustable leg set. This access hole is trimmed with a keyhole shaped leg grommet. The mouse-hole in the leg grommet facilitates passage of power wires through the top of the credenza. 30" wide credenzas have one grommet location which is centered. 36" wide credenzas offer three leg grommet locations:

- L = left
- C = centered
- R = right

See Figure 15 for leg grommet locations.

Figure 14: Progressive Low Credenza

Figure 15: Leg Grommet Locations in Progressive Low Credenza
The centered grommet location, places the height adjustable leg and the perpendicular peninsula top, centered on the credenza. The left location places the leg so that the peninsula top is flush with the edge of the credenza on the User's side of the peninsula. The right grommet location places the peninsula top flush with the credenza on the approach side of the peninsula top.

See Figure 16 for planning details.

The progressive low credenzas are designed with a recessed back creating a cavity for the height adjustable leg to sit behind. The shelf depth is 9 5/8"D.

Credenza legs are available in all core paint finishes. The leg stabilizers default to the leg finish. The case finish may be any core laminate, including wood grain laminate and wood veneer. The grommet may be any core paint finish.

Figure 16: Planning with Leg Grommet Locations for Progressive HA Peninsulas
**Wire Management**

The Wire Manager Accessory neatly and conveniently encapsulates and conceals several cables and directs them down the height adjustable leg, through the mouse-hole of the leg grommet as they are routed below. The wire manager prevents the cables from bunching as the peninsula top is raised and lowered. See Figure 17 for wire manager details.

The wire manager is an optional item for build-to-specification construction. It is included when a pre-configured height adjustable peninsula is specified.

The accessory wire manager is available in all core paint finishes. When ordered with the pre-configured height adjustable peninsula, it defaults to the leg finish.

Other accessories available for wire and power management include the Tone Cleat Plate, Power Strip, and Hinged Wire Cover. Refer to the Tone Height Adjustable Tables price list, Accessories section.

Pre-configured Peninsulas
The pre-configured versions of the Classic Height Adjustable Peninsula and Progressive Height Adjustable peninsulas provide a convenient method of ordering an entire unit with one pattern code. Not all finish combinations may be accommodated with this single pattern, in which case, the individual components may be selected for a build-to-specification solution.

Pre-configured Classic Height Adjustable Peninsula:
The pre-configured Classic Height Adjustable Peninsula includes one of each the following components:
- Peninsula worksurface
- Height adjustable leg set
- Classic leg surround
- Open Access pedestal
- Credenza top
- Wire manager

See Figure 18 for details.

The Peninsula Top size is defined by the product code. In the installed position, the edge of the Peninsula Top will be 3½” inboard of the back edge of the Credenza Top below. Refer to the Peninsula Top section, Figure 5, for diagram.

Pre-configured peninsulas are handed relative to the leg surround. From the User's point of view, a left-handed peninsula has the leg surround on the left with the right-handed version vice versa. Refer to Figure 3 for peninsula handedness.

There are three desk grommet options:
- N = no grommet
- GL = grommet left side, is to the left of the User
- GR = grommet right side, is to the right of the User

Peninsula tops are available in all core laminates, including wood grain laminates and wood veneer.

The Height Adjustable leg set is selected to fit the appropriate sized Peninsula top. Two switch options are available: S (standard up-down switch) or D (digital programmable switch which is at an upcharge). The leg finish may be any core paint.

The Classic Leg surround depth defaults to the Peninsula depth. The leg surround finishes default to the Case finish.

For pre-configured peninsulas, the Open Access Pedestal comes with stepped base. For flush base, please use build-to-spec component or specify additive Baseboard Kit accessory; RCAB30 or RCAB36.

The pedestal depth may be specified to be either 1=20” or 2=24” (actual is 19” or 23”). The width of the pedestal defaults to the peninsula top depth. The finish defaults to the case finish option.

The Credenza Top is the non-edge grommet type (RHPCE...). The width defaults to the peninsula top depth. The leg grommet defaults to the centered (C) location.

The finish default to the case finish.

The Leg grommet may be specified to be any core paint finish.

The Wire Manager finish defaults to the height adjustable leg set finish.

Refer to Installation Instruction 6TP00500 available on Knoll Exchange.
Pre-configured Progressive Height Adjustable Peninsula
The pre-configured Progressive Height Adjustable Peninsula includes one of each the following components:

- Peninsula worksurface
- Height adjustable leg set
- Progressive leg surround
- Progressive low credenza
- Wire manager

See Figure 19 for details
Please refer to the individual components for descriptions of construction and function. The available options and finishes for the pre-configured versions are outlined below.

The Peninsula Top size is defined by the product code. In the installed position, the edge of the Peninsula Top will be 3½” inboard of the back edge of the Credenza Top below. Refer to the Peninsula Top section, Figure 5, for diagram.

Pre-configured peninsulas are handed relative to the desk leg surround. From the User's point of view, a left-handed peninsula has the leg surround on the left with the right-handed version vice versa. Refer to Figure 3 for peninsula handedness.

There are three desk grommet options:
- N = no grommet
- GL = grommet left side, is to the left of the User
- GR = grommet right side, is to the right of the User

Peninsula tops are available in all core laminates, including wood grain laminates and wood veneer.

The Height Adjustable leg set is selected to fit the appropriate sized Peninsula top. Two switch options are available: S (standard up-down switch) or D (digital programmable switch which is at an upcharge). The leg finish may be any core paint.

The Progressive Leg surround depth defaults to the Peninsula depth. The finish of the infill panels of leg surround default to the Case finish. The Leg Surround frame finish may be any core paint.

The Progressive Low credenza width is defined by the Peninsula Top depth. The grommet location defaults to the C-centered location. The credenza cabinet finish defaults to the Case finish. The credenza leg finish defaults to the height adjustable leg set finish.

The Leg grommet may be specified to be any core paint finish.

The Wire Manager finish defaults to the height adjustable leg set finish.

Refer to Installation Instruction 6TP00501 available on Knoll Exchange.
Planning with Height Adjustable Peninsulas

CAUTION:
Allowance must be made for a minimum 1" clearance to adjacent worksurfaces to avoid possible pinch points.

The storage elements of the Height Adjustable Peninsula are designed intentionally without finished backs for ready access to adjacent power. Storage elements are designed to be used adjacent to a wall or panel rather than with the back exposed, with the worksurface perpendicular to the storage, typically in a T-shaped layout.

Planner must be aware of the upper height of the worksurface travel and allow clearance for mounted ancillary products such as monitor arms or lighting for example.

Generally, the planner should match the aesthetic of the Peninsula storage to the adjacent storage using the Progressive Pre-Configured Peninsula elements with Progressive Reff Profiles furniture elements and using the Classic Pre-Configured Peninsula elements with Classic pedestals and cabinets in either the flush or stepped base options.

See Figure 20 for overall width dimensions.

Figure 20: Planning with Height Adjustable Peninsulas
Modesties are not included with the Height Adjustable Peninsulas. Partial Hanging Modesties (RDHPM _) are available for order separately. Refer to Figure 21 for available widths, corresponding clearances, and Partial Hanging Modesty selection.

Peninsula (Progressive and Classic with 19"D Pedestal)  
Peninsula (Classic with 23"D Pedestal)
Built-to-Spec Height Adjustable Peninsulas

All of the modular components for both Classic and Progressive Height Adjustable Peninsulas are available individually, to create a build-to-spec solution.

To specify a build-to-spec solution, the following components must be specified separately:

For a Classic HA Peninsula:
- Peninsula Worksurface
- Height Adjustable Leg Set
- Classic Leg Surround
- Open Access Storage Pedestal (stepped or flush base)
- Credenza Top
- Wire Manager

For a Progressive HA Peninsula:
- Peninsula Worksurface
- Height Adjustable Leg Set
- Progressive Leg Surround
- Progressive Low Credenza
- Wire manager

Refer to Figure 22 for an illustration of these items.

**Specification Information**

**Application Notes**

To order please specify pattern number including:

1. Control Switch:
   - "S" specifies the standard up/down Control Switch.
   - "D" specifies the digital display with programmable settings. Add $318 list for the digital display with programmable settings.
2. Worksurface Grommet option:
   - No Grommets
   - GL= Grommet Left
   - GR= Grommet Right
3. Worksurface Grommet finish:
   - Painted or Plated
4. Worksurface Top finish:
   - L, V1, V2, V3
5. Worksurface Edge finish:
   - L, V1, V2, V3
   (Edge options are available on laminate tops only)
6. Case finish:
   - L, V1, V2, V3
   (Case includes Access Pedestal, Credenza top and Leg Surround)
7. Leg Grommet finish:
   - All core paint finishes
8. Leg Finish:
   - All core paint finishes
   (Leg finish refers to adjustable height round column leg)

Product on this page will accept woodgrain laminate, where laminate is currently an option.

Height range is from 26½"h - 42½"h (from the underside of worksurface to the floor) with the load capacity of 200 lbs.

An upcharge of $318 applies to the "Digital Switch Option". Assembly required; this product ships knocked down.

Leg finish applies to the vertical columns, cross rails and end brackets.

Fascias are not included and can be ordered separately.

Pedestals width is equal to worksurface depth.

Rail finish defaults to leg finish.

For further information please refer to the planning guide pages.

It is Not advisable to mix 28 3/8’h desk height products with 26 1/2” standard height products.

28 3/8” high desk will only work with 28 3/8” high lower storage.

Product on this page **Excluding any vertical surface over 60”**, will accept wood grain laminate, where laminate is currently an option.

Grommets are located 20” in form the sides and 3.5” in from the back.

Grommets ship separately in a kit.

Knoll accepts no responsibility for special grommet locations which interfere with support or other hardware. All requests for special grommet locations must be approved through custom product development.

Total height = 28 3/8” h to the underside of worksurface.

Worksurface is 1 1/2” thick.

Lower storage sold separately.

30” deep desk with flush modesty will accept up to 29” deep pedestals.

36” deep desk with flush modesty will accept up to 29” deep pedestals.

Classic Desks ship knocked down, with all hardware.
Reff Profiles Tables are freestanding worksurface solutions for private and open office planning as well as meeting and activity spaces. Reff Profiles offers a variety of types of tables which have differing aesthetics and functionality. All of the tables in this section plan with desk height products and all are 28 ⅞” high measured to the underside of the worksurface.

Due to interference conditions, desk height storage which is 28 ¼” high may not be placed under any tables.

Except where otherwise noted, worksurface stiffeners are required for support of 1 ½” thick table tops with spans greater than 54”. The recommended stiffener is AWM1S.

Tables are divided into two basic types; four legged versions and center column versions.

**The four legged versions are:**
- Tables with Open Frame Legs*
- Tables with L-Legs
- Tables with Reverse L-Legs
- Tables with Soft Rectangular Legs
- Tables with Column Legs
- Mobile Tables
- Tables with 2x4 Legs
- Tables with 4x4 Legs

*Two open frame legs are used per table but are connected to the underside of worksurfaces in each of the four corners.

**The center column versions are:**
- Sliding Tables
- Height Adjustable Sliding Tables
- Column Base Tables
- Height Adjustable Column Base Tables
Tables with Open Frame Legs

These tables are available in Rectangular top shapes.

Scope of nominal sizes:
Depths: 24", 30", 36"
Widths: 60", 66", 72", 78", 84"

Construction Details
Tables with open frame legs have two open frame supports which are positioned flush to the edge at both ends of the table. See Figure 1. Tables are supplied with required stiffener beams which connect with the top plates of the legs. Worksurfaces are supplied with pilot holes pre-drilled for threaded metal inserts. Legs are attached to the table top using machine screws supplied. Grommets are not available for these tables. Refer to installation instruction 6TP00441 available on Knoll Exchange.

The legs consist of four extruded aluminum frame members with mitered corners connected to two top plates of cast zinc alloy. See Figure 2. The frame members have a “T” shape which enables infill panels to be inserted flush to the face of the frame. Infill panels are available separately and installed in pairs.

The required stiffener beams are steel “hat” shapes which attach at each end to the top plates of the open frame legs and are also affixed to the under-side of the table top at regular intervals along the length of each stiffener.

Finish Details
Worksurface tops are available in all core laminates, wood grain laminates, mixed finish (laminate top with wood edges), and all core veneer finishes including synthetic edge options.

Open frame legs are available in all core paint finishes and anodized finishes. Leg top plates are painted to match the leg finish when core paint is selected. Leg top plates are plated to compliment the leg finish when anodized is selected.

Tables with L-legs, Reverse L-legs and Soft Rectangular legs

These tables are available in Rectangular and Square top shapes.

Scope of Nominal Sizes

Rectangular sizes:
- 30"D x 48"W
- 30"D x 60"W
- 30"D x 72"W
- 36"D x 72"W

Square sizes:
- 42"D x 42"W
- 48"D x 48"W

Grommet

These tables are offered with six grommet options in 3 locations for use with a variety of electrical power and communication outlets. The grommet code is made up of the grommet option followed by the grommet location.

Grommet options are:
- NG – No grommet
- P – Power center; cast grommet sleeve and hinged lid included with the table; suitable for use with under-mounted electrical outlets*
- D1 – Cut-outs for table drop-in electrical unit 202
- D2 – Cut-outs for table drop-in electrical unit 210
- D3 – Cut-outs for table drop-in electrical unit 311
- D4 – Cut-outs for table drop-in electrical unit 412

Grommet locations are:
- C – Centered
- E – One end

Ex. D1C = Cut-out for 202 table drop-in electrical outlet located at the center of the table.

Tables with L-legs, Reverse L-legs and Soft Rectangular legs, cont’d.

Construction Details
Tables with L, Reverse-L and Soft Rectangular legs have four legs which are positioned flush to the edge of the four corners of the table. See Figure 3. L and Reverse-L legs are not handed. The Soft Rectangular legs are handed; 2-LH and 2-RH. Worksurfaces are supplied with pilot holes pre-drilled to help center the legs in their design positions. Legs are attached to the table top using wood screws supplied. Each leg consists of an extruded aluminum vertical support, factory connected to a cast zinc alloy top plate assembly. See Figure 4. The L-leg and Reverse-L leg are 3” x 3” x 7/8” thick. The Soft rectangular leg is 2” x 3”. The top plate assembly is 5 ½” x 5 ½” x 3/16” thick. Each leg is supplied with a black 1 1/8” diameter glide which provides ¾” of height adjustability.

Finish Details
Worksurface tops are available in all core laminates, wood grain laminates, mixed finish (laminate top with wood edges), and all core veneer finishes including synthetic edge options. L, Reverse-L and Soft Rectangular legs are available in all core paint finishes and anodized finishes. Leg top plates are painted to match the leg finish when core paint is selected. Leg top plates are plated to compliment the leg finish when anodized is selected.

Tables with Column Legs, cont’d.

Construction Details

Tables with Column legs have four legs which are positioned inset from the edges of the table. See Figure 3. Column legs are not handed. Grommets are not available for these tables. Contact Custom Product Development if grommets are required.

Worksurfaces are supplied with pilot holes pre-drilled to help center the legs in their design positions. Legs are attached to the table top using wood screws supplied.

Each leg consists of round steel vertical support, factory connected to a steel top plate assembly. The diameter of the leg is dependent upon the top size selected:
- 36” diameter and 36” deep tops come with 2 ½” diameter legs.
- 42” diameter and 42” deep tops come with 3” diameter legs.
- 48” diameter and 48” deep tops come with 4” diameter legs.

The top plate assembly is 7 ½” x 7 ½” x 3/16” thick.

Each leg is supplied with a cast glide that is the same diameter as the leg. See Figure 2 (previous page). The glide provides 2 ¼” of height adjustability.

Finish Details

Worksurface tops are available in all core laminates, wood grain laminates, mixed finish (laminate top with wood edges), and all core veneer finishes including synthetic edge options.

Column legs are available in all core paint finishes and plated finishes. Leg top plates are painted black. The leg glides are finished the same color as the leg.

Mobile Tables, cont’d.

Construction Details
Mobile Tables have four round Column legs with casters, which are positioned inset from the edges of the table. See Figure 2. The castors are swivel type; two are provided with wheel brakes. Grommets are not available for these tables. Contact Custom Product Development if grommets are required. Worksurfaces are supplied with pilot holes pre-drilled to help center the legs in their design positions. Legs are attached to the table top using wood screws supplied.

