

# Interior Building Design & Construction: Commercial Interiors

## Building Design & Construction

	CREDIT	OPTION	INTENT	OLLO™
Materials and Resources: Building Product Disclosure and Optimization	<b>Environmental Product Declarations (EPDs)</b>	<b>Option 1:</b> EPDs	To select products from manufacturers who have verified improved environmental life-cycle impacts.	LCAs (life cycle assessments) have been completed for Ollo, which ensures that all key materials and processes are captured and converted into environmental impacts. A Type III EPD has also been completed, which discloses information over the product's life cycle from raw material extraction, transportation, manufacture, use, and reuse or end of life.  <b>Credit Contribution: 1 point</b>
	<b>Sourcing of Raw Materials</b>	<b>Option 2:</b> Leadership extraction practices. Use products that meet at least one of the extraction criteria by 25% of the cost or more:  + Extended producer responsibility + Bio-based materials + Wood products + Materials reuse + Recycled content	To select products verified to have been extracted or sourced in a responsible matter.	Ollo has recycled content documentation. Based on LEED's required calculation method, the typical Ollo chair with fixed arms and plastic base has 31% recycled content; an Ollo chair with fixed arms and an aluminum base has 37% recycled content.  <b>Credit Contribution: 1 point</b>
	<b>Material Ingredients</b>	<b>Option 1:</b> Material ingredient reporting	To select products for which the chemical ingredients in the product are inventoried.	Ollo has a completed Declare label, which provides a comprehensive review of all chemicals used in the product.  <b>Credit Contribution: 1 point</b>
Material Resources Pilot: Credit 112	<b>Certified Multi-Attribute Products and Materials</b>	Use interior furnishings from manufacturers who have validated environmental attributes by independent third party certifications and that have publicly disclosed the product attributes on which the certification has been granted.	To encourage the use of products and materials for which life cycle information is available and that have environmentally, economically, and socially preferable life-cycle impacts.	Ollo is BIFMA level® 3 certified. BIFMA level certification evaluates the environmental and social impacts of products in the built environment.  <b>Credit Contribution: 1 point</b>
