

## Product Overview

- Nano-Tex with BioAM is a special finish combining the high performance spill and stain resistance of Nano-Tex with a non-leaching antimicrobial, BioAM, useful in environments where control of microorganisms is a concern.
- On healthcare privacy curtains, Nano-Tex with BioAM has been tested and proven durable up to 30 healthcare washings. Additional testing shows the treatment may be durable beyond 30 washings and is expected to be effective for the life of the fabric under normal use and care.
- Nano-Tex provides long-lasting stain resistance. Liquid and oil based spills like red wine, juice and salad dressing bead up and roll off without soaking in. The technology does not change the natural look, feel and breathability of the fabric.
- Passes NFPA 701: Inherently fire resistant fabrics, which pass NFPA 701 prior to treatment will pass NFPA 701 after the application of Nano-Tex with BioAM.

## Environmental Benefits

Contains no arsenic, tin, heavy metals, silver or polychlorinated Phenols, or formaldehyde. Non-leaching technology does not migrate or rub off. Disables microbes through an electronic charge. Adding this treatment to 100% polyester products does not affect the recyclable property of the polyester.

## Nano-Tex with BioAM

5-70 yards \$ 250 min

Over 70 yards \$ 3.50 per yard

- Lead time: Additional lead time required.
- Minimums: 5 yard minimum.
- Approvals: Approved on all KnollTextiles privacy curtain fabrics. Cannot be added to fabrics already treated with Nano-Tex. Contact customer service for details.
- Shrinkage: Due to normal shrinkage in the finishing processes, one additional yard of fabric must be included per order.
- Returns: Orders requesting special finishing are non-cancelable and non-returnable.