Each leg consists of a round steel vertical support, factory connected to a steel top plate assembly. The legs are 3” diameter. The top plate assembly is 7 ½” x 7 ½” x ¾” thick. Castors have polyurethane wheels with tread guards. Each castor is rated for 120 lbs. The table height is 28 ¾” to the underside of the 1½” thick top. There is no height adjustability on Mobile Tables.

Finish Details
Worksurface tops are available in all core laminates, wood grain laminates, mixed finish (laminate top with wood edges), and all core veneer finishes including synthetic edge options. Column legs are available in all core paint finishes and plated finishes. Leg top plates are painted black. The castors are black.

Figure 2: Leg Locations
Tables with 2x4 Legs
Tables with 2x4 Legs are versatile meeting tables offering a vast selection of power and communications functionality and aesthetic diversity. Options for power and communications include several configurations; power center grommets which elegantly conceal the outlets below the table surface or drop-in table outlets which provide outlets flush with the table top. All electrical outlets and cable management accessories are ordered separately. Table tops and legs may be specified in different finishes creating nearly unlimited aesthetic possibilities.

These tables are available with Rectangular top shapes.

Scope of nominal sizes:

Depths: 36", 42", 48"
Widths: 72", 78", 84", 90", 96"

Grommet Codes
Tables with 2x4 Legs are offered with 6 grommet types in three location configurations.

Grommet code is made up of the combination of the grommet option and the grommet location.

Grommet options are:
NG – No grommet
P – Power center; cast grommet sleeve and hinged lid included with the table; suitable for use with under-mounted electrical outlets*
D1 – Cut-out for drop-in electrical unit 202

### Tables with 2x4 Legs, cont'd.

#### Construction Details

Tables with 2 x 4 legs have four legs which are positioned flush to the edges at the corners of the table. The legs are connected to a substructure which is integral to the table. The substructure consists of four peripheral rails which form the table skirt. The legs are field connected to the table skirt with a cast top plate at each corner. Triangular corner brackets provide further reinforcement and a connection point for the substructure to the table top.

L-brackets provide further connection points between the substructure and the table top. See **Figure 3**. No auxiliary stiffeners are required to reinforce the worksurface. Worksurfaces are supplied with pilot holes pre-drilled to locate the wood screws used to attach the worksurface to the substructure. Refer to installation instruction 6TP00385 available on Knoll Exchange.

The table skirt is an extruded aluminum profile; inset 2" from the long edge and 3" from the short edge. The skirt rails are 2" high x 1" deep. The legs are constructed of a 2" x 4 ½" extruded aluminum profile, factory connected to top plates of cast zinc alloy. The leg top plate creates a 1/8" thick reveal between the top of the leg and the bottom of the worksurface. A glide at the base of each leg provides 1 ½" of height adjustability.

Corner brackets and L-brackets are formed steel.

#### Finish Details

Worksurface tops are available in all core laminates, wood grain laminates, mixed finish (laminate top with wood edges), and all core veneer finishes including synthetic edge options.

Legs may be specified in all core paint finishes or in wood veneer finishes. When specified with a wood veneer finish, the leg finish must match the worksurface finish. Contact Custom Product Development if the wood veneer finish of the legs is desired to be a different wood veneer finish than the top.

The skirt finish defaults to the leg finish.

The leg reveal may be any core paint finish.

Corner brackets and L-brackets are supplied black.

Construciton Details

Tables with 4 x 4 legs have four legs which are positioned flush to the edges at the corners of the table. The legs are connected to a substructure which is integral to the table. The substructure consists of four diagonal rails which join four interior rails using cast Y-connectors. See Figure 2. The legs are field connected to the table substructure with a cast top plate at each corner. No auxiliary stiffeners are required to reinforce the worksurface. Worksurfaces are supplied with pilot holes pre-drilled to locate the wood screws used to attach the worksurface to the substructure. Refer to installation instruction 6TP00384 available on Knoll Exchange.

The table substructure rails are an extruded aluminum profile; 2" high x 1" deep. There is a 1/8" gap between the top of the rails and the underside of the worksurface.

The legs are constructed of a 4" x 4" extruded aluminum profile, factory connected to top plates of cast zinc alloy. The leg top plate creates a 1/8" thick reveal between the top of the leg and the bottom of the worksurface. A glide at the base of each leg provides 1 ½" of height adjustability.

Finish Details

Worksurface tops are available in all core laminates, wood grain laminates, mixed finish (laminate top with wood edges), and all core veneer finishes including synthetic edge options.

Legs may be specified in all core paint finishes or in wood veneer finishes. When specified with a wood veneer finish, the leg finish must match the worksurface finish. Contact Custom Product Development if the wood veneer finish of the legs is desired to be a different wood veneer finish than the top.

To order please specify pattern number including:

1. Grommet Drilling Options:
   - NG = no grommet
   - P = Power center grommet
   - D1 = Cut out for drop in electrical unit 202
   - D2 = Cut out for drop in electrical unit 210
   - D3 = Cut out for drop in electrical unit 311
   - D4 = Cut out for drop in electrical unit 412
   - *Electrical components are not included with tables & need to be ordered separately.

2. Grommet Locations:
   - B = Both ends
   - C = Center
   - E = One end

3. Grommet Finish:
   - NG = Finish not required
   - P = Painted and plated finishes
   - D1, D2, D3, D4 = Drilling locations only, finish not applicable

4. Worksurface finish: L, V1, V2, V3

5. Edge finish: L, V1, V2, V3
   (Edge options are available on laminate tops only)

6. Leg finish: All core paint or veneer to match top, where applicable

7. Leg reveal finish: All core paint options

**Application Notes**

The tables on this page, come complete with structural frame. No additional stiffeners are required.

Table’s frame ships knockdown.
Assembly required.

For laminate tops (including wood grain laminate) leg finish options are: all core paint finishes only.

The product on this page accept wood grain laminate where laminate is currently an option.

For veneer tops, leg finish options are: all core paint finishes or same wood veneer as the top. The prices indicated above, are for painted legs and no grommet.

Upcharges apply to legs with V1, V2 or V3 finishes.

Meeting Tables

Meeting Tables are based upon the Tables with 4 x 4 Legs and are offered in larger sizes suited to a variety of larger meeting spaces and small conference rooms.

Meeting Tables are available in a variety of configurations. Tables 30” to 48” deep are one worksurface deep by either two or three pieces wide of equal size. Tables 60” x 72” deep are two worksurfaces deep by either one, two or three pieces wide of equal size. Meeting Tables are available in two heights: desk height - which is 28 \(\frac{3}{8}\)” high to the underside of the worksurface and service height – which is 34 \(\frac{3}{8}\)” high to the underside of the worksurface. See Figure 1 for scope of table sizes and number of worksurface pieces per Meeting Table.

Meeting Tables offer a vast selection of power and communications functionality. Options for power and communications include several configurations; power center grommets which elegantly conceal the outlets below the table surface; or drop-in table outlets which provide outlets flush with the table top. See Figures 2, 3 and 4 for grommet options and locations. Meeting Tables are UL listed for use with all power and communications options. All electrical and cable management accessories are ordered separately.

Table tops and legs may be specified in different finishes creating a variety of aesthetic possibilities.

Seating Capacity

Seating capacity is based upon two module widths; 30” wide for Meeting Spaces and 36” wide for more generous Conference Spaces. Seating capacity includes side seating and end seating. For tables 30” to 48” deep, end seating includes one place at each end. For tables 60” and 72” deep, end seating includes two places at each end. See Figure 1 for Seating Capacity.

Power and Communications Management
Generally power is supplied to the Meeting Table by means of a floor monument outlet centered inside the Center Support footprint. Refer to Grommet Details for a description of the available power and communications outlets ordered separately.

For cable management, Meeting Tables will accept Undermounted Wire Baskets (RWMT…) which may be used to contain electrical outlet cables and conceal electrical equipment transformer blocks which may be plugged in to power outlets. For tables without a center support, a Flexible Vertical Wire Manager (RWMVF) may be specified separately.

**Grommet Details**

Meeting Tables are designed to accept a variety of power and communications outlets to suit every need. All electrical outlets are ordered separately.

Edge mounted electrical outlets are mounted under the meeting table close to the edge of the table and provide direct access to power and communications while partially concealing the outlet for a more refined aesthetic. Tables should be specified with the "no grommet" (NG) option when edge mounted option is chosen.

Power Centers have a hinged flip lid neatly framed by a grommet body and conceals the electrical and communications outlets mounted below the worksurface.

Meeting Tables specified with this option come with the cut-outs pre-drilled in the worksurface and includes all grommet body and lid assemblies.

Drop-in electrical outlets provide power and communications outlets flush mounted to the worksurface for direct access. Tables specified with this option are supplied with the appropriate sized cut-out pre-drilled to suit the desired Drop-in outlet.

Refer to Power and Data Accessories Planning Guide pages for further details of electrical outlets.

Grommet codes are made up of two elements; the grommet option followed by the grommet location.

Grommet options are:
- NG = no grommet
- P = Power Center grommet
- D1 to D4 = cut-outs for Drop-in Outlets

Grommet locations are:
- B = both ends
- 4 = four locations

See Figures 2 and 3 for definitions of grommet codes and associated power and communications outlets. See Figures 4A and 4B for grommet locations.

See Finish Details for power center grommet finish options.

Construction Details
Meeting Table tops are in multiple pieces. Tables 30” to 48” deep are one worksurface deep by either two or three pieces wide of equal size. Tables 60” x 72” deep are two worksurfaces deep by either two or three pieces wide of equal size. See Figure 1 for number of worksurface pieces per Meeting Table size. See Figure 4 for worksurface configurations. See Figure 5 for Grommet Cut-out sizes.

Meeting table support consists of four 4 x 4 legs positioned flush to the edges of the corners of the table and a center support positioned at each of the longitudinal divisions of the worksurfaces.

Center Support Details
The center support provides both support and cable management for the table. Tables which are two worksurfaces wide have one center support while tables which are three worksurfaces wide have two center supports. See Figure 1 for the quantity of center supports for each table size. The legs and center support(s) are connected to an integral substructure.

The center support is required to have two covers which are ordered separately. See following section for Center Support Covers. Center supports come in two depths, 9” and 24”; and two heights, 28 3/8” for desk height tables and 34 3/8” for service height tables. Tables 30” to 48” deep come with 9” deep center supports. All other tables come with 24” deep center supports. See Figure 12 for Center Support sizes.

Grain Direction
Veneer grain and alignment is not continuous on adjacent worksurfaces.

**Finish Details**

Power Center Grommet is offered in Polished Chrome (PD) or Satin Nickel (PU) and any core paint finish.

Worksurface tops are available in all core laminates, wood grain laminates, mixed finish (laminate tops with wood edges), and all core wood veneer finishes including synthetic edge options. Grain direction for wood veneer and wood grain laminate worksurfaces is along the width of the table. See Figures 6, 7 and 8 for grain direction.

Grain pattern for wood veneer and wood grain laminate will not be continuous on adjacent worksurfaces. To enhance the beauty of the wood veneer, Meeting Tables with domestic flat cut veneers (V2) are layed up using reverse slip matching, with sequential cathedrals arranged in opposite directions. See Figure 9 for arrangement of veneer for reverse slip match.

Legs may be specified in all core paint finishes or in wood veneer finishes. When specified with wood veneer finish, the leg finish must match the worksurface veneer finish. Contact Custom Product Development if the wood veneer finish of the legs is desired to be a different veneer finish than the top.

Leg reveals may be any core paint finish.

The table substructure is painted and defaults to the leg reveal color.

The center support covers are available in laminate, wood veneer or metal finishes.

---

**Figure 9: Reverse Slip Match**

**Figure 10: Leg Reveal**
Center Support Covers

Center support covers are required to enclose the center support of the Meeting Tables. Each center support requires two covers; one for each side of the support.

There are two types of center support cover; flat and offset. The Flat cover sits flush to the center support. The Offset cover is 1 ½" thick, adding an extra 3" of interior depth to the center support (when two are ordered) which helps to conceal an electrical floor monument.

The center support covers are available in laminate, wood veneer or metal finishes.

Electrical Components for
Reff Profiles Meeting Table

Reff Profiles Meeting Table can be powered by a modular distribution system featuring standard Knoll 2+2 and 3+3 eight- and ten-wire power systems. From a single point of connection to the building power supply, Reff Profiles raceway can distribute four or six 20-amp circuits. Depending on national and local electric codes, and anticipated load of a particular application, each circuit may support as much as 10 or more duplex outlets.

The central component is the power harness, which can be mounted under the table rails, anywhere along the length of the table rail. The harness is suspended from a power harness mounting bracket attached to either or both center table rails.

The power harness accepts snap-in duplex outlets on each face, and is enclosed by steel raceway covers, specified separately. Each end of the harness has ports for two jumper cables, or a power infeed and a jumper cable. The power infeed connects power from a building junction box, and jumpers connect power from one harness to another, in either direction.

Power harnesses are available in two sizes: 12” wide, with two duplex outlet locations on each face, and 24” wide, with four outlet locations on each face. Duplex outlets must be specified separately to access one of the four or six circuits. Outlets for circuits can be specified in black with white letters identifying circuits. Outlets for circuits X, Y, Z, are also available in orange with black letters, or black with orange triangles and letters to designate protected circuits.
Corresponding raceway covers for 12" harness are 18" wide; covers for 24" harness are 30" wide. Raceway covers can be ordered in pairs that include two covers with openings or one cover without openings.

Jumper cables are available in various lengths up to 72" to link power between harnesses. Jumper cables should be managed by cable clips for desk rails (RCMC10, set of 10).

Two types of infeeds are available to connect the power harness from the building power supply.

1) The power harness infeed has a modular connector with a six foot pigtail to connect from a junction box in the floor or wall to a power harness. See Figure 1.

2) A hardwired infeed box, required in New York City, mounts inside the meeting table center support and includes a connector with six foot pigtail to connect to the closest power harness. See Figure 2.

Outlet fillers are a kit of ten plastic filler plates that flex to snap securely into any unused outlet opening in Reff Profiles raceway covers. Installed covers are designed to closely mimic the appearance of adjacent power outlets. Fillers are black injection molded plastic.

Refer to Installation Instructions 6TP00481 available on Knoll Exchange.

Power harness and outlet modules: steel enclosure between molded polypropylene distribution blocks, 10-wire.

**Jumper cables:** flexible steel conduit with strain relief, 10-wire

**Outlets:** molded polycarbonate duplex preconfigured as circuit A, B, C (black), X, Y, Z (black, orange or black with orange triangle)

**Infeed:** watertight conduit with 6’ whip or hardware box mounted to desk rail, center beam or fence frame, 10-wire

Load should be balanced evenly among power circuits. In accordance with NEC2011 Article 210, the permissible load should not exceed 80% of the circuit ampere rating (which is 16 amps on each 20 amp branch circuit).

- PB: Available on all tables widths.
  - Grommet option includes 4 power center grommets.
  - P4: Available on tables 144"w to 216"w.
- Additional grommet options:
  - NG = no grommet
  - P = Power center grommet
  - PB = Both ends - all widths

**Center Support Details:**

Tables on this page require Center Support Covers which are sold separately.
216" tables come with 6 piece tops, and require two center supports.
All other tables on this page, come with 4 piece tops, and require only one center support.
Table height = 28 3/8"h to the underside of worksurface.
Product on this page do not include electrical components

**Center Support Covers:**

- All center supports are four feet high.
- Both center supports are sold separately.
- Center support grommet is available on all tables widths.
- Center support covers are sold separately.
- Refer to reference number 6TP00462 for Table assembly instructions, and 6TP00465 for Support installation instructions.

**Application Notes**

Power Rails are suspended from a Power Rail Mounting Bracket attached to the Meeting Table rail sub-structure. Power Rails accept snap-in Duplex Outlets on each face and are enclosed by steel Raceway Covers, specified separately. Each end of a Power Rail has ports for two-jumper cables or a Power Infeed and a Jumper Cable. The Power Infeed connects power from the building supply and Jumpers connect power from one Power Rail to another, in either direction.

Power Rails are available in Knoll Standard 2+2 (eight wire) or 3+3 (ten wire) power systems. Each power rail requires 1 set of Mounting Brackets (ordered separately); ROTRM - Mounting Brackets are black and supplied with mounting hardware. Outlet Fillers snap into Raceway Covers to cover un-used outlet openings. Outlet Fillers are supplied in black finish only.

