Knoll and Sustainable Design

Each year Knoll sets key initiatives in our journey to sustainability. We are members of a global consortium on energy, have adopted a scientific, metrics-based approach to sustainable product design, and maintain a leadership position in establishing universal, verifiable, sustainability standards for our industry.

Knoll promotes independent third-party certification because it provides the most impartial and trustworthy foundation for industry-wide environmental compliance. Certification by established and respected third parties ensures that all manufacturers are held to the same high standards and that customers can trust a company's declaration about the environmental benefits of its products. Knoll third-party partners include: the International Standards Organization (ISO); Forest Stewardship Council (FSC®); Rainforest Alliance; GREENGUARD® Environmental Institute; and Chicago Climate Exchange (CCX®).

In addition, Knoll is aligned with the U.S. Green Building Council and can help companies, healthcare organizations and educational institutions achieve Leadership in Energy and Environmental Design (LEED®) workplace certification.

1. Global Climate Change

- Knoll is a sponsor of the Clinton Global Initiative, which brings together a community of global leaders to devise and implement solutions to some of the world's most pressing challenges, including environmental change.
- Knoll is a member of the Chicago Climate Exchange, which promotes greenhouse gas reduction through the trading of credits earned for reducing emissions.
- Knoll has a comprehensive Energy Management Program to increase energy efficiency in products and processes.

2. Life Cycle Assessment (LCA) Tool

- Life Cycle Assessment is a science-based measurement of a product's environmental impacts throughout its life cycle, from raw materials sourcing through manufacture, shipping, use and re-use or end-of-life. LCA enables cradle-to-cradle implementation of sustainable practices.
- Knoll has partnered with The Green Standard.org to develop an affordable, universal ISO-compliant computer-based LCA tool that can be used by the entire contract furniture industry and is partnering on the development of an Environmental Product Declaration System (EPDs) for Knoll products. EPDs are verified documents containing LCA results and additional environmental performance information about a product.

3. Setting Industry Standards

- Knoll partners with MTS (The Institute for Market Transformation to Sustainability) to develop the SMaRT® Consensus Sustainable Products Standards, a set of consensus-based sustainable product standards based on the LEED® model, for all building products, fabric, apparel, flooring and carpet. MTS, the developer of SMaRT®, is an accredited American National Standards Institute (ANSI) standard developer.
- Knoll has established FSC® (Forest Stewardship Council) certified wood as the standard for general office open plan office systems, casegoods and tables.
- Knoll also participates in an ongoing BIFMA (Business and Institutional Furniture Manufacturers Association) initiative to establish level™ sustainability standards for the contract furniture industry.
- Our goal is to encourage all manufacturers in the contract furniture industry and related industries to adopt standards that will lead to sustainable products and practices.

For more information about Knoll and sustainable design, visit knoll.com/environment.

Introduction

With a commitment to innovation and modern aesthetics, Knoll sets the standard for the environment in which people work. AutoStrada is one of the most comprehensive office concepts to be developed by Knoll. Evolving workplace needs are met with innovative design, from private offices to collaborative spaces for team interaction.

AutoStrada addresses any office combination with a consistent aesthetic of high quality materials and carefully detailed design. Whether an office requires a high-performance open plan system, refined architectural case goods, progressive private office furniture, or a collaborative “big table” concept, AutoStrada provides a solution.

AutoStrada is a planning approach that combines furniture and interior architecture for both open plan and private offices spaces.

AutoStrada is a premium, one-source design.

AutoStrada is the definition of the most advanced technology management capabilities.

AutoStrada is modern. It is absolute design with a strong, basic design premise.

The Planning Models

Four AutoStrada planning models offer one set of continuous, intelligent, solutions-oriented capabilities.

Four ways AutoStrada redefines space:

- Spine-based planning
- Storage-anchored planning
- Collaborative table-based planning
- Architectural office planning

Any one environment could include solutions provided by any mix or all of the four planning models. Diverse planning models meet cross-cultural workplace environments everywhere.

AS1 AutoStrada spine based planning

AutoStrada spine based planning provides wall-like architectural order to office interiors and offers high performance technological support. The spine supports continuous off-module attachment of workspaces, storage components, KnollExtra accessories, and perpendicular linkable screens or panels to define workstations. The spine also manages and distributes power and communications throughout clusters of workstations, enabling convenient outlets at desk height and unobstructed access to cabling.

Spines can be built to any one foot increment of length and can be freestanding with outriggers to support cantilevered workspaces and overhead storage. Spines may also be integrated with attached panels or screens for support and enclosure. T-ends enable the spine to extend to absorb the dimensional gain of attached panels.

Spine covers include veneer, laminate, dry-erase marker, tackable fabric, integral shelves, slat wall and integral cable tray surfaces. Spines are available in three horizons--39”H, 48”H and 64”H--and may be fitted with frameless glass add ups for additional privacy above any of four crown profiles.

Linkable screens are available in tackable upholstered or glazed panels and windows, with a complete range of connectors that also support workspaces and storage.

AS2 AutoStrada storage anchored planning

AutoStrada storage anchored planning redefines the open office architecture with aesthetic and functional alternatives to conventional panel-based systems. Storage anchored planning begins with the anchor cabinet to which either AutoStrada panels or wood or laminate surrounds are attached to create individual or shared work areas. Storage anchored planning combines the performance of systems furniture with elegant details more like custom millwork.

AutoStrada panels feature a laminate or veneer tiled grid to the floor, with aluminum reveals between tiles on the exterior, and fabric or fabric and slat wall surfaces on the inside of the workstation. Interior base raceway distributes power and communications throughout a cluster with outlets only on the inside of the panels. AutoStrada panel heights enable seated access (42”H), seated privacy (49”H) or standing privacy (64”H). Frameless glass add ups can be added to panels for additional privacy. Connectors support workspaces, overhead storage or shelves and KnollExtra paper management and technology support tools.

AutoStrada surrounds, in veneer or laminate surface, are ideal for raised floor environments and a visual alternative to panels. Median surrounds or median storage form the backbone to which bridges and anchor cabinets are attached. Medians include a back panel, one or two end gables, a counter surface and a workspace or shelves. Bridges include a back panel and workspace. AutoStrada surrounds typically describe workstation boundaries at a 49” horizon.

AS3 AutoStrada wall based planning

AutoStrada wall based planning integrates freestanding and wall supported storage, desks and tables to build distinctive workspaces in private offices and walled collaborative areas.

AutoStrada Applied Walls add systems performance to built walls, enabling various surface materials and off module support for shelves, overheads and workspaces. Applied wall is either 69”H or 84”H, in any 6” increment of width. Horizontal channels contain interchangeable inserts like veneer, marker surface, fabric, glass, slat wall or recessed covers, and accept brackets for a variety of accessories at any point. Wall frames transfer most of the supported load directly to the floor.

AutoStrada overheads and tackboards can also be directly attached to most built walls. Freestanding AutoStrada cabinets for private offices are available in 70” and 84” horizons.

AS4 AutoStrada collaborative planning

AutoStrada collaborative planning is based on the Crinion Open Table, which creates open shared workspaces for groups from two to ten or more at a continuous workspace “bench”. Designed to support teams of people Crinion Open Table is ideal for trading rooms, libraries and conference rooms.

Crinion Open Table offers a unique alternative to traditional workstations, with continuous cantilevered workspaces, unobstructed kneespace, convenient, capable power and communications distribution, and optional desktop privacy screens. An extremely strong structure supports workspaces up to 36”d each side and virtually unlimited in length.

Crinion Open Table may be complemented with AutoStrada metal or wood storage, or Calibre files and cabinets as parallel file banks or as returns.

Materials

AutoStrada offers a range of exceptional materials and finishes, including premium grade hardwood veneers, Techwood, laminate, clear anodized aluminum, and architectural glass.

Veneers are all hand selected to best showcase the beauty of natural grain. Every effort is made to ensure that Knoll veneers are the best that can be sourced in quality of color, consistency and size. Natural variations of wood are not considered to be defects. The natural process of color change in real wood products is part of the beauty and unique character of the material. Knoll expects wood to patina over time.

Techwood is a genuine wood veneer which has been enhanced by technology to provide color and grain consistency.

High recycled content aluminum is used in the manufacture of aluminum components.

High-pressure laminate surface materials have been selected for their durability and low maintenance.

FSC (Forest Stewardship Council) certified materials are available by request.

Construction details

All AutoStrada worksurfaces are 1 1/4" thick and are a 3 ply solid construction. Worksurfaces are available in rectilinear and wedge shapes. The distinctive 3/8" tapered edge can be specified on just the user side or also on the approach side. Worksurfaces can be specified "full depth" with or without grommets, or with a 3/8" cord drop along the back with a centered edge grommet.

Worksurfaces appear to "float" 1" above lower storage components. Pedestals and legs can support a worksurface height of 28 1/4"H (typically in open plan) or 29 5/8" (in private offices). The higher worksurface height requires wood pedestals equipped with cabinet feet.

Pedestals and overhead storage are available in either metal or wood case. Wood pedestals have full extension file drawer slides with bottom-loadable steel floor and 3/4 extension slides all wood construction box drawers.

Wood or laminate case cabinets with hinged doors and adjustable shelves require doors to be removed to adjust shelving; alternatively a special request 170° hinge package is available to retrofit cabinets in the field.

Metal pedestals and Reuter overhead storage cabinets with flat front are durable steel construction with painted, laminate or veneer drawer fronts.

Metal pedestals feature full width protruding aluminum pull. Metal pedestals have all full extension personal, data and file drawer slides.

Wood cases incorporate 3 ply construction and components are finished on all sides. Core material is 45lb density particleboard. Wood drawers feature dovetail joinery details. File drawers have steel floor and are bottom loadable. Wood drawers feature full width anodized aluminum recessed or protruding pull. File drawers include file bars to support letter or legal suspended filing in either direction.

Freestanding private office cabinets are supported by cylindrical extruded aluminum feet which match an optional worksurface standoff detail.

Spine, linkable screens, panels, legs and metal storage offer 1" or greater levelling capacity. Wood storage has 1/2" levelling.

Cable management

AutoStrada incorporates discreet and concealed wire management as well as four or six circuit power distribution in all four planning models, supporting low to very high technology requirements. Storage anchored surrounds, designed for raised floor environments, are the only planning type that does not have power distribution capability.

Leg design

AutoStrada support legs are a refined shape in clear anodized aluminum finish. Legs feature either lockable casters or a unique glide sleeve that allows leveling without exposed glide threads. A pair of straight legs or one 9" wide leg can support one end of a worksurface when the other end is spine-supported, panel-supported or joined to a perpendicular worksurface with AT2TB brackets. If distance between support spans over 48", additional support is required.

Two pairs of straight legs may also be specified to create a freestanding table in combination with an AutoStrada worksurface not to exceed 72" x 30" with a corresponding stiffener.

Locks

All pedestals and cabinets with drawers are supplied with a ganglock mechanism in place. In addition, cabinets 30" wide and over with drawers have an interlock anti-tip feature to prevent the opening of a second drawer when one is already open. Drawer fronts and door fronts where applicable are routed to receive the lock itself. Keying instructions for key alike must accompany all orders and are field installed. Products are shipped from the factory with random locks or lock plugs for key-alike orders.

Representative Dimensions

All dimensions in this price list are nominal and for representative purposes only. For specific build dimensions please consult specification planning tools or contact your Customer Service representative.

Line drawings in this price list are strictly for quick product identification.

Customers Own Material

Prices for panels that are to be manufactured with a customer supplied fabric will follow Grade 10 panel pricing. Customer's Own Material is subject to an application testing fee of \$750 per fabric and a \$2500 fee for UL testing. Panels bearing COM fabrics are subject to extended leadtimes. It is the responsibility of the customer's purchasing agent to ensure COM fabric is supplied for testing and manufacturing. Delays in receiving COM fabric for manufacturing will result in rescheduled delivery dates.

Introduction

AutoStrada Applied Wall System is designed for systems performance in built wall environments. Applied Wall enables a variety of interchangeable wall surface materials, continuous support for worksurfaces, shelves and overhead storage, power distribution and integrated wire management. Applied Wall System supports AutoStrada components in private offices and collaborative work spaces, while transmitting much of the weight load directly to the floor.

Applied Wall System includes:

- wall mount frames which stand on leveling glides and are secured to built walls
- horizontal channels that are attached to the frames
- covers that insert between the channels
- shelves and overhead storage components that can be engaged anywhere along the channels
- cable tray, worksurface support brackets and accessories

Frames

Wall mount frames are available in 69" and 84" horizons, 36" or 48" wide. Frames are steel weldments that include two or three horizontal rails through which frames are bolted to the vertical structure of the built wall. Adjacent frames can be leveled and shims enable each frame to be made plumb. At each side are vertical frame members with leveling glides. Between the side frame members are one or two intermediate studs that extend from approximately 24" above the floor to the top of the frame.

Channels

Channels are painted or natural anodized aluminum extrusions that hold covers and feature a continuous curved slot into which components and brackets are inserted. Channels are attached to the frames at each side member and stud with a bracket above and below. Channels do not need to align with frame widths and can extend up to 6" beyond the side of a frame.

Top channels, 36"-144" in width in 6" increments, attach only at the top of the frame and finish off the top of the assembly. Intermediate channels, 24"-144" in 6" increments of width, attach typically every 15" below the top channel, but may also be set at 7 1/2" or 22 1/2" increments to accommodate specific purpose covers such as slat wall or markerboards. Bottom channels, 36"-144" in 6" increments of width, attach only at the base of a wall frame to support covers below worksurface height (between 1 1/2" and 24" above the floor). If no covers are planned below 24" no bottom channel is required but intermediate bottom trim cover and vertical frame covers are recommended to enclose the structural frame.

Covers

Wall covers are designed to insert between channels and may be interchanged without removing channels. Covers are optional and not required behind overhead storage cabinets or below worksurface height, for example. The scope of wall covers includes:

- 7 1/2"H recess covers for surface-mounted plugmold and voice/data outlets, normally mounted just below worksurface height, with optional cable trays
- 7 1/2"H slat wall covers to support KnollExtra accessories
- 15" and 22 1/2"H tackable linoleum covers
- 7 1/2", 15", 22 1/2" and 30"H veneer, laminate, paint, fabric, tackable fabric covers
- 7 1/2", 15", 22 1/2", 30", 45" H marker.

All covers are available from 24"-96" in 6" increments of width except laminate and marker, 24"-72".

Components

- 5 1/2" deep display shelves in painted or clear anodized aluminum, 24"-72" wide in 6" increments
- 9" deep, 1/2" thick glass shelves and 12" deep plastic laminate or wood veneer bookshelves, 24"-72" wide, designed to align with the bottom of an adjacent cabinet,
- 9" deep glass and 12" deep plastic or veneer bookshelves to align with the top of an adjacent cabinet,
- open overhead storage units in plastic laminate or wood veneer, 18"-96" wide
- overhead storage units with solid or glass sliding doors, 42"-96" wide in 6" increments
- fully enclosed overhead storage units with hinged doors, 18"-96" wide,
- Reuter overhead storage, task lights and fascias for wood overhead storage,
- grommets for wall covers, surface mounted plugmold raceway and cable trays,
- support brackets for the back or end of a worksurface, and
- accessories such as coat hook, picture hook, marker tray, notepad, and horizontal/vertical wire manager clips.

