

Executive Conference Chair
Eero Saarinen

EXECUTIVE CONFERENCE CHAIR In his groundbreaking collection of 1957, Eero Saarinen transformed executive seating into a fluid, sculptural form. With its clean profile and contoured back, the Saarinen Executive chair fits seamlessly in work, conference, lounge and dining applications. The chair is available with or without arms and base options include tubular steel legs, wooden legs or a swivel base. The swivel base option with adjustment levers provides smooth pivot and an extensive range of movement, functioning as a work chair with the appeal of a lounge chair.

EERO SAARINEN Son of the celebrated architect, Eliel Saarinen, Eero was classically trained in sculpture and architecture. His collaboration with Charles Eames in 1937 led to the creation of the Organic Armchair, made from plywood and foam rubber, the first three-dimensionally shaped bucket armchair. Saarinen continued to develop this theme in the years that followed with designs that included the Grasshopper, Womb and Tulip chairs, all for Knoll. Among the many building for which he is known are Dulles Airport in Washington D.C., and the TWA terminal at Kennedy International Airport in New York.
