

Healthy Spaces Response Program

Supporting Our Community and
Caregivers on the Front Line

Healthy Spaces Response Program

Knoll helps create inspiring healthcare environments that can contribute to staff performance, productivity and comfort.

Today, with the health and safety of our communities and front-line Covid-19 responders in mind, we've designed a Healthy Spaces Response Program to support caregivers and patients. Our variety of nursing stations and patient enclosures align with best practice safe social distancing measures. And these products feature premium, easy-to-clean materials that meet rigorous healthcare demands without sacrificing performance and most importantly—your safety.

Explore our complementary specialty seating— ready-to-ship in 5-10 days!

Please contact us with any specific project requirements—we look forward to quickly supporting you!

- + Standard Canadian Customers: #Q0022962

Our Commitment to Health and Safety

Manufacturing and Distribution Facilities Update

An amplified focus on associate health and safety measures at our manufacturing and distribution facilities during the Covid-19 pandemic is driving Knoll forward.

- + Knoll manufacturing facilities and distribution centers in North America are largely operational.
- + In addition to following the World Health Organization's and Centers for Disease Control guidelines, we have instituted new site protocols, health standards and social distancing measures at our manufacturing and distribution facilities. Safety is our #1 priority.
- + Our sales associates, account representatives and Knoll distribution partners are meeting with clients via video, web and audio conferencing—continuing to bring an innovative mindset to develop tailored workplace and healthcare solutions for our customers.
- + Customer Service operations continue to be staffed by associates working remotely from home to ensure projects are closely managed.

We are providing Covid-19 Updates at [knoll.com](https://www.knoll.com). In addition, our account representatives are working to ensure that our clients are kept up-to-date regarding our operations.

Health Care Without Harm / Healthy Interiors Criteria

Knoll supports the HCWH Healthy Interiors Criteria by offering furniture solutions that healthcare clients and the design community can trust will meet this criteria:

Eliminating the use of:

- + Formaldehyde
- + Per- and poly-fluorinated compounds (PFCs)
- + Polyvinyl Chloride (PVC)

Providing:

- + Antimicrobial properties
- + Stacking 6-high on floor
- + Silver frame
- + Flame Retardants

Simple and sustainable, our products are Clean Air Certified for healthy interior environments, are BIFMA level® certified and can contribute to LEED® certification.

Nursing Stations

Product Care & Cleaning

Tested Disinfectant Formulas

Healthcare facilities require furniture solutions that are functional, durable and easy to clean with disinfectants typically used in healthcare facilities. **Knoll has completed testing on its constellation¹ of Knoll products and found that the following products will not cause harm to the function or finishes of our products:**

- + Envirox[®] H2Orange2 Concentrate 117
- + Virox[™] Accelerated[™] Hydrogen Peroxide 5
- + Envirox[®] EvolveO2TM (GNx2 technology) #1, Multi-Purpose Cleaner and Degreaser*

These products have been tested on all standard Knoll Office veneers, laminates, paints, glass, aluminum, and plated finishes. While Knoll cannot guarantee the efficacy of these products, when properly used in accordance with the manufacturers' directions for use and dilution, they will not cause harm to standard Knoll Office finishes.

Furniture that is comprised of multiple materials may require multiple cleaning protocols. Refer to [Knoll Price Lists](#) to determine the component material and fabric options where applicable. Refer to the [Knoll Cleaning Guide](#) for how to clean each surface.

* *this product is a Green Seal GS-37 product*