Other cover sets

69" frames

display wall with marker surface

84" frames

Upper shelf, lower shelf, glass shelf and overhead

sliding doors

hinged doors

open overhead

Recess cover with cable tray and worksurface brackets

How to specify Applied Wall

1. Plan frames to support the height and width of the intended overall wall system. Frames can be installed side-by-side or as much as 12" apart to provide adequate structure for horizontal channels up to 6" wider than the frame on each side. For example, a 10' length of channels and wall covers can be supported by three 36" wide frames or by two 48" wide frames.
2. Specify horizontal channels at each level required for covers and overhead storage or shelves. A top channel is always required and intermediate channels may be attached to the frame at any 7 1/2" increment above 24", 31 1/2", 39", 46 1/2", 54", 61 1/2", or 69" above the floor.
3. Typically intermediate channels are planned at 24", 39" and 54" to support 15"h covers. An additional channel at 31 1/2" will enable 7 1/2"h covers above and below worksurface height for slat wall and power/wire management. Horizontal channels can be planned the full width of the wall or may be segmented to allow taller covers such as a markerboard in specific locations. Alternatively intermediate channels may be planned at 24" and 46 1/2" on a 69"H frame to support all 22 1/2" H covers.
4. Specify bottom channel to support 22 1/2"H covers between floor and 24". Specify intermediate bottom trim and vertical frame covers if leaving the frame open below 24".
5. Specify end trim if end of wall is visible and specify corner connectors, if any.
6. Specify functional covers such as recess cover, the mounting location for surface mounted power distribution and voice/data outlets, and slat wall covers. Also specify tackable or marker surface covers. Then fill in the wall with decorative covers such as wood veneer, plastic laminate, non-tackable fabric, or backpainted glass. If planning a bookshelf the cover below the shelf cannot be glass. Covers are not required behind overhead storage cabinets.
7. Specify overhead storage: display shelves at 31 1/2" or 39", lower bookshelves at 54" and upper bookshelves at 69" to align with adjacent overhead storage cabinets. Specify open, partially open or fully enclosed overhead storage in veneer or laminate surface. Overhead storage cabinets usually hang from a channel at 69" and bear against a channel at 54" above the floor.
8. Specify power and cable trays. Power is distributed by a surface mounted plugmold raceway with ten simplex outlets, available in three configurations: one- circuit three-wire, two-circuit four wire, or two-circuit six wire. A 24" wide plugmold with eight simplex outlets is also available. Raceways are always hardwired to the building power supply by an electrical contractor. Contractor will punch a hole through the recess cover behind the plugmold to connect from the wall to the plugmold. Recess cover also accommodates voice/data outlets and cable grommets are available to line a punched hole.
9. Specify worksurface supports. Worksurface support brackets can be attached to the channel at 24" above the floor or may be attached within a cable tray at the same level.
10. Add accessories.

Customer's Responsibility:**Attachment of AutoStrada Applied Wall System to built walls**

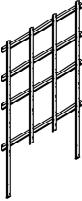

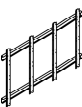

It is the responsibility of the customer and their structural engineer/architect to verify that the permanent built wall (studs, blocks, solid masonry, or other) to which the Applied Wall System is intended to be attached is designed to support the load bearing standards set forth below. It is also the responsibility of the customer and their structural engineer/architect to specify the fasteners and method for attaching the frames to the built wall and confirm that the installers have followed these specifications. For local standards and additional requirements such as seismic the customer should consult local building and safety codes.

Design loads:

69"H Applied wall: 240#/foot of width. Assume four 60 lb. vertical loads spaced evenly between 24" and 69" above the floor, with the load centered 11" from the built wall.
 84"H Applied wall: 300#/foot of width. Assume five 60 lb. vertical loads spaced evenly between 24" and 84" above the floor, with the load centered 11" from the built wall.

Warning/Disclaimer

Knoll is not responsible for the attachment method of the Applied Wall System product, which is the responsibility of the customer and its structural engineer/architect. Knoll is not responsible for the cost of preparing an existing wall nor the additional cost for a new wall to make them appropriate for the installation of the Applied Wall System product. Failure to properly attach the Applied Wall System to a wall capable of supporting the loads listed above can lead to property damage and/or personal injury.

Specification Information

Applied wall frames are painted black

Application Notes

Wall frames attach to built walls to provide level, vertical structure for complete applied wall system assemblies. Wall frames include two leveling glides, studs on 14" centers, and horizontal beams.

Knoll does not supply or recommend specific hardware to fasten frame to built wall.

Add on frames add 22 1/2" or 30" of height to 69" or 84" frames (or other add on frames). Add on frames include stacking hardware.

A	AutoStrada
AWS	Applied wall system
ET	End trim
69	Width
AA	Finish

Specification Information

Intermediate bottom trim and Vertical frame covers are available in Easy Grey (812) or any standard painted finish except 613 Silver.

All end trim inside and outside covers are available in AA anodized aluminum or any standard paint finish except 613 Silver.

All standard painted finishes except silver are also available for all end trims up to 91"H.

Application

Wall end trim encloses exposed end of applied wall frame and add on frames. If no wall covers are planned below 24" datum specify corresponding wall end trims for open base: 48"h for 69" h frames or 63"h for 84"h frames.

If no covers are planned below 24" datum specify optional intermediate bottom trim, which may be cut on site to overall width of applied wall, and one pair of vertical frame covers to cover exposed studs of each wall frame.

Order Code	Specification Information	Application
Example: AAWS C0724 R AA A AutoStrada AWS Applied wall system C Cover 07 Height 24 Width R Recess cover AA Finish	Recess covers are available in AA anodized aluminum or any standard painted finish except 613 Silver. Recess end trim is 812 Easy Grey or any standard painted finish except 613 Silver.	Recess covers provide mounting location for continuous, surface-mounted plugmold strip or voice/data outlets. Recess covers are typically mounted below or just above desk height (24"-35 1/2" above floor). Recess covers insert between intermediate channels and are secured in position with screws. Recess covers are extruded, clear anodized aluminum surface.

Recess cover should be at least 6" wider than 60" plugmold or 24" plugstrip to be mounted.
 Recess end trim encloses the ends of a recess cover where it meets any other cover type.
 Recess end trim kit includes one left hand and one right hand trim.
 Recess end trim is not required where recess cover meets wall end trim, corner connector or another recess cover.

Specification Information

See finish page for Knoll textile selections.

Application

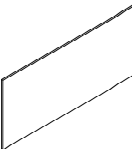

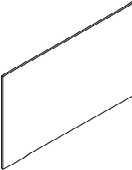

Non-tackable upholstered covers insert between horizontal channels to provide fabric surface.

Fabric is railroaded.

Wood core is firm enough to permit open shelf brackets to bear against face of cover.

Wall covers

Non-tackable upholstered

Specification Information

See finish page for laminate and veneer finish codes.

Product on this page will accept wood grain laminate where laminate is currently an option.

List price for wood grain laminate options will be current published laminate list price plus 10%.

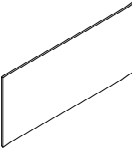

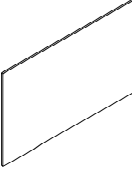

Application

Veneer or laminate covers insert between horizontal channels.

Techwood and natural veneer grain direction is horizontal.

Order Code

Example: AAWS C1524 G 881
A AutoStrada
AAWS Applied wall system
C Cover
15 Height
24 Width
G Backpainted glass
881 Finish

Specification Information

Backpainted glass is 4mm thick.
 Specify glass surface:
 881 sea glass white
 882 star white

Sea glass has natural glass tint.
 Star glass has low lead content for pure white appearance.

Application

Backpainted glass covers insert between horizontal channels to provide nearly opaque glass surface. Glass covers may be used as dry-erase marker surface.

Bookshelves cannot be mounted in channel directly above glass cover.

Order Code

Example:	AAWS CT18 AA
A	AutoStrada
AWS	Applied Wall System
CT	Cable tray
18	Width
AA	Finish

Specification Information

Cable trays are available in AA - Anodized Aluminum or any standard painted finish except 613 Silver.

End support brackets are available in all standard paint finishes.

Application

Cable trays mount anywhere along any intermediate channel, and are typically installed below worksurface height in the channel 24" above the floor.

End support brackets also directly engage into intermediate channel at 24" above floor to support back edge or one end of worksurface.

When combined with recess cover above cable tray is effectively expanded from 1 3/4" to 2 1/2" deep.

End support brackets include a flat base plate to engage into a slot in the base of the cable tray.

Order Code

Example:	AAWS RPM1 03 AA
A	AutoStrada
AWS	Applied Wall System
RPM1	Plugmold raceway, one circuit
03	36" width
AA	Finish, Aluminum

Specification Information

AA - Aluminum only available finish.

Plugmold is 60" wide with outlets every 6" (ten simplex outlets total).

Plugstrip is 28" wide with outlets every 3" (eight outlets total).

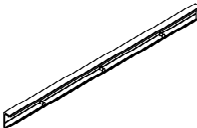

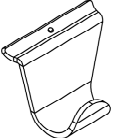

Application

Plugmold is surface mounted raceway for one or two circuits. Plugmold includes ten simplex outlets, anodized aluminum covers and end caps. Plugmold may be linked or trimmed to length on site.

Plugstrip includes eight simplex outlets.

Plugstrip mounts to 30" or wider recess cover.

Power supply must be made by an electrical contractor, including hardwire connection from junction box in building to back side of plugmold raceway. Typically contractor punches a hole for connection through a recess cover positioned just above a junction box in the building wall.

Order Code

Example: AAWS MT24 AA
A AutoStrada
AWS Applied wall system
MT Marker tray
24 Width
AA Finish

Specification Information

- Markertray is available in AA anodized aluminum or any standard painted finish except 613 Silver.
- Easel pad holder is available in AA anodized aluminum or 111 black only.
- Picture hook and Coat hook are available in all standard painted finishes.
- Wire manager clips are easy grey plastic.
- Cable grommets are black plastic.

Application Notes

Applied wall system accessories include integral bracket detail that engages into top or intermediate channels at any point.

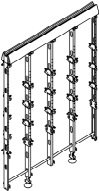

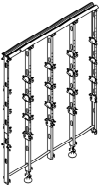

Easel pad holder includes three studs to hang standard 27"x34" easel pads on inside and outside face of bracket.

Wire manager clips may be used for horizontal or vertical wire management of lamp cords on the face of the applied wall.

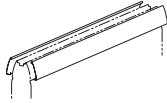

Cable grommet is 1 1/4" diameter trim ring for 1" diameter hole which may be punched in recess covers to route data/communications cables from inside of applied wall to the surface.

Specification Information

For flat ends specify:

Starting seventh position:
painted finish for outside trim cover and raceway cover

Starting eleventh position:
painted finish for crown end cap

Please specify painted finishes from paint finish options listed on page 7.

Application Notes

Flat end finishes end of corresponding height spine when end of wall is supported by outriggers or perpendicular screens or panels. Flat ends include end cover for compact crown or standard crown, as specified.

High-low straight connectors join service wall of different heights in a straight line.

Straight connector is replacement hardware kit to join Currents wall frames of the same height end to end. Kit includes four barrel-shape connectors and hardware.

Order Code

Example:	AX1A L48 118
AX1A	AutoStrada connector
L	Type
48	Height
118	vertical cover finish

Specification Information

For L, T, V and Y connectors specify:

Seventh position:
painted finish for vertical trim cover and raceway cover

Eighth position, and X connectors:
painted finish for top cap and standard crown end caps

Please specify painted finish as applicable from paint options listed on page 7.

Application Notes

L, T, and X connectors join spine frames at 90° angles and include vertical trim covers, top cap and standard crown end caps, and one spare set of straight connectors.

When ordering connectors for the spine frame with compact crown, specify crown end caps separately.

V and Y connectors join spine frames at 120° angles and include vertical trim covers, topcap and standard crown end caps.

Order Code

Example:	AA1 MPS48 3
AA1	Accessory
M	Morrison
PS	Panel starter
48	Panel height
V3	Finish

Specification Information

Please specify painted finish for panel starters, Morrison raceway shroud and end trim from paint finish options listed on page 7.

Linkable screen fillers are trim grey or easy grey integral color.

Application Notes

Panel starters attach perpendicular panels or linkable screens to spine wall structural base covers (5" - 21"H).

Panel starters include clamp bracket to any height spine wall and full height connector track with modified top wedge block.

Top clip connects panel connector track to spine wall crown. Specify top clip for added stiffness of panels higher than 48" or whenever cantilevering components from panel. Top clip is not compatible with end trim.

Specify raceway shroud if connecting power from spine wall to Morrison panel.

Linkable screen fillers are optional fillers for linkable screen starters. End trims may interfere with easy access to wall covers.

Order Code	Specification Information	Application Notes
Example: AX1 M6448 3 613 613	<i>T ends begin with AX1-prefix. Fourth position indicates attached panel system:</i>	T-end encloses the end of a spine wall and connects to linkable screens or panels on one or both sides. T-ends include Morrison-style top trim for the 7" wide connection to panels or screens. Currents T-end includes 5" and 6" wide trim and two end caps. Morrison T-end includes 7" wide trim. Use 5" wide trim and two end caps when connecting to Currents screens on both sides. Use 6" wide trim and one end cap when connecting to Currents screens on one side only. Specify Morrison end connector separately to finish side edge without a connected screen. Use 7" wide trim when connecting to Morrison panels. Specify Morrison end counter, top cap and raceway cover kits separately to finish side edge of Morrison T-ends without a connected panel.
AX1 Spine connector	C Linkable screen M Morrison panel	
M Morrison	<i>Fifth position: height of panel. Seventh position: height of service wall. Ninth position: extension at end of spine.</i>	T-ends for linkable screens and Morrison panels capture the end of the wall (no extension) or extend the wall 1 1/8" or 3 1/2". This extension enables precise planning of multiple workstations and intermediate screens or panels between workstations.
64 Morrison height	0 0" extension 1 1 1/8" extension 3 3 1/2" extension	Specify two 0" T-ends for a single workstation on each side (no intermediate screens).
48 Spine height		Specify two 1 1/8" T-ends for one intermediate screen, one 1 1/8" and one 3 1/2" for two screens, and two 3 1/2" for three intermediate screens.
3 Extension		T-ends with 3 1/2" extension have removable inside covers and accept ceiling infed panel.
613 Top cap finish		The Raceway Adapter kit finishes the bottom of a T-end with the Autostrada base trim profile. No adapter kit is necessary for 0" T-ends.
613 Vertical trim cover	<i>Please specify painted finish for Morrison top cap, crown end, vertical trim cover, raceway cover and T end vertical cover from from paint finish options listed on page 7.</i>	
	When ordering T-ends for the Spine, specify crown end caps separately.

4 4" base height
W359- Fabric
AA Trim finish
111 Outside base finish
111 Inside base finish

Specification Information

See Reff System for full selection of painted finishes, fabrics and wood veneers for T-end cover sets.

