

# Propeller

**KnollStudio**

## Sophisticated. Intelligent. Versatile.

Propeller® offers a multi-purpose portfolio of desking, training and conference tables for the evolving office landscape. Characterized by intelligent design, a sophisticated aesthetic and ease of reconfiguration, Propeller is the solution to the multi-tasking workplace.

“Design is function with cultural content. Every design has both a rational and an emotional component, which is the one that appeals to us beyond our strictly functional needs.”

—*Emanuela Frattini*

### Refreshing Flexibility

Designed with multi-tasking in mind, Propeller, here and front cover, is configured to meet the needs of distinct work environments. Tables in Brushed Aluminum laminate with Limette and Frosty White translucent edgebands and 11"-high tackable privacy screens in *Ricochet*, *Lemonade*. Saarinen chairs in Spinneybeck® *Amazon 3001* and *Sprite* chairs in Lime and White complement the aesthetic.

## Desks

Conceived for multi-user open plan or single private offices, the Propeller table desk is the backbone to building the contemporary office. The flexibility of Propeller means that a broad range of configurations can be created to meet the needs of any desking scenario. The signature Propeller leg, also available in C and T versions, features two separate channels to house power and data wiring. Privacy and modesty screens ensure a minimum of disturbance. With superior wire management and electric and data access at the desktop, Propeller sets the standard.

## Enhanced Productivity

Propeller ensures that the solution for a given work environment can be created or reconfigured with ease. In the desking application, opposite and reconfigured above right, Propeller balances privacy and collaboration. These desking configurations make use of the C-leg with Maple laminate worksurfaces, molded Grey edgeband, 18"-high privacy screens and the Propeller shelf, accented by the Copeland light, Jellyfish laptop stand and Chadwick chairs in Green with Black finish.

Middle left, privacy and modesty screens attach easily to the worksurface without tools.

Middle right, tables gang together with a simple click-to-lock release mechanism for easy reconfiguration.

Line drawings illustrate two of the many different desk configurations that can be created using Propeller tables.

## Meeting and Training

The simplicity of the Propeller table facilitates flexible meeting and training applications. Easily configured and reconfigured to create the furniture layout suitable to a range of activities, all Propeller training tables feature easy ganging mechanisms and casters or glides, as well as ingenious cable management for powered mobility. Folding, Flip-top and standing-height options are available.

## Workplace Collaboration

For meeting or training, Propeller offers the collaborative table solution. In the training room, opposite, with the Propeller easel, Propeller tables in Brushed Aluminum laminate with translucent Frosty White edgeband complement Life chairs in *Chamomile* with *Classic Bouclé*, *Chartreuse* seat cushions. Propeller standing-height tables create a study-bar with Bertioia stools and the Suzanne lounge in *Extreme Velvet*, *Himalaya* provides a quiet wayside.

Propeller tables, above left, gang together to create a large meeting table in Natural Beech veneer with Grey opaque edgeband, powered by the Plexus Box for power and data at strategic points. Open Up task chairs in Grey with Spinneybeck® *Sabrina 785* leather seat cushions. Propeller standing-height table, below.

The line drawings, left, illustrate four of the various meeting and training solutions Propeller provides.

#### Diverse Applications

Propeller provides not only ideas for desking, training and meeting, but also a full complement of table solutions for conference needs. Here, a Light Cherry veneer conference table with power and data, managed by the Peanut Base, also in Light Cherry veneer; credenza and sideboard to match; and Saarinen Executive chairs in Spinneybeck® Sabrina 785. Desk configuration in Brushed Aluminum laminate with 11"-high tackable privacy screens in Ricochet, Lemonade. Saarinen chairs in Spinneybeck® Amazon 3001; Copeland lights in Silver.

## Conference Tables

The sophistication of Propeller conference tables is unparalleled. Modular design, with the Peanut or Drum base, allows for a group as small as four to configurations that are virtually limitless. With bases available in traditional wood veneer or contemporary perforated aluminum, the Propeller conference table brings a refined aesthetic to any conference room or boardroom.

### Organic Style

Propeller conference tables with the Peanut base, opposite in Perforated Aluminum and above right in Light Cherry veneer, or the Drum base, below right in Light Cherry veneer, are elegant and functional. With enhanced space in the base for vertical wire management and the ability to conceal floor monuments, Peanut and Drum are ideal solutions. Horizontal wire management is provided from table segment to table segment. Panels on the base can be easily removed without tools for easy access.

## Conference Tables

The Propeller table can also be constructed with the slim standard leg in aluminum or wood. The signature aluminum Propeller leg easily manages wiring directly to the tabletop through a variety of power and data accessories: Grommet, Quadruplex, Transact™ and Plexus™ Box. The Propeller leg is also available in solid wood—the beauty of fine craftsmanship less the powered capability.

### Understated Elegance

The simplicity behind Propeller design is its ingenuity. The conference table, opposite, in Bright White laminate and Medium Grey opaque edgeband, is complemented by a matching credenza. Gigi chairs in Graphite.

### User's Choice

Above right, the Propeller leg is also available in solid lumber for both training and conference tables. The lumber leg, shown in Maple, features the same elegant shape as the signature aluminum leg but without the vertical wire management. A choice of chrome-plated glides or casters accent the design. Veneer worksurfaces, right, in Maple, extend finish options.

## Power and Data

Intelligently designed with the needs of the modern workplace in mind, Propeller includes a full range of accessories to manage power, data and associated cabling. Whatever the configuration, Propeller brings power and data to the worksurface.

### Practical Design

Transact Box, shown closed and open below left, Plexus Box, center, and Quadruplex, shown with the distinctive yin-yang Grommet, provide convenient tabletop access to power, voice and data.

Large conference tables, top right, with Peanut or Drum base, incorporate a structural frame, including adjustable clips, which can also serve as a horizontal wire management channel.

The modular raceway kit, shown below right with a wire management basket, offers a hard-wired electrical connection for Propeller training table applications.

**Practical Options**

The Propeller portfolio includes tables that fold, nest and stack. Accessory tables for café and break areas round out the Propeller product scope.

**More Choice**

Among the many practical options Propeller provides are: rolling cart, top left, and column base table to right, shown with Quadruplex; T-leg table; Trapezoid tables, shown stacked; folding tables; and Flip-Top tables, shown with round and rectangular tops.

# Propeller®

Sophisticated. Intelligent. Versatile. The Propeller portfolio of products, designed by Emanuela Frattini, offers a full complement of desking, training, meeting and conference tables to create a workplace that is aesthetically harmonious, easily configured and reconfigured, and technologically savvy. Propeller creates the modern office with grace and sophistication.

*Desking* – Propeller offers an array of worksurface shapes and dimensions that easily configure into a multitude of desk solutions using privacy and modesty screens. The creatively designed signature Propeller leg carries cables for electricity and data to several different optional accessories for the worksurface.

*Meeting and Training* – Whether it is for an informal collaborative space, a large meeting area, a classroom or a training room, Propeller can be arranged to meet the task. With tables that stack, flip or fold, Propeller takes all scenarios into consideration.

*Conferencing* – Propeller delivers variety not only in size and configuration but also in aesthetics. The varied selection of conferencing bases and the broad finish options available across all Propeller products make for design consistency throughout the workplace – from boardroom to training room to workstation.
