

# Leeds School of Business University of Colorado-Boulder

## Sector Focus: Education

The Leeds School of Business at the University of Colorado-Boulder has a new environmentally friendly home. Constructed in 2007, the Koelbel Building, which is LEED® Gold certified by the U.S. Green Building Council, features a 20% improvement in energy savings and other environmental benefits compared to other buildings on campus. The School selected Knoll to furnish faculty and staff offices, lounge areas, conference rooms, study rooms, and other public areas with a diverse offering of products that helped it achieve LEED® certification.

For busy college students, Propeller® tables, shown left with Soho side chairs, can be set up quickly for groups or reconfigured with privacy screens for individual study. Propeller® conference tables and Open Up chairs, cover, give the large, open conference room a comfortable yet professional feel. Administrative and faculty areas, right, feature Morrison workstations with Chadwick™ chairs. Morrison is GREENGUARD Indoor Air Quality Certified® and manufactured using clean technologies; it contains 20-30% recycled content steel and 100% recycled content particleboard.
