

# Sustainability Overview

## Ollo™

Ollo, a light task chair, is designed to stay on pace with the spontaneous style of today's work—pivoting between people, locations and tasks without breaking stride. Ollo is warranted for 24-hour, 7 days a week, multi-shift use for 12 years. See the Knoll Selling Policy for further details. Designed by Glen Oliver Loew.

### Manufacturing

Ollo is manufactured in our LEED Gold and ISO 14001 certified Lubin Manufacturing Facility using clean technologies:

- + No ozone-destroying chloroflourocarbons (CFCs)
- + Adhesive processes are 99% VOC-free
- + Returnable packaging is used for chair component parts
- + 100% of electricity used at the site is offset by wind energy

### Ollo and level®

Ollo is BIFMA level 3 certified. Level is a voluntary product standard developed by BIFMA to support safe, healthy and sustainable workplace environments. The program establishes prerequisites, requires third party certification and mandates annual reviews to maintain certifications.

### Ollo and GREENGUARD®

Ollo is GREENGUARD Gold certified. GREENGUARD ensures that products meet rigorous chemical emissions standards, helping reduce indoor air pollution.

### Ollo and LEED®

Ollo can contribute to achieving LEED credits under the version 4 standard. The LEED green building rating system is the accepted benchmark in North America for the design, construction and operation of high performance green buildings. Ollo is eligible to help companies achieve LEED credits.

### Ollo and Declare

Ollo has a Declare label. The label is a materials transparency platform and associated database that provides consumers with an at-a-glance reference for where a product is made, what it contains, and options for end-of-life disposal.

### Features:

#### Environmental Product Declaration (EPD)

Ollo has a completed EPD which shares information from the products' life cycle.

#### Efficient Use of Materials

Constructed using minimal materials.

#### Recycled Content

Constructed with 26% (plastic base) to 32% (aluminum base) recycled materials.

#### Recyclable Content

31% (plastic base) to 48% (aluminum base) of parts are readily recyclable.

#### Environmental Fabrics

Available with 35+ environmental fabrics from KnollTextiles, which are GREENGUARD Gold certified and can be cleaned with low environmental impact fluids, including GS-37 certified products.

#### Structural Components

Integrally colored polymer parts and cast, burnished aluminum parts require no coating, minimizing materials and eliminating Volatile Organic Compounds (VOCs).
