

Reff Profiles™

Building on the Knoll heritage of wood excellence, Reff Profiles creates tailored workspaces, based on a tradition of sustainable wood craftsmanship and design flexibility.

Reff Profiles™

Celebrating the Beauty of Wood Throughout the Workplace

Reff Profiles complements architectural spaces to support multiple work modes. From private offices, to reception and administrative support areas as well as open plan and meeting spaces, Reff Profiles creates a cohesive workplace experience.

Private Offices

Reff Profiles offers a comprehensive scope of components to create a wide range of private office environments, offering a variety of aesthetic options and a high level of personalization to create private offices that support today's workstyles across a broad spectrum of client needs.

Individual

Ideal for focused work, individual private offices offer a sanctuary to minimize distraction and promote concentration and reflection.

Multi-Use

Multi-use private offices support both individual and group work with spaces and technology that provide an alternate work setting for meeting and connecting in-person, or virtually with remote colleagues.

Shared Office

Shared offices facilitate learning and mentorship between teammates and can be optimized to support multiple hybrid workers who work in the office part-time and do not require a dedicated space. The shared office can be used many ways, ranging from a dedicated two-person office to an unassigned space occupied on a first-come, first-serve basis.

Administrative & Reception

Reff Profiles is detailed and scaled to transition from private offices to open plan administrative and reception areas. Leveraging common planning horizons, finishes, edge and hardware details, Reff Profiles compact reception stations and full-service administrative support environments integrate seamlessly to deliver a unified aesthetic throughout the workspace.

Providing a flexible, cost-effective alternative to custom millwork, Reff Profiles administrative and reception stations incorporate transaction counters, infill panels, specialized storage units and modular electrical components.

Reff Profiles administrative and reception stations offer standard and customizable components in a broad spectrum of wood veneers and other surface materials.

Open Plan

Reff Profiles delivers virtually unlimited planning capabilities for panel-based, open plan work environments. Harmonizing the rich character of wood casegoods with the latest ergonomic and technology support, Reff Profiles distills traditional influences, creating high-performance open plan workstations that are both classic and contemporary.

Open Plan Workstations

Reff Profiles open plan workstations address a broad spectrum of privacy and enclosure needs. Reff Profiles offers a comprehensive scope of panel and storage configurations in a variety of sizes and heights that address a broad spectrum of privacy and enclosure needs. Reff profiles open plan solutions can be scaled to minimize distraction to promote individual, focus work, or can be planned in more open layouts to facilitate teamwork and collaboration.

Height-Adjustable Desks

Reff Profiles height-adjustable desks allow users to adjust their workspaces throughout the day in an ergonomic, healthy and safe manner. Reff Profiles freestanding and peninsula height-adjustable desks bring a classic and architectural design solution to the sit-stand desk category. Combining rich materials and the ergonomic benefits of a height-adjustable worksurface, Reff Profiles open plan solutions are optimized to meet both functional and design needs.

Tables & Storage

Reff Profiles tables and complementary storage offer the perfect addition to meeting spaces, private offices, and open plan workstations. Coordinated table edge profiles, hardware, finishes and sizes ensure seamless integration throughout the workplace.

Conference Tables

Reff Profiles meeting and conference tables create signature spaces to gather. Reff Profiles Tables with 2x4 and 4x4 legs create tailored, high-performance meeting and conference spaces. Available in a range of sizes and finishes, including both seated and standing height, and featuring advanced technology management, Reff Profiles Tables with 2x4 and 4x4 legs create spaces for groups to do their best work.

Table Desks

Reff Profiles table desks deliver a light, adaptable solution for use in both individual and shared spaces. Reff Profiles table desks are at home in private offices and workstations and also respond to the need for collaborative spaces outside of the primary workstation. Reff Profiles table desks are available in a range of leg styles, including open frame legs, L-Legs, Reverse L-Legs, Soft Rectangular Legs, and Single Column to accommodate a range of customer preferences.