### Application Notes

Raceway End Caps finish the open end of two Raceway Covers.
Cover for exposed end of Power Rail covers the end of the Power Rail that has no Jumper connected.
Power Infeeds connect the Power Rail to the building power. They include a 6 foot liquid-tight conduit and pigtail for connection to a floor monument or wall electrical box.
A hardwire Power Infeed, required in New York City, includes all required mounting brackets and hardware to mount vertically inside the Meeting Table Center Support; and includes a 6 foot connector with pigtales to connect to the building power.

2. Grommet Locations:
   - C = Centered, * default location for Media Enclave Tables
   - D1, D2, D3 & D4 Option requires two Table drop in electrical units
   - P Option requires one table power center electrical unit

Application Notes

Table height = 28 3/8"h to the underside of worksurface. The tables on this page, come complete with structural frame. No additional stiffeners are required. The product on this page accept wood grain laminate where laminate is currently an option. For veneer tops, leg finish options are: all core paint finishes only. For electrical components, see page 345 to 347.

**Specification Information**

To order please specify pattern number including:

1. **Grommet Options:**
   - DG = Desk top grommet(s) only
   - P = Power center grommet
   - D1 = Cut out for drop in electrical unit 202
   - D2 = Cut out for drop in electrical unit 210
   - D3 = Cut out for drop in electrical unit 311
   - D4 = Cut out for drop in electrical unit 412
   - *Electrical components are not included with tables and need to be ordered separately.

2. **Grommet Location:**
   - C = Centered, *default location for Media Enclave Tables

3. **Grommet Finish:**
   - P = all core paint, PD, PU
   - D1 to D4 are cut outs only, no finish applies

4. **Worksurface Finish:**
   - L, V1, V2, V3

5. **Edge Finish:**
   - L, V1, V2, V3
   - (Edge options are available on laminate tops only)

6. **Leg Finish:**
   - All core paint or veneer to match top, where applicable

7. **Leg reveal finish:**
   - All core paint options

**Application Notes**

Table height = 28 3/8" h to the underside of worksurface.

The tables on this page, come complete with structural frame. No additional stiffeners are required.

Assembly required.

For laminate tops (including wood grain laminate) leg finish options are: all core paint finishes only.

The product on this page accept wood grain laminate where laminate is currently an option.

For veneer tops, leg finish options are: all core paint finishes or same wood veneer as the top. The prices indicated above, are for painted legs without center grommet.

Additional upcharges:

- **Leg Finish Add**
  - V1: $1430
  - V2: $1494
  - V3: $1731

Product on this page do not include electrical components.

*Upcharge of $144 applies for each Power Center grommet.

*Upcharges apply to legs with V1, V2 or V3 finishes.

**Note:**

For 48" deep tables:
- P Option requires one table power center electrical unit
- D1, D2, D3 & D4 Option requires one Table drop in electrical unit

For 60" deep tables:
- P Option requires two table power center electrical units
- D1, D2, D3 & D4 Option requires two Table drop in electrical units

For electrical components, see page 345 to 347.

Construction Features

Worksurface Tops

All center column tables have 1" thick tops. Grommets are not available for these tables. Sliding Tables, both fixed height and height adjustable are available in three organically shaped tops; round, soft square and soft rectangular. Column Base Tables are available in geometric shapes; round, square and rectangular. See Figure 2 for shapes and sizes. Worksurfaces are supplied with pilot holes pre-drilled to help center the leg in its design position. The worksurface top is field attached to the column base using wood screws supplied. Center column tables have two styles of edge profile. Sliding Tables have a beveled edge with a half round under-cut to improve finger grip and ease the sliding of the table from one location to another. See Figure 3. The fixed height and height adjustable Column Base Tables have a square edge profile and no finger grip. See Figure 4. Refer to Worksurface planning guide pages for tops construction details.

Tops, vertical column supports and base plates are shipped in separate packages.

Column Base

Column bases consist of a vertical support column with a factory connected steel top plate which is field connected to a steel base plate using three hex bolts. The base plate is shaped to match the worksurface top shape. See Figure 5.

Fixed Height - The fixed height vertical support consists of a steel 3" diameter column, factory connected to a 10" square top plate.

Height Adjustable - The vertical support consists of a pneumatically activated adjustable height column, factory connected to an 11 ¾" square top plate. The upper column diameter is 3 ½". The lower column diameter is 3".

Four 3 ¾" diameter nylon leveling glides are supplied with the table. Glides have a Teflon base to aide with movement over carpet. Glides have ¾" height adjustment. With the glides in their fully closed position, the top of the base plate is 1 7/16" above the floor level.

Finish Details

All worksurface tops are available in all core laminates, wood grain laminates, mixed finish (laminate top with wood edges) and all core veneer finishes. Sliding Table worksurface tops are also available with Solid Surface material option in Arctic White.

For Sliding Tables with beveled edge, depending upon the top finish selected, the beveled surface will have the following finish:

<table>
<thead>
<tr>
<th>Top Finish</th>
<th>Bevel Finish</th>
</tr>
</thead>
<tbody>
<tr>
<td>Laminate</td>
<td>Clear Coat</td>
</tr>
<tr>
<td>V1, V2, V3</td>
<td>Veneer - to match top</td>
</tr>
<tr>
<td>Solid Surface</td>
<td>Solid Surface - to match top</td>
</tr>
</tbody>
</table>

The Column Base is available in all core paint finishes. The vertical column has a smooth finish while the base plate has a textured finish in the same color as the column. The column top plate is painted black. The glides are black.

   - Painted or Anodized finishes only.
   - Ships with wood screws for fastening to underside of worksurface.

2. Pattern:
   - All core painted options
   - All core metallic painted options, plus AA
   - Painted or Plated finishes
   - Painted and Anodized finishes AP & AU

**Application Notes**

It is NOT advisable to mix 28 3/8" high planning desk height products with 26 3/8" standard height product.

For **Peninsulas**: Stiffeners are required for 1 1/2" thick tops with a span greater than 54". The end of the worksurface, opposite the open frame legs must be anchored securely.

For **Tables**: Stiffeners must be installed in a specific location relative to the leg top plates and may not be arbitrarily located. Stiffeners are finished black.

Open Frame legs include glides with 1" height adjustability. Open Frame legs are not intended or able to be used adjacent to full height - 28 3/8" desk height storage. Note: These legs are intended to be used with Knoll worksurfaces, only.

Installation instruction sheets available on Knoll.Exchange. For Peninsulas, refer to part number 6TP00440. For Tables; refer to part number 6TP00441.

**Application Notes**

To order please specify pattern number including:

1. **Finish Type**, where applicable
   - L = Laminate
   - 1 = V1
   - 2 = V2
   - 3 = V3

2. **Finish: Core paint finishes**

It is NOT advisable to mix 28\(\frac{3}{8}\)"h desk height product with 26\(\frac{3}{8}\)"h standard height product.

Product on this page will accept wood grain laminate where laminate is currently an option. For more information on grain direction on vertical surfaces, please see page 5.

Wood T and L bases are not recommended for supporting conference tops.

Refer to Top to Base matrix, pages 140 and 141 in the Reff Profiles planning guide.

All bases include 1\(\frac{1}{2}\)" leveler, allowing 1\(\frac{3}{4}\)" adjustability.

**Specification Information**

Stiffeners are black painted finish.

**Application Notes**

AutoStrada worksurfaces require stiffeners when the span between structural supports exceeds 60". Stiffener also serves as horizontal cable manager.

Stiffener corresponds in width to straight or corner worksurface back edge. Specify 12" less wide stiffener to mount adjacent to floor standing pedestal.

For 90° application span, use AWM1-S84 stiffener.

Pedestals

Reff Profiles pedestals for 28 7/8" planning are available in a variety of single and double width configurations. Pedestals provide efficient and customizable storage solutions and often form the supportive foundation of floorstanding workspaces.

Dimensions

Pedestals are available in three heights for 28 7/8" planning:
- 22 7/8"H (3/4 height), intended to combine with 1" thick worksurfaces to achieve a 23 3/8" credenza height.
- 28 7/8"H, intended to combine with 1 1/2" thick worksurfaces to achieve a full 29 7/8" freestanding desk height.
- 34 3/8"H, intended to combine with 1 1/2" thick tops for use in service height applications.

Note: Reff Profiles pedestals are also available in 26 1/2" height to achieve an overall height of 27 3/4". 26 1/2"H pedestals should only be planned in panel supported applications. Exceptions may be made for freestanding applications when matching legacy projects. See Reff Profiles Vol. One Price List for information on planning with 26 1/2" pedestals. Do not mix 26 1/2" pedestals with any 28 7/8" planning components.

Single floorstanding pedestals measure 15 7/8" wide (16" nominal, letter width), or 18 7/8" wide (19" nominal, legal width). Service height pedestals measure 23 7/8" wide (24" nominal). Double pedestals measure 29 7/8" and 35 7/8" wide (30" and 36" nominal, respectively.) The widths of the 24", 30", and 36" pedestals are undersized by 1/8" to eliminate any slight positional shift issues that may otherwise occur when several are placed beside one another.

Pedestals are 19", 23" or 29" deep. (24" wide pedestals are 19" or 23" deep only.) Optional 1" thick pedestal backs allow pedestals to match the depth of worksurfaces in exposed situations.

Construction

All floorstanding pedestal cases are constructed with precision mortised keyhole mechanical fasteners. This advanced construction method provides superior alignment and lasting rigidity to the case.

Interior drawer and shelf construction is either painted, metal or wood (veneer or laminate finish). Metal interiors provide increased economics while wood interiors feature the added quality of dovetailed joinery.

Wood drawers are a 4-sided 5 ply, maple veneered and finished inside and out. All corners are dovetailed for superior fit.

Metal drawer interiors are constructed of 22-gauge cold rolled, commercial quality (CRCQ) steel, painted black.

All box, file, and equipment drawers have full extension steel, ball bearing slides and are designed to meet BIFMA loading standards.

Hinged door pedestals use concealed, spring-loaded, adjustable pot hinges.

Floorstanding pedestals can replace wall hung support brackets, end panels, legs, T-bases, and L-bases to support worksurfaces. Four galvanized steel leveler glides are included to allow up to 1 1/2" of height adjustment.

Floorstanding pedestals are supplied with a hardware kit including wood screws for attachment to the underside of a worksurface. Pedestals may require counterweights (3 per pedestal, specified separately) when used in an unsecured fashion (i.e. freestanding.) Equipment pedestals are not intended for use in a standalone application.

All floorstanding pedestals (with the exception of access pedestals, see clarification below) include a metal back. Optional finished pedestal back panels are ordered separately and are available in 16", 19", 24", 30" and 36" widths to complement freestanding applications with exposed configurations.
Exterior Options
Floorstanding pedestals may be specified with a flush base detail or with a recessed, stepped base detail.

All pedestal fronts and cases are finished in veneer or laminate. If the case is specified in laminate, the front can be the same or a different laminate, or the front can be wood. If the case is specified in wood, the front will be of the same matching wood. Reff Profiles offers exceptional front set matching on pedestals specified in V2 or V3 veneer.

Pulls can be specified in B (no pull), C, D, F (bar), H (outline), J (routed), R (cylinder), S, and T (tab). Integral “J” pulls are full-width and routed out of the drawer front. Refer to pages 8-10 for pedestal pull locations and details.

Locks
Keyholes are drilled on all pedestals with drawers and are optional on models with hinge doors. Keyholes are located on the pedestal front: at the top right corner for drawer front pedestals; at the top left or right corner for single door pedestals (i.e. the latch side of the door); and on the top left corner of the right hand door for double door pedestals.

Locks are specified separately and can be randomly keyed or keyed alike. Locks are no charge and are available in a black or a matte silver finish.

Keying instructions must accompany all orders. Refer to page 622 for KnollKey Lock Program Information. Pedestals do not come with locks included. Randomly keyed locks are factory installed. Keyed-alike locks are field-installed using the KnollKey order form. Each locking pedestal counts for one lock core.
Interior Options

Pedestal drawers are available in various combinations of a 6” box style and a 12” file style.

Pencil trays are included in 16” and 19” wide box drawer pedestals with wood interiors; Pencil trays can be ordered separately for 16” and 19” wide pedestals with metal interiors.

12” file drawers include bars for front to back and side to side filing, accommodating both letter and legal filing, regardless of pedestal width. Wood file drawers do not support bottom loading. Metal file drawers will support bottom loading.

Also available, are box/file configurations with a single common front. The single front is attached to the file drawer. The box drawer is hidden behind the single front, and gets the same front finish as the case. The box drawer gets no applied pull. A finger space is provided for access.

Open and hinged door pedestals, single and double wide, include one adjustable shelf. Three sets of holes are drilled inside the pedestal. The shelf is positioned on the middle location and can move 2 1/2” higher or 2 1/2” lower. When centered, the clearance below the shelf is 11 1/2”. The clearance above the shelf is 4 1/4” for 22 1/8” high storage, and is 11” for 28 3/8” high storage. Shelves are 1 1/4” thick. Specify left-hand or right-hand hinge location on single-width pedestals with doors.

Access pedestals offer a recessed, removable back above their adjustable shelf that allows convenient access to wall-supplied services. The recessed position of the back panel allows space for cords to bend and for plugs to connect to outlets, as necessary. The recessed space is 4” deep. Access pedestals are intended for use in applications where the back of the pedestal is not exposed.

Equipment pedestals combine an equipment drawer with an open vertical cubby intended for housing a CPU tower. They are available 22 1/8” high or 28 3/8” high.

The handedness of the equipment pedestal is determined by the location of the drawer, from the user’s perspective.

There is no back behind the equipment drawer, to allow for wire management and access to power. The CPU cubby has a wood back with a 3” opening at the top for ventilation. The divider between the equipment drawer area and the CPU cubby has a grommet for wire pass-through.

Full pedestal backs can be ordered, but are not recommended for equipment pedestal applications, as they will restrict ventilation.

Equipment pedestals are available with wood interiors only.

The 22 1/8” high equipment pedestal has a cable pitch above the equipment drawer that guides cables towards the back of the pedestal, keeping them clear of the equipment below.

The 28 3/8” high equipment pedestal has a shelf above the equipment drawer, creating a horizontal cubby space. The back of this cubby space is removable for service access, and has a 1 1/8” opening at the top for cable management and ventilation.

Interior clearance dimensions for the equipment drawer:

Depth: 17 3/4” (for 19” deep pedestals) 21 3/4” (for 23” deep pedestals)
Height: 14 1/4” (for 22 1/8” high pedestals, without cable tray installed) 14” (for 28 3/8” high pedestals)
Width: 19 1/4” (for 30” wide pedestals) 25 1/4” (for 36” wide pedestals)

Interior clearance dimensions for the vertical CPU cubby:

Depth: 17 3/4” (for 19” deep pedestals) 21 3/4” (for 23” deep pedestals)
Height: 17 1/8” (for 22 1/8” high pedestals) 23 1/16” (for 38 3/8” high pedestals)
Width: 8”

24” wide pedestals are available with: an empty interior and a hinged door front, or a waste-recycle interior and a drawer front. They are 28 3/8” high or 34 7/8” high.

24” wide pedestal interior clearance dimensions:

Depth: 16.5” (for 19” deep pedestals) 20.5” (for 23” deep pedestals)
Height: 23.7” (for 28 3/8” high pedestals) 29.7” (for 34 7/8” high pedestals)
Width: 21”

The intent of the 24” wide hinged door pedestal is that it be customized to preference, and be specified in conjunction with interior options, such as shelves (ordered separately), or left empty for use with a mini refrigerator. Pedestal backs are not recommended for use with a refrigerator, as they will restrict ventilation.

The shelf drillings in 24” wide pedestals are spaced continuously 2 1/4” apart from top to bottom. To order shelf kits, refer to 552.

24” wide waste-recycle pedestal units come fully assembled and include 2 bins for recycling and waste. Waste-recycle pedestals do not have a lock option. The drawer body, which holds the bins, comes in black only. Bins are grey and each bin has a 25 (US) quart capacity.

Suitable tops for the 24” wide pedestal units are: 1 1/2” thick rectilinear tops (with desk top grommet) or 1 1/2” thick credenza tops (with edge grommet).

A 6” wide filler is optional and can be ordered separately to achieve full worksurface depth.
**Mobile Pedestals**

Mobile pedestals for 28 7/8" planning are 23 3/8" high (23" nominal), 15 5/8" wide (16" nominal), and 19 1/16" deep (19" nominal). Their tops align with 23 3/8" credenza height and will fit under full 29 3/8" freestanding desk height worksurfaces.