Specify:

1. Top trim profile
2. Panel finishes
3. Top trim finish
4. Base finish

Top trim profile:

E Extruded Aluminum

Base height:

4 4" base height

Application Notes

Specify covers in monolithic or tiled sets to complete T-end frames for AutoStrada or Reff panel.

Monolithic cover sets include a raceway cover and a single snap-in panel above.

Tiled sets include raceway cover and segmented tiles corresponding to adjacent AutoStrada or Reff tiled panels.

AutoStrada or Reff tiled module horizontal reveals are at nominal 19", 34", 49" and 64" above the floor and do not align with service wall cover reveals.

Please see page 7 for list of applicable finishes.

Panel system starters and T-ends

Gallery screen starters

description	h	w	d	pattern no.	list
Gallery screen starter	21"	3"	1"	AA1GPS ()	\$118.
Screen-to-worksurface bracket				AG1B	28.

Order Code

Example:	AA1 GPS 613
AA1	Accessory
G	For thin screens
PS	Panel starter
613	Painted finish

Specification Information

For intermediate gallery screen starters specify any standard painted finish.

Screen to worksurface bracket is black painted finish.

Application Notes

Gallery screen starter attaches thin screen to structural base cover of AutoStrada spine or Currents service wall. Specify Gallery screen to have through holes for starter bracket.

Screen-to-worksurface bracket is required to stabilize Gallery screens by connecting to adjacent worksurface. Specify one bracket for each screen.

Panel system starters and T-ends

Spine and linkable screens

Order Code

Example:	AA1 UPS48 111
AA1	Accessory
UPS	Panel starter
48	Panel height
111	Finish

Specification Information

Please specify painted finish for universal end and panel starters from paint finish options listed on page 7.

Application Notes

Universal adapters and starters integrate other panel systems with the AutoStrada spine. Vertical surface accepts architectural wall starter of most other systems.

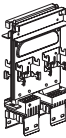

T-end adapters include connector to corresponding height T-end for linkable screen (specified separately).

Panel starter includes clamp bracket to structural base cover on service wall.

Top clip gives added stability to attached panels of the same height or higher than the service wall.

Order Code

Example:	AR1 EOM
AR1	Power component
E	2+2
OM	Outlet module

Application Notes

Autostrada power components distribute four 20-amp circuits at desk height: two convenience circuits and two protected circuits, with separate grounds and heavy duty #10 neutrals. Power may be distributed point-to-point between outlet modules at or below desk height. Outlet modules accept two duplex outlets on each face and four jumper cables to connect to other modules or infeed power.

Modular desk-height outlet module mounts between frame studs at any height from 21" - 48", above or below adjacent worksurfaces. Each 12"W frame bay can accept two outlet housings (up to four duplex outlets on each side) side by side.

Central switch controls three outlets inside wall frame for task or ambient lights. Switch occupies right-hand outlet opening in outlets cover on one side of wall.

Switches cannot be positioned back-to-back in combination with an outlet module. Central switch includes white rocker switch, connector to adjacent outlet module, and three simplex outlets on circuit B (2+2 or 3+3).

Outlet modules accept two duplex outlets on each face. Specify outlets with black face for convenience circuits. Specify orange face or black with orange triangle for protected circuits with separate ground and neutral in building power supply.

Desk height power infeed connects from floor box to outlets module in spine. Infeed includes 85" conduit with a 6" pigtail. Ceiling infeed connects from ceiling mounted box to desk height outlet module. Specify ceiling infeed panel separately.

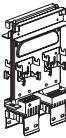

Hardwire base infeed is approved for installations in the City of New York. Infeed includes junction box for base raceway and connector to outlet module.

Jumper cables join power from outlet module to outlet module. Application dimension is distance between modules.

Transitional connectors connect power from AutoStrada spine to powered Morrison or Reff panels attached to the spine. Application dimension suggests distance from outlet to panel. Transitional connectors have watertight conduit between modular ends. Do not specify transitional connectors in City of New York installations.

Application Notes

AutoStrada power components distribute six 20-amp circuits at desk height or wall base: three convenience circuits and three protected circuits, with separate grounds and heavy-duty #10 neutrals.

Service wall power may be distributed point-to-point between outlet modules at desk height or in the base raceway. Outlet modules and power rails accept two duplex outlets on each face and four connector/jumper cables.

Modular desk-height outlet module mounts between frame studs at any height from 21" - 48", above or below adjacent worksurfaces. Each 12"W frame bay can accept two outlet housings (up to four duplex outlets on each side.)

Central switch controls three outlets inside wall frame for task or ambient lights. Switch occupies right-hand outlet opening in outlets cover on one side of wall.

Central switch includes white rocker switch, connector to adjacent outlet module, and three simplex outlets on circuit B (2+2 or 3+3).

Outlet modules and power rails accept two duplex outlets on each face. Specify outlets with black face for convenience circuits. Specify orange face or black with orange triangle for protected circuits with separate ground and neutral in building power supply.

Order Code	Specification Information	Application Notes
Example: AR1 PCC 100	Cable clips and cable managers are black plastic.	Specify cable clips, approximately 50 per wall frame to support and manage cables on the face of studs in the spine wall frame. Each clip manages up to 14 Category 5 or fiber optic cables; four clips attach between 21"-30", 30"-39", 39"-48"; six between 48"-64"H. Only two clips fit behind a cable tray cover at the 21"-30" height. Specify high capacity cable holders approximately 20 per wall frame to support and manage larger bundles of cables. Each holds up to 55 Cat 5 cables; two holders attach to studs at each 9" level; three holders at the 16" level of a 64"H wall. Only one holder fits behind a cable tray cover at the 21"-30" height (upside down).
AR1 Raceway	Cable holders are light grey plastic.	
PCC Cable clip	<i>Please specify painted finish for ceiling infeed panel from paint finish options listed on page 7.</i>	
100 Size/Quantity		<p>Raceway cable managers are U-shape cable supports that snap into the underside of the panel frame. Plan one per foot foot to contain data cables or power jumpers in the base raceway.</p> <p>Ceiling infeed panel attaches to end of spine adjacent to stabilizer end cabinet or Currents, Morrison, or Ref T-end panel with 3 1/2" extension, or to power monument. Center channel, 2" x 2 1/2", accommodates one or two power infeed cables. Each side channel is 1 1/2" x 3 1/2" lay-in cable raceway, for continuous lay-in cabling from ceiling to wall surface.</p> <p>Specify ceiling infeed separately.</p>

Order Code

Example: AC1 39L2 812
AC1 Linkable screen connector
39 Height
L2 90° 2-way L
812 Finish

Specification Information

All top and vertical trim is easy grey (812) or trim grey (813) integral color surface.

Connector post is painted black extrusion.

Carpet grips are black integral color surface.

Linkable screen feet are anodized aluminum or painted finish option listed on page 7 excluding silver.

Application Notes

Connectors join linkable screens in straight, 90° or 120° post configurations.

Linkable screen connectors include connector tracks, universal posts and top and vertical trim (where required).

Connector tracks have cantilever slots for worksurface and storage support.

L, T and X connectors include a universal post and 2, 3 or 4 connector tracks and top cap.

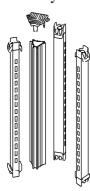

End trim may be specified instead of an end connector if cantilever capability is not required.

Carpet grips snap into linkable screen glides to prevent components from sliding. Glide rotates in carpet grip to permit levelling.

Non-skid grips snap into glides to prevent sliding on hard surface floors.

Order Code	Specification Information	Application Notes
Example: AG1 B 4948L N 115	For Gallery screens specify:	Gallery screens attach to AutoStrada or Currents spine and adjacent worksurfaces to define workspaces. Gallery screens are 1" thick, solid wood core, self-edged in laminate, Techwood or natural veneer. 39"H screens correspond in height to 39"H spine (underside of any crown). 49"H screens correspond in height to 49"H Anchor cabinet and to 48"H spine with compact or flat crown.
AG1 Gallery screen	1.Planning application, L=Screen at left end of spine (from inside face of screen) R=Screen at right end of spine S=Intermediate screen attached to face of spine	Other end of 39"H screen is always "N", no attachment. Other end of 49"H screen can have provisions for attachment to 49"H Anchor cabinet or no attachment.
B Back screen		
49 Height		
48 Width		
L End starter		Gallery screens must be stabilized by screen-to-worksurface bracket or attachment to Anchor cabinet.
N No attachment		
115 Finish	2.Then specify other end application: A=Attach to anchor cabinet (49"H screen only) N=No attachment	
	3.Then specify finish, all standard laminates for vertical applications, all standard Techwoods and natural veneers.	Gallery screens are specified by application: inserts for end starter (attach to left or right end of spine) or through holes for screen starter (intermediate screen attachment to face of spine) on one end. Inserts enable either 39"H or 48"H end starter to attach to inside face of 49"H screens.
	Gallery screens include black leveling glides with 1" range. Starting point for screens is 1/2" above floor.

Order Code

Example:	A1CRTT60AA
A	AutoStrada
1	Generation 1
CR	Continuous Run
TT	Top Trim
60	60" wide
AA	Finish, anodized aluminum

Specification Information

To order please specify pattern number including:

1. Width
2. Finish, where applicable
Up to and including 96" w AA anodized aluminum or painted finish options listed on page 7 excluding silver

Only available in AA-anodized aluminum over 96" w

Application Notes

Continuous run top trim for spanning multiple panels with one piece of trim. Continuous run top trim ships with "W" clips which secures trim to panel frame.

T Ten wire, 3+3
24 for 24" w panel
S Single sided raceway

Specification Information

Power rails are the primary power distribution component. Each rail provides outlet mounting position on one side and receptacles for branching power connectors at each end.

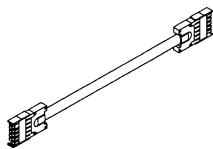

Power rail for 24" wide panel accepts one duplex outlet or one power infeed. Power rails for 30" to 48" wide panels accept two outlets.

Application Notes

Power rails on this page are for use with panels with one side raceway only.

Power connections and duplexes as required to be specified from following pages for 8 or 10 wire as required for panels with either one sided base raceway or both sides with base raceway.

Order Code

Example: RR3-E-24	
RR3	Reff raceway
E	Eight wire 2+2
24	for 24" panel

Specification Information

Reff 2+2 Raceway is a four-circuit, eight-wire modular power distribution system for use in Reff panels. 2+2 Raceway components distribute two 20-amp convenience circuits (A and B) with neutral and ground, and two protected 20-amp circuits (X and Y) with separate neutral and ground. In Canada circuits carry 15 amp load resting.

Specify the suffix "RF" after the power rail pattern number for panels manufactured before June 1996.

Application Notes

Power rails are the primary power distribution component of the Reff 2+2 Raceway. Each rail provides outlet mounting positions on both sides and receptacles for two branching power connectors at each end. Center supports permit lay-in cabling from either side of the raceway.

Rail for 24" wide panel accepts one duplex outlet or power infeed centered on each side. Rails for 30" to 48" panels accept two outlets (or one outlet and one infeed) on each side. 60", 66" and 72"W panels accept four duplex outlets per side. Duplex outlets are preconfigured to access one of the four circuits, A, B, X, Y, and snap into any standard outlet location. Duplexes on circuits X and Y may be specified in orange to signify protected circuits for electronic equipment.

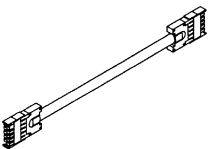

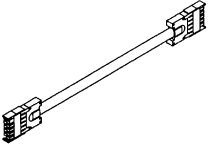

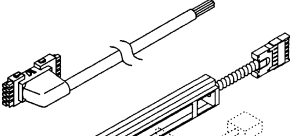

Power connectors transmit power between adjacent powered panels. Specify straight power connector for straight connections and through-post power connector when passing in a 90° or straight through a T, X or L post connection.

Power connectors are enclosed in steel flexible conduit.

*Power connectors must be specified according to the panel widths in the specified orientation.

If separation of cabling and electrical wires is required, a data shield can be attached below the power rail. Data Shields are field installed.

RR3	Reff raceway
E	Eight wire 2+2
P	power infeed
VR	for vertical raceway

Specification Information

Reff 2+2 Raceway is a four-circuit, eight-wire modular power distribution system for use in Reff panels. 2+2 Raceway components distribute two 20-amp convenience circuits (A and B) with neutral and ground, and two 20-amp circuits (X and Y) with separate neutral and ground.

For use in Canada, all circuits are CGA rated 15 amp capacity.

Note:

For NYC hardwire infeeds specify bracket height: 4", 5", or 6"H.

Beltway panels can use jumpers at the panel base in a straight run or around a corner.

Application Notes

Jumpers pass power through the raceway of panels that do not require power access to the next available power rail. Jumpers only connect to power rails. Jumpers 18" to 48" are available standard or extended. Extended jumpers should be specified when passing through a panel and a post. Jumpers 54" to 96" wide can be used with or without a post application. Extended jumpers and jumpers 54" to 96" wide can only pass through panels and one post.

Power infeeds connect building power supply to a cluster of interconnected power rails. Panel base infeed snaps into any outlet position in rail, and includes 6 foot liquid-tight conduit and pigtail for connection to floor or wall electrical box. Ceiling infeeds include up to 13' pigtail for connection

into panel base through power pole adjacent to panel with power rail. Power pole and post must be ordered separately.

Hardwire infeed, used in all New York City installations, includes junction box that mounts within non-powered panel base (any width 30" or greater). Electrical contractor supplies watertight conduit from building power supply to panel and trims power connectors to length. **RR3-EPNY2** includes two power connectors to power panels on both sides of infeed panel; **RR3-EPNY1** includes only one power connector.

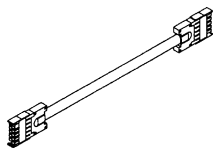

Cable sizes are nominal. Use the "type" column to specify the required cable for your panel.

Order Code

Example: RR3-T-24	
RR3	Reff raceway
T	Ten wire 3+3
24	for 24" panel

Specification Information

Reff 3+3 Raceway is a six-circuit, ten-wire modular power distribution system for use in Reff panels. 3+3 Raceway components distribute three 20-amp convenience circuits (A,B and C) with neutral and ground, and three 20-amp circuits (X, Y and Z) with separate neutral and ground.

A, B, X, Y outlets are identical to eight wire, 2+2 components.

Duplex outlet circuits are designated by white letters on black background.

In Canada, circuits carry a 15 amp load rating.

Note:

Specify the suffix "RF" after the power rail pattern number for panels manufactured before June 1996.

Application Notes

Power rails are the primary power distribution component of the Reff 3+3 Raceway. Each rail provides outlet mounting positions on both sides and receptacles for branching power connectors at each end. Center supports permit lay-in cabling from either side of the raceway.

Rail for 24"W panel accepts one duplex outlet or power infeed one either side. Rails for 30" to 48" panels accept two outlets each side, 60", 66" and 72" rails accept four duplex outlets per side.

*Power connectors must be specified according to the panel widths in the specified orientation.

