ROCKWELL UNSCRIPTED CREATIVE WALL can be both backdrop and focal point. As a freestanding plane or connected by crossbeams, it defines and creates open-ended spaces, allowing for circulation and connection within the open plan. It uses scale and a combination of aperture and enclosure to create landmarks, pavilions, portals, studios, and workshops for individuals or teams.

A variety of surface materials and interactive elements support and encourage creativity. Its expandable planning capabilities make for unlimited opportunities to design unique, immersive workplaces that can evolve over time.
