

Quoin Locker Bank Ganging

Hardware

5/8" Self-drilling screw

3/4" Screw

Ganging bracket

1. Remove shelves and/or doors from all units.
2. Lay common laminate top face down on clean, non-abrasive surface.
3. Arrange locker units upside down on underside of common top in desired configuration. (**Fig. 1**)
4. Align front stiles of lockers flush with one another. Secure with clamps to firmly hold units together.
5. Center units left to right on common top. There should be approx. 1/32" overhang on each end. Align back surfaces of units to be inset approximately 1/32" from edge of common top as shown.
6. Attach units to common top using #10 x 3/4" screws included with coat hook kit. If units have doors, install coat hook in center hole of the flange on opposite side of hinges.

Quoin Locker Bank Ganging, continued

7. Place ganging brackets over bottom flanges and align with (2) predrilled holes as shown. (Fig. 2)
8. Drive #10 x 5/8" drilling screws (4 per bracket) through holes of ganging brackets into locker base flange.
9. Remove clamps and carefully return unit to upright position.
10. Replace shelves and/or doors as necessary.
