

South Shore Hospital

Knoll

Sector Focus: Healthcare

South Shore Hospital is a regional provider of acute, outpatient, home health and hospice care for over 600,000 residents in Southeastern Massachusetts. When the hospital furnished its Surgical/Mobile Intensive Care and Critical Care units in South Weymouth, it needed products that would help create a flexible, comfortable work environment for caregivers. Thus, South Shore selected Knoll seating and modular systems. With easy-to-clean, durable finishes, Chadwick™ task seating and Reff® nurse stations withstand the rigors of a 24/7 multi-shift environment without sacrificing performance. Chadwick™ chairs, cover, rated Sustainable

Gold under the SMART® Consensus Sustainable Product Standard, are used throughout the South Shore units. Reff® nurse stations feature impact-resistant, laminate panels and adjustable, eased-edge worksurfaces. Reff® nurse stations, left, offer durability, elegant design and a Limited Lifetime Warranty. With efficient use of materials, a pioneering spring mechanism and a novel dual-mode head, the Copeland Light™, top right, integrates design dexterity with workplace needs. Wishbone™ flat panel monitor systems, bottom right, mount easily to virtually any workstation, offering flexibility and adjustability for all users.