Power connectors transmit power between adjacent powered panels. Specify straight power connector for straight connections and through-post power connector when passing in a 90° or straight through a T or X or L post connection.

Duplex outlets are preconfigured to access one of the four circuits, A, B, X, Y, and snap into any standard outlet location. Duplexes on circuits X and Y may be specified in orange to signify protected circuits for electronic equipment; all duplexes are black.

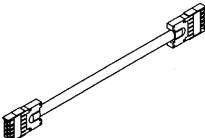

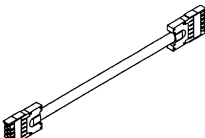

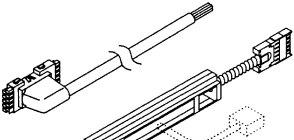

If separation of cabling and electrical wires is required, a data shield can be attached below the power rail. Data Shields are field installed.

Specification Information

Hardwire box is dedicated for panels with raceway either one or two sided, be sure to match to panel specification.

Application Notes

Certified electrician to install.
Reff Hardwire Box
Installation instruction sheet available. Part number 6TR45715.

Ported Panel Components

Reff ported panel components offer a cost effective alternative to using beltway panels which will provide users convenient access to data or power outlets at any user defined height on a Reff panel. Ports are one sided and may be installed below a worksurface, at desk height or even within a panel hung overhead storage unit.

Select option "Milled for ported components" when specifying panels. Ports may be added as technology needs change. Ports are field installed on the left or right hand side of a panel's vertical frame in either wood or fabric inserts. Installation instructions will be shipped with each kit, including a template for port placement along the vertical frame.

Panel jumpers are used to connect standard base electrical to the ported panel kit. Jumpers can be specified to connect a port within the same panel or to adjacent panels. Panel jumpers always pass through base raceway. If one port is installed, an additional port may be added within the same panel with an internal power jumper between the two ports. Ports can also be daisy-chained together in adjacent panels. Ported panel components are not available for stackable modules.

The kit includes a bracket set and cover plate and is ordered separately from the modular power components. Specify electrical components as you would for base raceway power then add the ported panel bracket kit, applicable duplexes and power jumpers.

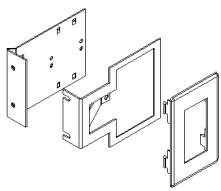

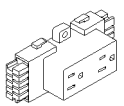

Vertical power port bracket kit and duplex.

Order Code	Specification Information	Application Notes
Example: AMBE604GFNEBV316 V316613AA	<i>To order please specify pattern number including:</i>	
A AutoStrada	1. Width	6. Finish, surround, top shelf and worksurface front edge <i>Laminate, V1, V2 or V3 finish</i>
M Median	2. Depth <i>4 = 26.5" d nominal</i> <i>5 = 32.5" d nominal</i>	7. Finish, worksurface <i>Laminate, V1, V2 or V3 finish</i>
B Binder depth top shelf	3. Grommet option <i>G = Grommet(s)</i> <i>N = No grommet(s)</i>	8. Finish, Grommet(s) <i>specify painted or plated finish</i>
E End gables, both sides	4. Face drill option <i>FL = face drill left gable for ganging</i> <i>FR = face drill right gable for ganging</i> <i>FN = face drill none</i>	9. Finish, Aluminum trim <i>AA - Anodized aluminum or painted finish option from page 7 excluding silver</i>
60 60" wide	5. End drill option <i>EL = end drill left gable to attach to bridge</i> <i>ER = end drill right gable to attach to bridge</i> <i>EB = end drill both gables to attach to bridges (applicable 84"w, 90"w and 96"w only)</i> <i>EN = no drill (for freestanding applications)</i>	Order worksurface stiffener for unsupported spans exceeding 48". *49"h to top of gable; with aluminum trim and top shelf 50.2"h. *Width noted is interior nominal dimension, overall footprint additional 2" nominal. See page 7 for finish options applicable.
4 26.5" d		
G Grommet		
FN Face drill gable, none		
EB End drill gable, both		
V316 Finish, surround, top shelf & worksurface edge		Mixed finish options applicable with V1, V2 or V3 finish surround, top shelf and worksurface front edge with laminate finish worksurface. Product on this page shipped knocked-down.
V316 Finish, worksurface		
613 Finish, grommet		
AA Trim, anodized aluminum		

Product on this page will accept wood grain laminate where laminate is currently an option. List price for wood grain laminate options will be current published laminate list price plus 10%.

Example: AWBK42EAAGL13AA A AutoStrada W Window BK Bridge kit 42 42" wide E Extruded Aluminum Top Trim AA Finish, window frame GL13 Finish, glass AA Finish, aluminum top trim	To order please specify pattern number including: Window bridge kit: 1. Width <i>Note: Be sure to specify window bridge kit to correspond with width of window bridge assembly</i> 2. Extruded Aluminum Top Trim profile <i>E = default</i> 3. Finish, window frame <i>Paint or Anodized Aluminum</i> 4. Finish, glass <i>TEMP - Clear, tempered</i> <i>GL6 - Block Matrix</i> <i>GL13 - Powder</i> 5. Finish, Aluminum top trim <i>AA - anodized aluminum or painted finish option from page 7 excluding silver</i>	Window bridge kits are for use with window bridge assemblies on page 154. Be sure to include median gable top trim when attaching window bridge assembly and window bridge kit to medians for the appropriate condition of median gable and top shelf. The median gable top trim is an aluminum extrusion which finishes the exposed portion of the median gable and continues a consistent aluminum trim detail from one unit to the next.

D Drilled to anchor	8. Finish, Aluminum trim (trim, M shelf option & pull) AA - Anodized aluminum or painted finish option from page 7 excluding silver
W Wood interior	
V316 Finish, Maple	
AA Finish, trim & pull, anodized aluminum	

3rd digit in pattern number indicates storage configuration, see individual pattern groups above for description.

Application Notes
*Upcharge applicable as follows for ACA(L/R)49 and ACB(L/R)49 cabinets: Option S upcharge for L/V1/V2 or V3 to correspond to shelf to match case; Option M upcharge under AA or paint for aluminum metal shelf
When planning with panels, single station or cluster groups where all workstations within the group are the same direction/hand, then specify 26.5" or 32.5" deep storage anchor cabinet units. When planning multi-station clusters mirroring left hand/right hand or with stations back to back with panel run perpendicular to two cabinets, you then need to specify one 24" d with one 26.5" d or 30" d with one 32.5" d cabinet to go side by side or back to back as the case may be. Brackets to secure cabinets to panel are required, specified separately - see page 173.
depth L V1 V2 V3 24" \$ 93 210 26.5" \$ 98 216 30" \$102 227 32.5" \$108 232
depth V2 V3 24" \$233 301 26.5" \$241 312 30" \$252 329 32.5" \$260 339
depth AA or paint 24" \$288 26.5" \$308 30" \$338 32.5" \$357
42" h - 42" h to below trim, 43.2" h overall 49" h - 49" h to below trim, 50.2" h overall
Product on this page will accept wood grain laminate where laminate is currently an option. List price for wood grain laminate options will be current published laminate list price plus 10%.
When planning with medians and bridges (single station or clusters of stations) specify either 26.5" or 32.5" deep storage anchored cabinets for anchoring the median or bridge unit of the same depth. Connection method to medians, median storage or bridges incorporated into product design, no additional hardware required.
Cabinets include angle bracket to side support worksurfaces except when drill option "F" for freestanding selected.
Cabinets drilled for locks, keying instructions must accompany order.
See page 7 for finish options applicable.

	D = drilled to anchor to panel or median	
	F = no drill, freestanding	Product on this page will accept wood grain laminate where laminate is currently an option.
	6. Finish	List price for wood grain laminate options will be current published laminate list price plus 10%.
	Laminate, V1, V2 or V3 finish	
	7. Finish, Aluminum trim (trim M shelf option & pull)	When planning with medians and bridges (single station or clusters of stations) specify either 26.5" or 32.5" deep storage anchored cabinets for anchoring the median or bridge unit of the same depth. Connection method to medians, median storage or bridges incorporated into product design, no additional hardware required.
	AA - Anodized aluminum or painted finish option from page 7 excluding silver	

3rd digit in pattern number indicates storage configuration, see individual pattern groups above for description.

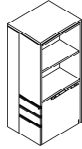

When planning with panels, single station or cluster groups where all workstations within the group are the same direction/hand, then specify 26.5" or 32.5" deep storage anchor cabinet units. When planning multi-station clusters mirroring left hand/right hand or with stations back to back with panel run perpendicular to two cabinets, you then need to specify one 24" d with one 26.5" d or 30" d with one 32.5" d cabinet to go side by side or back to back as the case may be. Brackets to secure cabinets to panel are required, specified separately - see page 173.

24" and 30" deep storage anchored cabinets may be specified for freestanding applications, specify drill option F for freestanding, otherwise connection detail will be exposed.

Cabinets include angle bracket to side support work surfaces except when drill option "F" for freestanding selected.

Cabinets drilled for locks, keying instructions must accompany order.

See page 7 for finish options applicable.

30" \$338	
32.5" \$357	
4. Shelf option for open interior side 42"h do not have shelf options 49"h have shelf option 64"h do not have "no" shelf option, shelf included N = No shelf S = Shelf to match case * M = Two piece extruded aluminum metal shelf assembly * (*upcharge applicable)	
5. Pull E = extruded aluminum pull P = extruded aluminum protruding pull	

See page 7 for finish options applicable.

Product on this page will accept wood grain laminate where laminate is currently an option.
List price for wood grain laminate options will be current published laminate list price plus 10%.

When planning with medians and bridges (single station or clusters of stations) specify 49"h cabinets in either 26.5" or 32.5" deep storage anchored cabinets for anchoring the median or bridge unit of the same depth.

When planning with panels, single station or cluster groups where all workstations within the group are the same direction/hand, then specify 26.5" or 32.5" deep storage anchor cabinet units. When planning multi-station clusters mirroring left hand/right hand or back to back stations with panel run perpendicular to two cabinets, you then need to specify one 24"d with one 26.5"d or 30"d with one 32.5" d cabinet to go side by side or back to back as the case may be.

Cabinets with front and back access not to be used in freestanding applications.

Cabinet to panel attachment brackets required, see page 173.

Cabinets include angle bracket to side support worksurfaces.
Cabinets drilled for locks, keying instructions must accompany order.

File drawers in cabinet styles prefixed ACIL and ACIR do not accommodate legal filing side to side.

left hand shown, shelf aligns with worksurface at 28 1/4" h overall, or 27" h to underside

Order Code	Specification Information
Example: ACEL4924SEWV316AA	To order please specify pattern number including:
A AutoStrada	1. Hand
C Cabinet	<i>L = User's Left</i>
E File/File lower front, Interior back open shelf	<i>R = User's Right</i>
L Left Hand	2. Height
49 49" high	49 = 49" h (for use with medians, bridges or panels, 49" h to below trim, 50.2" h overall)
24 24" deep	64 = 64" h (for use with panels 64" h to below trim, 65.2" h overall)
S w/shelf to match cabinet case	3. Depth
E Extruded Aluminum Pull	24 = 24" deep (use with 26.5" d unit for side by side cabinet application with panels)
W Wood interior	30 = 30" deep (use with 32.5" d unit for side by side cabinet application with panels)
V316 Finish, Maple	26 = 26.5" deep (use with medians, bridges & panels)
AA Finish, trim & pull, anodized aluminum	32 = 32.5" deep (use with medians, bridges & panels)

3rd digit in pattern number indicates storage configuration, see individual pattern groups above for description.

Specification Information

- 1. Hand
L = User's Left
R = User's Right
- 2. Height
49 = 49" h (for use with medians, bridges or panels, 49" h to below trim, 50.2" h overall)
64 = 64" h (for use with panels 64" h to below trim, 65.2" h overall)
- 3. Depth
24 = 24" deep (use with 26.5" d unit for side by side cabinet application with panels)
30 = 30" deep (use with 32.5" d unit for side by side cabinet application with panels)
26 = 26.5" deep (use with medians, bridges & panels)
32 = 32.5" deep (use with medians, bridges & panels)
- 4. Shelf option for open interior side
42" h do not have shelf options
49" h have shelf option
64" h do not have "no" shelf option, shelf included
N = No shelf
*S = Shelf to match case **
*M = Two piece extruded aluminum metal shelf assembly ** (*upcharge applicable)
- 5. Pull
E = extruded aluminum pull
P = extruded aluminum protruding pull

- 6. Drawer Interior applicable ACE(L/R) and ACI(L/R) only
W = wood interior
M = metal drawer interior, deduct \$100 list
- 7. Finish
Laminate, V1, V2 or V3 finish
- 8. Finish, Aluminum trim (trim, M shelf option & pull)
AA - Anodized aluminum or painted finish option from page 7 excluding silver

Connection method to medians, median storage or bridges incorporated into product design, no additional hardware required.

64" h cabinets include shelf to match case in price list above. Upcharge below applicable as follows for 49" h shelf to match case for L/V1/V2/V3 or AA or paint for aluminum metal shelf for M option for both 49" h and 64" h cabinets.

depth	L	V1
24"	\$ 93	210
26.5"	\$ 98	216
30"	\$ 102	227
32.5"	\$ 108	232
depth	V2	V3
24"	\$233	301
26.5"	\$241	312
30"	\$252	329
32.5"	\$260	339
depth	AA or paint	
24"	\$288	
26.5"	\$308	
30"	\$338	
32.5"	\$357	

Application Notes

- See page 7 for finish options applicable.
- Product on this page will accept wood grain laminate where laminate is currently an option. List price for wood grain laminate options will be current published laminate list price plus 10%.
- When planning with medians and bridges (single station or clusters of stations) specify 49" h cabinets in either 26.5" or 32.5" deep storage anchored cabinets for anchoring the median or bridge unit of the same depth.
- When planning with panels, single station or cluster groups where all workstations within the group are the same direction/hand, then specify 26.5" or 32.5" deep storage anchor cabinet units. When planning multi-station clusters mirroring left hand/right hand or back to back stations with panel run perpendicular to two cabinets, you then need to specify one 24" d with one 26.5" d or 30" d with one 32.5" d cabinet to go side by side or back to back as the case may be.
- Cabinets with front and back access not to be used in freestanding applications.
- Cabinet to panel attachment brackets required, see page 173.
- Cabinets include angle bracket to side support worksurfaces. Cabinets drilled for locks, keying instructions must accompany order.
- File drawers in cabinet styles prefixed ACIL and ACIR do not accommodate legal filing side to side.

Application Notes

- See page 7 for finish options applicable.
- Product on this page will accept wood grain laminate where laminate is currently an option. List price for wood grain laminate options will be current published laminate list price plus 10%.
- When planning with medians and bridges (single station or clusters of stations) specify 49"h cabinets in either 26.5" or 32.5" deep storage anchored cabinets for anchoring the median or bridge unit of the same depth.
- When planning with panels, single station or cluster groups where all workstations within the group are the same direction/hand, then specify 26.5" or 32.5" deep storage anchor cabinet units. When planning multi-station clusters mirroring left hand/right hand or back to back stations with panel run perpendicular to two cabinets, you then need to specify one 24"d with one 26.5"d or 30"d with one 32.5" d cabinet to go side by side or back to back as the case may be.
- Cabinets with front and back access not to be used in freestanding applications.
- Cabinet to panel attachment brackets required, see page 173.
- Cabinets include angle bracket to side support worksurfaces. Cabinets drilled for locks, keying instructions must accompany order.
- File drawers in cabinet styles prefixed ACIL and ACIR do not accommodate legal filing side to side.