Mobile pedestal cases are of glue and dowel construction.

Mobile pedestal interiors feature wood drawer construction. The drawers are a 4-sided, 5 ply, wood box, maple veneered and finished inside and out. All corners are dovetailed for superior fit.

Box and file drawers have full extension steel, ball bearing slides and are designed to meet BIFMA loading standards.

Five concealed, non-braking swivel casters are mounted on mobile pedestals, with four of the casters mounted near the corners and the fifth caster mounted to the drawer to ensure stability when the drawer is open.

Counterweights are included.

Mobile pedestals have a finished top, sides, and back and are offered in veneer or laminate. If the case is specified in laminate, the front can be the same or a different laminate, or the front can be wood. If the case is specified in wood, the front will be of the same matching wood. Reff Profiles offers exceptional front set matching on pedestals specified in V2 or V3 veneer.

An aluminum pencil tray is permanently attached to the top of the mobile pedestal. This tray also serves as the handle to pull the unit from place to place. The tray is available in all standard paint finish options and in three anodized finish options.

Mobile pedestals are available with a G (grommet) pull only.

Keyholes are always drilled on mobile pedestals. Keyholes are located on the pedestal front, at the center right side of the file drawer.

Locks are specified separately and can be randomly keyed or keyed alike. Locks are no charge and are available in a black or a matte silver finish.

Keying instructions must accompany all orders. Refer to page 622 for KnollKey Lock Program Information. Pedestals do not come with locks included. Randomly keyed locks are factory installed. Keyed-alike locks are field-installed using the KnollKey order form. Each locking pedestal counts for one lock core.

Mobile pedestal drawers are a box/file configuration with a single common front. The single front is attached to the file drawer. The box drawer is hidden behind the single drawer, and gets the same front finish as the case. The box drawer gets no applied pull. A finger space is provided for access.

The hidden box drawer will accommodate an interior pencil tray, but it is not included, and must be specified separately.

The mobile pedestal file drawer includes one letter width bar, and accommodates both letter and legal filing. The file drawer does not support bottom loading.

**Pedestal Accessories**

Additional and replacement pedestal accessories are available, including: pencil trays, file bars, box and file drawer dividers, shelf kits, counterweights, and waste/recycle bins. Refer to 551-552 for further information.

Application Notes
It is NOT advisable to mix 28\(\frac{3}{8}\)"h desk height products with 26\(\frac{3}{8}\)"h standard height products. These pedestals to be used in conjunction with 28\(\frac{3}{8}\)" planning.

Pedestals can be specified with 2 Base options: Flushed Base or Stepped Base. For more details, refer to the Planning Guide page 250 to 254.

Pedestals may require counterweights when used in unsecured fashion (ie freestanding)
*3 counterweights per pedestal
* Pencil trays available in 16" and 19"w box drawers only.

Pedestals with drawers always lock drilled.
L = drilled to accept lock

Excluding J-pull option will accept wood grain laminate, where laminate is currently an option.

Keying instructions must accompany all orders, refer to page 622. Pedestals do not come with lock included. Random locks are factory installed. Key alike are field installed using the KnollKey order form. Each locking pedestal on this page counts for one lock core.

These pedestals are key hole construction.

From the viewer's perspective, the drawer location determines the pedestal Right/Left orientation.

Applied back can be ordered separately, but **NOT** recommended for it restricts ventilation.

Not advised to use in a stand alone application.

**Specification Information**

To order please specify pattern number including:

1. **Lock Option**:
   - L = Drilled to accept lock
   - N = no drilling

2. **Lock Finish**:
   - B = Black
   - S = Matte Silver

3. **Pull option**:
   - B = no pull, no drilling
   - Customer's own pull
   - C = nickel finish C-pull
   - D = metal D-pull
   - F = Bar pull (1 pull per door set)
   - H = Outline pull
   - J = routed J-pull
   - R = Cylinder pull
   - S = S-pull
   - T = Tab pull (1 pull per door set)

4. **Pull Finish**:
   - Painted
   - Plated

5. **Case Finish**:
   - L, V1, V2, V3

6. **Front finish**:
   - L, V1, V2, V3

*If case is Laminate, the front can be laminate or wood.
*If case is Wood, the front can only be wood.

It IS NOT advisable to mix 28⅜'' desk height products with 26⅛'' standard height products. These pedestals to be used in conjunction with 28⅜'' planning.

Product on this page Excluding J-pull option will accept wood grain laminate, where laminate is currently an option.

**Application Notes**

- The pedestals on this page come with one adjustable shelf
- Wood shelf only
- Not available in metal interior
- Removable back is above adjustable shelf
- Works the same way as the 3/4'' access ped
- Inside height clearance: Top shelf = 10.9''
- Bottom shelf = 11.6''

Pedestals can be specified with 2 Base options: Flushed Base or Stepped Base. For more details, refer to the Planning Guide page 250 to 254.

For Stepped Base, replace "R" with "R2".

ie: RP161 = Pedestal with Flushed base
R2P161 = Pedestal with Stepped base

It is NOT advisable to mix 28\(\frac{3}{8}\)" desk height products with 26\(\frac{3}{8}\)" standard height products. These pedestals to be used in conjunction with 28\(\frac{3}{8}\)" planning.

**Keying instructions must accompany all orders, refer to page 622. Pedestals do not come with lock included. Key-alike are field installed using the KnollKey order form. Each locking pedestal on this page counts for one lock core.**

**Application Notes**

The intent of the hinged door pedestals, is to be customized to your preference, and are to be used in conjunction with interior options, such as shelves (which can be ordered separately) or empty for use with a mini refrigerator.

To order shelf kits for these pedestals, refer to page 552.

The shelf drillings in these units are continuously 2.5" apart from top to bottom.

Suitable tops for these units are; 1 1/2" thick rectilinear tops (with desk top grommet) or 1 1/2" thick Credenza tops (with edge grommet). 6" filler is optional and can be ordered separately to achieve full depth.

Finished back not recommended for use with a refrigerator as it restricts ventilation.

Pedestals can be specified with 2 Base options: Flushed Base or Stepped Base. For more details, refer to the Planning Guide page 250 to 254. For Stepped Base, replace “R” with “R2”, ie; RP161 = Pedestal with Flushed base RP2161 = Pedestal with Stepped base

Wall Storage Units Overview

Wall Storage Units expand the private office and meeting spaces storage options in the Reff Profiles line and are designed to enhance the performance of the office with improved cable management and storage options.

These units include a cable drop area behind each shelf allowing corded articles to be easily stored and used. Units must be attached to a wall or back-to-back. Adjacent units need to be attached to each other for alignment.

Reveals are installed between Bookcase, Stack-on and Shoulder Units.

Climbing or stepping upon the shelves will exceed the design load and may cause the shelf to collapse, resulting in personal injury and product damage. Do not climb or step upon the Bookcase.

Bookcases:

Wall Storage includes a series of Bookcases available in 14" and 11" depth, 86", 72", 53", 42" and 28" height; 36" and 30" width.

All dimensions are nominal. Actual dimensions are:

- **Depth**
  - 11" = 10 ¾"
  - 14" = 13 13/16"

- **Width (without vertical reveals)**
  - 30" = 29 13/16"
  - 36" = 35 13/16"

- **Height**
  - 86" = 86"
  - 72" = 72 1/2"
  - 53" = 52 5/8"
  - 42" = 41 1/2"
  - 28" = 28 3/8"

Actual Bookcase heights are with levelers at lowest extension (shortest height).

Wall Storage Units are offered in Discrete and Ganged types.

All Bookcases are available with or without a center gable.

Stack-on Units:

Stack-on Units are used to increase the number of shelves for storage to take greater advantage of available ceiling height.

Stack-on Units include a series of 11" and 14" deep units which are 32" high by 30" and 36" wide offered in Discrete and Ganged types. All Stack-on Units are available with or without a center gable.

When used with a 72" high Bookcase, the overall height is 72"H + 32"H = 104" high, suitable for a 9' high ceiling.

When used with an 86" high Bookcase, the overall height is 86"H + 32"H = 118" high, suitable for a 10' high ceiling.

**Discrete** units have finished laminate or veneer on the outside of the exterior vertical gables.

**See Figure 1.** Reveals are ordered separately.

**Ganged** units have a neutral tone material on both exterior vertical gables.

**See Figure 1.** They ship with vertical Reveals and a Ganging Kit.

Bookcases and Stack-on Units are shipped assembled with wood or laminate shelves installed. Glass shelves are packed together and shipped separately.

 neutrality material (N)

All backs are finished with neutral tone material
Construction Details

Bookcase and Stack-on Units:
Certain surfaces are generally not exposed and are therefore finished with a neutral tone material.

These surfaces include:
1. Tops of 86"H, 72"H and Stack-on units.
2. Backs of all units
3. Exterior of gables on all ganged units.

Gables are 3/4" thick. Shelf thickness for veneer and laminate adjustable shelves is 1". Fixed shelf is 1", and adjustable glass shelves are 1/4" thick. The second shelf from the bottom is always fixed. The top of the fixed shelf is nominally 28 3/4" above ground level.

Shelves are adjustable on 2 1/2" spacing to within 5" of the top and bottom shelves and the fixed shelf. Bottom shelf has four access holes for cabinet leveling with translucent removable caps.

Stack-on Unit bottom shelf is counterbored in four locations for attachment screws and translucent caps provided.

There is a 1/4" space between shelf and cabinet back for cord drop. Each fixed shelf has a 1 1/4" diameter half round opening to allow plug head pass-through.

The wood grain on veneer and wood grain laminate shelves is side to side.

Bookcase glides have 2" of adjustment for leveling. Allow 3/8" clearance between the wall and the back of the cabinet for wall attachment bracket. Cabinet back is inset flush with the back edge of the gables.

Actual depth on 11" Units = 10 3/4"
Interior depth = 10"
Shelf depth = 9 3/8"

Actual depth on 14" Units = 13 13/16"
Interior depth = 13"
Shelf depth = 12"

Included with the Bookcase are wall attachment brackets with mounting hardware for attachment to the cabinet. Fasteners for attachment of the bracket to the wall are not included.

Shoulder Units:
Shoulder Units are ordered separately to finish and complete a run of Ganged units. Shoulder Units create a full height uniform veneer grain and finish to cover the seam between a Bookcase and a Stack-on Unit.

Shoulder units are available in single depths and double depths. Double depth units are used to finish a run of Ganged units which are installed back to back.

Shoulder heights are 28"H, 42"H, 53"H, 72"H and 86"H for use with Ganged Bookcases, 104"H for use with 72"H Bookcases with 32"H Stack-on Units and 118"H for use with 86"H Bookcases with 32"H Stack-on Units.

Single Depths:
11" deep nominal = 10 3/4"
14" deep nominal = 13 13/16"

Double Depths:
22" deep nominal = 21 1/4"
28" deep nominal = 27 3/4"

Shoulder thickness = 3/4"

Shoulder Units have veneer or laminate on the outside, neutral tone material on the inside.

Included with Shoulder Units are two black Reveals with double sided tape (field installation required) and attachment hardware kit. Attachment hardware kit includes eight (8) flat head wood screws.
Finish Options
Wall Storage Units are available in several different finish approaches.

**Figure 1**
All Veneer  
(V1/V1, V2/V2, V3/V3)
The case is veneer and the shelves are also veneer. In this instance, the shelf finish must match the case finish.

**Note:** Veneer direction on shelves runs side to side.

**Figure 2**
Veneer case with laminate shelves  
(V1/L, V2/L, V3/L)
Laminate shelf options include all Reff Profiles core solid color laminates but do not include the use of impact resistant core laminate or wood grain laminates. The fixed shelf will match the adjustable shelves.

**Figure 3**
Laminate case with laminate shelves  
(L/L)
These shelves can be any core laminate including wood grain laminate. Fixed shelf will match adjustable shelves.

**Note:** Veneer shelves are not available with laminate case

**Figure 4**
Veneer case with center gable  
(V1/V1, V2/V2, V3/V3)  
(V1/L, V2/L, V3/L)  
(V1/G, V2/G, V3/G)
This option allows for veneer, laminate or glass shelves. Fixed shelf will match case veneer. Center gable will match the case finish.

**Note:** Glass shelves are only available on units with a center gable.

Glass shelves are available in:
- GL35 – Grey
- GL85 – Star Clear

**Figure 5**
Laminate case with center gable  
(L/L, L/G)
This option allows for laminate or glass shelves.

With glass shelves, the fixed shelf will match the case.

With laminate shelves, the fixed shelf will match the case.

Center gable will match the case finish.

**Note:** Glass shelves are only available on units with a center gable.

Shelf Kit
When a Shelf Kit is needed it can be ordered 11" and 14" deep and 30" and 36" wide. For Bookcases with center gables, 15" wide Shelf Kits are available for 30" wide Bookcases and 18" Shelf Kits are available for 36" wide Bookcases. Core laminate and veneer can be applied on all size Shelf Kits. Glass shelves are available 15" and 18" wide. Included with each Shelf Kit is (1) Shelf and (1) Hardware Kit.

Periodical Display Shelf Kit
Periodical Display Shelf Kits are intended for angular display. See Figure 1. These units fit into Bookcases using the existing shelf adjustment holes. No additional drilling is required. When installed, Display Shelf hinges down from the top. See Figure 2.
The Periodical Shelf Kit can be adjusted up or down on the bookcase every 2 ½".
Periodical Display Shelf may be specified in laminate or veneer. Retention lip may be specified in all Reff Profiles core paint finishes.
The Periodical Display Shelf is 3/4" thick. The lip at the base of the Periodical Display Shelf is 1/2" high.
The shelf and lip are shipped assembled. Included with the Periodical Display Shelf is a hardware kit with (2) hinge mounting brackets and (4) attachment screws; (2) shoulder screws for hinge point and (2) threaded support pins.
Periodical Display Shelf Installation Instruction 6TP00437 is available on Knoll Exchange.

Baseboard Kit
Bookcases are constructed with a flush kick plate. A Baseboard Kit may be ordered and field installed over the flush kick plate for a classic Reff Profiles aesthetic. Baseboards have a vertical grain direction. Baseboards are 1" thick and 3 3/8" high.
Baseboard Kits are available in all Reff Profiles core laminates or veneers. The back of the baseboard is black backer material. Included with the Baseboard Kit is (1) roll of double sided tape for field installation.

Reveals
Reveals provide a clean seam between each unit with consistent spacing.
Reveal dimensions are 1" wide x 3/32" thick. Reveal material is ABS plastic and the color is black. Reveals are available in kit quantities of 1, 10 or 50. Included in each kit are (2) Reveal Strips with double sided tape.
Reveal Installation Instruction 6TP00436 is available on Knoll Exchange.

Vertical Reveals
The length of the Reveal equals the height of the Bookcase. (Some field trimming may be required). Reveals are included with Ganged Bookcases and Shoulder Units. The Reveals are packed flat with the Bookcases and Shoulder Units for field installation. See Figure 3.
For Discrete type Bookcases and Stack-on Units they are ordered separately (shipped flat).

Horizontal Reveals
The width of the Reveal is equal to the width of the Bookcase. (Some field trimming may be required).
All Stack-on Units are supplied with Horizontal Reveals installed. Horizontal Reveals go between the top of a Bookcase and the bottom of the Stack-on Unit. See Figure 3.
**Ganging Kit**
Ganging Kits are used to attach adjacent Bookcases and Stack-on Units to one another. These ship with each Ganged Bookcase and Stack-On Unit. One extra Ganging Kit is needed when the ends of a run are Discrete Bookcases and Discrete Stack-on Units. *See Figure 4 and Figure 5.*

Included with the Ganging Kit are (4) Barrel Bolts and Drill Template. Ganging Kits are available in quantities of 1, 10 or 50.

- Quantity (1) has (1) drill template.
- Quantity (10) has (2) drill templates.
- Quantity (50) has (10) drill templates.

Ganging Kit Installation Instruction 6TP00436 is available on Knoll Exchange.

**Bookcase Grommet**
The Bookcase Grommet is intended to trim a field drilled 3 ½" hole to align with and for access to a wall power receptacle. *See Figure 6.*

Grommet color is black. Access may be limited for larger transformer plugs.

Included with Bookcase Grommet is (1) 3 ½" D grommet sleeve.

