

Bausch & Lomb Surgical Headquarters

Sector Focus: Healthcare, Consumer Products

Bausch & Lomb is an eye health company dedicated to enhancing life by perfecting vision. Offering the world's most comprehensive portfolio of eye health products, it is one of the oldest and most respected healthcare brands in the world. When the company relocated to a new 24,962 square foot space, it worked with architecture and design firm, Gensler, to find furnishings that were not only of superior quality but also offered the sustainable features it desired. Exemplifying the company's commitment to protecting the environment, Bausch & Lomb selected GREENGUARD certified Knoll systems and seating, which helped contribute

LEED credits to the new facility. A Graham Collection® private office, cover, features a Life® task chair, an AutoStrada™ table and JR® side chairs. Bausch & Lomb selected sustainable and ergonomic Chadwick™ chairs, left, for its open office workstations. SM2 lounge seating by Shelton Mindel and a Florence Knoll Coffee table with a marble top, top right, add modern elegance to the reception area. AutoStrada™ storage-anchored planning, bottom right, defines workplace boundaries with clear glass add-up panels. A Saarinen table with Saarinen Executive chairs provides associates a place to take a break, collaborate or discuss new ideas.