ASFS1	Autostrada floorstanding pedestal
FF	Configuration
18	Depth
111	Finish for case
P	Finish type for fronts
114	Finish for fronts
AA	Finish for pulls

Specification Information

All pedestals include front lock with KnollKey lock system. Personal drawer is 4"h. Data drawer is 7"h. File drawers are 11"h. Deep file drawers include file support for letter (width) or legal (depth) suspended file folders. All drawers have full extension, ball bearing drawer slides.

Please specify painted finish for case or fronts from paint finish options; front finish also optional from laminate, V1, V2 or V3 finish options listed on page 7.

Pulls are available in anodized aluminum or painted finish options listed on page 7 excluding silver.

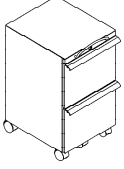

Application Notes

Floorstanding pedestals include levelling glides and closed top with 1" spacer to support one end of a worksurface at 27"h to underside of worksurface. 18"d pedestals fit under any worksurface with standard stiffener. Deep floorstanding pedestals fit under worksurfaces with worksurface stiffener 18" less than nominal width.

The metal case pedestals come with a 1" h board spacer that installs between the case and the worksurface it is supporting. The tops of the pedestals are drilled to accept the attachment screws.

Pedestals may not be used in freestanding applications.

ASMS1	Autostrada mobile pedestal
FF	Configuration
18	Depth
111	Finish for case
P	Finish type for fronts
114	Finish for fronts
AA	Finish for pulls

All pedestals include front lock with KnollKey lock system. Personal drawer is 4"H. Data drawer is 7"H. File drawers are 11"H. Deep file drawers include file support for letter (width) or legal (depth) suspended file folders. All drawers have full extension, ball bearing drawer slides.

Please specify painted finish for case or fronts from paint finish options: front finish also optional from laminate, V1, V2 or V3 finish options listed on page 7.

Pulls are available in anodized aluminum or painted finish options listed on page 7 excluding silver.

Mobile pedestals are independent storage components with locking casters and pull. Standard mobile pedestals roll under worksurfaces set at 28" or higher. Deep mobile pedestals with two files or personal/data/file will not fit under stiffener of universal worksurface or desk set at 29" or lower. Specify data/file mobile pedestal under worksurfaces adjusted lower than 28"H.

Example:	AFPB21EWV316AA
A	AutoStrada
F	Floor standing
P	Pedestal
B	Box/Box/File configuration
2	23" deep (nominal)
1	19" wide (nominal)
E	Extruded aluminum pull
W	Wood interior
V316	Finish, Maple
AA	Finish, pull (anodized aluminum)

Specification Information

To order please specify pattern number including:

- Pedestal type (embedded in pattern number)
F = Floor standing
M = Mobile
- Pedestal configuration
B = BBF (floorstanding) or BF (mobile)
F = File/File
- Depth (nominal)
1 = 19" deep
2 = 23" deep
3 = 29" deep *
(*available only in 16" or 19" widths)
- Width
0 = 16" wide (nominal)
1 = 19" wide (nominal)
2 = 30" wide (nominal)
3 = 36" wide (nominal)
4 = 42" wide (nominal)

Application Notes

- Pull
E = extruded aluminum pull
P = extruded aluminum protruding pull
- Interior
W = wood drawer interior
- Finish
Laminate, V1, V2 or V3 finish
- Finish, pull
Anodized aluminum or painted finish options listed on page 9 excluding silver.

See page 7 for finish options applicable.

Product on this page will accept wood grain laminate where laminate is currently an option.
List price for wood grain laminate options will be current published laminate list price plus 10%.

Note: Optional cabinet feet are recommended when pedestals used in free-standing applications to achieve overall desk height of 29 5/8" (see page 243).

Primary finished top required in freestanding applications, ordered separately when item stands alone.

Wood pencil tray included with BBF pedestals.

Actual depth nominal plus 3/8", finished back adds 1/2" (see page 190 for backs). Mobile pedestal includes finished back. All pedestals on this page include a finished sub-top and anti-tip spacer. Height to underside of worksurface including anti-tip spacer is 27"h. Optional work surface stand-offs (to use in place of anti-tip spacer) are specified separately from page 243.

19" wide (nominal) units accommodate legal filing front to back. File bars included to accommodate letter filing front to back. 30", 36" and 42" wide units include file bars to accommodate legal and letter filing front to back and side to side.

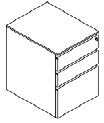

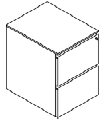

File drawers are bottom loadable.

Pedestals drilled for locks, keying instructions must accompany order.

Order Code

Example: AFB19V316
A AutoStrada
FB Finished back
19 19" wide
V316 Finish, Maple

Specification Information

To order please specify pattern number including:

- Width
 16 = for 16" wide units
 19 = for 19" wide units
 30 = for 30" wide units
 36 = for 36" wide units
 42 = for 42" wide units
 60 = for two 30" w side by side
 72 = for two 36" w side by side
 84 = for two 42" w side by side
 90 = for three 30" w side by side
 96 = for two 30" w & one 36" w side by side
- Finish
 Laminate, V1, V2 or V3 finish

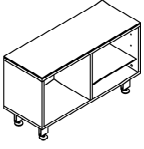

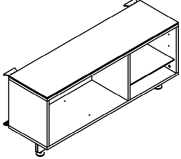

Application Notes

Finished backs are used with lower storage in free-standing applications where the back is exposed. Backs are 1/2" thick. Finished backs also recommended for "ganging" units together when creating build-to-spec credenza units.

Pedestal filler strip used in lieu of finished back when full back not exposed to finish gap to wall.

See page 7 for finish options applicable.

Product on this page will accept wood grain laminate where laminate is currently an option. List price for wood grain laminate options will be current published laminate list price plus 10%.

Order Code

Example:	APHOBO42V316
A	AutoStrada
PH	Panel hung
O	Overhead
B	Binder depth
O	Open
42	42" wide
V316	Finish, Maple

Specification Information

To order please specify pattern number including:

- Depth
B = Binder depth
G = Legal depth
- Width
- Finish
Laminate, V1, V2 or V3

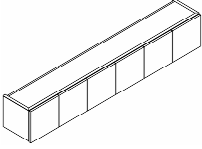

See page 7 for finish options applicable.

Product on this page will accept wood grain laminate where laminate is currently an option. List price for wood grain laminate options will be current published laminate list price plus 10%.

Application Notes

Panel hung overhead storage units include hardware to hang unit on panels.

Order Code	Specification Information
Example: AWHOBSD30LV316AA	
A	AutoStrada
WH	Wall hung
O	Overhead
B	Binder depth
S	Single high
D	Hinged doors, wood
30	30" wide
L	Lock holes drilled
V316	Finish, Maple
AA	Finish, Aluminum trim

Specification Information
<i>To order please specify pattern number including:</i>
1. Depth <i>B = Binder depth G = Legal depth</i>
2. Width
3. Lock <i>L = lock hole drilled N = not drilled for locks</i>
4. Finish <i>Laminate, V1, V2 or V3</i>
5. Finish, aluminum trim <i>Anodized aluminum or painted finish options listed on page 7 excluding silver.</i>

See page 7 for finish options applicable.

Product on this page will accept wood grain laminate where laminate is currently an option. List price for wood grain laminate options will be current published laminate list price plus 10%.

Application Notes
Manufacturer assumes no responsibility for the installation, attachment or the securing of wall hung units to the wall. A qualified local building contractor should be consulted to advise securing method and to determine if and what blocking requirements are necessary.
Single high overhead storage to be mounted at 68 1/2" from floor to top of overhead unit. Dimension is to top of wood side gable of corresponding 70" h floor standing cabinet not including aluminum and wood top trim.
Hinged doors extend slightly beyond case construction to allow for easy finger pull access along the bottom. No pulls available.
Optional lock drilling to be specified. If drilled for locks selected, keying instructions must accompany order.
Wood cleat included for wall mounting. Two piece cleat, full width of overhead. Each piece nominally 3 3/8" h. Bottom piece attached to wall.

Order Code	Specification Information
Example: AWHOBDD30LV316AA	
A	AutoStrada
WH	Wall hung
O	Overhead
B	Binder depth
D	Double high
D	Hinged doors, wood
30	30" wide
L	Lock holes drilled
V316	Finish, Maple
AA	Finish, Aluminum trim

Specification Information

To order please specify pattern number including:

- Depth
B = Binder depth
G = Legal depth
- Width
- Lock
L = lock hole drilled
N = not drilled for locks
- Finish
Laminate, V1, V2 or V3
- Finish, aluminum trim
Anodized aluminum or painted finish options listed on page 7 excluding silver.

See page 7 for finish options applicable.

Product on this page will accept wood grain laminate where laminate is currently an option.
List price for wood grain laminate options will be current published laminate list price plus 10%.

Application Notes

Manufacturer assumes no responsibility for the installation, attachment or the securing of wall hung units to the wall. A qualified local building contractor should be consulted to advise securing method and to determine if and what blocking requirements are necessary.

Double high overhead storage to be mounted at 82-5/16" from floor to top of overhead unit. Dimension is to top of wood side gable of corresponding 84" h floor standing cabinet not including aluminum and wood top trim.

Hinged doors extend slightly beyond case construction to allow for easy finger pull access along the bottom. No pulls available.

Optional lock drilling to be specified. If drilled for locks selected, keying instructions must accompany order.

Wood cleat included for wall mounting. Two piece cleat, full width of overhead. Each piece nominally 3 3/8" h. Bottom piece attached to wall.

Overhead storage, wood cases

Wall-attached overheads for private office

Specification Information

Please specify painted finish for overhead upmount or downmount kit. Paint options are listed on page 7.

Application Notes

Reuter upmount brackets attach overhead cabinet anywhere along standard spine crown, lifting 1" above nominal wall height. Extended upmount brackets lift overhead to 10" above nominal wall height.

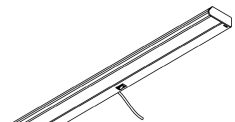

Downmount brackets attach overheads within the upper 16" of 64"H walls with either compact or standard crown. The AutoStrada version of the downmount brackets extends to the bottom of the access cover, making contact with the bottom trim extrusion.

Specify an extra bracket (one-half pair) for center support of overhead cabinets wider than 60".

Upmount or downmount brackets may be inset to permit overhead to extend 1" or 3" beyond the end of the spine at T-ends.

Wall mount frames secure Reuter overhead cabinets to wall (frame/wall mounting hardware is not included). Frame is concealed behind storage. Use 2 RO1-WMF2 to wall mount 66" and 72" wide Reuter overheads.

Wall mount wire manager is two-part wire concealment kit, 22"H (medium grey only).

Order Code

Example:	RT1 SMK 2413 AA
RT1	Reuter task lamp
SMK	Mounting kit
24	Width
13	Depth
AA	Finish

Specification Information

Mounting kit finish choice:
Anodized Aluminum or painted finish options listed on page 9 excluding silver.

12" deep: binder depth wood overhead, wall mounted with tackboard below.

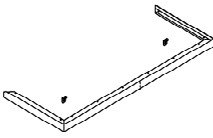

13" deep: binder depth wood overhead on Applied Wall System or wall mounted without tackboard.

Application

Reuter T5 task lamp mounting kit enables task lamp to be mounted under veneer or laminate overhead storage cabinets (with or without doors). Mounting kit includes anodized aluminum fascia to conceal lamp and manage power cord along front and side of cabinet. Specify mounting kit in width corresponding to overhead cabinet. Mounting kit also includes back supports for one task lamp.

To mount a second task lamp within one longer mounting kit specify one additional pair of back supports. Back supports are L brackets into which the pins at the back of the Reuter are inserted. Sliding brackets on sides of the lamp slide over the inside lip of the fascia at any point to support the front of the lamp.

To order please specify pattern number including:

1. Width
23 = 24" deep left, 30" deep right
32 = 30" deep left, 24" deep right
26 = 24" deep left, 36" deep right
62 = 36" deep left, 24" deep right
2. Depth
L = Laminate
M = Mixed, Laminate surface/V1, V2 or V3 edge
V = V1, V2 or V3
3. Grommet option
N = No grommets
G = Grommet(s), flush
R = Grommet(s), recessed
4. Finish, Surface
Laminate, V1, V2 or V3 finish

6. Finish, Edge
Must be same as surface finish unless M surface type specified, then must be V1, V2 or V3 finish
7. Finish, Grommet(s)
specify painted or plated finish

See page 7 for finish options applicable.

Product on this page will accept wood grain laminate where laminate is currently an option.

List price for wood grain laminate options will be current published laminate list price plus 10%.

Application Notes

Hardware to attach to vertical support to be specified separately.

1 1/4" tops require additional support when distance spans over 48".

Important: Please note placement of grommet(s) when specified assumes user edge is wedge side. If application requires user side to be straight edge and wedge edge as approach side, then specify no grommets.

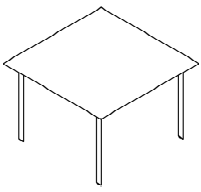

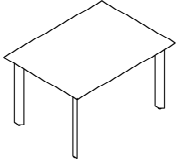

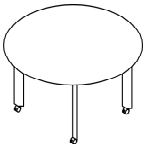

When grommets specified up to 48" w tops have one grommet, over 48" w have two grommets.

Order Code

Example:	ATTA24S1
A	AutoStrada
TT	Transaction top
A	1 1/4" thick
24	24" wide
S	Straight end treatment
1	V1 finish
V316	Maple

To order please specify pattern number including:

1. End treatment type
2. Finish type
3. Finish

1. End treatment options:

- S = Straight
- L = Left side mitre
- R = Right side mitre

2. Finish type:

- L = Laminate
- M = Wood/laminate mixed
- 1 = V1
- 2 = V2
- 3 = V3

Transaction tops are for mounting to 42" h panel or overall panel height achieved from 34" h base panel plus 8" h stacking module. Transaction tops ship with necessary bracketry included.

No grommets included.

Tops may be used to span more than one consecutive panel.

Transaction tops will not fit between panel Hi-Lo conditions without notching the underside of the top. This can be done in the field or through Custom Product Development.

Applicable finishes are listed on page 7.

Product on this page will accept woodgrain laminate where laminate is currently an option. List price for woodgrain laminate options will be current published laminate list price plus 10%.