Bookcase Grommet Installation Instruction 6TP00389 is available on Knoll Exchange.
Planning Guidelines
Wall Storage Units are offered in two types. **Discrete (D)** units have finished Laminate or Veneer on the outside of the exterior vertical gables. They ship assembled and reveals are ordered separately. **Ganged (G)** units have a neutral tone material on both exterior vertical gables. They ship assembled and include Vertical Reveals and a Ganging Kit.

Wall Storage Units can be planned in a variety of configurations providing a wide range of storage solutions.

**Planning Sample 1**
Discrete Bookcase 72” high
Discrete Bookcases have a finished exterior vertical gable. This is finished in any core laminate or veneer.

**Planning Sample 2**
Two Discrete Bookcases ganged side by side.
Order (1) Reveal Kit each time two Discrete Bookcases meet. In addition, order (1) Ganging Kit each time two Discrete Bookcases meet.

**Planning Sample 3**
Discrete and Ganged units joined adjacent to each other.
Since Ganged Units ship with Ganging Kits and Reveal Kits, order (1) additional of each for this application.

**Planning Sample 4**
Stack-on Units (S)- Discrete and Ganging used.
Since Ganged Units ship with Ganging Kits and Reveal Kits, order (1) additional of each is needed for ordering.

On veneer units, the wood grain on the exterior of the gables of the Stack-on Unit and the Bookcase, will not match. Specify a full height shoulder to cover both the Bookcase and Stack-on Unit for veneer and wood grain laminate.
Planning Sample 5
Using all Ganged Bookcases (G) and Ganged Stack-on (GS) Units

The outside of these units are finished with a neutral tone backer sheet.

Order a full height Shoulder Unit (S) to finish the exterior vertical gables with core laminate or veneer.

Planning Sample 6
Discrete or Ganged Units attached back-to-back

Back-to-back attachment is required for stability.

Order (1) Ganging Kit for attaching (2) Bookcases back to back.

See Example A.

In Example B below, (1) additional Ganging Kit should be ordered to attach the Stack-on Units back to back.

Order (2) Ganging Kits Total for Example B.

Ganging Kit includes (4) barrel bolts and (1) drill template.
Refer to Bookcase Ganging Kit Installation Instructions, 6TP00436 available on Knoll Exchange.

• Horizontal Reveal Kits are included with each Stack-on Unit.
• Vertical Reveals are included with each Ganged Bookcase and Stack-on Unit.
• Ganging Kits are included with each Ganged Bookcase and Stack-on Unit.

**Application Notes**

All shelves are adjustable on 2.5\" centers within 5\" from the top and bottom of cabinet. All adjustable shelves are supported on field installed threaded pins. Shelves are flush with the front edge of the gables and have a nominal 10" inside depth. The back of each shelf has a 1/2" space for cable management. 3\(\frac{1}{2}\) diameter grommet is available for field installation over wall electrical outlet.

The shelves on cabinets with center gable, are adjustable on both sides (2.5\" intervals within 5\" from the top and bottom of cabinet) Center gable is fixed.

Overall depth of units = 10\(\frac{3}{4}\)" (not including wall attachment hardware).

Base kick plate is flush with front edge of gable. For Classic esthetic an additional kick plate is available in Accessories for wall storage units. See page 314.

Exterior of back is finished with neutral tone backer sheet. Interior of back has the same finish as the case (gables).

**32" nominal height = 32" actual height**  
72" nominal height = 72½" actual height  
86" nominal height = 86½" actual height  
Gildes add 2° of height adjustment.  
To prevent tipping, the back of each bookcase must be attached to a wall or to the back of another bookcase using the wall attachment hardware provided.

### Specification Information

To order, please specify pattern number including:  
1. **Case Finish**: Laminate / Wood veneer  
2. **Shelf Finish**: Glass Finish; GL35 or GL85

It is not advisable to mix 28½"h desk height products with 26½" standard height products.

Product on this page will accept woodgrain laminate where laminate is currently an option. For more information on grain direction on vertical surfaces, please see page 5.

Installation instruction sheets available on Knoll Exchange. For grommet location refer to reference number 6TP00389.

### Application Notes

- **Glass shelves** are available in GL35 and GL85 only. Bookcase units with glass shelves are available with Center Gable only. Center gable is fixed.  
- **Second shelf from the bottom is fixed. The top of the fixed shelf is nominally 283/4" above ground level. All other shelves are adjustable on 2.5" centers within 5° from the top and bottom of cabinet and away from the fixed middle shelf. All adjustable shelves are supported on field installed threaded pins. Shelves are flush with the front edge of the gables and have a nominal 10" inside depth. The back of each shelf has a ½" space for cable management. Centered at the back of the fixed shelf is an additional 1½" diameter half round hole for hook head pass-through.**

3½" diameter grommet is available for field installation over wall electrical outlet.

The shelves on cabinets with center gable, are adjustable on both sides (2.5" intervals within 5° from the top and bottom of cabinet) Center gable is fixed.

The fixed shelf is the same finish as the case.

Overall depth of units = 10¾" (not including wall attachment hardware).

Base kick plate is flush with front edge of gable. For Classic aesthetic an additional kick plate is available in Accessories for wall storage units. See page 312. Cabinet is key hole construction. Cabinet back is inset. Exterior of back is finished with neutral tone backer sheet. Interior of back has the same finish as the case (gables).

Adjacent bookcases are intended to be field attached to one another using ganging kits.

Ganging kits and Reveals are not included, and can be ordered separately. See Accessories for Wall Storage Units, page 312.

**Specification Information**

To order, please specify pattern number including:

1. Case Finish: Laminate / Wood veneer
2. Shelf Finish: Laminate / Wood veneer

It is Not advisable to mix 28¾”h desk height products with 26½” standard height products.

Product on this page will accept woodgrain laminate where laminate is currently an option. For more information on grain direction on vertical surfaces, please see page 5.

Installation instruction sheets available on Knoll Exchange. For grommet location refer to reference number GTP00399.

For ganging instructions, refer to reference number GTP00436.

The cabinet is key hole construction. Cabinet back is inset.

**Application Notes**

All shelves are adjustable on 2.5” centers within 5” from the top and bottom of cabinet. All adjustable shelves are supported on field installed threaded pins. Shelves are flush with the front edge of the gables and have a nominal 13” inside depth. The back of each shelf has a ½” space for cable management. 3½” diameter grommet is available for field installation over wall electrical outlet.

The shelves on cabinets with center gable, are adjustable on both sides (2.5” intervals within 5” from the top and bottom of cabinet) Center gable is fixed.

Overall depth of units = 14” (not including wall attachment hardware).
Base kick plate is flush with front edge of gable. For Classic esthetic an additional kick plate is available in Accessories for wall storage units. See page 312. Exterior of back is finished with neutral tone backer sheet. Interior of back has the same finish as the case (gables).

Adjacent bookcases are intended to be field attached to one another using ganging kits.

Ganging kits and Reveals are not included, and can be ordered separately. See Accessories for Wall Storage Units, page 312.

42” nominal height = 41 \(\frac{1}{2}\) actual height

Glides add 2” of height adjustment.

Specification Information

To order, please specify pattern number including:

1. Case Finish: Laminate / Wood veneer
2. Shelf Finish: Glass Finish; GL35 or GL85

It is Not advisable to mix 28\(\frac{3}{8}\)’h desk height products with 26 \(\frac{1}{2}\) standard height products.

Product on this page will accept woodgrain laminate where laminate is currently an option. For more information on grain direction on vertical surfaces, please see page 5.

Installation instruction sheets available on Knoll Exchange. For grommet location refer to reference number 6TP0039.

For ganging instructions, refer to reference number 6TP00436.

The cabinet is key hole construction. Cabinet back is inset.

Application Notes

Glass shelves are available in GL35 and GL85 only. Bookcase units with glass shelves are available with Center Gable only. Center gable is fixed. All shelves are adjustable on 2.5” centers within 5” from the top and bottom of cabinet. All adjustable shelves are supported on field installed threaded pins. Shelves are flush with the front edge of the gables and have a nominal 13” inside depth. The back of each shelf has a \(\frac{1}{2}\)” space for cable management. 3 \(\frac{1}{2}\) diameter grommet is available for field installation over wall electrical outlet.

The shelves on cabinets with center gable, are adjustable on both sides (2.5” intervals within 5” from the top and bottom of cabinet) Center gable is fixed.

Overall depth of units = 14” (not included wall attachment hardware).

Base kick plate is flush with front edge of gable. For Classic esthetic an additional kick plate is available in Accessories for wall storage units. See page 312.

Outer surface of exterior gable in “Ganged” units are finished with neutral tone backer sheet. Interior of back has the same finish as the case (gables). Ganged bookcase are intended to be placed adjacent to one another and attached to each other. Black vertical reveals are included to go between adjacent units.

Additional shoulder units are available and ordered separately to finish the ends. Alternatively, “Discrete” bookcases may be used to finish the ends of a run. Ganged units include a ganging kit consisting of hardware and drilling template to field attach adjacent units together.

**Specification Information**

To order, please specify pattern number including:

1. Case Finish: Laminate / Wood veneer

2. Shelf Finish: Glass Finish; GL35 or GL85

**Application Notes**

Glass shelves are available in GL35 and GL85 only. Bookcase units with glass shelves are available with Center Gable only. Center gable is fixed. Second shelf from the bottom is fixed and is in the same finish as the case. The top of the fixed shelf is nominally 28\(\frac{1}{8}\)" above ground level. All other shelves are adjustable on 2.5" centers within 5" from the top and bottom of cabinet and away from the fixed middle shelf. All adjustable shelves are supported on field installed threaded pins. Shelves are flush with the front edge of the gables and have a nominal 13" inside depth. The back of each shelf has a 2" space for cable management. Centered at the back of the fixed shelf is an additional 1\(\frac{1}{8}\)" diameter half round hole for plug head pass-through. 3\(\frac{1}{8}\)" diameter grommet is available for field installation over wall electrical outlet.

The fixed shelf is the same finish as the case.

The shelves on cabinets with center gable, are adjustable on both sides (2.5" intervals within 5" from the top and bottom of cabinet) Center gable is fixed.

Overall depth of units = 14" (not including wall attachment hardware).

Base kick plate is flush with front edge of gable. For Classic esthetic an additional kick plate is available in Accessories for wall storage units. See page 312. Exterior of back is finished with neutral tone backer sheet. Interior of back has the same finish as the case (gables).

Glass shelf options are GL35 or GL85

**It is Not advisable to mix 28 3/8" desk height products with 26 3/8" standard height products.**

Product on this page **Excluding any vertical surface over 60**, will accept wood grain laminate, where laminate is currently an option.

Installation instruction sheets available on Knoll Exchange.

For ganging instructions, refer to reference number 6TP00436.

For periodical shelf; refer to reference number 6TP00437.

**Additional Information**

Shoulder units have veneer on outside, paper on inside. (except Laminate)

Shoulder thickness = 3/8" thick

Shoulder units are ordered separately to finish and complete a run of Ganged units. Shoulders come with black reveals and attachment hardware kit.

104"h and 118"h shoulders are to accommodate 72"h and 86"h bookcases with 32"h mounted stack-on units.

Shoulder units include attachment hardware kit.

Black reveal kits are included with the shoulder units.

Shelf thickness:

- Glass = 3/8" thick
- Wood or Laminate = 1" thick

Glass shelves are only available in 15" and 18" width.

Baseboard kits are to create a classic esthetic.

Cabinets

Note: This planning section is relevant specifically to freestanding Progressive Cabinets. Please see previous section for Reff Profiles “Classic” Cabinets.

Reff Profiles Progressive Cabinets provide purposeful and efficient freestanding vertical storage that delivers a modern aesthetic to private offices and open plan environments. Streamlined detailing offers clean lines, a unique grommet pull, and a full-to-floor door detail.

Configurations include hinged door with shelves behind, and hinged door with several combinations of shelves, drawers, and wardrobe behind.

Cabinets can be used as wardrobes, general storage, binder and file storage, or as personal storage towers.

Progressive Cabinets can be used adjacent to desk height (28½") workstations and private offices, and will match the aesthetic detail of Reff Profiles Progressive Overheads and Progressive Low Credenzas.

Cabinets can also be combined with Progressive L-shelves, tackboards & task panels to form innovative workwalls within private offices.

Note: While Reff Profiles Progressive Cabinets may be planned alongside Reff Profiles “classic” pedestals, files, and cabinets, there is no plinth detail on the Progressive Cabinet, as it features a full-to-floor door. Progressive Cabinets should not be planned next to a “classic” cabinet with a “stepped” or “flush” plinth detail and door.

Dimensions

Cabinets are available in four heights for 28½” planning:

- 42"H (actual height 41½"), intended to be compatible with 42" panel height.
- 49"H (actual height 48½"), intended to be compatible with 49" panel height.
- 64"H (actual height 63¼"), intended to be compatible with 64" panel height.
- 68"H (actual height 67¾"), intended to be align with a single height progressive overhead or L-shelf.

Refer to pages 15 & 17 for additional guidelines for progressive planning horizons.

Note: Reff Profiles cabinets are also available for “standard height” (26½") planning applications. “Standard height” cabinets for 26½"H planning should only be planned adjacent to panel supported applications. Exceptions may be made for freestanding applications when matching legacy projects. See Reff Profiles Standard Height Planning Guide for information on planning with “standard height” cabinets for 26½” planning. Do not mix “standard height” (26½") planning components or cabinets with any cabinets for 28½" planning.

Cabinets measure 18" or 24" wide. The widths of the cabinets are undersized by ¼" to eliminate any slight positional shift issues that may otherwise occur when several are placed beside one another.

Cabinets are nominally 20" or 24" deep. (Actual depths are 19¾" and 23½") All cabinets include a finished back, and will match the depth of worksurfaces in exposed situations.

Construction

All Progressive Cabinet cases are assembled with glue and dowel construction.

Interior drawer and shelf construction is either painted metal or wood (veneer or laminate finished). Metal interiors provide increased economics while wood interiors feature the added quality of dovetail joined drawers and either 0.6 mm veneer edging or 0.8 mm ABS edging (for laminate).

Wood drawers are a 4-sided 5 ply, wood box, maple veneered and finished inside and out. All corners are dovetailed for superior fit.

Metal drawer interiors are constructed of 22-gauge cold rolled, commercial quality (CRCQ) steel.

All box and file drawers have full extension steel, ball bearing slides and are designed to meet BIFMA loading standards.

Except those with tough latch, hinged door pedestals use concealed, soft-closing spring-loaded, adjustable pot hinges.

Progressive Cabinet Nominal Planning Horizons

Notes

- Planning horizons are nominal. Dimensions are actual.
- Images displayed are examples only and do not represent the complete scope of products available.
Four leveler glides are included to allow up to 1 1/2" of height adjustment. Glides are adjusted through four corresponding access holes in the bottom shelf of the cabinet case. These interior access holes are capped by included hole plugs. Plug color is not user defined. Black plugs are provided with dark veneers and laminates. Clear plugs are provided with light veneers and laminates.

All progressive cabinets include a finished back.

**Exterior Options**
Progressive Cabinets have a full-to-floor door detail and all feature a unique "G" grommet pull.

---

*Progressive Cabinet Full-to-Floor Door; Base Detail*

*Progressive Cabinet; Grommet Pull Detail*
All cabinet doors and cases are finished in either veneer or laminate. If the case is specified in laminate, the door can be the same or a different laminate, or the door can be wood veneer. If the case is specified in wood veneer, the door will be of the same matching wood veneer.

Only the highest grade veneer offered by the industry, Architectural AA, is used for Reff Profiles. The veneer for each door is hand selected and laid up to be center balanced and matched. Though the veneer is selected to stringent standards, the color and grain between adjacent cabinets will have natural variations and may not match.

The handedness of a Progressive Cabinet is determined from the user’s perspective. If, from the user’s perspective, the hinges are on the right side, the cabinet is classified as a "right hand" cabinet.

**Locks**

Keyholes are optional on cabinet doors.

Door locks are not pre-routed and therefore, locks cannot be retro-fitted.

For 42” high progressive cabinets, keyholes are located on cabinet door fronts at the top left or top right corner of the cabinet (i.e. the latch side of the door).

For 49”, 64”, and 68” high progressive cabinets, keyholes are located on the top left or top right corner of the **side gable** of the cabinet (i.e. the latch side of the cabinet). See **FIGURE 1**, below.

