

# OTTR Chronic Care Solutions

## Sector Focus: Healthcare

OTTR Chronic Care Solutions is an award-winning private company headquartered in Omaha, Nebraska. Since its founding in 1993, the Company has worked to develop state-of-the-art software products that improve the quality of patient care, workflow management and operational efficiencies for the healthcare industry.

When OTTR Chronic Care solutions renovated its headquarters, the Company worked with Knoll dealer Spaces, Inc. to outfit the space with furniture that would support the technology needs of its employees while also creating a welcoming, open work environment. The Company selected Antenna® Workspaces in two different configurations for its open plan.

Antenna® Workspaces Big Table, which features back-to-back desk tops with shared legs, facilitates collaborative work. The compact center beam supports storage cabinets and screens to establish clear focused-work areas. Antenna® Workspaces Linked Desks, with side-to-side, and perpendicular return surfaces, create U-shape arrangements. A sculpture featuring FilzFelt® (left) wool further delineates space between work groups with a color palette that complements the Company's Antenna® Workspaces panels. The innovative Generation by Knoll®, which is used throughout the space, is constructed using a high performance elastomer, which facilitates changes in posture and position throughout the workday.
