# Newson Aluminum Chair

Marc Newson

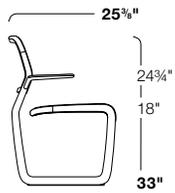

**Knoll**

Honoring the cantilevered designs of Ludwig Mies van der Rohe, the NEWSON ALUMINUM CHAIR is a forward-looking expression that synthesizes simplicity, material and precision, in the Modernist tradition. It is defined by a single uninterrupted line that reflects Marc Newson's signature combination of organic forms and meticulous engineering. The Newson Aluminum chair is designed using cast aluminum, which allows for a dynamic form, as well as an innovative knit mesh, which integrates seamlessly into the seat.

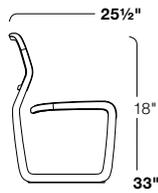

Fueled by a fanaticism for space-age futurism and complex mathematical patterns, Marc Newson continues to make his mark on the world. From furniture and household goods to bicycles and cars, architecture to sculpture, Newson has made a career exploring the marriage of natural forms and contemporary materials and technologies to create beautiful, functional and subtly playful objects for life.