**Note:** For 49”, 64”, and 68” high cabinets, care must be taken to plan accordingly, so that keyholes are not blocked by adjacent cabinets; For example, two adjacent cabinets must have their door hinges centered between the cabinets. Additionally, three cabinets of these heights cannot be placed together unless the center cabinet has no lock.

Locks are specified separately and can be randomly keyed or keyed alike. Locks are no charge and are available in a black or a matte silver finish.

Keving instructions must accompany all orders. Refer to page 622 for KnollKey Lock Program Information. Cabinets do not come with locks included. Randomly keyed locks are factory installed. Keyed-alike locks are field-installed using the KnollKey order form.

**Note:** Orders requiring 50 or fewer locks, placed without specific keying instructions, will be delivered randomly keyed by the factory without warning.

Interior Options

18" wide Progressive Cabinets are available with the following interior options:

C = hinge door with shelves
Y = hinge door with shelves and FF drawers
Z = hinge door with shelves and BBF drawers

24" wide Progressive Cabinets are available with the following interior options:

V = hinge door with shelves and wardrobe
W = hinge door with shelves, FF drawers, and wardrobe.
X = hinge door with shelves, BBF drawers, and wardrobe.

Cabinets are available with a metal or wood interior option.

For cabinets with the metal interior option, the shelves and drawers will be metal; If the case is natural wood veneer, the shelves and drawers will be painted black, i.e. V316 case = black painted shelves and drawers; If the case is regular laminate (non-woodgrain), the shelves and drawers will be painted to match the case color, i.e. 114 case = 114 painted shelves and drawers; If the case is woodgrain laminate, the shelves and drawers will be painted black, i.e. 125 case = black painted shelves and drawers.

For cabinets with wood interior, the shelves and drawer fronts will be the same finish as the case.

Cabinets feature adjustable shelves with three sets of holes drilled inside the cabinet for each shelf. The shelf is positioned on the middle location and can move 2 1/2" higher or 2 1/2" lower.

Note exception: The shelves located second from the bottom on 64"H and 68"H cabinets are fixed.

See FIGURE 2, below, for information regarding clearances above and below shelves.

Progressive Cabinet shelves are 1 1/4" thick when specified with wood interior.

42" high cabinets come with either two adjustable shelves, or with FF or BBF drawers below a fixed shelf.

49" high cabinets come with either three adjustable shelves, or with one adjustable shelf above BBF or FF drawers below a fixed shelf.

64" and 68" high cabinets come with either four adjustable shelves, or with two adjustable shelves above BBF or FF drawers below a fixed shelf.

All 24" wide cabinets contain a 7 1/2" wide wardrobe section that includes a pre-mounted coat rod in a black finish. Wardrobes do not include, and will not accommodate a standard boot tray.

Note: 20" deep wardrobe cabinets provide only 18" of clear storage space.

Interior drawers do not come with pulls. Rather, there is a 2 1/4" gap between drawers which acts as a finger grip.

Pencil trays are not included with box drawer cabinets. Wood or plastic pencil trays can be ordered separately.

12" high file drawers include bars for front to back and side to side filing, accommodating both letter and legal filing, regardless of cabinet width. Wood file drawers do not support bottom loading. Metal file drawers will support bottom loading.

Cabinet Accessories

Additional and replacement cabinet accessories are available, including: pencil trays, file bars, and shelf kits. Refer to pages 551-553 for further information.

*Pencil trays are NOT included in BBF configuration.

The images on this page are shown as a left hand cabinets.

From the users perspective, if the hinges are on the right side, the cabinet is classified as "right hand" cabinet.

These products are Glue and Dowel Construction

Grommet pulls only

Shelves and File Front will default to the case finish

42"h cabinets are compatible with panel height.

When case finish is Solid color Laminate, shelves are painted to match.

When case finish is wood or wood grain laminate, shelves are painted black.

Drawer interiors always painted black.

Cabinets with wardrobe come with a coat rod.

68"h Cabinets are for the private offices application to align with a single high overhead, and are compatible with panel height.

No wardrobe option in the 18"w cabinets.

Cabinets with wardrobe come with a coat rod.
Cabinets

Note: This planning section is relevant specifically to freestanding “Classic” Cabinets. Please see section following for Reff Profiles Progressive Cabinets.

Reff Profiles freestanding cabinets for 28½” planning provide high-density storage in a variety of sizes and configurations. Options include open shelves, hinge doors, box and file drawers, or hybrid combinations.

Cabinets can be used as wardrobes, bookcases, general storage, lateral files, or electronic media centers.

Single freestanding cabinets can be used adjacent to desk height (28½”) workstations and private offices and will match the aesthetic detail of Reff Profiles components. Grouped cabinets can be used in central storage areas to provide high capacity storage solutions.

Cabinets can also be combined with overheads, tackboards & task panels to form innovative workwalls within private offices.

Dimensions

Cabinets are available in three heights for 28½” planning:

- 53”H (actual height 52½”), derived from the height of a 4 drawer file application in 28½” planning.
- 72”H (actual height 72½”), intended to align with a single height overhead.
- 86”H (actual height 86”), intended to align with a double height overhead.

Refer to page 14 for a guide to 28½”H planning horizon.

Note: Reff Profiles cabinets are also available for “standard height” (26½”) planning applications. “Standard height” cabinets for 26½” planning should only be planned adjacent to panel supported applications. Exceptions may be made for freestanding applications when matching legacy projects. See Reff Profiles Standard Height Planning Guide for information on planning with “standard height” cabinets for 26½” planning. Do not mix “standard height” (26½”) planning components or cabinets with any cabinets for 28½” planning.

Cabinets measure 12”, 15½” (16” nominal), 18½” (19” nominal), 30”, or 36” wide. The widths of the 12”, 30”, and 36” cabinets are undersized by ½” to eliminate any slight positional shift issues that may otherwise occur when several are placed beside one another. 16” and 19” wide cabinets correspond in width to letter and legal width pedestals, respectively.

Cabinets are nominally 15”, 20” or 24” deep, and will match the depth of worksurfaces in exposed situations.

Construction

All “classic” cabinet cases are constructed with a combination of dowels and precision mortised keyhole mechanical fasteners. This advanced construction method provides superior alignment and lasting rigidity to the case.

Interior drawer and shelf construction is either painted metal or wood (veneer or laminate finished). Metal interiors provide increased economics while wood interiors feature the added quality of dovetail joined drawers and either 0.6 mm veneer edging or 0.8 mm ABS edging (for laminate).

Wood drawers are a 4-sided 5 ply, wood box, maple veneered and finished inside and out. All corners are dovetailed for superior fit.

Metal drawer interiors are constructed of 22-gauge cold rolled, commercial quality (CRCQ) steel, painted black.

All box and file drawers have full extension steel, ball bearing sliders and are designed to meet BIFMA loading standards.

Except those with tough latch, hinged door pedestals use concealed, soft-closing spring-loaded, adjustable pot hinges.

Cabinets that are 86”H by 15” deep are required to be attached to a wall for stability. Anchor brackets are included for 86” high, 15”deep bookcases.

Four leveler glides are included to allow up to 1½” of height adjustment.

All cabinets include a finished back.
**Exterior Options**

Cabinets may be specified with a flush base detail or with a recessed, stepped base detail.

All cabinet fronts and cases are finished in either veneer or laminate. If the case is specified in laminate, the front can be the same or a different laminate, or the front can be wood veneer. If the case is specified in wood veneer, the front will be of the same matching wood veneer.

For the Stepped Base option with mixed finishes for the front and case, the visible portion below the drawer or door shall match the case.

Only the highest grade veneer offered by the industry: Architectural AA, is used for Reff Profiles. The veneer for each front set is hand selected and laid up to be center balanced and matched. Though the veneer is selected to stringent standards, the color and grain, between adjacent cabinets, will have natural variations and may not match.

Pulls can be specified in B (no pull – use customer’s own), C, D, F (bar), H (outline), J (routed), R (cylinder), S, and T (tab). Integral “J” pulls are routed the full width of the top edge of the drawer front or hinged door. Refer to pages 9 & 10 for cabinet pull locations and details.

**Locks**

All cabinets with drawers are supplied with a ganglock mechanism in place. In addition, cabinets with drawers have a drawer interlock anti-tip device designed to prevent the opening of a second drawer when one is already open.

Keyholes are pre-drilled on all cabinet drawers and are optional on hinge doors.

Locks for drawers can be retro-fitted. Door locks are not pre-routed and therefore, locks cannot be retro-fitted.

Keyholes are located on cabinet fronts as follows:

1) At the top right corner for drawer-set fronts
2) At the top left or right corner for single door cabinets (i.e. the latch side of the door)
3) On the top left corner of the right hand door for double door cabinets

Locks are specified separately and can be randomly keyed or keyed alike. Locks are no charge and are available in a black or a matte silver finish.

Keyping instructions must accompany all orders. Refer to page 622 for KnollKey Lock Program Information. Cabinets do not come with locks included. Randomly keyed locks are factory installed. Keyed-alike locks are field-installed using the KnollKey order form.

**Note:** Orders requiring 50 or fewer locks, placed without specific keying instructions, will be delivered randomly keyed by the factory without warning.

Each locking cabinet counts for either one or two lock cores, depending on cabinet configuration.

**Note:** The ½ height hinge door on Wardrobe Combination cabinets comes with touch latch only and is non-locking.
Interior Options

Open bookcase and hinged door cabinets feature adjustable shelves with three sets of holes drilled inside the cabinet for each shelf. The shelf is positioned on the middle location and can move 2 1/2" higher or 2 1/2" lower.

See FIGURE 1, below, for information regarding clearances above and below adjustable shelves.

Figure 1: Cabinet Shelf Elevations
“Classic” cabinet shelves are $1\frac{1}{16}$ thick when specified with wood interior.

For cabinets (open or closed) with the metal interiors option, the shelves will be metal: If the case is natural wood veneer, the shelves will be painted black, i.e. V316 case = black painted shelves; If the case is regular laminate (non-woodgrain), the shelves will be painted to match the case color, i.e. 114 case = 114 painted shelves; If the case is woodgrain laminate, the shelves will be painted black, i.e. 125 case = black painted shelves.

For cabinets with wood interior, the shelves will be the same finish as the case.

Specify left-hand or right-hand hinge location on 12", 16" & 19" wide cabinets with doors.

Wardrobe cabinets feature fixed-position coat hooks or coat rods. 15” deep wardrobe cabinets come with 2 coat hooks. 20” and 24” deep wardrobe cabinets come with a pre-mounted coat rod in a black finish.

86”H Wardrobe Combo cabinets with $\frac{1}{2}$ height hinged doors come equipped with a coat rod and a fixed top shelf on the wardrobe side, and 2 adjustable shelves on the $\frac{1}{2}$ height door side.

72”H Wardrobe Combo cabinets with $\frac{1}{2}$ height hinged doors come equipped with a coat rod on the wardrobe side, and 2 adjustable shelves on the $\frac{1}{2}$ height door side.

Wardrobe cabinets do not come equipped with a boot tray. Please specify separately. See current page 553.

**Note:** 20” deep wardrobe cabinets provide only 18” of clear storage space.

Drawer cabinets are available in various combinations of a 6” box style and a 12” file style, with or without a combination of open shelving, hinged doors, and wardrobes.

Pencil trays are not included with box drawer cabinets. Wood or plastic pencil trays can be ordered separately for 16” and 19” wide cabinets.

12” high file drawers include bars for front to back and side to side filing, accommodating both letter and legal filing, regardless of cabinet width. Wood file drawers do not support bottom loading. Metal file drawers will support bottom loading.

**Cabinet Accessories**

Additional and replacement cabinet accessories are available, including: boot trays, pencil trays, file bars, box and file drawer dividers, shelf kits, shelf dividers, and utility hooks. Refer to pages 551-553 for further information.

### Specification Information

To order the Open Bookcase, please specify pattern number including:

1. **Finish type:**
   - L = Laminate
   - 1 = V1
   - 2 = V2
   - 3 = V3

2. **Interior options:**
   - M = Metal

3. **Cabinet Finish:**
   - Wood or Laminate

Please note: Shelf adjustability is limited to approximately 2.5” up or down per shelf from predetermined shelf height.

Cabinets can be specified with 2 Base options: Flushed Base or Stepped Base. For more details, refer to the Planning Guide page 250 to 254. For Stepped Base, replace “R” with “R2”:

- RC531DHB = Cabinet with Flushed base
- R2C531DHB = Cabinet with Stepped base

When case finish is Solid color Laminate, shelves are painted to match.

When case finish is wood or wood grain laminate, shelves are painted black.

Application Notes
It is Not advisable to mix 28 3/8"h desk height products with 26 1/2" standard height products.

Product on this page Excluding J-pull option and any vertical surface over 60", will accept wood grain laminate, where laminate is currently an option.

Hinge door cabinets have optional lock drilling which can be specified in the cabinet product code. Keying instructions must accompany all cabinet orders.

Drawers are always drilled for locks.

After specifying product code, provide keying instructions. Refer to page 622 for keying instructions.

* If case is Laminate, the front can be laminate or wood.
* If case is Wood, the front can only be wood.

When case finish is solid color laminate, shelves are painted to match.

When case finish is wood or wood grain laminate, shelves are painted black.

Please note: Shelf adjustability is limited to approximately 2.5" up or down per shelf from predetermined shelf height.

Pencil trays are not included in cabinets with BBF configuration.

File drawers include file bars for front to back and side to side filing. File drawers do not support bottom loading.

Cabinets can be specified with 2 Base options: Flushed Base or Stepped Base. For more details, refer to the Planning Guide page 250 to 254.

For Stepped Base, replace “R” with “R2”, ie; RC531DHB = Cabinet with Flushed base

It is **Not advisable to mix** 28\(\frac{3}{8}\)" h desk height products with 26\(\frac{1}{2}\)" standard height products.

Product on this page **Excluding J-pull option and any vertical surface over 60°**, will accept wood grain laminate, where laminate is currently an option.

1\(\frac{1}{2}\)" thick worksurfaces are recommended to be used with these Desktop towers. See page 386.

These products are Glue and Dowel Construction.

42"h desk top towers for use with single tier overhead bridges and floorstanding cabinet.

56"h desk top tower for use with double tier overhead bridges and floor standing cabinet.

Hinge glass doors feature no pulls, only touch latch.

Shelves to match case finish.

Shelves on single height available with 2 adjustable shelves.

Shelves on double high available with one fixed middle shelf, one upper and one lower adjustable shelf.

All adjustable shelves have 2\(\frac{1}{2}\)" up or down flexibility.

From users perspective, the open shelves' location determines handedness.

ie. Right hand - open shelves on right hand.

**Specification Information**

To order please specify pattern number including:

1. Glass finish: GL35, GL45, or GL85
   - GL35 = Grey colored glass
   - GL45 = Star back painted White
   - GL85 = Star Clear colored glass
   *($903 upcharge applicable for GL45)

**Application Notes**

Grommets and cut outs are not optional for the glass accent tops.

Credenza glass tops on this page are supplied with anti skid bumpers.
**Task Panels**

The high performance Task Panel is designed to augment the utility of the zone immediately above the credenza in a Private Office setting, by offering tool rail capability and cable management features in addition to tackable and decorative inserts. All Task Panels have a cable curtain along the full length of the bottom edge which, when used in conjunction with notched back credenza tops, provides access to in-wall power sources and for cable concealment. See figure on following page for cable management details. The optional tool rail is designed to accept slatwall accessories and the Refl Profiles Task Panel Shelf. Slatwall accessories are available from KnollExtra. Insert panels may be conveniently removed, exposing a 1/4" wire clearance space which allows cable drops at any point along the entire width of the Task Panel. Check local electrical codes for suitability.

Task Panels are configured in eight heights (H1 – H8) to correspond to their application. See application diagrams on the following pages. H1 and H2 are designed for focused work applications whereas H3 through H8 are designed for collaborative or team work applications.

**Construction**

The Task Panel consists of a framework and optional tool rail, with decorative trims and a variety of functional and decorative inserts. See figures below for breakdown of components. Bottom right: The frame assembly consists of two vertical members, a bottom and top frame member and an optional tool rail. These are connected together and supported by mounting brackets. Edges have decorative trims; a top cover and two end covers. Connected to the bottom frame member is a nylon brush which forms the cable curtain. Frames are clad with either one or two inserts depending upon the use of the tool rail. Bottom left (upper); single monolithic insert with spacers. Bottom left (lower); top segmented insert and bottom segmented insert and spacers. Task Panels are shipped with frame and trim components, cable curtain and hardware in one container and inserts and spacers in a separate container.

