Wood Planters

Antenna Workspaces
Wood Planters

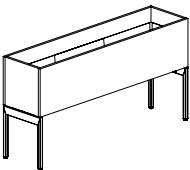

Antenna Wood Planters, designed by Antenna Design, breathe life into the workspace, providing a refreshing alternative to traditional space-defining elements. Antenna planters create a dynamic boundary for circulation paths and define borders for workstations and shared spaces.

- A The freestanding planter reimagines the Antenna Workspaces desk structure, allowing for broad planning capabilities throughout the office
- B The beam-mounted planter is supported at one end by Power Beam, and acts as an alternative solution to panels and screens