Order Code	Specification Information	Application Notes
Example: AB1AS28 AA AB1A AutoStrada leg S Straight 28 Height AA Finish	AutoStrada straight legs, wide legs and L-legs are available in anodized aluminum or painted finish option listed on page 7 excluding silver. To order specify pattern number including height 1. Specify finish	A pair of straight legs or a pair of L-legs or one wide leg can support one end of a worksurface when the other end is spine-supported, panel-supported or joined to a perpendicular worksurface with AT2TB brackets. If distance between support spans over 48", additional support is required. Two pairs of straight legs or L-legs may also be specified to create a freestanding table in combination with an AutoStrada worksurface not to exceed 72" x 30" with a corresponding worksurface stiffener. AutoStrada straight legs are available in three heights with or without casters:

27" from floor to underside of worksurface (28³/₈" desk height)
 28³/₈" from floor to underside of worksurface (29³/₄" desk height)
 30¹/₈" from floor to underside of worksurface (31¹/₂" desk height)
 AutoStrada wide legs are only available on glides, 27" or 28³/₈" to underside of worksurface.
 AutoStrada L-legs are available in three heights, glide only (no caster option) 26¹/₂"h, 27"h and 28³/₈"h.

Specification Information

To order please specify pattern number including:

1. Finish
Laminate, V1, V2 or V3 finish

See page 7 for finish options applicable.

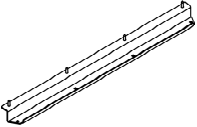

Product on this page will accept wood grain laminate where laminate is currently an option.
List price for wood grain laminate options will be current published laminate list price plus 10%.

Application Notes

To be used for free-standing private office applications.

Half height suspended modesty intended for optional use with work surfaces when creating configurations including a peninsula top supported at one end by a pair of legs (legs on page 236) or "freestanding" table desk by set of legs and would install just behind the legs by angle bracket that ships with modesty. Attachment hardware included.

If installing below worksurface with grommets, be sure to specify recessed grommet location.

AWM1 Stiffener
S Straight
36 Application

Specification Information

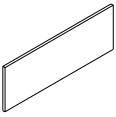

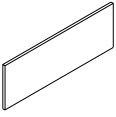

Stiffeners are black painted finish.

Application Notes

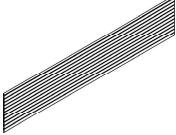

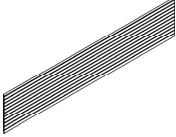

AutoStrada worksurfaces require stiffeners when the span between structural supports exceeds 48". Stiffener also serves as horizontal cable manager.

Stiffener corresponds in width to straight or corner worksurface back edge. Specify 12" less wide stiffener to mount adjacent to floor standing pedestal.

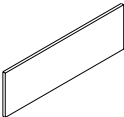

For 90" application span, use AWM1-S84 stiffener.

Order Code	Specification Information	Application Notes
Example: ASWM26AA A AutoStrada SW Slatwall M for median 26 for 26.5" d gable AA Finish, anodized aluminum	To order please specify pattern number including: 1. For median or bridge <i>M = for medians</i> <i>B = for bridges</i> 2. Width <i>26 = for 26.5 d median gable</i> <i>32 = for 32.5 d median gable</i> <i>All others specify to match width of corresponding median or bridge</i> 3. Finish <i>AA - anodized aluminum or painted finish option from page 7 excluding silver</i>	Slatwall attaches to median or bridge assembly with brackets (supplied with slatwall) which are then screwed onto modesty of median or bridge assembly. Modesties are not predrilled for attachment, field drill required during installation.

Order Code	Specification Information	Application Notes
Example: AWSOAA A AutoStrada WSO Work surface stand-off AA Finish, anodized aluminum	To order please specify pattern number including: 1. Finish <i>AA - anodized aluminum or painted finish option from page 7 excluding silver</i>	Worksurface stand-offs are for use primarily in the private office between work surfaces and wood case pedestals or lower storage. Worksurface stand-offs may also be installed in place of anti-tip wood spacer between worksurfaces and wood case pedestals or lower storage in storage anchored planning. Anti-tip wood spacer and stand-offs are both 1"h. Cabinet feet are for use with lower storage units in private office planning to achieve overall worksurface height of 29 3/8". Note: Free-standing cabinets on page 175 include cabinet feet. If you are planning to create an open knee space credenza with one storage unit on either end of the credenza, you would require 2 pairs of work surface stand-offs and 2 pairs of cabinet feet for each lower storage unit.
		When "ganging" units together to create "build-to-spec" credenzas, one pair of worksurface stand-offs and one pair of cabinet feet are required to span side-by-side units. For instance, if creating a credenza with 3 lower storage units, specify 4 pairs of stand-offs and 4 pairs of cabinet feet. Cabinet feet should not be used in spine-based or storage anchored planning models. Use only with wood case pedestals and laterals to achieve overall worksurface height of 29 3/8" (or 28 3/8" to underside of worksurface). Spine based and Storage Anchored planning model components are engineered at 27" from floor to underside of worksurface. To install cabinet feet, first remove leveller from pedestal or lower storage, then reinstall with feet.

This Order Guide provides basic planning, specifications and pricing information for Crinion Open Tables.

Refer to KnollExtra price list for compatible accessories such as flat screen monitor supports, task lights, paper management accessories, keyboard and storage drawers.

Refer to Calibre, Reff or Currents price lists for shared and individual storage options. Additional information can be found at www.knoll.com.

Crinion Open Table is the straightforward alternative for open, collaborative work environments. The table accommodates a group of four to eight or more at a continuous work surface.

Crinion Open Table typically consists of deep worksurfaces end-to-end and back-to-back, cantilever supported by parallel beams between end legs. The beams form a technology corridor for flat screen monitor supports, outlets and power/data distribution. Also available is a single-sided configuration, with a single main beam and a smaller back beam, and a single beam configuration for tables with shallower (24" deep) worksurface.

The center of dual tables or back of single-sided tables features a top channel which supports privacy screens above the table and modular power distribution below the worksurface.

Crinion Open Table is appropriate for libraries and education environments, laboratories, finance and trading desks, teaming areas and design offices.

Crinion Open Table is unique in offering individual height-adjustability and extraordinarily deep worksurfaces. Overall dual table depth is 48", 60" or 72".

The table structure is strong enough to span 16 feet between end legs or intermediate supports to build tables of any length.

The continuous worksurfaces and clear kneespace enable varying numbers of workers to sit on each side. Storage is typically separated from the table in parallel, shared file-and-storage islands, perpendicular files and filetops as returns or mobile pedestals.

Crinion is distinguished by a minimalist, modern design, and details like square or tapered edge worksurfaces, plastic laminate, Techwood or natural veneers, and aluminum fittings.

Crinion Open Table simplifies the planning and specifications of an open office, and it can make a dramatic visual and functional statement of collaboration.

The quality and classic design of Crinion work well in virtually any interior.

Crinion Open Tables are comprised of worksurfaces, table base assemblies, power components and screens.

Worksurfaces

Individual worksurfaces are available in four standard widths (48", 60", 72", 96") and three depths (nominal 24", 30", 36"), which may be combined to form single-sided or dual-sided groups of two to ten or more positions.

Worksurface edge options

Worksurfaces are 1 1/4" thick, with three front edge options: Tapered edge, laminate, veneer or mixed.

Square edge, veneer

Postformed edge, laminate only

Power and accessory options

Worksurfaces may be specified with hinged power access door and continuous 1/2" cord drop, or edge grommet and continuous cord drop, or just cord drop.

Hinged power access door is 24"W and 5"D, centered on worksurface width. Door hinges toward user for continuity between access opening and cord drop.

Any worksurface (except end counters) accepts clamp on KnollExtra accessories such as flat screen monitor arm or task light.

Other worksurface types

End counters have front edge detail on side edges as well and are designed to extend dual tables 24" or 30" beyond the endleg. End counters also include 3" wide center grommet. Extended end counters are 36"D surfaces with center grommet or hinged power access door. Base of the table must be extended 12" under the back of each extended end counter (although top channels should be specified only as wide as the worksurfaces on each side of the table).

All end counters must be supported by end counter cantilevers and endlegs for end counters.

Worksurface heights

Fixed height cantilevers support worksurfaces at 28 1/2"H, with 27" clear below the top (except directly below cantilevers).

Adjustable height cantilevers enable worksurfaces to be independently set at 27", 27 3/4", 28 1/2", 29 1/4", or 30"H.

Open Table base assemblies

Complete base assemblies simplify specifications for most common configurations of dual or single-sided open tables. Base assemblies include top channels and end caps, beams, end legs and intermediate legs (where required), trusses and top channel supports, cantilever brackets (specify fixed or adjustable height) and midspan supports. Specify worksurfaces, screens, power components, cable trays and accessories separately.

Complete base assemblies are available for the following typical tables, combinations of 60" or 72" worksurfaces.

Single-sided or dual, 24"D, 30"D, or 36"D, with continuous beam span between end legs

10' W two/four positions 60"W

12' W two/four positions 72"W

15' W three/six positions 60"W

Single sided or dual 24"D, 30"D, or 36"D, with intermediate leg

18' W three/six positions 72"W

20' W four/eight positions 60"W

24' W four/eight positions 72"W

25' W five/ten positions 60"W

Open Table base components

Base assemblies may also be specified by individual components to create configurations other than those listed above, or to create tables with end counters or frameless glass add ups.

In addition to worksurfaces Open tables require top channel, starter beams for spans up to 15', extension beams for additional spans of 4' to 15', intermediate legs every 16' or less, two end legs, trusses at every worksurface junction and at each end leg. Adjustable tables require two cantilevers per worksurface (or three for 96"W). Fixed height tables may be supported by a fixed height cantilever at each end, shared cantilevers at each worksurface joint, and a midspan support bracket at the center of each worksurface greater than 48" wide. For 96"W worksurfaces the midspan support should be a 24"D cantilever. Power components, cable trays and screens are optional.

Power distribution

Optional modular raceway distributes 2+2 four circuit or 3+3 six circuit configuration from a single point of supply. Bundles of cables can be managed from the floor in a cable infeed shroud located at any intermediate leg. Raceway provides power outlets and data/communications outlet openings on one or both sides, accessed through hinged access doors in worksurfaces or from under table. Specify 30" raceway for two duplex outlets each side or 42" raceway for four duplex outlets each side. Duplex outlets, power infeed and jumpers between raceways must be specified separately.

Specify compact power module for outlets under extended end counters.

Privacy screens

There are four screen options for Crinion Open Table.

The standard screens are 14"H (42" horizon) or 21"H (49" horizon) in acrylic, slat wall or combination surfaces. Center screens include mounting hardware to attach to the standard top channel. Center screens are available full width, 48", 60" or 72", or shorter by 1" to leave space at either end of the table for a dual end screen. Side screens attach to the front and back of a worksurface at any point other than at a hinged access door. Mounting brackets are specified separately to correspond to each worksurface edge detail. Dual end screens span across the end of a table (or above an end counter) from worksurface front edges.

Frameless glass add ups are available in 12" height only, 48", 60", and 72"W. Add ups can only mount to a top channel for frameless glass add ups, which may be at the center of a dual table or back of a single-sided table specified by components.

Original Crinion privacy screens are 12"H or 19"H (41" or 48" horizons) and mount to a standard top channel only.

Morrison Network fabric screens (15"H or 22"H) can also be mounted to the standard top channel with Crinion Open Table mast kit.

Accessories and storage

All Crinion worksurfaces accept clamp base KnollExtra flat screen monitor arms and task lights at any point except behind the hinged power access door. Worksurfaces also accept suspended accessories like adjustable keyboard supports, BackPack center file or keyboard drawers, or CPU holders. Beam location under most tables prevents pedestals deeper than 20" underneath. However 36"D tops can be planned on 30"D table bases to create additional kneespace depth and room for 24"D pedestals.

Crinion Open Table file tops are available for 27"H Calibre files positioned perpendicular to the table to act as returns. Tapered front and back edges assure consistent detail with tapered worksurface edges. File tops are also available for pairs of files and back to back files.

Finishes

L - Laminate

Matching edge band unless noted otherwise

- 117 Soft Grey
- 118 Bright White
- 114 Folkstone Grey
- 111 Jet Black

Customers Own Material

Prices for panels that are to be manufactured with a customer supplied fabric will follow Grade 10 panel pricing. COM fabrics are subject to a testing charge prior to acceptance for use on panels. Panels bearing COM fabrics are subject to extended leadtimes. It is the responsibility of the customer's purchasing agent to ensure COM fabric is supplied for testing and manufacturing. Delays in receiving COM fabric for manufacturing will result in rescheduled delivery dates.

Mixed Finish work surfaces:

To order mixed finishes, enter four digit finish code as follows:

Use 2 digit prefix to indicate surface finish (laminate)

- 11 Jet Black
- 14 Folkstone Grey
- 17 Soft Grey
- 18 Bright White
- 19 Pumice
- 21 Micro Grey
- 22 Brushed Sand
- 23 Brushed Grey
- 28 Fog
- 29 Micro Sand

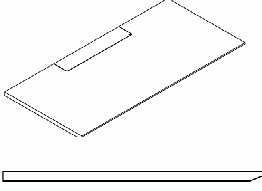

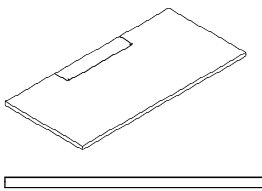

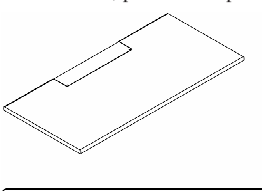

Use 2 digit suffix to indicate edge finish (wood)

- 11 for Y311
- 12 for V312
- 16 for V316, Y316
- Y9 for Y319
- Y3 for Y323
- 24 for Y324
- 25 for Y325
- 26 for Y326
- 27 for Y327
- 28 for Y328
- 29 for Y329
- 41 for Y431
- 43 for V433
- 45 for V415
- 46 for V436
- 47 for V417
- 48 for V418
- 52 for V512
- 53 for V513
- 54 for V514
- 55 for V515
- 57 for V517
- 61 for V411
- 71 for V421
- 73 for V423
- 75 for V425
- 77 for V427

Example:

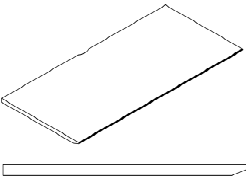

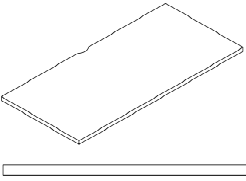

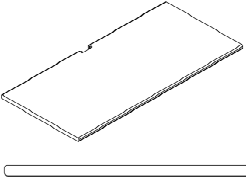

For a Micro Grey laminate surface with Bronzed Cherry edge, enter finish code 2112

For a Jet Black laminate surface with Light Maple edge, enter finish code 1116

Specifications

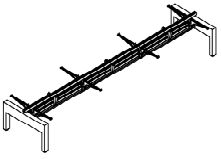

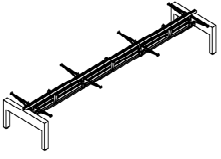

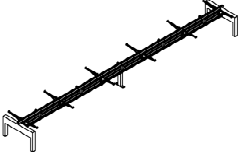

File tops are 1 1/4" thick with square edge or tapered edge option tapering to 1/2" thick front edge. Tapered edge file tops are tapered front and back edges only.

