Planning with Pixel Lounge

Pixel Lounge is designed to support all the ways you work. With seating elements, tables and power, you can plan a multitude of configurations to create engaging environments.

From office spaces to campuses, airport lounges and beyond, Pixel Lounge offers a comfortable spot for anyone who needs to relax while getting down to business—because sometimes the best work gets done when it doesn't feel like work at all.

Planning with
Pixel Lounge

- A** Seat
- B** Arm
- C** Table
- D** Beam

Features

- + Easily plan for scalable and reconfigurable individual and group spaces.
- + Combines comfort and power accessibility—with plush seat cushions designed to provide ergonomic comfort and electrical modules seamlessly integrated in the tables
- + Beautiful from all angles with the lightness of the base structure and welcoming scalloped back. Graceful details like the reveal offers the ability to add a subtle nuance or pop of color.

Planning

- + Plan with twenty-two preconfigured patterns or build-to-spec with individual components.
- + Six different types of beams to plan a myriad of configurations.
- + Seats and Low Tables easily slide into position on beams. Seats are interchangeable with Low Tables.
- + Seats may be installed facing the same direction on a beam or may be individually reversed 180° to face the opposite direction on the beam.

Power & Data

- + A variety of power configurations easily accessible under the seat, within the low tables, and up mounted tables that are easily interchanged.

PLANNING TYPES

Pre-configured

Twenty-two pre-configured single pattern number assemblies are available for quick specification.

Built-to-Spec

Components are specified separately to create tailored configurations.