The unit is field-assembled; fastened together using brackets and screws in pre-punched holes. See part #6TP00085 for assembly and installations instructions.
Specification Options
Task Panels are offered in widths from 30" to 96" in 6" increments; and in eight application heights, H1 to H8. Overall thickness of the Task Panel is 1 ½".
Task Panels are available in two basic configurations; monolithic (with a single insert) and segmented (with two inserts divided by the horizontal tool rail). See diagrams, previous page, for description. The Task Panel cover trims and optional tool rail are offered in three anodized metallic finishes; Black (AA), Polished (AP) and Satin (AU) as well as all core paint colors. Refer to Reff Profiles finish options page for more information.
Task Panel inserts are available in a variety of finishes including fabric (tackable), Forbo™ (tackable linoleum), laminate, veneer, glass and marker board.
Note that segmented Task Panels with fabric lower inserts are available up to 72" wide.

Planning Notes
1. H1, H3, H5 and H7 Task Panels are intended for use with 1 ½" thick credenza tops. H2, H4, H6 and H8 Task Panels are intended for use with 1" credenza tops.
2. Fabric is applied to inserts railroad style only
3. Forbo™ is available on lower segmented inserts only
4. Grain direction for veneer inserts is vertical
5. Glass is not available for lower segmented inserts.

#### Specification Information

To order please specify pattern number including:

1. Finish: Fabric

#### Application Notes

It is Not advisable to mix 28 3/8"h desk height products with 26 1/2" standard height products.

All Fabric to be applied railroaded as current tackboard.

Tackboards are 1" thick.

H5 Height = Top of Single high overhead to top of 1 1/2" thick desk height worksurface.

Always supplied including Velcro for attachment.

U-channel for cord management is not included.
**Reff Screens**

Reff screens provide partial enclosure for workspaces to a nominal horizon of 42"—seated visual access—or 49"—seated visual privacy. Screens are available in a variety of surface finishes for aesthetics, performance and price point.

**Desk Mounted Screens**

Desk mounted screens provide enclosure both above and below the top, starting from either 9 3/8" or 21 7/8" above the floor for 26 1/2" high planning and from either 11 1/4" or 23 3/4" above the floor for 28 3/8" high planning. Desk mounted screens attach directly to the back of a desk top with two brackets that also define a 1 1/4" offset for wire management and clamp-on accessories. Bracket centers are located 3 1/4" from each end of screens 24", 27", 30", and 36" wide and 12" from each end of screens 36" and wider.

Screens are available in the following widths 24", 27", 30", and 36"-72" wide in 6" increments. In most applications screens can be mounted to matching width or wider tops.

**Two types of screens are available:**

- Frameless laminate, marker surface or veneer screens are 3/4" thick with matching edge and crisp, eased corners.
- Fabric screens are 1 1/4" thick, with painted perimeter frame capturing a wood structural core and tackable, fabric wrapped inserts on each face.

**Specification Options**

For frameless screens type: laminate (L) or veneer (V); specify finish, any core laminate or dry-erase marker surface (M), or any core Techwood or natural veneer. Also specify bracket color, in any Reff Profiles core paint finish.

For fabric screens specify fabric, perimeter frame and brackets painted finishes. Fabric is oriented railroad style for screens wider than 60".

Bracket and frame paint finish codes with suffix "T" indicate textured.

**Construction**

Frameless screens are ¼" MDF construction, with threaded inserts at bracket locations.

Fabric screens have a 1/8" MDF core, with 3/8" thick tackable PET material inserts on each side wrapped in fabric, and aluminum perimeter frame with seamless corners. Fabric screens have threaded metal inserts at bracket locations.

Laminate screens are edged with color matching ABS edgeband. Marker surface screens are edged with White ABS edgeband. Veneer screens are edged with matching veneer.

---

Built-in 1 1/4" wire drop

Screen always at back

For applications with work surface 26 1/2" off the floor

For applications with work surface 28 3/8" off the floor

J-Wire Troughs are available in two types, Wall Mount & Under Mount. Wall mount J-wire troughs may be attached to both architectural walls and fixed modesty panels. Under mount J-wire troughs may be attached directly under worksurfaces.

Both types are available in 6" increments, in lengths ranging from 24" to 72". Troughs are 3" high by 3" deep. They are constructed of 18-gauge cold rolled steel. Wall mount is available in black. Under mount is available in all Reff Profiles core paint finishes.

**Application notes:**
Wires may run along the length of the trough and may exit at the trough ends or over the open front of the trough at any point. Under mount troughs also have a 1 ½" diameter, U-shaped mouse hole for wire entry/exit.

Wall mount J-wire troughs are attached to a vertical surface such as a full modesty panel, suspended modesty panel, or architectural wall. Refer to Figure 1 and 2.

Fasteners are not included with wall mount J-wire troughs. Attachment fasteners should be selected with consideration given to the vertical surface’s material type and thickness. Care should be taken so that screws will not protrude through or damage the visitor side of a modesty panel.
Under mount J-wire troughs have two tabs at the top that allow them to be attached to the underside of a worksurface. Wood screws are included with under mount J-wire troughs.

Under mount J-wire troughs are designed to work with worksurfaces specified with flush, recessed, edge or no grommets. When edge grommets are specified, the trough is attached with the opening towards the wall which will enable the ability to run wires anywhere along the opening in the worksurface while still allowing the ability to run wires through the grommet of the wire manager. Refer to Figure 5.

Under mount J-wire troughs may be specified when a desk screen (i.e. Antenna) is to be used as a modesty panel. Refer to Figure 6.

The width of the J-wire trough should be specified so that the trough spans and falls beneath grommet locations, but does not interfere with leg or pedestal positions. (i.e. A 72"w double letter-wide pedestal desk with flush grommets would be get a 36" trough.) Refer to Figure 3 and 4.

Wire troughs may not be used to stiffen a worksurface.
The wire manager for credenza may be specified for use with a 1" or 1 ½" thick credenza top with edge grommet. Wires, transformers, or personal accessory chargers may then be pushed off the worksurface, but will not drop all the way to the floor.

The wire manager for credenza top is 24" wide, 1" high and 1 ¼" deep, and will fit any standard width credenza top with edge grommet. It is constructed of 24-gauge cold rolled steel and is available in black.

**Application notes:**

The wire manager for credenza is intended to be mounted to the inside edge of the edge grommet. Wires may run along the length of the trough, exiting at the trough ends between the trough and the un-notched portion of the worksurface top.

**Note:** There will be a visible black lip (approx. ¼" wide) at the edge of the worksurface where the wire manager is mounted.

For installation, wood screws and double sided tape are included with the wire manager.
Power and Data Outlets

Power and Data Outlets are available in a variety of configurations for use with worksurfaces, peninsulas and tables.

The electrical accessories make power and data taps more accessible to the end user.

All Power and Data Accessories are ordered separately from the furniture elements which they support.

These accessories are offered in a variety of configurations consisting of simplex receptacles, double USB charging ports and blank spaces which may be used to field install data outlets. The Power and Data Outlets are available in 4 configurations. See Figure 1 below for available configurations.

Power and Data Accessories come in the following applications:

- Electrical component for Peninsula Power Center
- Table Power Center
- Table Undermount
- Table Drop-In
- Clamp-on
- Offset Clamp-on

See Figure 3 for available configuration options for each of these Power and Data Accessories.

General Notes

Simplex outlets and USB charging ports are wired together and on the same circuit. All units have a 15 Amp overall rating. Each outlet of the duplex USB charging port can deliver up to 2.1 Amps, sufficient to charge most tablets and smart phones. All units are available with choice of 72" or 120" long cordset or 72" long hardwire cord.

The 412 units with cordset come with an OCP (Over Current Protection) plug head which is larger than standard. See Figure 2 for dimension. All other cordset units come with a standard 3 prong plug head.

The 72" long hardwire cord is 9/16" diameter flexible metal conduit with pigtails for direct connection to building power. For hardwired option information, refer to Handwired Electrical Components.

Connection option selected must comply with local and/or national electrical code.

Cordset power and data outlets are certified to UL 962A, Furniture Power Distribution Units.

All power and data outlets are available in three color options: black body with black bracket (B/B), white body with white bracket (W/W) or white body with silver bracket (W/S). The cord sets match the body color.

Data connectors are not available through Knoll and must be coordinated and provided by a communications equipment supplier.

Data port bezels are provided with the Power and Data Outlets to accept RJ45, VGA and HDMI connections. L-Com part numbers for data connectors are as follows:

- RJ45 - TDG1026A-8C
- VGA - DGBV15F
- HDMI - HDFF

Refer to Figure 17 for Cabling Diagram.

Refer to Desktop Outlet Installation Instructions available on Knoll Exchange.

*Figure 3: Application Options*
**Desktop Outlet for Peninsula Power Center Stand-off**
The Desktop Outlet for Peninsula Power Center Stand-off works in conjunction with the Power Center Stand-off and the Power Center (PC) Grommet to bring electrical receptacles and data outlets to the worksurface. The Power Center Stand-off and Power Center Grommet are included with a Peninsula top when specified. See Figure 4. The Peninsula Power Center Electrical Outlet is ordered separately in a choice of 3 configurations. See Figure 3 for configuration options.

The Peninsula PC Outlet comes with the associated bracket and hardware to field install the electrical unit into the PC stand-off cavity after the peninsula has been installed. Refer to Figure 5. Refer to Power Center Stand-off Installation Instruction on Knoll Exchange.
Electrical Component for Tables – Power Center
This electrical component (Figure 6) mounts to the underside of a worksurface and is used when a Table with 2x4 Legs or a Table with 4x4 Legs is specified with a power center grommet option. This unit presents the face of the electrical receptacles and data outlet(s) to the user at a convenient 45 degree angle for ease of plug insertion and is available in 3 configurations. Refer to Figure 3 for available configurations for this unit.

Wire Bracket Kits are available (ordered separately) to support and conceal excess cables and transformer blocks.

The Electrical Component for Tables – Power Center mounts adjacent to the power center cut-out (Figure 7) and is retained to the worksurface using a single bracket and associated hardware included with the unit for one power center. When a table is specified with several power centers, the equivalent number of electrical components will be required.

A Flexible Vertical Wire Manager is available (ordered separately) to route the power cable to a floor monument. Refer to Accessories - Wire Management.

Refer to Reff Profiles Desktop Electrical Components Installation Instructions available on Knoll Exchange.

Figure 6: Electrical Component for Tables – Power Center (311 shown)
Figure 7: Image from below the table showing the electrical unit adjacent the grommet opening
Electrical Component for Tables – Undermount

The electrical component (Figure 8) field mounts to the underside of a worksurface at the peripheral edge to provide convenient access to power and data outlets (Figure 9). It comes in 4 configurations. See Figure 3 for available configurations.

Optional cable clips are provided with the unit to route the power cable under the worksurface.

A Flexible Vertical Wire Manager is available (ordered separately) to route the power cable to a floor monument.

Refer to Reff Profiles Desktop Electrical Components Installation Instructions available on Knoll Exchange.
Electrical Component for Tables - Drop-in

The Drop-in Electrical Outlet for Tables works in conjunction with Tables with 4x4 Legs and Tables with 2x4 Legs to bring electrical receptacles and data outlets directly to the worksurface and flush to the worksurface.

This Drop-in Electrical Outlet (Figure 10) is offered with 4 possible configurations. Refer to Figure 3 for available configurations.

The cut-out is provided when specified with a Table with 2 x 4 legs or a Table with 4 x 4 legs. Figure 11

Cut-out sizes for each unit are as follows:
- 202 - 2⅜" x 7½"
- 210 - 2⅜" x 6"
- 311 - 2⅜" x 8½"
- 412 - 2⅜" x 11½"

Drop-in Electrical Outlets are field installed into the available cut-out.

To use this product in other applications, special tops must be ordered with the required cut-out to suit.

This component may be utilized on worksurfaces up to 1 ½" thick.

Refer to Reff Profiles Desktop Electrical Components Installation Instructions available on Knoll Exchange.
Clamp-on Electrical Component
The Clamp-on Electrical Outlet brings electrical and data receptacles to worksurface height without needing to field install grommets. See Figure 12. The Clamp-on Electrical Outlet is available in 4 configurations. Refer to Figure 3 for available configurations.

This component may be utilized on any worksurface, up to 1 ½” thick where power and data access is desired. See Figure 13 for clearance dimensions.

Space for power cable clearance must be considered. For cordset option, allow at least 3/8” between the edge of the mounting surface and any adjacent components (other worksurfaces, wall panels, tackboards, etc.) for power cable clearance. For Hardwired option, refer to Hardwired Electrical Components Planning section.
Offset Clamp-on Electrical Component

The Offset Clamp-on Electrical Component (Figure 14) has the same function as the Clamp-on Electrical Component but may be used where components such as task panels or taskboards are mounted above the worksurface immediately adjacent to the Clamp-on unit. See Figure 15 for clearance dimension.

Hardwired Electrical Components

All Desktop Power and Communication Outlets are available with a hardwire option.

Check with your local electrical authority to verify compliance with local electrical code.

The hardwire option includes a 72" long cord contained in a 9/16" diameter silver colored flexible metal conduit with pigtails for direct connection to building power.

The hardwired option will require a qualified electrician to install.

All hardwire units are certified to UL111, Multi-Outlet Assemblies.

Each electrical component is equipped with a strain relief collar at the joint between the cable and the component housing. This strain relief is rigid and comes in 3 profiles (not user selected). The strain relief profile has been selected to provide the best power cord orientation for the application.

The strain relief color matches the body of the electrical unit.

Figure 19
Simple Stand Off
Simple Stand Offs provide support for 1½" thick worksurface tops mounted to low credenzas or ¾ height storage cabinets with a 1" top. The simple standoff is included when specified with peninsula tops.

Simple Stand Off assemblies are 2 ¼" deep, 12" wide, and 5 ¼" high. They are constructed of 16 gauge cold rolled steel and are available in all core painted finishes for 28 3/8" high planning.

The Simple Stand Off comes with the stand off weldment, mounting bracket, mounting hardware and round grommet. Refer to Figure 20.

Application notes:
The Simple Stand Off must be permanently and securely affixed to the underside of a worksurface and also to whatever support unit it rests upon.

The Simple Stand Off is designed to support a top without additional worksurface supported storage such as hutches or desktop towers for example.

To access the cavity of the Simple Stand Off, a special top must be ordered with the appropriate cut-out for a Desktop Grommet which must be specified separately and field installed.

Figure 20: Simple Stand Off

Stand Off for Power Center
Stand Offs for Power Center provide support for 1 ½" thick worksurface tops mounted to low credenzas or ¾ height storage cabinets with a 1" top while also providing opportunity for wire management and power/data capabilities. The power center standoff is included when specified with peninsula tops.

Power Center Stand Off assemblies are 6 ⅜" deep, 10 ¼" wide, and 5 ¼" high. They are constructed of 16-gauge cold rolled steel and are available in all core painted finishes for 28 ⅜" high planning.

Application notes:
The Power Center Stand Off is designed to support a top without additional worksurface supported storage mounted upon it, such as hutches or desktop towers for example.

The Power Center Stand Off must be permanently and securely affixed to the underside of a worksurface and also to whatever support unit it rests upon.

To access the cavity of the Stand Off for Power Center, a special top must be ordered with the appropriate cut-out for a Power Center Grommet which must be specified separately and field installed.

When power and data capability is desired for use with this unit, the Desktop Outlet electrical options must be specified separately. Refer to Figure 21.

A 1 ¾" round grommet is included for field drilling of cable route from the power center standoff through the lower storage element.

Refer to 6TP00505 for Installation Instructions.

Figure 21: Stand Off for Power Center

Power Center Grommet
The Power Center Grommet must be specified when utilizing a stand-off for power center. The grommet trims the opening in the peninsula table top that allows access into the stand-off for power center. It includes an attached, hinged lid. Refer to Figure 22.

Power Center Grommets are 8" wide x 5" deep and are available in all core painted and plated finishes for 28 ⅜" high planning.

The Power Center Grommet is included when specified with a peninsula top.

To utilize the Power Center Grommet, special tops must be ordered with the required cut out pre-drilled to suit.