Specify finishes:
 L - Laminate
 M - Laminate/veneer edge
 1 - Veneer group 1
 2 - Veneer group 2
 3 - Veneer group 3

Application Notes

File tops correspond to 30", 36" or 42"W lateral files. File tops on 2 high Calibre files positioned perpendicular to the Crinion Open Table serve as a worksurface return.

36	Depth
D	Dual
18	Width
S	Segmented
F	Fixed height
613	Base finish
111	Top channel finish

Specifications

Base assemblies include end legs, beams, trusses, cantilever brackets, channels and end caps.

Fixed height base assemblies have shared cantilever brackets for adjacent worksurfaces and midspan support brackets for every worksurface.

- Specify base finish for base assembly.
For legs and cantilever brackets specify one paint finish for all.
- Specify top channel finish.
AA anodized aluminum and all paint finishes are available except 613 Silver.
Beams are anodized aluminum only.

Application Notes

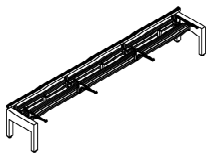

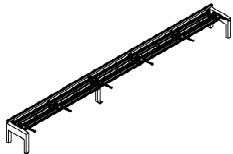

Complete base assemblies include all base components necessary to support worksurfaces. Specify screens, power components and cable trays separately. Base assemblies include end legs, intermediate leg (where required), beams, trusses, cantilever brackets, mid span support brackets, top channel and end caps.

No table on this page has beams longer than 15'.

Base assemblies correspond to:
 10': four 60"x36"D worksurfaces
 12': four 72"x36"D worksurfaces
 15': six 60"x36"D worksurfaces
 18': six 72"x36"D worksurfaces
 20': eight 60"x36"D worksurfaces
 24': eight 72"x36"D worksurfaces
 25': ten 60"x36"D worksurfaces

Order Code

Example:	XTC1120AA
XT	Crinion open table
C1	Top channel
120	Width
AA	Finish

Specifications

Top channels are extruded aluminum with natural anodized finish AA or any standard painted finish except 613 Silver.

Top channel end caps are die cast aluminum AA or any standard painted finish except 613 Silver.

Top channel filler is 812 Easy Grey or 111 Black.

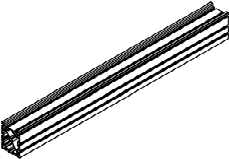

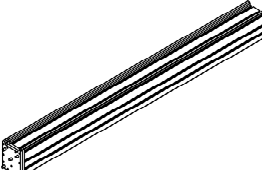

Application Notes

Crinion Open Table top channel supports privacy screens and suspended raceway components at any point. Top channel is required at the center of dual tables.

Top channels and end caps are included in complete base assemblies.

Top channels correspond in width to one or two worksurface widths.

Order Code

Example: XTB1XD30 613	
XT	Crinion Open Table
B1	Base components
XD	Beam truss for dual table
30	Depth
613	Finish

Specifications

Beam trusses are available in all standard painted finishes.

Application Notes

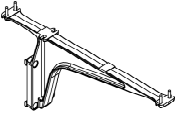

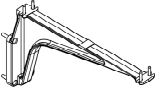

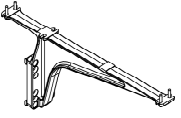

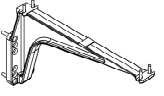

Crinion Open Table bases are assembled from beams, end legs or end panels, intermediate legs and trusses. After selecting beams and leg kits, specify trusses between beams.

Specify beam trusses adjacent to each end leg and at each worksurface junction.

For 24"D tables specify top channel support instead of truss.

Beam trusses with no top channel support must be specified in combination with intermediate legs planned other than at worksurface junctions (as for cable infeed shrouds).

Worksurface support cantilever and mid span support

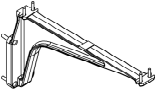

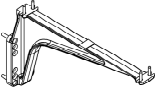

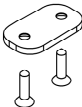

description	w	d	h	pattern number	P1/P2	P3

Cantilever for end counters, adjustable height	3"	19"	9" - 12"	XTB1ACEND ()	230.	243.
						
Worksurface linking plate				XTB1LP		28.
						

Order Code	Specification	Application Notes
Example: XTB1FCEND 613	Specify paint finish code after pattern number.	Cantilever brackets are required to support each end of worksurface.
XT Crinion Open Table		Brackets attach to inserts on the outside face of end legs for end counters.
B1 Base components		Fixed height cantilever supports for end counter at 28 1/2" H.
FC Fixed height cantilever		Adjustable cantilevers for end counter enables end counter to be set at 28 1/2", 29 1/4" or 30" H.
END for end counter		A linking plate is recommended to join adjacent worksurfaces that are independently supported at the same height. Specify two linking plates at the junction of two worksurfaces, or four total for each end counter to two worksurfaces. A linking plate is not required where adjacent tops are supported by a shared fixed height cantilever bracket, as with complete fixed height base assemblies. Linking plates are recommended for complete adjustable height base assemblies in which tops are set at the same height.

	From main beam, 24D only				XTWTB ()	68.
						
	From top channel, 30/36D only				XTWTC ()	89.

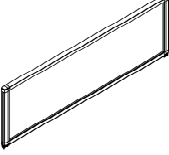

Order Code	Specifications	Application Notes
Example: XTBT36 118		
XT Crinion Open Table	Beam mounted cable trays are available in any standard painted finish.	Beam mounted cable trays may be inserted in slots on either face of Crinion Open Table main beams. On 24"D dual or single sided tables beam mounted cable trays are the only option for cable management other than the shallow channel on top of the beam or a cable basket. On 30"D and 36"D tables beam mounted trays may complement other cable tray options.
BT Beam mounted cable tray	Cable basket is zinc metal finish only.	For 96"W worksurfaces specify 36"W trays between supports. Specify 48"W trays for additional cable management between trusses on the inside face of beams on dual 30"D and 36"D tables with 60" worksurfaces. Specify 60"W trays on the inside face of beams on dual 30"D and 36"D tables with 72"W worksurfaces.
36 Width	Basket hangers can be specified in any standard painted finish.	Beam mounted cable trays must be segmented to fit between cantilever and midspan support brackets. Cable basket is suspended below the center of dual tables instead of or in addition to cable trays. Cable basket offers the most flexibility for managing large bundles of cables and for entering or exiting the tray at any point. Cable basket ships in 10' lengths and is cut to size in field. Specify cable basket hangers separately. Each hanger can suspend one end of a tray or two adjacent trays. Hanger from trusses is for 30" or 36"D dual or single sided tables. Hanger from main beam is for 24"D dual tables only. Hangers from top channel are for 30" or 36"D dual tables only.
118 Paint finish		For 48"W worksurfaces with shared cantilevers specify 36"W trays. For 60"W worksurfaces with shared cantilevers and midspan supports specify 24"W trays adjacent to end legs specify 18"W trays. For 72"W worksurfaces with shared cantilevers and midspan supports specify 24"W trays.

combination shown

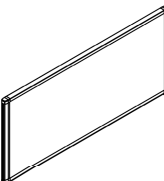

Order Code	Specifications	Application Notes
Example: XTCS16014A O 111		
XT Crinion Open Table	Acrylic surface is AO opal or AT translucent.	Center screens mount to continuous channel at center of tables. Specify 14" H screens for a 42" horizon. Specify 21" H screens for a 49" horizon. Horizons are maintained regardless of worksurface height.
CS1 Center screen	For Marker surface both sides specify suffix M.	Center screens adjacent to end screens allow space for dual or single sided end screens.
60 Width	For Slatwall screens specify slatwall and frame finish.	Slatwall screens require buttresses to support Knoll Extra flat screen monitor arm. Specify one buttress per monitor arm, up to four buttresses per screen.
14 Height	For combination acrylic/slatwall screens specify suffixes CO (opal) or CT (translucent), slatwall and frame finish.	Combination screens include 14" high slatwall with acrylic above.
A Surface	Slatwall surface is available in (AA) or any standard painted finish except 613 Silver.	Center screens include mounting hardware for standard top channel only.
O Opal	For veneer surface specify suffix V and finish code from list on Crinion Open Table.	Slatwall screens will support flat panel monitor arms with varying weight limitations based on mounting and application. Please refer to the KnollExtra price list for comprehensive mounting and weight limitation information by application.
111 Frame finish	Frame is clear anodized aluminum or any standard paint finish except 613 Silver.	Veneer grain direction is horizontal. Marker surface has wood core.

60	Width
14	Height
A	Acrylic
O	Opal
118	Frame finish

Specifications

- Specify surface
A = Acrylic
V = Veneer
M = Marker
- For Acrylic surface specify
O = Opal
T = Translucent
 Veneer surfaces may be any standard AutoStrada V1, V2 or V3 veneer.
 Specify veneer finish code from Crinion Open Table.
- Specify frame finish.

Frame is clear anodized aluminum (AA) or any standard paint finish except 613 Silver.

Brackets are available in all paint finishes.

Application Notes

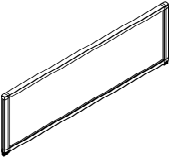

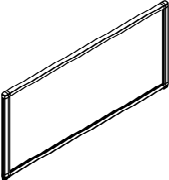

Return screens span the depth of Crinion Open Table worksurfaces and the width of a 30", 36" or 42" worksurface planned as perpendicular return. Specify 14" H screens for 42" horizon. Specify 21" H screens for a 49" horizon. Returns (file tops or AutoStrada worksurfaces) must be at the same height as worksurface.

Specify side brackets separately.

Veneer grain direction is horizontal.

Morrison Network privacy screens mounting kit for Crinion Open Table

AutoStrada

description	w	d	h	pattern number	list price
Fabric screen mounting kit				XTPS1MZKIT	\$117.

Crinion Open Table

Order Code	Specifications	Applications notes
Example: XTPS1MZKIT		
XT	Crinion Open Table	<p>Crinion Open Tables are designed to accept Morrison Network privacy screens with fabric screen mounting kit. Screens are tackable fabric, $\frac{3}{4}$" thick, in widths corresponding to Crinion worksurfaces 48", 60" or 72" wide. Specify screens MZ1-B4815F, MZ1B6015F or MZ1B7215F.</p> <p>Specify one mounting kit for each screen. Fabric screen mounting kits include two uprights that fasten to the top channel at any point. Uprights slide into internal channels in screens. Fabric screens do not align in height with acrylic privacy screens.</p>

Selling Policy

	<p>This Selling Policy supercedes all previous selling policies. Prices, discounts and product offerings are subject to change without notice.</p>
Terms & Conditions of Sales	<p>Sales by Knoll, Inc. or Knoll North America Corp. ("Seller") of Knoll Product Lines (hereinafter "Products") within the United States and Canada are made only on the terms which are contained in this Selling Policy. Seller hereby gives notice of its objection to any different or additional terms and conditions. This sale is expressly conditional upon Purchaser's assent to the terms and conditions set forth below. Additional terms and conditions may apply to KnollStudio and KnollTextiles orders. These terms and conditions may be modified or supplemented only by a written document signed by an authorized representative of Seller. These terms and conditions supercede any prior and/or contemporaneous agreements or correspondence between Purchaser and Seller. Written quotations expire thirty (30) days from the date of issuance and can be withdrawn by written notice anytime during that period. Where Purchaser and Seller have entered into the Knoll Electronic Terms and Conditions, all orders, acknowledgements, invoices and other business communications placed or transmitted in accordance with the Knoll Electronic Terms and Conditions shall be deemed to be in writing and signed and shall be valid for all purposes as if they were originated and maintained in documentary form.</p>
Ordering Information	<p>All orders must be in writing. The product pattern number(s) contained on Seller's order acknowledgement shall be the final expression of the order.</p>
Order Confirmation	<p>A purchase order is not binding on Seller until Purchaser has received Seller's order confirmation or acknowledgment.</p>
Pricing Policies	<p>List prices are subject to change without notice.</p> <p>List prices shall be those prices in effect on the date of receipt of a complete purchase order unless shipment is requested more than ninety (90) days after order entry in which case prices in effect on the date of shipment apply. List prices include specified freight costs. Unless specified in writing by Seller, no other charges are included in Seller's list prices.</p>
Taxes	<p>All sales, use, excise and other taxes applicable to the sale of the Products shall be paid by Purchaser. If Purchaser claims an exemption from any tax, Purchaser shall submit to Seller the appropriate exemption certificates.</p>
Terms of Payment	<p>Payment for one hundred percent (100%) of the net order amount is due within thirty (30) days of the date of invoice, which is issued upon shipment. In case of any discrepancies, such as shortages, and Seller is notified in writing within ten (10) days of receipt of Product, only that portion may be deducted and the balance paid. For orders greater than \$100,000 net, a fifty percent (50%) deposit is due at the time of order placement, with the remainder due within thirty (30) days of the date of invoice.</p> <p>KnollStudio orders less than \$2,000 require payment for one hundred percent (100%) of the net order amount (including any applicable sales tax and charges for inside delivery, special packaging, etc.), due at time of order placement. For KnollStudio orders greater than \$2,000, a one-half (50%) deposit is due at time of order placement with the remainder (including any applicable sales tax and charges for inside delivery, special packaging, etc.) due prior to shipment.</p> <p>If, in the judgment of Seller, Purchaser's financial condition does not justify the terms of the payment, Seller may require full or partial payment in advance.</p> <p>Past due accounts shall be charged one and one-half percent (1.5%) per month, or the highest rate permitted by law, whichever is less, and will be added to the outstanding balance. In the event Purchaser defaults on payment, Purchaser shall be liable for all collection costs, including reasonable attorney's fees and costs.</p>
Changes and Cancellation	<p>Purchase orders may not be changed or cancelled, in whole or in part, without prior written consent of Seller. Changes may effect delivery dates. Expenses incurred because of changes shall be charged to Purchaser. In the event of cancellations, Purchaser will be liable for reasonable cancellation charges established by Seller. Orders for special Product, orders including "COM" (hereinafter defined) material and orders pursuant to expedited delivery programs, may not be canceled.</p>
Freight Prepaid	<p>Freight is prepaid and included in the price of all Products, except KnollTextiles, within the 48 contiguous United States for orders placed with Knoll, Inc. and within Canada, excluding the Yukon, Northwest Territories, Nunavut and Newfoundland for orders placed with Knoll North America Corp. Packing is tested for rigorous motion and transportation but is not guaranteed to protect furniture from conditions over which the Seller has no control. If special packaging is required for any reason, please consult with your sales representative or dealer. Seller shall select the method of shipment and routing. All shipments shall be tailgate deliveries. Freight for all KnollTextiles orders is prepaid and added to the invoice.</p>
Delivery/Freight Charges	<p>Shipments outside the contiguous 48 United States and Canada shall be shipped F.O.B. Origin.</p> <p>For shipments outside the contiguous United States and Canada, Purchaser is responsible for the cost of freight from point of embarkation, including any handling and transportation charges incidental to loading at the point of departure and unloading at the final destination.</p> <p>Conditions beyond the control of Seller, including weather, available facilities and traffic conditions, may affect exact time of delivery. Seller shall not be responsible for specific carrier delivery date or time unless it has made a specific delivery commitment, in writing.</p> <p>Nonstandard methods of shipment and/or additional services are available upon request. Purchaser will be billed for the differential cost of any special services in excess of standard surface carrier freight costs. Premium charges, at Purchaser's request, will be added for airfreight, exclusive use of vehicle and extra, export or special packaging. Accessorial charges will be added for inside delivery, extra labor, reassignment and redelivery.</p> <p>Partial shipments may be made and invoiced by Seller.</p>
Claims	<p>All shipments for all Knoll Products within the contiguous United States and Canada are F.O.B. Origin. Risk of loss passes to Purchaser at time of delivery to carrier. Purchaser shall inspect all Products upon receipt and notify Seller within ten (10) working days after receipt of any damage or defects which are, or should be, apparent from an inspection of the Product and its packaging. Failure of Purchaser to make a claim against carrier or notify Seller during the ten (10) working day period shall constitute acceptance of the Products and waiver of any apparent defects, errors or shortages. Seller will agree to repair or replace Product damaged in shipment if Purchaser has notified Seller of freight damage within ten (10) working days after receipt and assigns its rights against the carrier.</p>
Seller's Security Interest	<p>Until Seller receives the full payment for the Product, Seller shall have a security interest in the Product. Purchaser agrees to perform all acts, including but not limited to the execution and filing of documentation, which may be necessary to perfect and assure the security interest of Seller.</p>
Returns	<p>The return of Products without a written authorization by Seller shall not be accepted. To receive authorization for Product return, please call Customer Service. All Products that are returned pursuant to a valid authorization shall be subject to a twenty-five percent (25%) of list restocking charge. Products not currently offered for sale by Seller (including COM) shall not be authorized for return. All returned Products must be unused, in original condition and in the original Seller packing cartons. No refund or credit shall be given for damaged Products.</p>
Held Orders/Storage	<p>If Purchaser requests that an order be held or delayed, prices and terms and conditions in effect at the time of shipment shall apply. If Purchaser requests a delay after the time when Seller can defer production, Purchaser will be invoiced for the Product, payable in accordance with standard terms, when the order is ready for shipment. Seller may transfer the Product to storage, in which case all expenses incurred in connection with storage, including demurrage, preparation for storage, storage charges and handling shall be payable by Purchaser upon submission of invoices by Seller. Risk of loss to the Product shall pass to the Purchaser upon delivery of the Product into storage.</p>

