

LEED® Credits: Commercial Interiors v2 & v3

Sapper™

CI v2 & v3 ●

EB v2 ○

EB v3 ○

NC v2.2 & v3 ○

Sapper may contribute to achieving the following LEED Credits.

Credit	Intent	Sapper™
CORE AREAS		
MR Credit 3.2 Materials Reuse: 30% Furniture and Furnishings	To reuse building materials and products to reduce demand for virgin materials and reduce waste, thereby reducing impacts associated with the extraction and processing of virgin resources.	▶ Sapper is designed for durability with a 10-year warranty and can be reused on many building projects.
MR Credit 5.1 Regional Materials	To increase the demand for building materials and products that are extracted and manufactured within the region, thereby supporting the regional economy and reducing the environmental impacts resulting from transportation.	▶ Sapper may contribute to this credit depending on project location. The chair is manufactured in East Greenville, Penn.
IEQ Credit 4.5 Low-Emitting Materials, Systems Furniture and Seating	To reduce the use of furniture assemblies that may release indoor air contaminants that are odorous or potentially irritating and might be deleterious to installer and occupant health, comfort and well-being.	▶ Sapper is GREENGUARD Indoor Air Quality Certified® and GREENGUARD Children & SchoolsSM certified. Certificates are available for download at www.greenguard.org .
INNOVATION IN DESIGN		
ID Credit 1	To provide design teams and projects the opportunity to achieve exceptional performance above the requirements set by the LEED Green Building Rating System and/or innovative performance in Green Building categories not specifically addressed by the LEED Green Building Rating System.	
Low Emitting Materials Systems Furniture & Seating (LEED CI v2/v3 IEQc4.5)	Reduce the use of furniture assemblies that may release indoor air contaminants that are odorous or potentially irritating and might be deleterious to installer and occupant health, comfort and well-being.	▶ Sapper is GREENGUARD Children & SchoolsSM certified, which is exemplary performance (the more stringent 25 ppb Formaldehyde) over LEED CI v2 GREENGUARD Certificate requirements of 50 ppb Formaldehyde.
SUPPLEMENTARY AREAS		
MR Credit 2.1 and 2.2 Construction Waste Management (Divert 50%, 75%)	To divert construction and demolition debris from disposal in landfills and incineration facilities. Redirect recyclable recovered resources back to the manufacturing process and reusable materials to appropriate sites.	▶ While this credit is not specific to products, Sapper packing materials include polyethylene bags, which reduces packaging usage.

Sapper is an award-winning classic recognized for its elegant lines and hand-finished craftsmanship.

Clean Manufacturing Technologies

- ▶ No ozone-destroying chlorofluorocarbons (CFCs)
- ▶ Returnable packaging is used for chair component parts
- ▶ 100% of electricity used at the site is offset by wind energy
- ▶ Manufactured in a LEED® Gold, ISO 14001 certified facility

Materials

- ▶ Available with 20+ environmental upholstery fabrics
- ▶ Integrally colored polymer parts require no coating, minimizing materials and eliminating VOCs
- ▶ No polyvinyl chloride (PVC)