Grommets
Desktop Grommets are included with certain worksurfaces when specified. Desktop grommets may be ordered separately, if desired, for field installation.

To use this product in non-standard applications, special tops must be ordered with the required cut-out pre-drilled to suit.

The Desktop Grommet includes a grommet sleeve and lid. The grommet sleeve is 2" deep x 3" wide with a 1/8" flange all round which sits ½" above the finished worksurface. The outside to outside dimension of the flange is 2 ¼" deep and 3 ¼" wide. The grommet lid sits inside the sleeve and is flush with the top of the sleeve. Refer to Figure 23.

Desktop Grommets are available in all core painted and plated finishes for 28 ⅜" high planning.

Application notes:
Desktop Grommets are available for use in 1", 1 ¼" and 1 ½" thick worksurfaces. Care should be taken to specify the grommet appropriate for the worksurface’s thickness.

**Wall Mounting Suggestions**

The following information is provided only as a guide, and represents minimum recommendations only. Knoll does not accept responsibility for the attachment of any Knoll product to a Customer’s site wall. Wall specification/construction is the responsibility of the Customer and its structural engineer/architect. Failure to properly attach Knoll products to adequate wall structures can lead to property damage and/or personal injury.

You should consult your own structural engineers and/or architects and must not rely on the information provided herein.

It is the responsibility of the Customer and its structural engineers/architects to verify that the permanent structural walls (studs, blocks, solid masonry, etc.) on which the Knoll products are intended to be mounted are designed appropriately to support the product weight, PLUS 3 lbs. per linear inch for each useable shelf length.

**NOTE: A cabinet’s top is considered a “useable shelf” and MUST be included in the calculation of the total load for an overhead cabinet.**

It is the responsibility of the Customer and its structural engineer/architects to specify the fasteners and method for attaching the Knoll supplied wall mounting cleat, bracket, frame, etc. to the supporting wall and to confirm that the installers have adhered to these specifications. For all local building standards and codes, and additional requirements (including, but not limited to, seismic conditions) the Customer should always consult local code agencies.

**Selling Policy**

**Terms & Conditions of Sales**

This Selling Policy supersedes all previous selling policies. Prices, discounts and product offerings are subject to change without notice.

**Ordering Information**

All orders must be in writing. The product pattern number(s) contained on Seller’s order acknowledgement shall be the basis for delivery. A purchase order is not binding on Seller until Purchaser has received Seller’s order confirmation or acknowledgment.

**Order Confirmation**

List prices are subject to change without notice.

**Pricing Policies**

List prices are those prices in effect on the date of receipt of a complete purchase order unless shipment is requested more than ninety (90) days after order entry in which case prices in effect on the date of shipment apply. List prices include specified freight costs. Unless specified in writing by Seller, no other charges are included in Seller’s list prices.

**Taxes**

All sales, use, excise and other taxes applicable to the sale of the Product shall be paid by Purchaser. If Purchaser claims an exemption from any tax, Purchaser shall submit to Seller the appropriate exemption certificates.

**Terms of Payment**

Payment for one hundred percent (100%) of the net order amount is due within thirty (30) days of the date of invoice, which is generally issued upon shipment. In case of any discrepancies, such as shortages, and Seller is notified in writing within ten (10) days of receipt of Product, only that portion may be deducted and the balance paid. For orders greater than $100,000 net, a fifty percent (50%) deposit is due at the time of order placement, with the remainder due within thirty (30) days of the date of invoice. KnollStudio orders less than $2,000 require payment for one hundred percent (100%) of the net order amount (including any applicable sales tax and charges for inside delivery, special packaging, etc.), due at time of order placement. For KnollStudio orders greater than $2,000, a one-half (50%) deposit is due at time of order placement with the remainder (including any applicable sales tax and charges for inside delivery, special packaging, etc.) due prior to shipment.

If, in the judgment of Seller, Purchaser’s financial condition does not justify the terms of the payment, Seller may require full or partial payment in advance. Past due accounts shall be charged one and one-half percent (1.5%) per month, or the highest rate permitted by law, whichever is less, and will be added to the outstanding balance. In the event Purchaser defaults on payment, Purchaser shall be liable for all collection costs, including reasonable attorney’s fees and costs.

**Changes and Cancellation**

Purchase orders may not be changed or cancelled, in whole or in part, without prior written consent of Seller. Changes may effect delivery dates. Expenses incurred because of changes shall be charged to Purchaser. In the event of cancellations, Purchaser will be liable for reasonable cancellation charges established by Seller. Orders for special Product, orders including “COM” (hereinafter defined) material and orders pursuant to expedited delivery programs, may not be canceled.

**Freight Prepaid**

Freight is prepaid and included in the price of all Products, except KnollTextiles, within the 48 contiguous United States for orders placed with Knoll, Inc. and within Canada, excluding the Yukon, Northwest Territories, Nunavut and Newfoundland for orders placed with Knoll North America Corp. Packing is tested for rigorous motion and transportation but is not guaranteed to protect furniture from all conditions. If special packaging is required for any reason, please consult with your sales representative or dealer. Seller shall select the method of shipment and routing. Freight for all KnollTextiles orders is prepaid and added to the invoice.

**Delivery/Freight Charges**

For shipments outside the contiguous United States and Canada, Purchaser is responsible for the cost of freight from point of embarkation, including any handling and transportation charges incidental to loading at the point of departure and unloading at the final destination. Conditions beyond the control of Seller, including weather, available facilities and traffic conditions, may affect exact time of delivery. Seller shall not be responsible for specific carrier delivery date or time unless it has made a specific delivery commitment, in writing. Nonstandard methods of shipment and/or additional services are available upon request. Purchaser will be billed for the differential cost of any special services in excess of standard surface carrier freight costs. Premium charges, at Purchaser’s request, will be added for airfreight, exclusive use of vehicle and extra, export or special packaging. Accessorial charges will be added for inside delivery, extra labor, reconsignment and redelivery.

**Claims**

All shipments for Knoll Products within the contiguous United States and Canada are F.O.S. Origin. All risk of loss passes to Purchaser at time of delivery to Seller packing cartons. No refund or credit shall be given for damaged Products.

**Seller’s Security Interest**

Until Seller receives the full payment for the Product, Seller shall have a security interest in the Product. Purchaser agrees to perform all acts, including but not limited to the execution and filing of documentation, which may be necessary to perfect and assure the security interest of Seller.

**Returns**

The return of Products without a written authorization by Seller shall not be accepted. To receive authorization for Product return, please call Customer Service. All Products that are returned pursuant to a valid authorization shall be subject to a twenty-five percent (25%) list restocking charge. Products not currently offered for sale by Seller (including COM) shall not be authorized for return. All returned Products must be unused, in original condition and in the original Seller packing cartons. No refund or credit shall be given for damaged Products.

**Held Orders/Storage**

If Purchaser requests that an order be held or delayed, prices and terms and conditions in effect at the time of shipment shall apply. If Purchaser requests a delay after the time when Seller can defer production, Purchaser will be invoiced for the Product, payable in accordance with standard terms, when the order is ready for shipment. Seller may transfer the Product to storage, in which case all expenses incurred in connection with storage, including demurrage, preparation for storage, storage charges and handling shall be payable by Purchaser upon submission of invoices by Seller. Risk of loss to the Product shall pass to the Purchaser upon delivery of the Product into storage.
A Purchaser who requests a fabric or other surface material not standard to Seller’s line of Products (“COM”) must submit samples of the requested material to Seller prior to entry of a purchaser order. Seller shall determine if the material is suitable to its manufacturing processes and meets any requirements of Underwriters Laboratories. If the COM is acceptable, Seller will then establish a price for using the COM or the Product in question. For a description of the procedures for submitting samples and testing, contact customer resources or your sales representative. Seller shall have no responsibility for the appearance, condition, performance, durability, colorfastness or any other physical attribute of the COM. Purchaser shall indemnify and hold Seller harmless for any damages, injuries or losses arising out of or related to use of the COM on the Product.

Seller warrants to the original Purchaser only that the Products Seller manufactures and sells to Purchaser are free of defects in workmanship and materials, during the applicable warranty period set forth below.

Warranty period set forth below is for 24-hour, 7 days a week, multi-shift use (includes parts and labor to repair).

Should any failure to conform with this limited warranty appear to a Product listed below during the applicable warranty period from the date of shipment, Seller shall, upon prompt written notice, repair or replace, at its option and costs, the affected part or parts.

This warranty does not apply to:

• Damage caused by a carrier other than the Seller.
• Normal wear and tear or acts or omissions of parties other than Seller (including user modification, improper use or installation of Products).
• COM or other third party materials applied to Products.
• Products not installed by or under the auspices of a Knoll Dealer.
• Dramatic temperature variations or exposure to unusual conditions.
• Changes in surface finishes, including colorfastness due to aging or exposure to light.
• Except as specifically noted above, textiles and upholstery supplied by KnollTextiles and Spinneybeck FilzFelt (consult current price lists for applicable warranties).

Natural variations occurring in wood, marble, and leather shall not be considered defects, and the Seller does not guarantee the colorfastness or matching of the colors, grains or textures, or surface hardness of such materials. The Seller also does not guarantee the colorfastness of fiberglass panel surfaces.

THE EXPRESS WARRANTIES CONTAINED HEREBIN ARE IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSE AND ALL OTHER WARRANTIES ARISING FROM COURSE OF DEALING OR USAGE OF TRADE.

The remedies provided above are the Purchaser’s sole remedies for any failure of Seller to comply with its obligations regarding the workmanship of its Products. Correction of any nonconformity in the manner and for the period of time provided shall constitute complete fulfillment of all liabilities of Seller, with respect to or arising out of the Product furnished hereunder.

Delay/Force Majeure

Seller shall not be liable for failure to perform or for delay in performance due to fire, flood, strike or other labor difficulty, act of God, act of any governmental authority or of the Purchaser, riot, embargo, fuel or energy shortage, wrecks or delay in transportation, inability to obtain necessary labor, materials or manufacturing facilities from usual sources or failure of suppliers to meet their contractual obligations, or due to any cause beyond its reasonable control. If any such event occurs, Seller may extend delivery dates by a period of time necessary to overcome the effect of such delay, allocate available Product or cancel any purchase order.

Compliance with Law

Purchaser is SOLELY RESPONSIBLE FOR COMPLIANCE WITH ALL APPLICABLE FEDERAL, STATE AND LOCAL LAWS, ORDINANCES, REGULATIONS, RULES AND STANDARDS RELATING TO THE INSTALLATION, MAINTENANCE, USE AND OPERATION OF THE PRODUCTS.

Patents

Subject to the following provisions, Seller shall, at its own expense, defend or, at its option, settle any claim, suit or proceeding brought against the Purchaser, and/or its vendees, mediate and immediate, so far as based on an allegation that any Product or any part thereof furnished hereunder constitutes a direct or a contributory infringement of any claim of any patent of the United States or Canada. This obligation shall be effective only if Purchaser shall have made all payments then due hereunder and if Seller is notified promptly in writing and given authority, information and assistance for the defense of said claim, suit or proceeding. Seller shall pay all damages and costs awarded in such suit or proceedings so defended.

The foregoing indemnity does not apply to the following:

• Products supplied according to a design other than that of Seller, and which is required by the Purchaser.
• Combination of the Product with another product not furnished hereunder unless Seller is a contributory infringer.
• Products or other products of a suit or proceeding made without Seller’s written consent.

Limitations of Liability

SelleR, ITS CONTRACTORS, AUTHORIZED DEALERS AND SUBCONTRACTORS OR SUPPLIERS OF ANY TIER SHALL NOT BE LIABLE TO PURCHASER FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING FROM A BREACH OF THIS AGREEMENT.

Purchaser’s remedies set forth herein are exclusive and the liability of Seller with respect to the breach of this agreement or any contract entered into between the parties pursuant hereto shall not exceed the price of the Product or part on which such liability is based.
KnollKey Lock Program

General Information

Following is the KnollKey lock policy, applicable to all products.

Knoll furniture can be ordered keyed-alike or random keyed. Key-alike and random keying instructions cannot be mixed on any single order. Only one of the two instructions can be used on an individual order. When an order is submitted with mixed (key-alike and random) instructions, Knoll will release the order as key-alike only and lock cores will have to be specified separately.

Key-alike

For the convenience of the user, furniture may be keyed alike at no charge. Write “Key-alike” in the description of your purchase order for any pedestal, overhead, file or other item you wish to have keyed alike.

Using the key-alike instructions, order cores and keys as line items on your purchase order. Do NOT submit a key-alike form. The Knoll East Greenville Lock Center will select key numbers from the standard range of K 001 - K 250. Key numbers will not be repeated unless over 250 sets are ordered. Lock cores keyed-alike will ship separately from the product, ready for field installation.

There is no charge for key-alike orders if placed with the furniture order. IF THE KEY-ALIKE ORDER IS NOT PLACED AT LEAST TWO WEEKS PRIOR TO THE FURNITURE SHIP DATE, A $50 HANDLING CHARGE AND AIR FREIGHT CHARGES WILL APPLY.

If product is ordered and shipped random-keyed, additional lock cores for key-alike are billable.

Random-Keying

To specify product keyed-random, write “key-random” in the product description. Random-keyed product is shipped with the lock core factory installed. A shrouded key is included. Random means no effort has been made to match key numbers, or to make them different.

Keys

A Knoll shrouded key is shipped with every lock core. 250 Key numbers are available. For numbers above 250, contact Custom Product Development. Additional keys and key blanks are available. See service parts for more information.

Master Keying

Knoll locks can be controlled by means of a master key. There is no additional per-lock charge for master keying. A letter of approval from the client must accompany orders for master keys.

Installing Lock Cores

Lock cores can be installed or removed in the field by using a change key. Cores must be in the unlocked position to be removed. See service parts for change key pattern number and pricing.

Lock Distribution

All orders for key-alike lock cores/keys are packaged and shipped from the East Greenville Lock Center, regardless of where the pedestals, overhead, or other units are produced. Random keyed product will have cores factory-installed.

How to Specify

Key-Alike

Following is an example of how to specify key-alike for a cluster of 10 workstations.

Step 1 - Using the project floorplan, count the number of locks in each workstation.

Step 2 - Count the number of workstations with the same quantity of locks. Group together the workstations with a like number of locks.

Step 3 - For the first group (5 sets of 2 locks), enter the number of workstations in the quantity column.

Step 4 - Then enter the pattern number “KSPEC_ _” and add a suffix for the number of locks for that group (i.e., for 2 locks per station, add the suffix “2”). Up to 30 lock cores are available in a set (i.e., KSPEC 30).

Step 5 - Repeat for other groups.

Your Key instructions are complete.

Knoll will select key numbers for each set from 250 available numbers. Additional key numbers are available through Custom Product Development. For additions to existing installations, specify desired key numbers in the description.

General Ordering Information

The Products
This guide encompasses all standard products for this product group.

Sizes
Dimensions listed in this guide are indicated as:
H = height
W = width
D = depth
Dia. = diameter
Rad. = radius

Pricing
All prices shown are list.

How to Order
Select pattern numbers and quantities required for your complete installation. Product questions can be addressed in the specific sections of this guide or by contacting your sales representative or customer resource representative at 1-800-343-5665.

Next, select options (if required), along with colors and finishes appropriate to each product. Reference the Finishes and Fabrics pages for color designations.

On large installations, an item’s “designated area” can be specified to assist in product organization and handling.

To expedite complete / correct entry of your order, be certain all pattern numbers, quantities, colors and area identifications are completely specified. Also, include complete purchase order numbers, bill-to and ship-to addresses, a contact name and specific factory shipping dates required.

Mail all orders to:
Knoll, Inc.
1235 Water Street
P.O. Box 157
East Greenville, PA 18041
Attention: Order Entry

Once your order is entered at Knoll, an acknowledgment will be mailed to you. You will be advised of your scheduled shipping date within five days of the original acknowledgment. If it is necessary to revise your order, please contact your customer resource representative.

Sustainability Statement

Sustainable design is a key component of Knoll’s environmental focus. Our commitment to social responsibility and a healthy environment has prompted us to further articulate our longstanding environmental programs and, with encouragement and support from our colleagues in the industry, we have re-energized our focus on such “green” initiatives as life cycle analysis and LEED™ certification. Knoll is proud to have contributed to projects that have received LEED certification from the U.S. Green Building Council.