Selling Policy

Customer's Own Material	<p>A Purchaser who requests a fabric or other surface material not standard to Seller's line of Products ("COM") must submit samples of the requested material to Seller prior to entry of a purchaser order. Seller shall determine if the material is suitable to its manufacturing processes and meets any requirements of Underwriters Laboratories. If the COM is acceptable, Seller will then establish a price for using the COM or the Product in question. For a description of the procedures for submitting samples and testing, contact customer resources or your sales representative. Seller shall have no responsibility for the appearance, condition, performance, durability, colorfastness or any other physical attribute of the COM. Purchaser shall indemnify and hold Seller harmless for any damages, injuries or losses arising out of or related to use of the COM on the Product.</p>
Warranty	<p>Seller warrants to the original Purchaser only that the Products Seller manufactures and sells to Purchaser are free of defects in workmanship and materials, during the applicable warranty period set forth below.</p> <p>Warranty period set forth below is for 24-hour, 7 days a week, multi shift use.</p> <p>Should any failure to conform with this limited warranty appear to a Product listed below during the applicable warranty period from the date of shipment, Seller shall, upon prompt written notice, repair or replace, at its option and costs, the affected part or parts.</p> <p><i>Product and Period of Warranty</i></p> <p><i>Lifetime: AutoStrada, Calibre, Crinion Open Table, Currents, Dividends Horizon, Equity, Morrison, Reff laminate, Series 2 Storage, Template and other non-wood components (except cascade edge worksurfaces, operational parts, controls, electrical, Lighting, Series 2 Veneer Front Storage, special or custom products, see below)</i></p> <p><i>10 Years: AutoStrada, Crinion Open Table, Reff wood components, Series 2 Veneer Front Storage, Wood Casegoods (Magnusson, The Graham Collection) (except wood casegoods upholstered surfaces, see below), Interaction tables (except height adjustment mechanisms for Counterforce, crank-adjustable, and split-top tables and worksurfaces, see below), Reuter overheads, Reuter vertical storage, KnollExtra Sapper Monitor Arm Collection, Adjustable keyboard mechanisms and platforms, Communication Boards (except fabric board textiles, see below), Smokador collection (except leathers, see below), and Orchestra Universal Systems Accessories, Bulldog, Chadwick, Essentials Work Chairs, Generation by Knoll work chair, Life, Moment, RPM and Sapper seating structural and operational parts, controls, casters, pneumatic cylinders, seat and back suspension material (except seating upholstery, textiles and leathers, finishes and labor, see below). Labor to repair Generation by Knoll work chair.</i></p> <p><i>5 Years: Operational parts, controls, electrical, Lighting (except light ballasts, bulbs and power supply, see below), cascade edge worksurfaces, special or custom product, wood veneer products, Currents handerank, Interaction Counterforce, Interaction crank-adjustable, and split-top mechanisms, KnollStudio, KnollExtra Wishbone and Zorro monitor supports, CPU storage and all universal storage drawers, Spark Series seating structural parts, (except seating upholstery, textiles, finishes and labor, see below).</i></p> <p><i>3 Years: Bulldog, Chadwick, Essentials Work Chairs, Life, Moment, RPM, Sapper seating upholstery, textiles and leathers, finishes and labor to repair, Generation by Knoll work chair seating upholstery, textiles and leathers, and finishes, Spark Series seating upholstery and textiles. Fabric boards textiles and Smokador Collection leathers.</i></p> <p><i>2 Years: All other KnollExtra product</i></p> <p><i>1 Year: Light ballasts, bulbs and power supply, seating upholstered ampads and soft ampads, Spark Series seating finishes and labor to repair, wood casegoods upholstered surfaces.</i></p> <p>This warranty does not apply to:</p> <ul style="list-style-type: none"> • Damage caused by a carrier other than the Seller. • Normal wear and tear or acts or omissions of parties other than Seller (including user modification, improper use or installation of Products). • COM or other third party materials applied to Products. • Products not installed by or under the auspices of a Knoll Dealer. • Dramatic temperature variations or exposure to unusual conditions. • Except as specifically noted above, textiles and upholstery supplied by <i>KnollTextiles</i> (consult current <i>KnollTextiles</i> price list for applicable warranty). <p>Natural variations occurring in wood, marble, and leather shall not be considered defects, and the Seller does not guarantee the colorfastness or matching of the colors, grains or textures, or surface hardness of such materials. The Seller also does not guarantee the colorfastness of fiberglass panel surfaces. THE EXPRESS WARRANTIES CONTAINED HEREIN ARE IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSE AND ALL OTHER WARRANTIES ARISING FROM COURSE OF DEALING OR USAGE OF TRADE.</p> <p>The remedies provided above are the Purchaser's sole remedies for any failure of Seller to comply with its obligations regarding the workmanship of its Products. Correction of any nonconformity in the manner and for the period of time provided shall constitute complete fulfillment of all liabilities of Seller, with respect to or arising out of the Product furnished hereunder.</p>
Delay/Force Majeure	<p>Seller shall not be liable for failure to perform or for delay in performance due to fire, flood, strike or other labor difficulty, act of God, act of any governmental authority or of the Purchaser, riot, embargo, fuel or energy shortage, wrecks or delay in transportation, inability to obtain necessary labor, materials or manufacturing facilities from usual sources or failure of suppliers to meet their contractual obligations, or due to any cause beyond its reasonable control. If any such event occurs, Seller may extend delivery dates by a period of time necessary to overcome the effect of such delay, allocate available Product or cancel any purchase order.</p>
Compliance with Law	<p>PURCHASER IS SOLELY RESPONSIBLE FOR COMPLIANCE WITH ALL APPLICABLE FEDERAL, STATE AND LOCAL LAWS, ORDINANCES, REGULATIONS, RULES AND STANDARDS RELATING TO THE INSTALLATION, MAINTENANCE, USE AND OPERATION OF THE PRODUCTS.</p>
Patents	<p>Subject to the following provisions, Seller shall, at its own expense, defend or, at its option, settle any claim, suit or proceeding brought against the Purchaser, and/or its vendees, mediate and immediate, so far as based on an allegation that any Product or any part thereof furnished hereunder constitutes a direct or a contributory infringement of any claim of any patent of the United States or Canada. This obligation shall be effective only if Purchaser shall have made all payments then due hereunder and if Seller is notified promptly in writing and given authority, information and assistance for the defense of said claim, suit or proceeding. Seller shall pay all damages and costs awarded in such suit or proceedings so defended.</p> <p>The foregoing indemnity does not apply to the following:</p> <ul style="list-style-type: none"> • Products supplied according to a design other than that of Seller, and which is required by the Purchaser. • Combination of the Product with another product not furnished hereunder unless Seller is a contributory infringer. • Any settlements of a suit or proceeding made without Seller's written consent.
Limitations of Liability	<p>SELLER, ITS CONTRACTORS, AUTHORIZED DEALERS AND SUBCONTRACTORS OR SUPPLIERS OF ANY TIER SHALL NOT BE LIABLE TO PURCHASER FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING FROM A BREACH OF THIS AGREEMENT.</p> <p>Purchaser's remedies set forth herein are exclusive and the liability of Seller with respect to the breach of this agreement or any contract entered into between the parties pursuant hereto shall not exceed the price of the Product or part on which such liability is based.</p>

KnollKey Lock Program

KnollKey Lock Program General Information

Following is the KnollKey lock policy, applicable to all products.

Knoll furniture can be ordered keyed-alike or random keyed. Key-alike and random keying instructions cannot be mixed on any single order. Only one of the two instructions can be used on an individual order. When an order is submitted with mixed (key-alike and random) instructions, Knoll will release the order as key-alike only and lock cores will have to be specified separately.

Key-alike

For the convenience of the user, furniture may be keyed alike at no charge. Write "Key-alike" in the description of your purchase order for any pedestal, overhead, file or other item you wish to have keyed alike.

Using the key-alike instructions, order cores and keys as line items on your purchase order. Do NOT submit a key-alike form. The Knoll East Greenville Lock Center will select key numbers from the standard range of K 001 - K 250. Key numbers will not be repeated unless over 250 sets are ordered. Lock cores keyed-alike will ship separately from the product, ready for field installation.

There is no charge for key-alike orders if placed with the furniture order.

IF THE KEY-ALIKE ORDER IS NOT PLACED AT LEAST TWO WEEKS PRIOR TO THE FURNITURE SHIP DATE, A \$50 HANDLING CHARGE AND AIR FREIGHT CHARGES WILL APPLY.

If product is ordered and shipped random-keyed, additional lock cores for key-alike are billable.

Random-Keying

To specify product keyed-random, write "key-random" in the product description. Random-keyed product is shipped with the lock core factory installed. A shrouded key is included. Random means no effort has been made to match key numbers, or to make them different.

Keys

A Knoll shrouded key is shipped with every lock core. 250 Key numbers are available. For numbers above 250, contact Custom Product Development. Additional keys and key blanks are available. See service parts for more information.

Master Keying

Knoll locks can be controlled by means of a master key. There is no additional per-lock charge for master keying. A letter of approval from the client must accompany orders for master keys.

Installing Lock Cores

Lock cores can be installed or removed in the field by using a change key. Cores must be in the unlocked position to be removed. See service parts for change key pattern number and pricing.

Lock Distribution

All orders for key-alike lock cores/keys are packaged and shipped from the East Greenville Lock Center, regardless of where the pedestals, overhead, or other units are produced. Random keyed product will have cores factory-installed.

How to Specify Key-Alike

Following is an example of how to specify key-alike for a cluster of 10 workstations.

Step 1 - Using the project floorplan, count the number of locks in each workstation.

Step 2 - Count the number of workstations with the same quantity of locks. Group together the workstations with a like number of locks.

5 workstations with 2 locks per station
3 workstations with 4 locks per station
2 workstations with 5 locks per station

Step 3 - For the first group (5 sets of 2 locks), enter the number of workstations in the quantity column.

Qty	Pattern #	Description	Unit List	Ext. List
5				

Step 4 - Then enter the pattern number "KSPEC_ _" and add a suffix for the number of locks for that group (i.e., for 2 locks per station, add the suffix "2"). Up to 30 lock cores are available in a set (i.e., KSPEC 30).

Qty	Pattern #	Description	Unit List	Ext. List
5	KSPEC 2	Set of 2 cores/keys	N / C	N / C

Step 5 - Repeat for other groups.

Qty	Pattern #	Description	Unit List	Ext. List
5	KSPEC 2	Set of 2 cores/keys	N / C	N / C
3	KSPEC 4	Set of 4 cores/keys	N / C	N / C
2	KSPEC 5	Set of 5 cores/keys	N / C	N / C

Your Key instructions are complete.

Knoll will select key numbers for each set from 250 available numbers. Additional key numbers are available through Custom Product Development. **For additions to existing installations, specify desired key numbers in the description.**

Service Parts

Pattern #	Description	List Price
KKEY_ _ _	Shrouded Key Specify key number desired	\$5
KBLANK	Shrouded Key Blank	\$5
KSPECB_ _ _	Retrofit Universal Core/Key Specify key number desired	\$18
KCHANGE	Change Key	\$5
KMASTER*	Master Key	\$5

*Note: A letter of approval on company letterhead from the client must accompany all orders for master keys.

General Ordering Information

The Products

This guide encompasses all standard products for this product group.

Sizes

Dimensions listed in this guide are indicated as:

H = height

W = width

D = depth

Dia. = diameter

Rad. = radius

Pricing

All prices shown are list.

How to Order

Select pattern numbers and quantities required for your complete installation. Product questions can be addressed in the specific sections of this guide or by contacting your sales representative or customer resource representative at 1-800-343-5665.

Next, select options (if required), along with colors and finishes appropriate to each product. Reference the Finishes and Fabrics pages for color designations.

On large installations, an item's "designated area" can be specified to assist in product organization and handling.

To expedite complete / correct entry of your order, be certain all pattern numbers, quantities, colors and area identifications are completely specified. Also, include complete purchase order numbers, bill-to and ship-to addresses, a contact name and specific factory shipping dates required.

Mail all orders to:

Knoll, Inc.
1235 Water Street
P.O. Box 157
East Greenville, PA 18041
Attention: Order Entry

Once your order is entered at Knoll, an acknowledgment will be mailed to you. You will be advised of your scheduled shipping date within five days of the original acknowledgment. If it is necessary to revise your order, please contact your customer resource representative.

Sustainability Statement

Sustainable design is a key component of Knoll's environmental focus. Our commitment to social responsibility and a healthy environment has prompted us to further articulate our longstanding environmental programs and, with encouragement and support from our colleagues in the industry, we have re-energized our focus on such "green" initiatives as life cycle analysis and LEED™ certification. Knoll is proud to have contributed to projects that have received LEED certification from the U.S. Green Building Council.

For the latest information on Knoll products that help our customers achieve LEED certification, log on to knoll.com, click on "About Knoll" and then "Environmental Focus."
